12th March 2018

Dear Subscriber

Challenging Network Rail Standards

The aim of Network Rail's standards is to achieve a safe, high performing and cost efficient railway system. We know, however, that they are often seen as overly complex and adding unnecessary cost. Our Transformation Plan and response to the Hansford Review identified opportunities to improve by encouraging our suppliers and other stakeholders to proactively challenge our standards to increase innovation and creativity and to reduce costs.

At the end of March 2018 we will be introducing a new process that will enable suppliers and other stakeholders to raise a challenge to a standard where they consider it to be incorrect, not enable the application of best practice, or drive increased cost without comparable benefit. Suppliers and other stakeholders will be able to challenge a standard by completing an application form that will be made available on the websites that host our standards. When reviewing any challenge received we will conduct a rigorous impact assessment across a broad range of output capabilities such as safety, performance, environment and compatibility to make sure the capabilities are not compromised.

Following launch of the process we will be progressively introducing appropriate incentives to encourage challenge to our standards, for example, through providing our corporate recognition of successful applications and within future procurement contracts focusing on the early design stages. As the scope covers our whole portfolio of policies, standards, processes and specifications, including initiating dialogue with RSSB in relation to Railway Group and Industry Standards, we are looking forward to seeing the constraints that can be unlocked and the opportunities that will be enabled through successful challenges to our standards.

For more information please contact: standardsmanagement@networkrail.co.uk

Yours sincerely

Brian Tomlinson
Chief Systems Assurance Engineer
Safety, Technical & Engineering

Guidance for Completing the Standards Challenge Application Form

The standards challenge application form can be used to submit a challenge to a Network Rail standard, policy, rule, specification, business process or work instruction that is considered to: (i) be incorrect; (ii) not enable the application of modern/best practice; or (iii) drive increased cost without comparable benefit. The form can also be used to initiate dialogue with Network Rail regarding a potential challenge to Technical Standards for Interoperability, Group Standards or Rail Industry Standards.

The form is relatively straightforward to complete. The **PURPLE TEXT** in the form is intended to provide further guidance or examples relating to the information requested and should be overwritten or deleted if the form field is not used.

Standards Challenge – Application Form

Please complete this form to submit a challenge to a Network Rail standard, policy, rule, specification, business process or work instruction currently available via either the IHS or SAI websites or internally via Network Rail's intranet site (Connect) that is considered to: (i) be incorrect; (ii) not enable the application of modern/best practice; or (iii) drive increased cost without comparable benefit. This form can also be used to initiate dialogue with Network Rail regarding a potential challenge to Technical Standards for Interoperability, Group Standards or Rail Industry Standards. See guidance note for more detail on how to complete this form. For further advice relating to standards please contact: standardmanagement@networkrail.co.uk

1. Applicant Details	
Applicant Name	PURPLE TEXT provides guidance for completing the form and should be overwritten or deleted if the form field is not used.
Position	
Company/Organisation	
Email address	
Telephone Number	
Postal Address including Post Code	
Date form completed	dd-mmm-yyyy format e.g. 01-Apr-2018
Status of applicant	Are you applying on behalf of your company/organisation? If applying on behalf of another party please explain further.
2. Project Details (if applicable)	
Is this challenge in connection with an existing project?	Enter Yes or No. If No please progress to Section 3 of this form.
If so what is the name of the project?	Enter Programme or Project Name and any other relevant details including Project Number if known.
Current project GRIP Stage	Enter current project GRIP stage number (1 to 6).
Who is the Principal Contractor for the project?	Enter the name of the Principal Contractor and also your company's relationship to the Principal Contractor.
Who is the primary Network Rail contact for the project?	Enter the name the Network Rail Project Engineer, Project Manager or other key contact details.
Are they aware and supportive of this application?	Enter Yes or No and provide more details where necessary.
Are there any other key contacts that need to be kept informed of this application?	Enter names and contact details e.g. relevant Route Asset Manager.
Is this application project delivery or time sensitive?	Enter Yes or No. If Yes please explain why including key dates.
3. Confidentiality	
Should this application be treated as confidential?	Enter Yes or No.
If so please provide further details	Please detail the nature of the sensitivity and any limitations on sharing with others e.g. intellectual property.
4. Details of the Challenge	
Which standard does the challenge relate to?	Enter standard reference number, issue date and title.
Which clause/requirement does this challenge relate to?	Enter relevant clause/requirement number(s) or enter 'General' if it relates to the whole standard.
What is the nature of the challenge?	Provide details of what specifically is being challenged and why e.g. does not reflect latest practice, alternative approach.
What is being proposed?	Provide details as to how the standard should be amended/updated.
Does the challenge relate to a specific geographic area?	If so, provide further details e.g. applicable location(s), line(s) or Network Rail Route(s). If not, enter 'National application'.
What would be the key benefits of the proposal?	Outline the key benefits of the proposal - to be expanded upon in Section 5 of this form.
What is the potential scale of the proposed change?	For example, is it a project specific application, and/or does it have potential national application. The answer to this question is key to enable the potential overall impact to be assessed.
What could be involved in modifying the standard including any supporting material/resources?	For example, time, production cost, specialist resources required, training material or training development/delivery cost.

Form ID: STDCHAL-APP-A Version: 1 Date: March 2018 Page 1 of 2

Section 1 is used to capture the applicant details.

Section 2 is to ascertain whether or not the application is being made in connection with an existing or forthcoming project and if so capture the relevant details.

Section 3 asks whether the application needs to be treated as confidential. If not, details of the application may be made available to other parties so they have visibility of the challenges that are being raised, or to provide examples of good practice.

Section 4 is focussed on the heart of the challenge seeking details of what is being proposed, why and the benefits it may bring? There are some key questions in this section that will help with further evaluation. In particular the question relating to the potential scale of application is seeking to identify if it is a project specific application and/or whether it could have potential national application. For example could it impact large quantity and/or high cost items such as electrification, track, structure, plant or signalling assets? This section also seeks information on what could potentially be involved in modifying the standard and any subsequent impact on training.

5. Preliminary Impact Assessment	
What is the potential impact of the proposal on:	Please include both positive and negative impacts as appropriate. Try to quantify and provide further explanation/rationale where possible such that the overall impact can be evaluated e.g. cost per year, cost per asset, and potential number of assets within scope. Also consider and detail the potential timescales for realisation of the impact. Enter 'None' if no impact or 'Not known' if impact not known.
Legislative Compliance	For example any positive or negative impact on compliance.
Health and Safety	For example train accident risk, station safety, workforce safety and/or public safety. Is it possible to estimate in terms of Fatality & Weighted Injuries (FWI) or Lost Time Injuries per year?
Security	For example physical/personal or cyber/data/information security.
Environment and Sustainability	For example energy consumption, noise or waste.
Customer Experience	For example journey time, capacity (frequency and quantum of services) or passenger/traffic flow.
People	For example impact on Network Rail or supplier roles such as resource levels, engagement or working conditions.
Other Stakeholders	For example train operators, station operators, railway neighbours, trade unions or other companies/suppliers.
Industry or Corporate Reputation	For example public, government or regulator perception.
Operational Performance and Asset Reliability	For example Public Performance Measure (PPM), Service Affecting Failures, Delay per Incident.
Productivity and/or Project Delivery Timescales	For example, efficiency such as production rate or start/finish timescales.
Compatibility	For example train infrastructure interfaces, future equipment compatibility.
Quality and Provision/Receipt of Assurance	For example quality of materials or work undertaken, improved assurance.
Asset Life	For example, maintenance, refurbishment, and/or renewal interval.
Equipment, Systems or Processes	For example IT systems, processes or equipment required.
Development and Design Costs	Include any costs associated with modifying the standards from Section 4.
Manufacturing and/or Material Costs	For example sourcing, processing and/or supply.
Implementation Costs including Training	For example construction, testing or commissioning. Include any costs associated with training development and delivery from Section 4.
Operations and Maintenance Costs	Consider resource/material costs including supporting business processes. Identify impact on annual and/or life cycle cost.
Renews/Replacement and/or Disposal Costs	Consider renewal interval and form of disposal e.g. reuse or recycling.
Any potential Cost Avoidance or Opportunity Cost?	If so, provide further details - qualitative or quantitative.
Other	Please expand if required.
6. Risks, Assumptions, Issues and Dependencies	
What are the key risks and potential mitigation measures?	These are the key risks that could be experienced during or following implementation of the proposed change and their potential mitigation measures.
Are there any assumptions, issues or dependencies?	Please identify any relevant to this application.
7. Further Information	
Additional information	Please provide any additional information that would assist in reviewing this application.
Please send the completed form, together with any relevant attachments to: standardsmanagement@networkrail.co.uk	
<small>Privacy Notice: Individuals whose personal data is processed have the right to access their data and the right to ask for their data to be amended (for example, if it is inaccurate). Personal data will not be transferred outside Network Rail and will not be transferred outside the European Economic Area.</small>	
8. Standards Management Team Use Only	
Date application received	dd-mm-yyyy format e.g. 01-Apr-2018
Initial quality check undertaken by	Enter name
Initial quality check date	dd-mm-yyyy format e.g. 01-Apr-2018
Entered in to monitoring system by	Enter name
Date entered in to monitoring system	dd-mm-yyyy format e.g. 01-Apr-2018
Reference Number assigned in monitoring system	STDCH-000000
Form ID: STDCHAL-APP-A Version: 1 Date: March 2018 Page 2 of 2	

Section 5 is equally important. It lists a range of output capabilities and is asking the applicant to provide their view on whether these would be positively or negatively impacted if the challenge were to be accepted and to provide details of the expected scale of the change – seeking quantification, particularly costs, where possible. Where items have been quantified this will assist in evaluation of the business case for change (benefits vs. cost). For benefits please indicate the timescales within which they could expect to be realised. Where there is considered to be no positive or negative impact please enter 'None'. If the impact is not known, for example if the applicant does not have sufficient knowledge of maintenance costs, please write 'Not known' or provide a qualitative response.

Section 6 requires the key risks to be identified that could be experienced during, or following, implementation of the proposed change and their potential mitigation measures.

Section 7 is available to reference any supporting information that is to be submitted with the application.

The completed form and supporting information should be sent to standardsmanagement@networkrail.co.uk and the application will follow the process below.

Standards Challenge – Application Form

Please complete this form to submit a challenge to a Network Rail standard, policy, rule, specification, business process or work instruction currently available via either the IHS or SAI websites or internally via Network Rail's intranet site (Connect) that is considered to: (i) be incorrect; (ii) not enable the application of modern/best practice; or (iii) drive increased cost without comparable benefit. This form can also be used to initiate dialogue with Network Rail regarding a potential challenge to Technical Standards for Interoperability, Group Standards or Rail Industry Standards. See guidance note for more detail on how to complete this form. For further advice relating to standards please contact: standardsmanagement@networkrail.co.uk

1. Applicant Details

Applicant Name	PURPLE TEXT provides guidance for completing the form and should be overwritten or deleted if the form field is not used.
Position	
Company/Organisation	
Email address	
Telephone Number	
Postal Address including Post Code	
Date form completed	dd-mmm-yyyy format e.g. 01-Apr-2018
Status of applicant	Are you applying on behalf of your company/organisation? If applying on behalf of another party please explain further.

2. Project Details (if applicable)

Is this challenge in connection with an existing project?	Enter Yes or No. If No please progress to Section 3 of this form.
If so what is the name of the project?	Enter Programme or Project Name and any other relevant details including Project Number if known.
Current project GRIP Stage	Enter current project GRIP stage number (1 to 8).
Who is the Principal Contactor for the project?	Enter the name of the Principal Contractor and also your company's relationship to the Principal Contractor.
Who is the primary Network Rail contact for the project?	Enter the name the Network Rail Project Engineer, Project Manager or other key contact details.
Are they aware and supportive of this application?	Enter Yes or No and provide more details where necessary.
Are there any other key contacts that need to be kept informed of this application?	Enter names and contact details e.g. relevant Route Asset Manager.
Is this application project delivery or time sensitive?	Enter Yes or No. If Yes please explain why including key dates.

3. Confidentiality

Should this application be treated as confidential?	Enter Yes or No.
If so please provide further details	Please detail the nature of the sensitivity and any limitations on sharing with others e.g. intellectual property.

4. Details of the Challenge

Which standard does the challenge relate to?	Enter standard reference number, issue date and title.
Which clause/requirement does this challenge relate to:	Enter relevant clause/requirement number(s) or enter 'General' if it relates to the whole standard.
What is the nature of the challenge?	Provide details of what specifically is being challenged and why e.g. does not reflect latest practice, alternative approach.
What is being proposed?	Provide details as to how the standard should be amended/updated.
Does the challenge relate to a specific geographic area?	If so, provide further details e.g. applicable location(s), line(s) or Network Rail Route(s). If not, enter 'National application'.
What would be the key benefits of the proposal?	Outline the key benefits of the proposal - to be expanded upon in Section 5 of this form.
What is the potential scale of the proposed change?	For example, is it a project specific application, and/or does it have potential national application. The answer to this question is key to enable the potential overall impact to be assessed.
What could be involved in modifying the standard including any supporting material/resources?	For example, time, production cost, specialist resources required, training material or training development/delivery cost.

5. Preliminary Impact Assessment

What is the potential impact of the proposal on:	Please include both <u>positive</u> and <u>negative</u> impacts as appropriate. Try to quantify and provide further explanation/rationale where possible such that the overall impact can be evaluated e.g. cost per year, cost per asset, and potential number of assets within scope. Also consider and detail the potential timescales for realisation of the impact. Enter 'None' if no impact or 'Not known' if impact not known.
Legislative Compliance	For example any positive or negative impact on compliance.
Health and Safety	For example train accident risk, station safety, workforce safety and/or public safety. Is it possible to estimate in terms of Fatality & Weighted Injuries (FWI) or Lost Time Injuries per year?
Security	For example physical/personal or cyber/data/information security.
Environment and Sustainability	For example energy consumption, noise or waste.
Customer Experience	For example journey time, capacity (frequency and quantum of services) or passenger/traffic flow.
People	For example impact on Network Rail or supplier roles such as resource levels, engagement or working conditions.
Other Stakeholders	For example train operators, station operators, railway neighbours, trade unions or other companies/suppliers.
Industry or Corporate Reputation	For example public, government or regulator perception.
Operational Performance and Asset Reliability	For example Public Performance Measure (PPM), Service Affecting Failures, Delay per Incident.
Productivity and/or Project Delivery Timescales	For example, efficiency such as production rate or start/finish timescales.
Compatibility	For example train infrastructure interfaces, future equipment compatibility.
Quality and Provision/Receipt of Assurance	For example quality of materials or work undertaken, improved assurance.
Asset Life	For example, maintenance, refurbishment, and/or renewal interval.
Equipment, Systems or Processes	For example IT systems, processes or equipment required.
Development and Design Costs	Also include any costs involved in modifying the standards from Section 4.
Manufacturing and/or Material Costs	For example sourcing, processing and/or supply.
Implementation Costs including Training	For example construction, testing or commissioning. Include any costs associated with training development and delivery from Section 4.
Operations and Maintenance Costs	Consider resource/material costs including supporting business processes. Identify impact on annual and/or life cycle cost.
Renewal/Replacement and/or Disposal Costs	Consider renewal interval and form of disposal e.g. reuse or recycling.
Any potential Cost Avoidance or Opportunity Cost?	If so, provide further details - qualitative or quantitative.
Other	Please expand if required.

6. Risks, Assumptions, Issues and Dependencies

What the key risks and potential mitigation measures?	These are the key risks that could be experienced during or following implementation of the proposed change and their potential mitigation measures.
Are there any assumptions, issues or dependencies?	Please identify any relevant to this application.

7. Further Information

Additional information	Please provide any additional information that would assist in reviewing this application.

Guide to Network Rail Standards and Catalogue

1. Guide to Network Rail Standards and Catalogue

1. Guide to Network Rail Standards and Catalogue

Welcome to the Catalogue of Network Rail Standards.

This document is intended as a guide to Network Rail Standards, current, as of the date of publication.

It does not include historic records, although a simple 15 month archive listing of withdrawals and supersessions is maintained for your convenience.

Whilst we endeavour to keep this content up-to-date from the information provided to us by Network Rail, IHS Markit cannot be held responsible for any errors or omissions.

The content of this catalogue is divided into the following sections:

Section 1	Is this Guide to Contents. It gives the user general information on Network Rail Standards, TSIs and Railway Group Standards.
Section 2	Lists the changes to Standards in this issue of the catalogue
Section 3	Is the listing of Network Rail Catalogues
Section 4	Is the listing of Network Rail Standards by Steering Group
Archive	Lists changes to standards over the last 15 months
Index	Index to this Catalogue

1.1 Quick Find – Using the Index

If you have a document of which you want to find the status, the quickest way to find your document is to look in the Index. All current standards are listed along with the page number where you will find more information on that document.

1.2 Network Rail Standards

“Network Rail standards” is the generic term for the documents that specify requirements and provide guidance directed towards securing the safe and efficient operation of the rail infrastructure. They support the overall company assurance system by specifying how Network Rail controls its principal health and safety risks, and how the organisation complies with Technical Specifications for Interoperability (TSIs), domestic legislation, Railway Group Standards and Network Rail Business Critical Rules.”

1.3 Network Rail Standards Framework

The standards framework, detailed in NR/L2/EBM/STP001, is designed to enable Network Rail Standard Owners to:

- develop requirements that are designed to control and/or help mitigate against identified safety and business risks;
- align those requirements (risk controls) to the relevant asset management lifecycle stages; and
- describe those requirements within a hierarchy of Network Rail standards.

NOTE 1: A standard might not be needed if there are no identified risks to be controlled.

NOTE 2 The Bow-Tie risk methodology may be used to identify risks and their controls.

1.4 Types of Network Rail Standards

A Network Rail standard shall be classified as either:

- a) mandatory:
 - 1) Level 1;
 - 2) Level 2;
 - 3) Level 3;
- b) (non-mandatory)
 - Guidance Note

NOTES

- Level 1, Level 2 and Level 3 standards are monitored for compliance on the Network Rail non-compliance database.
- Level 1 Network Rail standards shall specify the organisation’s objectives, goals, strategies and policy requirements.
- Level 1 standards provide the framework for business processes, assurance systems and controls specified at Level 2.
- Examples of Level 1 standards include Asset Management Policies and the Network Rail Drugs and Alcohol Policy.

- Level 2 Network Rail standards shall specify “what” is to be achieved.
- Level 2 standards outline business processes, assurance systems and controls. They provide the minimum requirements against which Level 3 processes can deliver.
- Examples of Level 2 standards are specifications, process requirements and product specifications.

- Level 3 Network Rail standards shall specify the “how to” tasks to be followed in order to deliver requirements specified in Level 2 standards.

- Examples of Level 3 standards are work instructions and process instructions.

- Guidance Notes shall provide guidance based on best practice.
- Guidance Notes are non-mandatory and are not monitored for compliance.

1. Guide to Network Rail Standards and Catalogue

1.5 Other documents associated with Network Rail Standards

Other documents that are associated with Network Rail Standards are listed below, though not all types are included in this catalogue:

Emergency Change (also known as Letter of Instruction)	Document directly linked to an existing Network Rail standard, authorised by a Professional Head, that is used to issue mandatory instructions where there is an emergency need not otherwise covered. The Emergency Change process is specified in NR/L2/CSG/STP001.
Notice Board	Briefing documents, intended to improve the circulation of information on signalling and associated topics. Enabling the quick briefing of information on incidents, new products, and general information. The contents of Notice Boards are for guidance only and are contained within NR/L2/SIG/11120.
Technical Instruction	A document that details a mandatory specific additional requirement or amplification of one or more requirements in an existing signal engineering company standard.
Permanent Way Special Instruction (PWSI)	A particular form of specification issued by Track Engineering.
Signalling Technical Advice Notice (SIGTANS)	The method by which Network Rail advises its own engineers and contractors about changes to signalling equipment and signalling equipment in service. The requirements of SIGTANS are mandatory. Alternative practices may be accepted where they can be demonstrated to be as good or better than the contents of the SIGTAN.
Signalling Workshop Engineering Notices (SIGWENS)	The method by which Network Rail advises suppliers about additional or revised processes required in the manufacture, repair or servicing of signalling equipment before it is released for use on Network Rail signalling infrastructure. The requirements of these documents are mandatory.
Special Inspection Notices (SINS)	A Letter of Instruction, mandated by Network Rail standard, NR/L2/CSG/10072 Special Inspection Notices, used when defects in control systems or telecommunications are identified that might create a hazard.

1.6 The Current NR Numbering Systems

1.6.1 NR Numbering System in the New Framework (by Standard Level and Steering Group)

The numbering system in the new framework uses the standard level (L1, L2, L3, or GN) and Steering Group to create a unique and logical reference number.

NR / a / b / c The general format of a typical standard reference number is as follows

Table 1 - Document Codes

These 2- or 3-letter codes may prefix certain document numbers

Code	Meaning	Code	Meaning
CI	Civils	PG	Program Group
CP	Core Procedure	SE	Safety
EN	Environment	SG	Signalling
EP	Electrical Power	SPC	Signalling, Power & Communications
ME	Mechanical & Electrical Engineering	TE	Telecomms
MG	Management / General	TK	Track
PL	Planning

INFORMATION MANAGEMENT	INF	TELECOMS ENGINEERING	TEL
INFRASTRUCTURE INVESTMENT	INI	TRACK ENGINEERING	TRK
INFRASTRUCTURE MAINTENANCE	MTC		

1. Guide to Network Rail Standards and Catalogue

1.6.2 Previous NR Numbering System (by Document Type and Discipline Name)

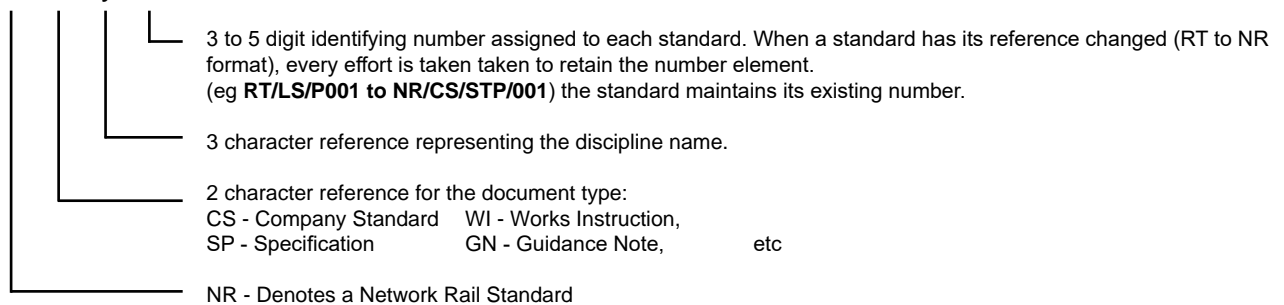

The numbering system introduced in June 2005 used a document type and discipline name to create a reference number. This numbering system has been superseded by the numbering system in the new framework (1.5.1). Standards will be renumbered as they are migrated into the new framework. From December 2005, additional temporary front sheets were appended to the majority of then-existing standards; this carried the old RT and the replacement Network Rail-branded (NR) reference numbers. The content of the standards was not affected and existing signatures, references, issue numbers and dates were retained.

*To minimise confusion, where standards have not yet been up-issued, they are listed under their RT reference numbers.
Only new and up-issued standards are listed under the NR numbers.*

From June 2005 until June 2007, Network Rail Standards were referenced as follows:

- Company Standards: NR/CS/[discipline name]/[number] e.g. NR/CS/STP/001
- Business Process Documents: NR/[document type]/[discipline name]/[number] e.g. NR/SP/STP/045
- Standard Functional Procedures may have additional descriptive references to align with specific activities, for example: NR/PRC/MTC/[activity code] [number] e.g. NR/PRC/MTC/MG0011

NR / x / y / z The general format of a typical standard reference number was as follows:

1.7 Compliance Date

Compliance is the fulfilment of the requirements of a Standard. The Compliance Date is the date at which the Network Rail standard comes into force. **NOTE:** This might not necessarily be the publication date.

1.8 Technical Specifications for Interoperability (TSIs)

TSIs are European-wide standards and set out essential requirements in eight subsystems.

Where applicable, TSIs are mandated in the UK through The Railways (Interoperability) Regulations 2006. TSIs take precedence over all other national standards including Railway Group standards and Network Rail standards.

TSIs are monitored for compliance on the Network Rail compliance database.

1.9 Railway Group Standards

Railway Group Standards are defined by the Railway Group Standards Code as "a standard authorised by the Railway Group Standards Code, being:

- technical standards with which railway assets or equipment used on or as part of railway assets by or on behalf of Railway Group Members must conform; or
- operating procedures with which the operators of railway assets must comply.

Compliance with which will contribute significantly to the safe operation of the rail network and the safe operation and safe interworking of railway assets used or to be used on or in connection with the rail network."

Railway Group Standards are produced and implemented as specified in the Railway Group Standards Code published by the RSSB and specify what must be done rather than how it should be done. Network Rail, as a member of the Railway Group, has an input to the process of developing these and must consider how it will meet the requirements. This is normally achieved by preparing Network Rail Standards.

Railway Group Standards are subordinate to TSIs.

Railway Group Standards may be accessed online at www.rssb.co.uk or directly from the Network Rail Standards on-line service.

1.10 Referenced Documents

Some Network Rail Standards grant mandatory or advisory status to other documents produced by Network Rail or other organisations. Referenced documents derive their authority from Network Rail Standards and therefore should only be applied in the circumstances and to the extent shown in any relevant Network Rail standard.

1. Guide to Network Rail Standards and Catalogue

1.11 Ordering Standards, Delivery & Prices

Complete suite of Standards in electronic format.
Subscription only, from:

Fax: 01344 404421

1.12 The Network Rail Standards Portal

Network Rail Standards are now made available free of charge to all Network Rail suppliers and partner organisations via this online portal:

https://global.ihs.com/csf_home.cfm?&csf=NR

For organisations that are not eligible to free of charge standards, there is pricing available on the Portal.

Network Rail Catalogues

3.1 Network Rail Catalogues

3. Network Rail Catalogues

3.1 Network Rail Catalogues

NR/CAT/STP001	Catalogue of Network Rail Standards Issue 120; Jun 21	Replaces NR/CAT/STP001 Iss 119; Mar 21
----------------------	--	--

The Network Rail Standards Catalogue, formerly known as The Line Standards Catalogue, lists Standards issued by Engineering, Safety & Environment, and Contract & Supply.

RT/LS/CAT004	Index of Network Rail Documents Relating to Signalling and Communications Equipment: Part 2 – Signalling Structure Drawings Issue 4; Feb 00	Replaces Iss 3;
---------------------	--	---------------------------

This catalogue lists documents (drawings) relating to signalling equipment – Signalling Structure Drawings.

NR/L2/SIG/CAT003	Index of Network Rail Documents Relating to Signalling Equipment Issue 10; Mar 19	Compliance 01/06/19	Replaces RT/L3/CAT003 Iss 9; Dec 16
-------------------------	--	-------------------------------	---

This index is part 1 of a 4 part series providing listings of documents relating to Signalling Equipment. Part 1 deals with former BRS SM (Mechanical) drawings and BRS SE (Electrical) drawings.

NR/GN/SIG/CAT005	Index of Network Rail Documents Relating to Signalling & Communications Equipment Issue 55; Jun 21	Replaces NR/GN/SIG/CAT005 Iss 54; Mar 20
-------------------------	---	--

The purpose of this standard is to provide signal engineers a standardised approach to signalling design. This prevents additional costs being incurred when a design solution already exists and assists maintainers when fault finding. The document includes a listing of typical circuits for signalling and level crossing applications.

NR/GN/SIG/CAT006	Index of NR Documents Relating to Signalling and Communications Equipment Issue 11; Jun 12	Replaces RT/LS/CAT006 Iss 10; Aug 04
-------------------------	---	--

This catalogue lists documents (drawings) relating to signalling equipment – Equipment and Systems Specifications. The standards shown in catalogue 6 are for reference purposes only, they may not reflect today's requirements nor Network Rail's future asset strategy.

4

Listing of Network Rail Standards

4. Listing of Network Rail Standards

4.1 ASSET INFORMATION

Level 1

NR/L1/ADG/001	Asset Data Policy Issue 1; Dec 16	Compliance 04/03/17	Replaces New at Issue 102
----------------------	--	-------------------------------	-------------------------------------

This policy specifies the principles for governance of the Network Rail quality management system for asset-related data and information. In support of Network Rail's objective to treat data as an asset, these principles apply to the asset data estate across all its lifecycle stages.

NR/L1/ADG/004	Geospatial Referencing Issue 1; Dec 20	Compliance 31/03/24	Replaces New at Issue 118
----------------------	---	-------------------------------	-------------------------------------

This policy mandates requirements to improve Network Rail's geospatial referencing data and provides a structure to accurately capture and reference geospatial data.

Level 2

NR/L2/ADG/002	Asset Data Governance Framework Manual Issue 2; Mar 17	Compliance 03/06/17	Replaces NR/L2/ADG/002 Iss 1; Dec 16
----------------------	---	-------------------------------	--

These modular standards set out the processes within the quality management system for asset-related data and information and for asset data governance:

- data quality planning – the process to define data and information requirements and to set plans to maintain the required accuracy of asset related data;
- data architecture management – the process to maintain the asset data architecture and at a conceptual level to meet business information needs;
- data stewardship management – the process to define the responsibilities for asset data and deliver a stewardship model;
- data flow management – the process to identify where and how asset related data is used and maintained throughout Network Rail;
- data design – the process to translate data requirements into logical and physical designs to store and maintain asset related data;
- data quality criteria set-up – the process to define the measures and method to (assess) the accuracy of asset related data;
- data error cause analysis – the process to perform root cause analysis of identified errors and issues and to develop remediation plans;
- data processing – the processes to collect, maintain and provide asset related data for reporting and use;
- data quality measurement – the process to measure the accuracy of asset related data;
- data error correction – the process to correct / fix asset related data issues and errors;
- verification and validation of asset related data – the process to perform self-assurance and cross functional assurance of the accuracy of asset related data and the effectiveness of the asset data governance framework; and,
- operate the asset data governance framework – the process to maintain and modify the asset data governance framework.

NR/L2/ADG/002/	Module	Issue	Issue Date
01	Data Quality Planning	1	Dec 2016
02	Data Architecture Management	1	Dec 2016
03	Data Stewardship Management	1	Dec 2016
04	Data Flow Management	1	Dec 2016
05	Data Design	1	Dec 2016
06	Data Quality Criteria Set-up	1	Dec 2016
07	Data Error Cause Analysis	1	Dec 2016
08	Data Quality Measurement	1	Dec 2016
09	Data Error Correction	1	Dec 2016
10	Data Processing – Collection	1	Dec 2016
11	Data Processing – Maintenance	1	Dec 2016
12	Data Processing – Presentation for use	1	Dec 2016
13	Validation and Verification of Asset Data	1	Mar 2017
14	Operate Asset Data Governance Framework	1	Mar 2017

Level 3

NR/L3/AIF/003	Asset Data Management for Ellipse and GEOGIS Issue 1; Sep 10	Compliance 04/12/10	Replaces See below
----------------------	--	-------------------------------	------------------------------

Replaces: NR/L2/EBM/MG0027, (NR/L3/MTC/MG0027) Iss 2, NR/L3/EBM/AM0001 Iss 2

This standard specifies the processes that are used to manage changes to data concerning the infrastructure assets of Network Rail.

NR/L3/AIF/005	Management of Asset Data and Information in the Rail Vehicle Asset Register Issue 2; Sep 11	Compliance 03/09/11	Replaces NR/L3/AIF/005 Iss 1; Sep 10
----------------------	--	-------------------------------	--

This standard implements the requirements of NR/L2/AIF/001, Asset data management for assets contained in the Rail Vehicle Asset Register (RVAR).

4.2 CIVIL ENGINEERING

4.2.1 Civil Engineering

Company Standards

RT/CE/P/044 **Managing Structures Works** Issue 1; Apr 04

The purpose of this Network Rail Standard is to define the requirements for works to new and existing structures on, over or under Network Rail's infrastructure such that there is no unacceptable risk to safety as a result of their Design or construction.

Responds to GC/RT5180, GC/RT5203 and GK/RT0033

Specifications (including Procedures)

RT/CE/S/080 **Management of Existing Bridges and Culverts** Issue 1; Apr 04**Replaces**

RT/CE/P/023 Iss 3; Feb 99

RT/CE/S/222 Iss 1; Feb 99

The purpose of this Specification is to define the requirements for the management of existing Bridges and Culverts on, over or under Network Rail's infrastructure such that there is no unacceptable risk to safety as a result of their condition, use or location.

RT/CE/S/082 **Management of Existing Retaining Walls** Issue 1; Apr 04**Replaces**

RT/CE/P/023 Iss 3; Feb 99

RT/CE/S/222 Iss 1; Feb 99

The purpose of this Specification is to define the requirements for the management of existing Retaining Walls on Network Rail's infrastructure such that there is no unacceptable risk to safety as a result of their condition, use or location.

RT/CE/S/087 **Management of Existing Buildings and Station Structures** Issue 1; Apr 04**Replaces**

RT/CE/P/023 Iss 3; Feb 99

RT/CE/S/222 Iss 1; Feb 99

The purpose of this Specification is to define the requirements for the management of existing Buildings and station structures on, over or under Network Rail's infrastructure such that there is no unacceptable risk to safety as a result of their condition, use or location.

RT/CE/S/091 **Management of Existing Ancillary Structures** Issue 1; Apr 04**Replaces**

RT/CE/P/023 Iss 3; Feb 99

RT/CE/S/222 Iss 1; Feb 99

The purpose of this Specification is to define the requirements for the management of existing Ancillary Structures on, over or under Network Rail's infrastructure such that there is no unacceptable risk to safety as a result of their condition, use or location.

RT/ENGP/06 **Buildings, Stations & Depots Engineering Policy** Issue 2; Dec 01**Replaces**

The Buildings, Stations and Depots (BS&D) engineering policy sets out a proactive and pragmatic asset management regime for maintaining ('steady state'), improving ('renewal improvements'), enhancing (new and improved) assets and rationalising/right sizing redundant or oversized assets.

Level 1

NR/L1/CIV/001 **The Management of Buildings and Civils Infrastructure**
Issue 1; Mar 21**Compliance**

06/03/22

Replaces

New at Issue 119

The purpose of this document is to define the Network Rail Buildings and Civils (B&C) Infrastructure, identify the assets, define accountabilities and help users navigate through the Buildings and Civils standards framework.

NR/L1/CIV/032 **The Management of Structures** Issue 2; Sep 09**Compliance**

05/12/09

Replaces

RT/CE/P/032 Iss 1; Apr 04

The purpose of this standard is to define the essential procedures that have to be followed so that no unacceptable risk to the safe use or performance of railway infrastructure will arise from the stability, load-bearing capacity, condition or use of existing structures.

(Contains NR/BS/LI/306 Issue 2, NR/BS/LI/426 Issue 2)

NR/L1/CIV/094 **National Asset Protection and Optimisation Delivery Framework** Issue 1; Jun 18**Compliance**

01/09/18

Replaces

New at Issue 108

This document provides a National framework for Network Rail's Asset Protection and Optimisation function.

NR/L1/CIV/192 **Management of Lift Assets** Issue 1; Mar 20**Compliance**

07/03/20

Replaces

New at Issue 115

The purpose of this document is to specify the high-level requirements to be followed when undertaking any activity as part of the life cycle management for Lift assets.

4.2 CIVIL ENGINEERING

4.2.1 Civil Engineering

CIV
Level 2

NR/L1/CIV/192/	Title	Issue	Issue Date
01	Lift Asset Data/Information Management	1	Mar 2020
02	Lift Asset Design	1	Mar 2020
04	Lift Maintenance	1	Mar 2020

NR/L1/CIV/195	Management of Escalator and Moving Walk Assets Issue 1; Mar 20	Compliance 07/03/20	Replaces New at Issue 115
---------------	---	------------------------	------------------------------

The purpose of this document is to specify the high-level requirements to be followed when undertaking any activity as part of the life cycle management for escalator and moving walk (EMW) assets.

NR/L1/CIV/195/	Title	Issue	Issue Date
01	Escalator and Moving Walk Asset Data/Information Management	1	Mar 2020
02	Escalator and Moving Walk Assets Design	1	Mar 2020
04	Escalator and Moving Walk Maintenance	1	Mar 2020

Level 2

NR/L2/CIV/003	Engineering and Architectural Assurance of Building and Civil Engineering Works Issue 6; Sep 20	Compliance 05/12/20	Replaces NR/L2/CIV/003 Iss 5; Dec 18
---------------	--	------------------------	---

This business process sets out:

- the engineering and architectural assurance of Works to Building and Civil Engineering infrastructure; and
- Entry into (Operational) Service (EIS) requirements for such Works.

NR/L2/CIV/005	Drainage Systems Manual Issue 1; Jun 18	Compliance 03/12/18	Replaces See Below
---------------	--	------------------------	-----------------------

Replaces: NR/L3/CIV/005 Iss 2, NR/L3/TRK/002/D08 Iss 1, NR/L3/TRK/002/D18 Iss 1, TWI 2B009 ISS 1, TWI 2B011 ISS 1, TWI 2B012 ISS 1, TWI 2B013 ISS 1, TWI 2B014 ISS 1, TWI 2B017 ISS 1

This Manual helps mitigate the risk of drainage system failure by promoting a co-ordinated approach to the management of railway drainage assets.

NR/L2/CIV/005/	Title	Issue	Issue Date
01	Drainage Asset Management	1	Jun 2018
02	Railway Drainage	1	Jun 2018
03	Drainage Management Plans	1	Jun 2018
04	Drainage Inspections	1	Jun 2018

06	Drainage Evaluation	1	Jun 2018
07	Drainage Intervention	1	Jun 2018
08	Drainage Assessment	1	Jun 2018
09	Drainage Design	1	Jun 2018
10	Drainage Installation	1	Jun 2018
11	Drainage Maintenance	1	Jun 2018
12	Maintenance of Chambers	1	Jun 2018
13	Maintenance of Pipes	1	Jun 2018
14	Maintenance of Channels including Ditches	1	Jun 2018
15	Maintenance of Culverts	1	Jun 2018

NR/L2/CIV/035	Management of Structures Issue 2; Jun 19	Compliance 01/06/19	Replaces NR/L2/CIV/035 Iss 1; Dec 17
---------------	---	------------------------	---

This document sets out the procedures and defines the methods and requirements for carrying out Structural Assessments. It forms part of the control barrier 'Carry out Structural Assessment and implement actions' to prevent functional failure of the structure.

NR/L2/CIV/035/	Title	Issue	Issue Date
MOD01	Management of Structural Assessment	2	Jun 2019
MOD02	Carry Out Structural Assessment	1	Dec 2017

NR/L2/CIV/044	Planning, Design and Construction of Undertrack Crossings Issue 4; Mar 20	Compliance 01/06/20	Replaces NR/L2/CIV/044 Iss 3; Jun 17
---------------	--	------------------------	---

This Network Rail Business Process Document defines the requirements for the planning, design and construction of undertrack crossings to maintain:

- safe operation of trains; and / or
- the safe movement and control of people to and from the trains.

It contains requirements supplementary to NR/CS/CIV/044. Compliance with this Specification and the Procedures and Specifications referenced in it, will deliver compliance with the Railway Group Standards in respect of the design and construction of undertrack crossings.

NR/L2/CIV/072	Wind Loading of Overhead Line Equipment and Structures Issue 2; Sep 19	Compliance 07/12/19	Replaces NR/L2/CIV/072 Iss 1; Dec 15
----------------------	--	-------------------------------	--

This standard enables Network Rail to achieve economy, safety and performance in the design of overhead line equipment, structures and foundations.
 Guidance is provided on the application of design to the structural Eurocodes, as well as supplementary information to the application of BS EN 50119:2009.

NR/L2/CIV/073	Design of Overhead Line Structures Issue 1; Dec 15	Compliance 05/03/16	Replaces RT/E/S/27215 Iss 1; Dec 04
----------------------	---	-------------------------------	---

This standard enables Network Rail to achieve economy, safety and performance in the design of overhead line equipment.
 Guidance is provided on the application of design to the structural Eurocodes, as well as supplementary information to the application of BS EN 50119:2009.

NR/L2/CIV/073/F001	Design of OLE Structures to Eurocodes Issue 1; Dec 15
---------------------------	--

In conjunction with the development of Network Rail's new codes NR/L2/CIV/072 and NR/L2/CIV/073 for OLE Structure design to the Eurocodes, this document contains worked examples demonstrating the use of the Eurocode for the design of typical OLE structures.

NR/L2/CIV/074	Design and Installation of Overhead Line Foundations Issue 1; Dec 17	Compliance 03/03/18	Replaces New at Issue 106
----------------------	--	-------------------------------	-------------------------------------

This standard defines the requirements for the design of foundations for Overhead Line Equipment, to achieve economy, safety and performance and mitigate the risk of dewirements.
 Guidance is provided to the application of design to the structural Eurocodes, as well as supplementary information to the application of BS EN 50119: 2009.

NR/L2/CIV/084	Management of Tunnels Issue 2; Mar 19	Compliance 02/03/19	Replaces RT/CE/S/084 Iss 1; Apr 04
----------------------	--	-------------------------------	--

To set out the approach for the management of Tunnels through their lifecycle to meet the requirements in Network Rail's Tunnels' Asset Policy and Asset Management Strategy.
 To provide a framework to support the operating business to deliver safe, reliable and sustainable Tunnels throughout their lifecycle by mitigating risks to Tunnels managed by Network Rail.

NR/L2/CIV/086	Management of Earthworks Manual Issue 10; Jun 21	Compliance 04/09/21	Replaces NR/L2/CIV/086 Iss 9; Mar 19
----------------------	---	-------------------------------	--

This process outlines the procedures that manage the geotechnical controls mitigating the risks of:

- loss of track support and/or track geometry;
- slope failure leading to loss of kinematic envelope and/or track geometry.

NR/L2/CIV/086/	Title	Issue	Issue Date
Mod01	Earthwork Evaluations	1	Sep 2017
Mod02	Earthwork Assessments	1	Mar 2018
Mod03	Geohazard Assessment	1	Mar 2019
Mod04	Earthworks Interventions	1	Sep 2017
Mod05	Earthwork Mitigations	1	Sep 2017
Mod06	Earthworks Monitoring Strategy Selection and Implementation	1	Sep 2017
Mod07	Earthworks Operational Restriction Selection and Implementation	1	Sep 2017
Mod08	Earthworks temporary restraint selection and implementation	1	Sep 2017
Mod09	Earthworks Adverse/Extreme Weather Risk Assessment	1	Sep 2017
Mod11	Definition of Earthworks Derailment Models	1	Sep 2017
Mod12	Definition of Earthwork Criticality	1	Sep 2017
Mod13	Management of Vegetation on Earthworks	1	Sep 2018
Mod14	Asbestos Risk Assessment for Earthwork Interventions	1	Jun 2021

NR/L2/CIV/095	Asset Protection and Optimisation Management of Third Party Works on Network Rail Infrastructure Issue 1; Mar 20	Compliance 06/06/20	Replaces NR/L2/INI/CP0043 Iss 3; Jun 16
----------------------	---	-------------------------------	---

The purpose of this business process is to support in the mitigation of potential risks imported to the Network Rail infrastructure by Third Party organisations when working on, near, over or under the infrastructure through the application of Asset Protection and Optimisation (ASPRO) controls.

4.2 CIVIL ENGINEERING

4.2.1 Civil Engineering

CIV
Level 2

NR/L2/CIV/096	Asset Protection and Optimisation Management of Outside Party Works Issue 1; Mar 21	Compliance 05/06/21	Replaces New at Issue 119
----------------------	--	-------------------------------	-------------------------------------

The purpose of this business process is to support the mitigation of potential risks imported to the Network Rail (NR) infrastructure by Outside Party organisations. These Outside Parties may present risks when working on, near, over or under the infrastructure therefore the Asset Protection and Optimisation (ASPRO) function should evaluate what level of control is required.

NR/L2/CIV/140	Model Clauses for Civil Engineering Works Issue 12; Mar 17	Compliance 03/06/17	Replaces NR/L3/CIV/140 Iss 11; Jun 16
----------------------	---	-------------------------------	---

The purpose of the standard is to define the requirements for the production and use of Model Clauses for specifying Civil Engineering Works.

4.2 CIVIL ENGINEERING

4.2.1 Civil Engineering

CIV
Level 2

NR/L2/CIV/150	Station Wayfinding Design and Assurance Procedure Issue 1; Sep 20	Compliance 05/12/20	Replaces New at Issue 117
----------------------	---	-------------------------------	-------------------------------------

This business process supports the statutory requirement to achieve consistency between installations undertaken in different locations. It sets out the requirements for the provision of Wayfinding in a consistent manner that enables designs and compliance to be measured.

NR/L2/CIV/168	Asbestos Management Issue 1; Mar 17	Compliance 03/09/21	Replaces New at Issue 103
----------------------	--	-------------------------------	-------------------------------------

This business process sets out the process by which Network Rail will comply with the current Control of Asbestos Regulations (CAR) and associated approved code of practice and guidance L143.

NR/L2/CIV/169	Design of Tunnels Issue 1; Mar 19	Compliance 02/03/19	Replaces New at Issue 111
----------------------	--	-------------------------------	-------------------------------------

The purpose of this standard is to define the requirements for the Design and enable the project team to confirm that the Design complies with relevant codes and standards such that there is no unacceptable risk to safety as a result of the Design.

NR/L2/CIV/171	Examinations, Inspections and Assessments of Buildings & Architecture Assets: Structures and Fabric Issue 2; Sep 19	Compliance 01/04/21	Replaces NR/L2/CIV/171 Iss 1; Dec 17
----------------------	--	-------------------------------	--

The process outlined in this document helps manage, through examinations and inspections, the following risks:

- loss of safe environment
- slips, trips and falls at building assets
- train collision due to failure of building asset.

NR/L2/CIV/172	Buildings and Architecture: Instructing Reactive, Minor Emerging Works and Business Plan Interventions Issue 1; Dec 17	Compliance 03/03/18	Replaces New at Issue 106
----------------------	--	-------------------------------	-------------------------------------

This document outlines the business process for the planning, investment and maintenance management of building fabric and Mechanical and Electrical (M&E) assets.

NR/L2/CIV/177	Monitoring Track Over or Adjacent to Construction Works Issue 3; Mar 21	Compliance 06/03/21	Replaces NR/L2/CIV/177 Iss 2; Mar 20
----------------------	---	-------------------------------	--

This business process controls the hazard of non-compliant track geometry being caused through Construction Works which could affect train operations.

It defines the requirements for monitoring of the Track over or adjacent to Construction Works to maintain:

- safe operation of trains; and/ or
- the safe movement and control of people to and from the trains.

NR/L2/CIV/191	Mining Manual Issue 2; Mar 21	Compliance 06/09/21	Replaces NR/L2/CIV/191 Iss 1; Mar 20
----------------------	--------------------------------------	-------------------------------	--

The purpose of this manual and its modules is to define the roles, responsibilities and procedures for managing the risks that mineral extraction poses to safety and performance throughout Network Rail. This helps to achieve compliance with the requirements of mineral and construction legislation, as identified in the individual modules.

NR/L2/CIV/191/	Document Title	Issue	Issue Date
1	Managing the Risk from Abandoned Underground Mines to Existing Infrastructure	1	Mar 2020
2	Planning Consultations for Mineral Extraction	1	Mar 2020
3	Inspection of Surface Mining and Tips	1	Mar 2020
4	Assessing the Risk to the Railway from Hydraulic Fracturing	1	Mar 2020
5	Managing the Risk from Mining in Design and Construction	1	Mar 2020
6	Notices of Approach for Mineral Extraction	1	Mar 2020
7	Inspection of Abandoned Underground Mines	1	Mar 2020
8	Inspection of Working Underground Mines	1	Mar 2020
9	Management of Mining Related Incidents	1	Mar 2021

NR/L2/CIV/193	Standard Specification for New and Upgraded Lifts Issue 1; Dec 19	Compliance 01/01/20	Replaces NR/GN/ELP/27230 Iss 1 NR/SP/ELP/27228 Iss 1
----------------------	---	-------------------------------	---

The purpose of this specification is to provide a recognised methodology and standardised approach for the installation of new lifts or refurbishing existing lifts and/or replacement of life expired lifts.

NR/L2/CIV/196	Standard Specification for New and Upgraded Escalators Issue 1; Dec 19	Compliance 01/01/20	Replaces NR/SP/ELP/40067 Iss 1
----------------------	--	-------------------------------	--

The purpose of this specification is to provide a recognised methodology and standardised approach for the installation of new lifts or refurbishing existing escalators and/or replacement of life expired lifts.

4.2 CIVIL ENGINEERING

4.2.1 Civil Engineering

CIV/RES
Level 3

NR/L2/CIV/250	Landlord's Consent Issue 1; Mar 20	Compliance 05/12/20	Replaces New at Issue 115
----------------------	---	-------------------------------	-------------------------------------

The purpose of this business process is to confirm Network Rail are maintaining and protecting the safety of the railway by ensuring that all necessary Network Rail departments have consented for the works to go ahead and support our position as being a Statutory Undertaker under the Buildings Act 1984 (England and Wales Only).

NR/L2/CIV/295	Scour Assessment of Bridges, Culverts and Retaining Walls Issue 2; Sep 18	Compliance 01/12/18	Replaces NR/L2/CIV/295 Iss 1; Jun 17
----------------------	--	-------------------------------	--

This business process describes the procedures for safeguarding Network Rail structures from the risk of scour. It manages the threat of scour, which can lead to functional failure of a structure.

Level 3

NR/L3/CIV/006	Structures, Tunnels and Operational Property Examinations Issue 9; Sep 19	Compliance 01/04/21	Replaces NR/L3/CIV/006 Iss 8; Jun 17
----------------------	--	-------------------------------	--

This document is the overarching document for the set of documents that govern how the examinations of Buildings and Civils Assets should be managed and carried out. This document guides the user to the applicable part of the standard depending on asset type and activity. Failure to implement and manage examination regime for Buildings and Civils assets could result in potential functional failures going undetected by the asset management teams. This may result in accidents and/or disruptions to the operation of the railway network.

NR/L3/CIV/00012	Road Vehicle Incursions: Risk Assessment of Public and Non-Public Bridge and Neighbouring Sites Issue 2; Sep 20	Compliance 05/12/20	Replaces NR/L3/CIV/00012 Iss 1; Jun 03
------------------------	--	-------------------------------	--

This standard sets out methodologies to establish the risk of road vehicle incursion at public and non-public sites. This standard covers the following scenarios:

- Overbridge sites carrying single carriageway roads, dual-carriageway roads and motorways;
- Neighbouring sites where road and rail are beside each other;
- Areas adjacent to a railway line where vehicles regularly park.

NR/L3/CIV/020	Design of Bridges Issue 1; Mar 11	Compliance 04/06/11	Replaces RT/CE/S/007 Iss 1; Jun 10
----------------------	--	-------------------------------	--

The purpose of the standard is to define the requirements for the structural Design of Bridges and Bridge-like structures
(Contains NR/BS/LI/331)

NR/L3/CIV/023	Assessment of Footbridges Issue 1; Mar 18	Compliance 02/03/19	Replaces New at Issue 107
----------------------	--	-------------------------------	-------------------------------------

This document provides requirements and advice for the assessment of footbridges.

NR/L3/CIV/024	Assessment of Operational Property Structures Issue 1; Mar 18	Compliance 02/03/19	Replaces New at Issue 107
----------------------	--	-------------------------------	-------------------------------------

This document provides requirements and advice for the assessment of Operational Property structures.

NR/L3/CIV/028	Reporting of Structures and Operational Property Safety Related Events Issue 6; Sep 19	Compliance 07/12/19	Replaces NR/L3/CIV/028 Iss 5; Sep 15
----------------------	---	-------------------------------	--

This work instruction defines the system for the recording, rating, reporting and reviewing of safety related events
This allows Network Rail to:

- a) investigate and report safety related events;
- b) carry out a continuous review of the performance of the network;
- c) improve current practice through lessons learned Scope.

NR/L3/CIV/028/	Title	Issue	Issue Date
01	Guidance on Filling in the CIV028 Structures Safety Event Template	1	Sep 2019
02	Guidance on Filling in the CIV028 Operational Property Safety Event Template	1	Sep 2019

NR/L3/CIV/030	Platform Components and Prefabricated Construction Systems Issue 3; Sep 11	Compliance 03/12/11	Replaces RT/E/PS/00030 Iss 2; Jun 05
----------------------	---	-------------------------------	--

This specification provides specification requirements for manufactured platform components and pre-fabricated platform systems to be installed at Network Rail owned stations.

NR/L3/CIV/038	Managing the Potential Effects of Coal Mining Subsidence Issue 1; Dec 08	Compliance 01/03/09	Replaces NR/SP/CIV/037 Iss 2; Apr 04 (RT/CE/P/037)
----------------------	---	-------------------------------	---

The purpose of this standard is to define the procedure for managing the potential effects of subsidence arising from coal mining, so that in following this procedure (a) such effects will not produce an unacceptable risk to the integrity, safe use or performance of the rail infrastructure, and (b) the cost of Works to manage such effects or for requiring Reservation of Support are determined and, respectively, recovered or paid.

NR/L3/CIV/039	Specification for the Assessment and Certification of Protective Coatings and Sealants Issue 5; Mar 09	Compliance 05/12/09	Replaces RT/CE/S/039 Iss 4; Feb 02
----------------------	---	-------------------------------	--

The purpose of this standard is to define the procedures and test methods that shall be followed when assessing and certifying coatings and sealants for use on Network Rail's infrastructure.

NR/L3/CIV/040	Work Instruction for the Use of Protective Coating Systems Issue 2; Jun 19	Compliance 07/09/19	Replaces NR/L3/CIV/140 Iss 1; Mar 09
----------------------	---	-------------------------------	--

This work instruction defines the selection and use of protective coating systems for Network Rail's infrastructure. Protective coatings are applied and reapplied to:

- preserve and protect the infrastructure so that it provides the required service life in the most cost-effective manner;
- in some cases, the colour of the final coat complies with regulations that govern the safe operation of the railway; and/or
- to satisfy aesthetic requirements.

NR/L3/CIV/041	Waterproofing Systems for Underline Bridge Decks Issue 3; Aug 08	Compliance 06/06/09	Replaces RT/CE/S/041 Iss 2; Aug 01
----------------------	---	-------------------------------	--

This specification provides the performance criteria for waterproofing systems proposed to be used on Network Rail's underline bridge decks and provides recommendations for tests to be carried out to prove compliance with the performance requirements.
Responds to GC/RT5110

NR/L3/CIV/065	Examination of Earthworks Manual Issue 6; Sep 17	Compliance 31/12/17	Replaces NR/L3/CIV/065 Iss 5; Dec 14
----------------------	---	-------------------------------	--

This business process manages the control, 'earthwork examination', mitigating the following risks:

- loss of track support or track geometry;
- slope failure leading to loss of kinematic envelope or track geometry.

NR/L3/CIV/065/	Title	Issue	Issue Date
Mod01	Definition of Risk Evaluation Matrix	1	Sep 2017
Mod02	Definition of Soil Cutting Hazard Index	1	Sep 2017
Mod03	Definition of Rock Slope Hazard Index	1	Sep 2017
Mod04	Definition of Soil Embankment Hazard Index	1	Sep 2017

NR/L3/CIV/066	Managing the Risks to the Railway from Landfill Operations Issue 1; Sep 20	Compliance 05/09/20	Replaces NR/L3/CIV/037 Iss 3; Dec 08
----------------------	---	-------------------------------	--

The purpose of this standard is to help mitigate risks that Landfill operations pose to Network Rail's operations and infrastructure.

NR/L3/CIV/071	Geotechnical Design Issue 4; Jun 11	Compliance 03/09/11	Replaces NR/L3/CIV/071 Iss 3; Mar 10
----------------------	--	-------------------------------	--

The purpose of the standard is to define the requirements for geotechnical designs undertaken for Network Rail.

NR/L3/CIV/076	Management of the Risk of Bridge Strikes from Road Vehicles and Waterborne Vessels Issue 4, Sep 10	Compliance 04/12/10	Replaces NR/L3/CIV/076 Iss 3, Jun 2008
----------------------	---	-------------------------------	--

The purpose of this Network Rail standard is to:

- define the requirements for the management of Underline and Overline Bridges on Network Rail's infrastructure such that there is no unacceptable risk to safety as a result of Bridge Strikes;
- reduce the risks to the operational railway from Bridge Strikes, as far as is reasonably practicable, by assessing the safety risks at each Bridge and implementing mitigating measures as necessary;
- reduce train delays resulting from Bridge Strikes, as far as is reasonably practicable, without compromising the safety of train operations.

NR/L3/CIV/142	The Management of the Movement of Abnormal Road Loads Issue 3; Dec 17	Compliance 03/03/18	Replaces NR/L3/CIV/142 Iss 2; Sep 10
----------------------	--	-------------------------------	--

The purpose of this document is to define the requirements for the management of the movement of Abnormal Road Loads over Network Rail structures. These procedures form a control barrier against the threat of overloading by live loads to structures.

NR/L3/CIV/151	Engineering Assurance of Standard Designs and Details for Building and Civil Engineering Works Issue 6; Mar 12	Compliance 03/03/12	Replaces NR/L3/CIV/151 Iss 5; Mar 11
----------------------	---	-------------------------------	--

The purpose of the standard is to issue Standard Designs and Details for Building and Civil Engineering Works, along with supplementary information to that given in NR/L2/CIV/003 on the process for their application.

NR/L3/CIV/151/F010	Index of Standard Designs and Details for Building and Civil Engineering Works Issue 17; Mar 21	Compliance N/A	Replaces NR/L3/CIV/151/F010 Iss 16; Sep 20
---------------------------	--	--------------------------	--

This document provides lists of Drawings, Engineering Assurance Forms, Technical User Manuals and Selection Guides.

NR/L3/CIV/160	The Design of Car Parks for Railway Stations and Depots Issue 1; Jun 09	Compliance 05/12/09	Replaces New at Issue 72
----------------------	--	-------------------------------	------------------------------------

The purpose of the standard is to provide direction and guidance on the design of car parks for railway stations and depots.

NR/L3/CIV/162	Platform Extensions Issue 2; Sep 11	Compliance 03/12/11	Replaces NR/L3/CIV/162 Iss 1; Mar 10
----------------------	--	-------------------------------	--

This Standard provides requirements and guidance on works to extend existing platforms at stations; for example, those involved in the Longer Trains Programme.

(Contains NR/BS/LI/371)

NR/L3/CIV/164	Legionnaires' Disease — The Control of Legionella Bacteria in Water Systems Issue 1; Sep 11	Compliance 03/12/11	Replaces New at issue 81
----------------------	--	-------------------------------	------------------------------------

The purpose of this Standard is to raise awareness of legionella risks and obligations of employers under HSE regulations. Responsible persons are identified, and requirements provided to reduce the growth of legionella and subsequent infection risks to passengers and employees on Network Rail Property

NR/L3/CIV/170	Assessment of Tunnels Issue 1; Mar 19	Compliance 02/03/19	Replaces New at Issue 111
----------------------	--	-------------------------------	-------------------------------------

This document provides requirements and guidance for the structural assessment of Tunnels.

NR/L3/CIV/176	Management of Reports on Bridge Strikes Issue 4; Sep 10	Compliance 04/12/10	Replaces NR/L3/CIV/176 Iss 3; Jun 06
----------------------	--	-------------------------------	--

The purpose of this Network Rail standard is to define the processes and the responsibilities for reporting information on Bridge Strikes.

NR/L3/CIV/185	Management of Reports of Safety Related Geotechnical Incidents Issue 3; Sep 20	Compliance 05/09/20	Replaces NR/L3/CIV/185 Iss 1*: Sep 17
----------------------	---	-------------------------------	---

This procedure manages the control, 'the receipt of ad-hoc reports from train operating companies, freight operating companies, Network Rail staff and earthworks reporting procedures', relating to the risks of:

- loss of track support and/or track geometry
- slope failure leading to loss of kinematic envelope and/or track geometry.

NR/L3/CIV/185/	Title	Issue	Issue Date
01	Reporting of the M6 Regulatory Measure for Earthwork Failures	2	Sep 2020

* Issue 2 withdrawn before publication.

NR/L3/CIV/187	Coastal and Estuarine Asset Management Plans Issue 1; Sep 19	Compliance 07/12/20	Replaces RT/CE/S/089 Iss 1; Apr 04 NR/L3/CIV/006/6 Issue 1
----------------------	--	-------------------------------	---

Coastal and Estuarine assets require specialist knowledge to fully understand the associated coastal erosion and flood risks. This work instruction mitigates the risk to the safe use or performance of railway infrastructure due to coastal and estuarine asset failure by the preparation and implementation of Coastal and Estuarine Asset Management Plans (CEAMPs). The CEAMP will provide recommendations for asset management interventions.

NR/L3/CIV/190	Developing Extreme Weather Plans Issue 1; Dec 17	Compliance 03/03/19	Replaces New at Issue 106
----------------------	---	-------------------------------	-------------------------------------

The purpose of this document is to define a standard approach for the development of Extreme Weather Plans for Structures assets. An Extreme Weather Plan (Structures) (EWPS):

- identifies structures at risk from extreme weather;
- outlines the management actions to protect the structures under these conditions; and
- defines a procedure for receiving and acting upon notifications of extreme weather.

NR/L3/CIV/194	Selection and Design of New and Upgraded Lifts Issue 1; Dec 19	Compliance 01/01/2020	Replaces NR/GN/ELP/27230 Iss 1 NR/SP/ELP/27228 Iss 1
----------------------	--	---------------------------------	---

The purpose of this work instruction is to provide a systematic approach to the selection and design of Lifts.

NR/L3/CIV/197	Selection and Design of New and Upgraded Escalators and Moving Walk Issue 1; Dec 19	Compliance 01/01/2020	Replaces NR/SP/ELP/40067 Iss 1
----------------------	--	---------------------------------	--

The purpose of this work instruction is to provide a systematic approach to the selection and design of Escalators and Moving Walks.

NR/L3/CIV/300	Managing Complaints About Pigeons Issue 1; Jun 07	Compliance 02/06/07	Replaces
----------------------	--	-------------------------------	-----------------

The purpose of this Work Instruction is to define:

- The procedure for managing complaints and Legal Notices concerning the nuisance caused by pigeons
- The roles and responsibilities of Network Rail employees in managing such complaints and Notices.

The procedure is designed to deliver an amicable, timely and cost-effective solution that satisfies all legal obligations.

Guidance Notes (Including Codes of Practice)

NR/GN/CIV/001	Waterproofing Underline Bridge Decks Issue 3; Aug 08	Replaces RT/CE/C/001 Iss 2; Aug 01
----------------------	---	--

The purpose of this standard is to supplement NR/GN/CIV/041: Waterproofing systems for Underline Bridge decks by providing information on;

- the types of Waterproofing Systems, and their components,
- the selection of a Waterproofing System for a particular bridge deck,
- the detailing of a Waterproofing System,
- the application of a Waterproofing System,
- the performance criteria for a Waterproofing System.

NR/GN/CIV/002	The Use of Protective Treatments and Sealants Issue 5; Mar 09	Replaces RT/CE/C/002 Iss 4; Feb 02
----------------------	--	--

The purpose of this standard is to support NR/L3/CIV/040: Specification for the use of protective coating systems by providing guidance and information on the selection, application and reapplication of such systems to Network Rail infrastructure.

NR/GN/CIV/025	The Structural Assessment of Underbridges Issue 3: Jun 06	Replaces RT/CE/C/025 Iss 2; Feb 04
----------------------	--	--

The purpose of this document is to provide recommendations for applicable standards and analytical methods which may be used to determine the load carrying capacity of existing Network Rail underbridges.

NR/GN/CIV/065	Examination of Earthworks Guidance Manual Issue 1: Jun 21	Replaces New at Issue 120
----------------------	--	-------------------------------------

Earthwork examinations are carried out to check the likelihood of failure of the asset. These examinations are required to confirm the asset failure likelihood and to qualitatively assess its ability to perform its function. The purpose of this manual is to help to standardise the information recorded by different examiners, by providing definitions for each of the parameters to be recorded. The definitions are supported by illustrative photographs and sketches as appropriate.

NR/GN/CIV/065/	Title	Issue	Issue Date
01	Soil Cuttings	1	Jun 2021
02	Soil Embankments	1	Jun 2021

NR/GN/CIV/100	Strategic Design Manual Issue 2: Mar 21	Replaces NR/GN/CIV/100 Iss 1: Dec 20
----------------------	--	--

This standard provides advisory guidance which supports Network Rail's broad objectives, goals, strategies and policy requirements for station design and planning. It references UK legislation and British Standards and provides a framework for design processes, assurance systems and specified controls that will encourage good design, assurance and control at all levels of station and infrastructure.

NR/GN/CIV/100/	Title	Issue	Issue Date
01	Design Advice Panel Project Guidance	1	Dec 2020
02	Station Design Guidance	1	Mar 2021
05	Heritage: Care and Development	1	Dec 2020

NR/GN/CIV/163	Management of Water Supply Issue 1: Dec 10	Replaces New at Issue 78
----------------------	---	------------------------------------

The purpose of this document is to establish roles and responsibilities for the monitoring, reporting, tracking and repair of water leaks, as well as the process for claims resulting from water leaks, leading to the proactive management of water consumption.

NR/GN/CIV/165	De-icing of Operational Property Assets Issue 1: Dec 10	Replaces New at Issue 78
----------------------	--	------------------------------------

This Guidance Note provides recommendations and guidance on the use of de-icing products on all Network Rail Operational Property. This includes both Franchised Stations and Managed Stations, Depots and lineside buildings.

NR/GN/CIV/166	R22 Refrigerant Systems – Phasing out Issue 1: Dec 10	Replaces New at Issue 78
----------------------	--	------------------------------------

This guidance is provided for phasing out of R22 refrigerant systems currently in use on all Network Rail Operational Property, in accordance with EU Regulations for reduction of greenhouse gases and gases which are likely to cause damage to the ozone layer. Guidance is provided for suitable cost effective alternatives to R22. This guidance applies to all R22 refrigerant systems present in Stations, Depots and all lineside buildings.

NR/GN/CIV/200	Station Design Manual Issue 3; Jun 21	Replaces NR/GN/CIV/200 Iss 2; Mar 21
----------------------	--	--

This standard provides advisory guidance which supports Network Rail's broad objectives, goals, strategies and policy requirements for station design and planning. It references UK legislation and British Standards and provides a framework for design processes, assurance systems and specified controls that will encourage good design, assurance and control at all levels of station and infrastructure development.

NR/GN/CIV/201	Managing Bridge Strike Incidents - Good Practice Guide for Bridge Strike Nominees Issue 4; Jun 08	Replaces NR/GN/CIV/201 Issue 3; Apr 06
----------------------	--	--

The purpose of NR/GN/CIV/201 is to provide guidance and additional information on the processes to be followed by Bridge Strike Nominees during examinations of Bridges following a reported bridge strike, and gives examples showing the damage limits to a bridge following a bridge strike up to which Bridge Strike Nominees are authorised to permit train movements.

NR/GN/CIV/202	Management of the Risk of Bridge Strikes Issue 3; Sep 10	Replaces NR/GN/CIV/202 Issue 2; Jun 08
----------------------	---	--

The purpose of this Guidance Note is to provide guidance and information to those within Network Rail, and its suppliers, contractors and consultants who have responsibilities for complying with the requirements of NR/L3/CIV/076 Management of the risk of Bridge Strikes from road vehicles and waterborne vessels.

NR/GN/CIV/203	Evaluation and Assessment of Earthworks Issue 1; Oct 07	Replaces
----------------------	--	-----------------

The purpose of this document is to provide guidance on the Evaluation and Assessment of Earthworks. The objectives of these key activities of the asset management cycle are (a) to determine or confirm the stability of existing Earthworks, and (b) to assess the risk posed by the continued use of an Earthwork. The information from (a) and (b) may be used in the design of remedial works to the Earthwork.

NR/GN/CIV/208	Ground Investigation Issue 1; Dec 18	Replaces New at Issue 110
----------------------	---	-------------------------------------

The purpose of this guidance note is to provide guidance, information and best practice on the design and implementation of ground investigations.

This document provides guidance on railway specific aspects of ground investigation, including ecological surveys, contaminated land, buried services, operational railway restrictions and mining.

NR/GN/CIV/300	Compliance Design Manual Issue 2; Mar 21	Replaces NR/GN/CIV/300 Iss 1; Dec 20
----------------------	---	--

This standard provides advisory guidance which supports Network Rail's broad objectives, goals, strategies and policy requirements for station design and planning. It references UK legislation and British Standards and provides a framework for design processes, assurance systems and specified controls that will encourage good design, assurance and control at all levels of station and infrastructure development

NR/GN/CIV/801	The Application of the Observational Approach to the Design of Remedial Works to Earthworks Issue 3; Mar 09	Replaces NR/L3/CIV/801 Iss 2; Apr 07
----------------------	--	--

The purpose of this Guidance Note is to supplement NR/SP/CIV/071: Design of earthworks, earthwork remediations and geotechnical aspects of foundations for structures by providing advice on the application of the Observational Approach (OA) to the design of remedial works to embankments and soil cuttings.

RT/CE/C/015	The Assessment of Underbridge Capacity Issue 1; Nov 95	Replaces
--------------------	---	-----------------

Defines parameters and methods for the assessment of underbridges owned by Network Rail.
Responds to GC/RT5100

Special Inspection Notices

NR/SIN/143	Special Inspection of Architectural Features Attached to Station Building Assets Issue 3; Apr 15*	Compliance 30/04/16	Replaces New at Issue 97
-------------------	--	-------------------------------	------------------------------------

This Special Inspection Notice (SIN) applies to all station building assets which have decorative or functional architectural features attached to them. This SIN is issued following an incident at Bath Spa Station and requires Route Asset Managers (RAMs) responsible for station buildings as part of the Operational Property portfolio to:-

- Identify if the above features are present on Station buildings
- Instruct and manage a detailed additional inspection / examination of these features by utilising the current CEFA contractor or a competent surveyor.

* Issues 1 & 2 were not formally published

4.2.2 Railway Estates Policy & Planning

Guidance Notes

RT/LS/G/00002 **Responsive Maintenance** Issue 3; Jun 05

Replaces
RT/LS/G/00002 Iss 2; Apr 01

This guidance note has been developed to provide practical advice for use at an operational level to maximise the value for money spent on common responsive maintenance repairs.

Price: D

4.3 COMMERCIAL PROPERTY**Level 2**

NR/L2/PRO/001	Property Clearance Process Issue 1; Dec 09	Compliance 06/03/10	Replaces New at Issue 74
----------------------	---	-------------------------------	------------------------------------

This Network Rail standard specifies the application process to be followed for Stage 1 (Business) Clearance and Stage 2 (Technical) Clearance and defines the type of proposals and schemes which are subject to or exempt from the clearance process.

4.4 COMPANY STANDARDS GROUP

Level 2

NR/L2/CSG/STP001	Standards and Controls Management Manual Issue 8; Jun 20	Compliance 05/12/20	Replaces NR/L2/CSG/STP001 Iss 7; Mar 18
-------------------------	---	-------------------------------	---

The purpose of this manual and its modules is to:

- support the control of risks throughout Network Rail;
- help maintain a consistent, safe and coherent company-wide set of standards and control documents;
- provide structure and consistency to the management of the Network Rail standards and control documents change process; and
- provide structure and consistency to the management of variations to standards and control documents; and
- provide structure and consistency to the production and use of bowties in support of the development of standards and control documents.

NR/L2/CSG/STP001	Title	Issue	issue Date
01	Principles of Standard and Control Management (<i>Contains PowerPoint Briefing</i>)	8	Jun 2020
02	Managing Standard and Control Document Change Projects	8	Jun 2020
03	Drafting Criteria for Standards and Control Documents	3	Dec 2016
04	Managing Variations to Network Rail Standards and Control Documents and Railway Group Standards	7	Jun 2020
05	Producing Bowties and Using Them to Support the Management of Standards and Control Documents	1	Dec 2016

NR/L2/CSG/10072	Business Process for Special Inspection Notices Issue 1; Mar 16	Compliance 04/06/16	Replaces NR/L2/SIG/10072 Iss 6; Dec 10
------------------------	---	-------------------------------	--

This purpose of this standard is to provide a consistent approach to the development, implementation and closure of special inspection notices (SINs).

4.5 COMPETENCE & TRAINING MANAGEMENT

Company Standards

NR/CS/CTM/001	Competence Management Issue 1; Dec 06	Compliance 31/12/07	Replaces
---------------	---------------------------------------	------------------------	----------

This standard sets out the requirements for a management system that ensures people involved in work or provision of services that may affect the operational safety and/or performance of Network Rail controlled infrastructure, are competent to perform the work. It defines processes to ensure Network Rail maintains a robust Competence Management System.

Specifications (including Procedures)

NR/SP/CTM/011	Competence and Training in Track Engineering Issue 1; Dec 06	Compliance 31/12/08	Replaces
---------------	--	------------------------	----------

This specification sets out the minimum requirements for the training and assessment of people who undertake track engineering work on Network Rail controlled infrastructure. It defines processes that shall be implemented to ensure that people who undertake track engineering work are competent to perform the work.

NR/SP/CTM/016	Competence and Training in Fixed Plant Engineering Issue 1; Dec 06	Compliance 31/03/09	Replaces
---------------	--	------------------------	----------

This specification sets out the minimum requirements for the assessment of people who undertake Fixed Plant engineering work on Network Rail controlled infrastructure. It defines processes that shall be implemented and the standards that shall be achieved to ensure that people who undertake Fixed Plant engineering tasks are competent to perform the work. Where a person is required to isolate or work near electrical equipment reference should be made to NR/SP/CTM/018 Training & Competence in Traction Power Distribution Engineering (Contains NR/BS/LI/429 Issue 1)

NR/SP/CTM/017	Competence and Training in Civil Engineering Issue 1; Jun 06	Compliance	Replaces
---------------	--	------------	----------

This Specification sets out the minimum requirements for the training and assessment of people who undertake Civil Engineering work that may affect the operational safety of Network Rail controlled infrastructure. It defines processes that shall be implemented and the standards that shall be achieved to ensure that personnel who undertake Civil Engineering work are competent to perform the work.

Level 2

NR/L2/CTM/012	Competence and Training in Signal Engineering Issue 3; Sep 11	Compliance 02/06/12	Replaces NR/L2/CTM/012 Iss 2; Mar 10
---------------	---	------------------------	---

This specification sets out the minimum requirements for the training and assessment of people who undertake signal engineering work on Network Rail managed infrastructure. It defines processes that shall be implemented and the standards that shall be achieved to confirm that people who undertake signal engineering work are competent to perform the work.

NR/L2/CTM/014	Competence and Training in Overhead Line Engineering Issue 2; Mar 10	Compliance 05/06/10	Replaces See below
---------------	---	------------------------	-----------------------

Replaces: NR/SP/CTM/014 Iss 1; Dec 06, NR/L2/ELP/24001 Iss 5; Aug 08, NR/L2/ELP/21070 Iss 5; Aug 08
This specification sets out the minimum requirements for the assessment of personnel who undertake OLE engineering, isolation and/or switching and object removal activities on Network Rail managed infrastructure. It defines processes to be implemented and the standards to be achieved to confirm that personnel who undertake OLE engineering, isolation and/or switching and object removal activities are competent to perform the work.

NR/L2/CTM/018	Competence and Training in Traction Power Distribution Issue 2; Mar 10	Compliance 05/03/11	Replaces NR/SP/CTM/018 Iss 1; Dec 06
---------------	---	------------------------	---

This specification sets out the minimum requirements for the assessment of personnel who undertake Traction Power Distribution work on Network Rail controlled infrastructure. It defines processes to be implemented and the standards to be achieved to confirm that personnel who undertake Traction Power Distribution work are competent to perform the work.

NR/L2/CTM/021	Competence and Training in Track Safety Issue 4; Dec 10	Compliance 04/12/10	Replaces NR/L2/CTM/021 Iss 3; Sep 10
---------------	--	------------------------	---

This specification sets out the minimum requirements for the training and assessment of individuals who undertake Track Safety activities on Network Rail managed infrastructure. It defines the processes that are to be implemented and the standards that are to be achieved to confirm that individuals who are required to go on or near the line are competent.
(Contains NR/BS/LI/383)

NR/L2/CTM/022	Competence and Training in the Loading and Load Examination of Infrastructure Wagons (Including Special Vehicles) Issue 2; Jun 12	Compliance 01/09/12	Replaces NR/L2/CTM/022 Iss 1; Jun 07
---------------	---	------------------------	---

The purpose of this standard is to set out the minimum requirements for the training and assessment of individuals who undertake loading and load examination of infrastructure wagon activities on Network Rail managed infrastructure. It defines processes to be implemented and the standards to be achieved to confirm that individuals who undertake loading and examination of loading of infrastructure wagons activities are competent.

NR/L2/CTM/025	Competence & Training in On-Track Plant Operation & Activities Issue 2; Mar 21	Compliance 05/06/21	Replaces NR/L2/CTM/025 Iss 1; Sep 08
----------------------	---	-------------------------------	--

This standard is part of the competence and training requirements for planning, controlling and operating On-Track Plant within a possession. It:

- Sets out the minimum requirements for the training and competence assessment of persons who plan, control and operate OTP used on Network Rail managed infrastructure.
- It defines processes to be implemented and the standards to be achieved to confirm that persons who plan, control and operate OTP are competent to do so.

NR/L2/CTM/028	Competence and Training In OLE Construction Engineering Issue 2; Jun 10	Compliance 01/07/10	Replaces NR/L2/CTM/028 Iss 1; Mar 09
----------------------	--	-------------------------------	--

This specification sets out the minimum requirements for the assessment of personnel who undertake OLE construction, renewals, enhancement and/or modification project activities on Network Rail Managed Infrastructure. It defines the processes to be implemented and the standards that are to be achieved to confirm that personnel undertaking these activities are competent to perform their tasks.
(Contains NR/BS/LI/347)

NR/L2/CTM/201	Competence Management Issue 2; Mar 12	Compliance 02/06/12	Replaces NR/L2/CTM/001 Iss 1; Dec 10
----------------------	--	-------------------------------	--

This standard sets out the requirements for managing the competence of Network Rail employees involved in work that can affect the operational safety and/or performance of Network Rail managed infrastructure. It defines the processes that Network Rail implements and maintains as part of its Competence Management System.

NR/L2/CTM/202	Quality Assurance of Training & Assessment Organisations Issue 3; Dec 19	Compliance 07/03/2020	Replaces NR/L2/CTM/202 Iss 2; Dec 11
----------------------	---	---------------------------------	--

This business process is part of Network Rail's Competence Management System. It:

- provides assurance that training and/or assessment organisations have safe and effective management systems in place to deliver training and/or assessments which awards a Network Rail competence; and
- confirms that training and/or assessment organisations use approved trainers and/or assessors with the required skills and knowledge.

NR/L2/CTM/205	Competence and Training for the Maintenance of Traction and Rolling Stock and On-track Machines Issue 1; Jun 11	Compliance 02/06/12	Replaces New at Issue 80
----------------------	--	-------------------------------	------------------------------------

The purpose of this document is to define the minimum requirements for the training and assessment of individuals required to undertake maintenance and/or overhaul work on Traction and Rolling Stock (T&RS) and On-track machine (Including modules on-track plant, which have been deemed to be T&RS assets in order to reduce ambiguity and complexity), which are owned, hired and/or leased by Network Rail, or where Network Rail has an engineering responsibility.

NR/L2/CTM/206	Competence and Training in Lookout Operated Warning Systems Issue 1; Sep 11	Compliance 03/12/11	Replaces New at Issue 81
----------------------	--	-------------------------------	------------------------------------

This standard sets out the minimum requirements for the training and assessment of personnel who operate or control the operation of Lookout Operated Warning Systems (LOWS) equipment on the Network Rail Managed Infrastructure

NR/L2/CTM/207	Competence and Training in Planning Issue 2; Jun 12	Compliance 01/06/13	Replaces NR/L2/CTM/207 Iss 1; Sep 11
----------------------	--	-------------------------------	--

The purpose of this standard is to set out the minimum requirements for the training and review/assessment of individuals who undertake the planning of work activities that takes place on, or that affects the Network Rail managed infrastructure. It defines processes that are to be implemented and the standards that are to be achieved to confirm that people who are required to undertake these activities are competent.

NR/L2/CTM/209	Competence and Training in Safe System of Work Planner Issue 1; Dec 10	Compliance 04/06/11	Replaces New at Issue 78
----------------------	---	-------------------------------	------------------------------------

The purpose of this standard is to set out the minimum requirements for the training and assessment of individuals who plan a safe system of work (SSOW) on the Network Rail managed infrastructure. It defines processes that are to be implemented and the standards that are to be achieved to confirm that people who are required to plan a SSOW for individuals or groups that go on or near the line are competent.

NR/L2/CTM/220	Competence & Training in Portable, Transportable & Mobile Plant (PTMP) Operation & Activities Issue 2; Jun 21	Compliance 04/09/21	Replaces NR/L2/CTM/220 Iss 1; Jun 12
----------------------	--	-------------------------------	--

This standard is part of the Competency and Training requirements for planning, controlling and operating Portable, Transportable and Mobile Plant (PTMP). It:

- Sets out the minimum requirements for the training and competence assessment of persons who plan, control and operate PTMP on Network Rail Managed Infrastructure (NRMI) and/or Network Rail owned or leased property.
- It defines processes to be implemented and the standards to be achieved to confirm that persons who plan, control and operate PTMP are competent to do so.

NR/L2/CTM/222	Competence and Training in Track Welding, Weld Inspection and Ancillary Processes Issue 1; Dec 10	Compliance 04/06/11	Replaces New at Issue 78
----------------------	--	-------------------------------	------------------------------------

This standard sets out the minimum requirements for the training and competence assessment of individuals who undertake track welding activities on Network Rail managed infrastructure. It defines processes to be implemented and the standards to be achieved to confirm that individuals who undertake track welding activities are competent to do so.

NR/L2/CTM/223	Competence and Training in Managing Site Safety Issue 1; Jun 11	Compliance 04/06/14	Replaces New at Issue 80
----------------------	--	-------------------------------	------------------------------------

This standard sets out the minimum requirements for the training and assessment of people who manage site safety on Network Rail managed infrastructure. It defines processes that shall be implemented to confirm that people who manage site safety are competent to perform the work.

NR/L2/CTM/229	Competence and Training for Emergency Evacuation Wardens and Persons Responsible for Fire Safety Issue 1; Mar 12	Compliance 31/10/12	Replaces New at Issue 83
----------------------	---	-------------------------------	------------------------------------

This standard sets out the minimum requirements for the training and assessment of Network Rail employees who are required to undertake the roles of Emergency Evacuation Wardens and Persons Responsible for Fire Safety.

Level 3

NR/L3/CTM/131	IRSE Assessing Agency Network Rail Watford Issue 1; Sep 09	Compliance 05/09/2009	Replaces New at Issue 73
----------------------	---	---------------------------------	------------------------------------

This Standard defines how Competence and Training Management operate the Maintenance IRSE Assessing Agency located at Watford.

NR/L3/CTM/301	Management Review & Advisory Visit Process Issue 1; Jun 10	Compliance 04/09/10	Replaces NR/L3/CTM/108 Iss 4 NR/L3/CTM/111 Iss 3
----------------------	---	-------------------------------	---

This procedure defines the information required and the processes necessary to conduct management reviews and briefs across all Network Rail C&T teams and the responsibilities, scope, methods and processes required to check/confirm the status of the compliance of Network Rail Competence and Training to required standards and the Network Rail Assurance Framework NR/SP/ASR/036.

NR/L3/CTM/302	Production and Maintenance of Training and Assessment Solutions Issue 3; Mar 21	Compliance 05/06/21	Replaces NR/L3/CTM/302 Iss 2; Sep 18
----------------------	--	-------------------------------	--

This work instruction provides guidance and direction for Network Rail employees, and those acting on their behalf, so that training is appropriate, efficient, effective and safe. This process serves as a guiding framework for creating effective training and assessment solutions. This work instruction:

- a) controls the risk of unsafe and inefficient working practices due to the implementation of unsuitable training and assessment solutions (T&AS);
- b) uses selected elements taken from Systems Approach to Training (SAT) and Analyse, Design, Develop, Implement and Evaluate (ADDIE) to provide a uniform, logical process to be applied to the production and maintenance of all T&AS.

NR/L3/CTM/303	Trainer Approval Issue 1; Jun 10	Compliance 04/09/10	Replaces NR/L3/CTM/105 Iss 3 NR/L3/CTM/106 Iss 3
----------------------	---	-------------------------------	---

This specification establishes the process to be followed to approve and maintain trainer competence to deliver training modules. It provides a framework whereby professional and vocational competence requirements are satisfied prior to unobserved delivery of training courseware, thereby providing an auditable quality control process to maintain safe and effective delivery of training.

NR/L3/CTM/304	Training, Planning and Administration Issue 1; Jun 10	Compliance 04/09/10	Replaces See below
----------------------	--	-------------------------------	------------------------------

Replaces: NR/L3/CTM/101 Iss 4, NR/L3/CTM/102 Iss 3, NR/L3/CTM/103 Iss 4, NR/L3/CTM/104 Iss 3, NR/L3/CTM/114 Iss 3

This procedure sets out the process to be followed for establishing prioritised statement of training requirements, and subsequent planning, administration and delivery of these requirements, including the provision for the procurement of training services and development of resources.

NR/L3/CTM/305	Training Evaluation Issue 1; Jun 10	Compliance 04/09/10	Replaces NR/L3/CTM/104 Iss 3 NR/L3/CTM/114 Iss 3
----------------------	--	-------------------------------	---

This standard defines the processes required to evaluate Network Rail training programmes at immediate (assessments) and reaction level (as per the Kirkpatrick model) and intermediate level evaluation (as per Network Rail's methodology). In addition it defines the process to be followed for complaints associated with Network Rail's training events.

NR/L3/CTM/306	Skills Assessment Scheme Issue 2; Dec 15	Compliance 11/10/16	Replaces NR/L3/CTM/306 Iss 1; Sep 10
----------------------	---	-------------------------------	--

The Skills Assessment Scheme is a competence assurance process based on risk. It applies a methodology to attain, maintain and renew competence based on the activity being performed by an individual

NR/L3/CTM/306/	Title	Issue	Issue Date
01	Competence Assurance Process	1	Dec 2015
02	Assessor Competence	1	Dec 2015
03	Verification and Audit	1	Dec 2015

NR/L3/CTM/307	Advanced Apprenticeship Scheme and Foundation Degree (Part-time) Programme Administration Issue 1; Sep 10	Compliance 04/12/10	Replaces NR/L3/CTM/133 Iss 1
----------------------	--	-------------------------------	--

The purpose of the document - NR/L3/CTM/307 - is to define the administrative processes to be followed in regard to the Advanced Apprenticeship (AA) Scheme and the Foundation Degree (FD) (part-time) programme.

4.6. CONTRACTS & PROCUREMENT**Guidance Notes**

NR/GN/CPR/401	Guidance on Contractual Health and Safety Requirements Issue 1; Dec 08	Compliance n/a	Replaces NR/SP/CPR/008 Iss E14
----------------------	--	--------------------------	--

The purpose of this document is to show how the process and requirements specified in the obsolete standard Contract Requirements Safety (NR/SP/CPR/008) are dealt with in revised company standards and other documents.

4.7 ELECTRICAL POWER

Specifications (including Procedures)

NR/SP/ELP/21014	Specification of Voltage Testing of High Voltage Electrical Distribution Equipment (Including Cables) on AC and DC Electrified Lines Issue 2; Dec 05	Replaces RT/E/S/21014 Iss 1; Nov 97
------------------------	---	---

This specification states the Directorate's requirements for voltage testing (pressure testing) of major items of electrical distribution equipment, in the range 3.3kV to 66kV, 50Hz, on AC and DC Electrified Lines when the performance of insulation has been affected by refurbishment, modification, repair or relocation. The test voltage values and acceptance criteria are included.

NR/SP/ELP/21024	Specification for Impedance Protection Relay for 650/750V DC Track Feeder Circuit Breakers Issue 2; Dec 05	Replaces RT/E/S/21024 Iss 1; Mar 97
------------------------	---	---

This specification states the requirements for the design, manufacture and testing of an impedance protection relay for use in association with new or existing 650/750V dc track feeder circuit breakers. When the relay is installed on existing switchgear, as a replacement for an existing protection device, this specification shall also apply to circuit breaker operation, wiring modifications external to the relay and accessories.

NR/SP/ELP/21026	Specification for 415V and 440V Changeover Switchboards for DC Traction Substations Issue 2; Dec 05	Replaces RT/E/S/21026 Iss 1; Mar 98
------------------------	--	---

This specification states the requirements for the design, manufacture and testing of low voltage changeover switchboards used in DC traction substations for the control and distribution of 400 V or 440 V, 50 Hz auxiliary supplies for substation domestic and for signalling and other trackside purposes.

NR/SP/ELP/21028	Specification for Ancillary Wiring of Electrical Distribution Equipment on AC and DC Electrified Lines Issue 3; Feb 06	Replaces NR/SP/ELP/21028 Iss 2; Dec 05
------------------------	---	--

This specification states the requirements for the design, manufacture, installation and testing of ancillary wiring between main items of electrical distribution equipment including SCADA outstation equipment on ac and dc Electrified Lines together with the preparation of associated documentation. Where required, the requirements for wiring within an item of electrical distribution equipment will be specified in the procurement specification.

(Contains NR/BS/LI/342)

NR/SP/ELP/21030	Specification for Prefabricated and Modular Steel Housings for Electrical Distribution Equipment on DC Electrified Lines Issue 2; Dec 05	Replaces RT/E/S/21030 Iss 1; Nov 97
------------------------	---	---

This specification states the Directorate's requirements for secure and weatherproof prefabricated and modular housings of steel construction for indoor electrical distribution equipment for dc electrified Lines. The specification states requirements for overall performance and technical details including construction and testing.

 Please see caution below

NR/SP/ELP/21032	Earthing Systems for DC Traction Substations, Track Paralleling Huts and Similar Equipment Locations Issue 2; Apr 06	Replaces RT/E/S/21032 Iss 1; Oct 96
------------------------	---	---

This specification states the requirements for the design, manufacture, installation and testing of equipotential bonding of equipment and earth electrode systems for d.c. traction substations, track paralleling huts and similar equipment locations (except for metal enclosures around controlled track switches).

(Contains NR/BS/LI/060)

NR/SP/ELP/21033	Specification for the Welding of Transformer Tanks and Conservators During Manufacture Issue 2; Dec 05	Replaces RT/E/S/21033 Iss 1; Dec 96
------------------------	---	---

This specification states the requirements for the control of welding, including supervision, materials, welding procedures, inspection, testing and also the approval of welders and operators, to achieve the appropriate quality level during the manufacture of power transformer tanks and conservators.

NR/SP/ELP/21041	Specification of Batteries and Battery Charging Equipment for Electrification Applications Issue 2; Dec 05	Replaces RT/E/S/21041 Iss 1; Nov 97
------------------------	---	---

This specification states the requirements for the design, manufacture and testing of batteries and battery charging equipment for use in substations and at other similar locations to provide supplies for tripping, closing, protection and control of electrical switchgear and associated electrical distribution equipment.

 Please see caution below

 CAUTION: The requirements for protective treatments materials and their application referred to in this specification have been superseded by:
NR/L3/CIV/039 - Specification for the Assessment and Certification of Protective Coatings & Sealants;
NR/GN/CIV/002 - The use of Protective Treatments & Sealants

NR/SP/ELP/21046	Examination of DC Traction Electrification Equipment in Light Maintenance Depots Issue 3; Apr 06	Replaces RT/E/S/21046 Iss 2; Sep 97
------------------------	---	---

This specification states the requirements for the periodic examination, to determine the general condition, of dc electrification equipment installed in light maintenance depots for the purpose of supplying traction power to rolling stock.

NR/SP/ELP/21051	Specification for Calculation of Protection Settings for DC Circuit Breakers Issue 2; Dec 05	Replaces RT/E/S/21051 Iss 1; Oct 98
------------------------	---	---

This specification states the requirements for the calculation of settings for protection against short circuit faults between the positive and negative circuits of track feeder sections.

NR/SP/ELP/21060	Issue of Safety Documentation for Work on 650/750VDC Apparatus Issue 2; Feb 06	Replaces RT/E/S/21060 Iss 1; Mar 98
------------------------	---	---

This specification sets out the issuing of safety documentation to prevent injury or danger to persons working on or near 650/750Vdc apparatus. (Contains NR/BS/LI/447)

NR/SP/ELP/21066	Restrictions on Entry into Substations Equipped with GEC Type KC 33kV Switchgear Issue 4; Apr 06	Replaces RT/E/S/21066 Iss 3; Jun 99
------------------------	---	---

This specification details the special arrangements necessary for persons requiring entry into certain substations equipped with GEC type KC 33kV switchgear.

NR/SP/ELP/21073	The Siting of Pantograph Monitoring Equipment Issue 2; Apr 06	Replaces RT/E/S/21073 Iss 1; Nov 97
------------------------	--	---

This specification states the requirements for siting of trackside pantograph monitoring equipment defined in Network Rail specification NR/PS/ELP/21072, "Trackside pantograph monitoring equipment".

NR/SP/ELP/21081	Specification of Security Palisade Fencing for Electrical Distribution Installations for AC and DC Electrified Lines Issue 2; Dec 05	Replaces RT/E/S/21081 Iss 1; Mar 98
------------------------	---	---

This specification states the requirements for the design, manufacture and installation of perimeter palisade fencing of the security type for use, when specified, around electric traction distribution installations.

NR/SP/ELP/21082	25kV Overhead Line Equipment Insulators Issue 2; Feb 06	Replaces RT/E/S/21082 Iss 1; Mar 98
------------------------	--	---

This specification states the requirements for the design, manufacture and testing of insulators for overhead line equipment used on 25 kV ac Electrified Lines.

NR/SP/ELP/21104	Design and Installation of Electric Track Equipment for DC Electrified Lines Issue 2; Apr 06	Replaces RT/E/S/21104 Iss 1; Mar 98
------------------------	---	---

This specification states the requirements for the design, manufacture, installation and testing of electric track equipment, including conductor rail and negative bonding, for use on the existing third rail dc traction system areas and where extensions are proposed. (Contains NR/BS/LI/328)

NR/SP/ELP/21106	Specification for 25kV AC System Protection Calculations Issue 2; Dec 05	Replaces RT/E/S/21106 Iss 1; Dec 98
------------------------	---	---

This specification states the requirements for system protection calculations for 25 kVac traction installations to cater for overloads and short circuit faults having negligible impedance at the point of fault.

NR/SP/ELP/21107	Bolted Running Rail Connections for Traction Bonding on AC and DC Electrified Lines Issue 2; Apr 06	Replaces RT/E/S/21107 Iss 1; Mar 98
------------------------	--	---

This specification states the requirements for the design, manufacture and testing of bolted electrical connections for attachment to running rails. The connections are used for: a) traction bonding; b) signal track circuit connections.

NR/SP/ELP/21112	Calculation of Protection Settings for 3-phase H.V. Distribution Systems Issue 2; Apr 06	Replaces RT/E/S/21112 Iss 1; Dec 98
------------------------	---	---

This specification states the requirements for the calculation of settings on 3 phase h.v. distribution systems for protection against short circuit faults and, when specified in the procurement specification, overloads.

NR/SP/ELP/21130	Technical Competency Requirements for Design of Overhead Line Equipment Issue 2; Feb 06	Replaces RT/E/S/21130 Iss 1; Dec 98
------------------------	--	---

This specification states the requirements for technical competency and accreditation for the supply of overhead line equipment design to Network Rail.

NR/SP/ELP/27021	Electric Track Equipment Layout Design for DC Electrified Lines Issue 2; Apr 06	Replaces RT/E/C/27021 Iss 1; Mar 98
------------------------	--	---

This guidance note states the best practice for electric track equipment layout design on Network Rail dc Electrified Lines including those which are designated 'standard current' and 'high current'.

NR/SP/ELP/27030	Overhead Line Equipment as Installed Data Records Issue 2; Apr 06	Replaces RT/E/C/27030 Iss 1; 1 Dec 04
------------------------	--	---

This document defines the record of parameters which need to be produced and kept up to date. The data records will form the basis of any future developments in automated checking of the electrified system parameters for acceptance and maintenance.

NR/SP/ELP/27044	Allocation of Designations for Switching Stations, Auxiliary Supply Points, Electrical Sections, Overhead Line Switches, Circuit Breakers and the Like, for AC Electrified Lines Issue 2; Apr 06	Replaces RT/E/C/27044 Iss 1; Dec 04
------------------------	---	---

The principles laid down in this document give the preferred method of determining designations for use on all future electrification schemes.

NR/SP/ELP/27169	Isolation of Switching Stations at Electrical Control Room Boundaries to Comply with issue of Permits-to-work and Sanctions-for-test Certificates Issue 2; Apr 06	Replaces RT/E/P/27169 Iss 1; Dec 04
------------------------	--	---

At switching stations where the high voltage equipment is part or dual controlled from two different Electrical Control Rooms (ECR) the information defined in this specification will apply for isolation of the high voltage equipment and issue of Permit-to-Work (21067/P/1) or Sanction-for-Test (21067/S/1)

NR/SP/ELP/27175	Acceptance of High Mast Winching Mechanisms and Associated Equipment Issue 2; Dec 05	Replaces RT/E/P/27175 Iss 1; Dec 04
------------------------	---	---

This specification is written to ensure a common policy and assist in the fulfilment of statutory obligations for the acceptance, registration, testing and certification of high mast winching mechanisms and associated equipment.

NR/SP/ELP/27183	50 Cycle Single Phase AC Electrification Overhead Line Equipment Issue 2; Apr 06	Replaces RT/E/S/27183 Iss 1; Dec 04
------------------------	---	---

This standard includes drawings, descriptions, loading diagrams, calculations and instructions appertaining to the equipment shall be provided in sufficient detail to permit efficient manufacture, erection and maintenance in "polluted" and "clean" areas, of a nominal 25kV, 50 cycles, single phase ac overhead system of railway electrification.

NR/SP/ELP/27192	Design and Installation of Negative Bonding and Associated Equipment on High Current DC Electrified Lines Issue 2; Apr 06	Replaces RT/E/S/27192 Iss 1; Dec 04
------------------------	--	---

This specification details the engineering requirements for the design and installation of negative bonding on Network Rail dc Electrified Lines which are designated "High Current".

NR/SP/ELP/27193	Specification for Earthing and Bonding for Dollands Moor International Freight Yard Issue 2; Feb 06	Replaces RT/E/S/27193 Iss 1; Dec 04
------------------------	--	---

This document details the specific earthing and bonding requirements for Dollands Moor International Freight Yard.

NR/SP/ELP/27195	Earthing and Bonding at North Pole International Depot Issue 2; Feb 06	Replaces RT/E/S/27195 Iss 1; Dec 04
------------------------	---	---

This Earthing and Bonding specification is unique to the North Pole Depot area and the section of the West London Lines between West Way and Mitre Bridge Junction, it should be read in conjunction with NR/SP/ELP/21085 which contains general information regarding standard bonding practices, cable sizes, use of spider plates etc.

NR/SP/ELP/27202	Concrete for Overhead Line Equipment Structures Issue 2; Feb 06	Replaces RT/E/S/27202 Iss 1; Dec 04
------------------------	--	---

This Specification pertains to every aspect of the use of concrete for overhead line electrification foundations and associated concrete structures.

NR/SP/ELP/27203	Provision of Isolation, Earthing and Indication Facilities Where Local Isolations are Permitted on AC Electrified Lines Issue 2; Apr 06	Replaces RT/E/S/27203 Iss 1; Dec 04
------------------------	--	---

This document covers the provisions necessary to enable the procedures to be followed within those areas and for those tasks to which local isolation instructions apply. It amplifies, but in no way modifies the requirements of NR/L3/ELP/29987.

NR/SP/ELP/27205	Specification for the Installation and Operation of Buffer Sections and Permanently Earthed Sections in AC Overhead Line Equipment Issue 2; Apr 06	Replaces RT/E/S/27205 Iss 1; Dec 04
------------------------	---	---

This document details the installation and operational requirements for buffer sections and permanently earthed sections on ac overhead line equipment.

NR/SP/ELP/27210	Maintenance of Electro-mechanical Supervisory Equipment Issue 2; Apr 06	Replaces RT/E/S/27170 Iss 1; Dec 04
This specification defines the minimum planned periodic maintenance that shall be carried out on electro mechanical supervisory equipment in order to ensure the safety of the electrical system.		
NR/SP/ELP/27217	Emergency Disconnection of Grid Supply Feeders for DC Electrification Issue 2; Apr 06	Replaces RT/E/S/27217 Iss 1; Dec 04
This standard lays down the arrangements to be adopted following the removal of emergency tripping facilities that utilised the electrification telephone circuits.		
NR/SP/ELP/27224	Specification for Installation of Cable Routes Forming Part of The Traction Distribution System Issue 2; Apr 06	Replaces RT/E/S/27224 Iss 1; Aug 05
This document details the requirements for the design, refurbishment and construction of new cable routes and the refurbishment of existing cable routes for high voltage ac power distribution cables and associated pilot supervisory cables, signalling supply distribution and point heater cables, ac and dc traction cables and other cables used on electrical distribution systems. (Contains NR/BS/LI/040, NR/BS/LI/217, NR/BS/LI/465)		
NR/SP/ELP/27242	Specification of Low Voltage Electrical Installations on Railway Premises (Including Plugs, Sockets, Trailing Leads and Appliances) Issue 1; Dec 05	Replaces
This specification has been prepared to control the design and maintenance of hydraulic fluid power systems.		
NR/SP/ELP/27243	Specification for Signalling Power Supplies Issue 1; Aug 06	Replaces
This document specifies Network Rail's requirements for signalling power supply trackside distribution systems. This document focuses on the different types of distribution feeder that can be used and the applicability of BS7671. These requirements ensure that the system design complies with the Electricity at Work Regulations 1989. This specification references supporting standards where appropriate. (Includes NR/BS/LI/256)		
NR/SP/ELP/27300	Specification for Computer Aided Design Formats for Electrification and Plant Documentation Issue E1; Sep 05	Replaces
The purpose of this document is to ensure that Cad documentation is consistent in appearance and format. The processes described in this specification shall be applied to 'drawings' which includes any document that is wholly or primarily graphical in nature.		
NR/SP/ELP/40041	Core Maintenance Specification for Overhead Trolley Jumper Systems Issue 2; Apr 06	Replaces RT/E/S/40041 Iss 1; Mar 96
This document is the Technical Specification for the maintenance of Overhead Trolley Jumper Systems. The document is to be read in conjunction with the relevant Contract Documentation.		
NR/SP/ELP/40042	Periodic Inspection and Testing of Electrical Installations, Appliances and Equipment Issue 3; Feb 06	Replaces RT/E/P/40042 Iss 2; Dec 01
This procedure defines the process for determining the frequency of testing and examination and the minimum standard of testing that the installations, equipment and appliances shall undergo in order to ensure continued safe usage.		
RT/E/S/27223	Specification for Tyne and Wear Metro (Sunderland Extension) – OLE Maintenance Issue E1; Jun 05	Replaces
This specification states the minimum requirements in order to ensure the safety and reliability of the Tyne and Wear Metro (Sunderland Extension) overhead line electrification energised at 1500V dc.		
RT/E/P/24000	Content and Preparation of Control Room Instructions Issue 3; Dec 02	Replaces RT/E/P/24000 Iss 2; Aug 02
This procedure states the mandatory requirements for the content and preparation of electrical control room instructions by Network Rail zones for use at electrical control rooms by electrical control operators to ensure that adequate and correct procedures are followed in the control and operation of the electrification and plant equipment under their jurisdiction.		
RT/E/P/24010	Management of Warnings and Alarms Received from Trackside Pantograph Monitoring Equipment Issue 1; Nov 97	Replaces
This is a procedure for the reporting and investigating pantograph uplift exceedances detected by trackside pantograph monitoring equipment operating on 25kV overhead line electrification equipment managed by Network Rail.		
RT/E/P/27180	Operating & Maintaining Escalator Trolleys at London Victoria Issue 1; Dec 04	Replaces formerly SP-PM-66
Former BRB standard, migrated to Network Rail template, December 04		

Product Specifications

NR/PS/ELP/00003	Resistive Type Live Line Indicators Issue 2; Feb 06	Replaces
This Product Specification states the minimum performance requirements for a resistive type live line indicating device for use on the overhead line and switching station equipment.		
NR/PS/ELP/00006	Portable DC Short Circuiting Devices Issue 2; Apr 06	Replaces RT/E/PS/00006 Iss 1; Apr 00
This Product Specification gives the minimum performance requirements for the design, manufacture and testing of portable short circuiting devices to be used on d.c. electrified lines.		
NR/PS/ELP/00007	Product Specification for Uninterruptible Power Supplies (UPS) Issue 3; Oct 05	Replaces RT/E/PS/00007 Iss 2; Jun 03
This product specification states the requirements for Uninterruptible Power Supply (UPS) units when installed to provide power for Network Rail's operational infrastructure.		
NR/PS/ELP/00008	Product Specification for High Voltage Cables and Accessories for Traction Supplies Issue 3; Dec 05	Replaces RT/E/PS/00008 Iss 2; Dec 01
This Product Specification states the Directorate's requirements for polymeric insulated 6.35/11 kV, 12.7/22 kV and 19/33 kV single and three-core cables for DC Electrified Lines and 25 kV two-core concentric and single-core cables and accessories for AC Electrified Lines.		
NR/PS/ELP/00021	Product Specification for Standby Diesel Generators for Signalling Supplies Issue 2; Oct 05	Replaces RT/E/PS/00021 Iss 1; Oct 01
This product specification states the minimum requirements for diesel generating sets installed as fixed installations in order to provide standby power supplies for signalling equipment on Network Rail's operational infrastructure.		
NR/PS/ELP/00022	400V 3-phase AC Shore Supply Equipment for use in non Electrified Areas Issue 2; Feb 06	Replaces RT/E/PS/00022 Iss 1; Apr 01
This product specification states the requirements for the design, manufacture, testing, installation and commissioning of 400 V, 3 phase, 3 wire, 50 Hz shore supply equipment for use in non electrified areas in depots etc, to provide power supplies for train auxiliaries when the train is stabled and the on-board auxiliary power supplies are not in service.		
Note: NR/PS/ELP/00022 Issue 2, (aka NR/L2/RMVP/00022) is no longer mandatory, as of July 2012		
NR/PS/ELP/21072	Trackside Pantograph Monitoring Equipment Issue 2; Apr 06	Replaces RT/E/S/21072 Iss 1; Nov 97
This specification states the Directorate's performance requirements for equipment to monitor the dynamic performance of pantographs fitted to passing trains.		
NR/PS/ELP/27182	Insulating Shroud for Foot of Conductor Rail Issue 2; Apr 06	Replaces RT/E/S/27182 Iss 1; Dec 04
This product specification covers the design, manufacture and testing of a conductor rail shroud for use in conjunction with Network Rail standard conductor rail systems other than the dc Electrified lines in the Liverpool area.		
NR/PS/ELP/27187	Product Specification for Fused Isolators Issue 2; Apr 06	Replaces RT/E/S/27187 Iss 1; Dec 04
The Specification covers the design, manufacture and testing of silicone-rubber covered "primary" live-line insulated poles for use in live-line testing and earthing on electrified lines.		
NR/PS/ELP/27188	Silicone-Rubber Covered Primary Live Line Insulated Poles Issue 2; Apr 06	Replaces RT/E/S/27188 Iss 1; Dec 04
The Specification covers the design, manufacture and testing of silicone-rubber covered "primary" live-line insulated poles for use in live-line testing and earthing on electrified lines.		
NR/PS/ELP/27189	Ancillary Equipment Enclosures for 25kV Structure Mounted Outdoor Switchgear Issue 2; Feb 06	Replaces RT/E/S/27189 Iss 1; Dec 04
This specification covers the requirements for the design, manufacture and installation of these types of enclosures together with the preparation of associated drawings, manuals, provision of certain electrical fittings and their installation.		

NR/PS/ELP/27196	Specification for Outdoor Ancillary Cubicles for 25kV AC Isolation Transformers Issue 2; Feb 06	Replaces RT/E/S/27196 Iss 1; Dec 04
------------------------	--	---

This specification covers the electrical supply and pilot cables to the isolating transformers, from outdoor ancillary cubicles, installation and commissioning of outdoor ancillary cubicles and the electrical equipment housed within the cubicle. This specification includes the design, manufacture, erection, factory & site testing/commissioning and for the supply and installation testing/commissioning of the cubicle and electrical installation.

NR/PS/ELP/27219	750V DC Track Voltage Relays Issue 2; Apr 06	Replaces RT/E/S/27219 Iss 1; Dec 04
------------------------	---	---

This general specification covers the design and manufacture of track voltage relay systems, based on solid state technology, for use on 750V dc third rail electrification systems. The system specified in this document are to be used for indicating the state of energisation of a track section and to trip the associated dc circuit breakers in the event of a fault that creates low voltage conditions.

NR/PS/ELP/27220	Paired Core Compound Filled Supervisory Cable Issue 2; Apr 06	Replaces RT/E/S/27220 Iss 1; Dec 04
------------------------	--	---

This specification details the requirements for paired core compound filled supervisory cables for modem based supervisory systems operating in the VF range 300 to 3000 Hz.

Level 1

NR/L1/ELP/27000	Policy Requirements for Electrical Power Assets Issue 4; Jun 21	Compliance 31/07/21	Replaces NR/L1/ELP/27000 Iss 3; Dec 20
------------------------	--	-------------------------------	--

The requirements in NR/L1/ELP/27000 have been updated to reflect changes in the EP standard portfolio, the CP6 EP Asset Policy and the Routes' strategic business plans, the electrical safety vision and variations against the existing standard. The changes include:

- The transposition of relevant requirements from the CP6 Asset Policy into the standard;
- Removal of duplication and misalignment of requirements;
- Providing greater clarity on the difference between requirements and guidance;
- Incorporate any lessons learnt from recent renewals and enhancement schemes to drive improvements in safety, performance and/or delivery efficiency;
- Modification to the policy for PCB contaminated asset to align with changes to legislation.

Level 2

NR/L2/ELP/1007	Specification for 25kV A.C. Disconnectors, Earthing Switches and Switches Issue 3; Jun 19	Compliance 07/09/19	Replaces NR/L2/ELP/1007 Iss 2; Mar 17
-----------------------	--	-------------------------------	---

The purpose of this document is to define the specific requirements for Network Rail's 25 kV A.C. single-pole and two-pole disconnectors, earthing switches and switches for on-load applications, following as closely as possible those identified within the applicable British Standard BS EN 50152-2:2012

NR/L2/ELP/21015	Maintenance of Negative Traction Cables and Bonding for DC Conductor Rail Systems Issue 4; Sep 17	Compliance 02/12/17	Replaces NR/L2/ELP/21015 Iss 3; Jun 15
------------------------	--	-------------------------------	--

The purpose of this standard is to specify the planned periodic maintenance for negative traction cables and bonding on DC conductor rail traction power electrified lines.

NR/L2/ELP/21048	Maintenance of Positive Conductor Rail and Traction Cables for DC Conductor Rail Systems Issue 2; Sep 17	Compliance 02/12/17	Replaces NR/L2/ELP/21048 Iss 1 NR/SP/ELP/27048 Iss 2
------------------------	---	-------------------------------	---

The purpose of this standard is to specify the planned periodic maintenance for positive conductor rail and associated cables on DC conductor rail traction power electrified lines.

NR/L2/ELP/21085	Earthing and Bonding on A.C. Electrified Railways Issue 4; Jun 20	Compliance 05/12/20	Replaces NR/SP/ELP/21085 Iss E3; Apr 07 NR/GN/ELP/00004 Iss 2; Apr 06
------------------------	--	-------------------------------	--

The purpose of this standard is to define the fundamental design principles that support the development of earthing and bonding system design to meet legislative requirements and to achieve safety, economy and performance.

NR/L2/ELP/21087	Specification of Maintenance Frequency and Defect Prioritisation of Overhead Line Electrification Equipment Issue 9; Jun 20	Compliance 06/06/20	Replaces NR/L2/ELP/21087 Iss 8; Sep 18
------------------------	--	-------------------------------	--

This specification defines the required delivery frequency of maintenance work activities on Overhead Line Electrification Equipment by detailing the asset technical requirements to produce the optimum frequencies for inspection and defect removal, maximising availability through Risk Based Maintenance.

NR/L2/ELP/21088	General Maintenance Parameters for Overhead Line Electrification Equipment Issue 4; Jun 21	Compliance 05/06/21	Replaces NR/L2/ELP/21088 Iss 3; Dec 15
------------------------	---	-------------------------------	--

This standard defines the general maintenance parameters for all OLE systems currently in use on Network Rail controlled infrastructure. The maintenance parameters for each OLE system are detailed within the modules which support this standard.
(Contains NR/BS/LI/466)

NR/L2/ELP/21088/	Title	Issue	Issue Date
01	Glossary	1	Dec 2015
02	Mark 1 Maintenance Parameters (Contains NR/BS/LI/466)	1	Dec 2015
03	Mark 2 Maintenance Parameters (Contains NR/BS/LI/466)	1	Dec 2015
04	Mark 3 Maintenance Parameters (Contains NR/BS/LI/466)	1	Dec 2015

18	Sheffield Tram Train 750V DC OLE Maintenance Parameters (STT 750).	1	Jun 2021

NR/L2/ELP/21090	OLE Seasonal Preparation Response for Extreme Weather Issue 1; Dec 20	Compliance 05/12/20	Replaces New at Issue 118
------------------------	--	-------------------------------	-------------------------------------

The purpose of this document is to provide a systematic and structured approach to preparing and responding to the threat of adverse weather conditions, the triggers and monitoring regime that determine when action needs to take place to prevent overhead line failures that lead to disruption of the line, and the actions that are required to prevent any service affecting failures.

NR/L2/ELP/21120	E&P Records Management Process Issue 1 Jun 08	Compliance 01/12/08	Replaces New at Issue 68
------------------------	--	-------------------------------	------------------------------------

This document describes the management of new and altered Electrification and Plant Business Critical records for which the Network Records Group are custodians

NR/L2/ELP/21131	Warning and Other Signs for A.C. and D.C. Electrified Lines Issue 3; Dec 19	Compliance 01/01/20	Replaces NR/L2/ELP/21131 Iss 2; Dec 18
------------------------	--	-------------------------------	--

The purpose of this document is to provide a specification for the design and display of signs on Network Rail infrastructure to warn and provide safety information to persons on or near a.c and/or d.c electrified lines.

NR/L2/ELP/23001	Technical Requirements for High Voltage A.C. Switchgear in Traction and Non-Traction Systems Issue 1; Mar 21	Compliance 06/03/22	Replaces NR/PS/ELP/27236 Iss 2 NR/SP/ELP/21018 Iss 2
------------------------	---	-------------------------------	---

This standard states the specific requirements for the design, manufacture, and testing of High Voltage (HV) switchgear used for traction and non-traction power supplies on Network Rail infrastructure.

NR/L2/ELP/23001/	Title	Issue	Issue Date
MOD A	Technical Requirements for 25 kV A.C. Switchgear	1	Mar 2021
MOD B	Technical Requirements for 6.6, 11, 22 and 33 kV A.C. Switchgear	1	Mar 2021

NR/L2/ELP/23002	Specification for High Voltage AC Cables, AC Traction Earthing and Bonding Cables DC Traction Cables, Pilot Cables and Associated Accessories Issue 1; Dec 20	Compliance 05/06/21	Replaces NR/PS/ELP/21101 Iss 2
------------------------	--	-------------------------------	--

The purpose of this manual is to define the requirements for high voltage (HV) AC cables, AC traction bonding, DC traction power cables, multicore pilot cables and cable accessories to provide assurance that they are suitable for use on Network Rail infrastructure.

NR/L2/ELP/23002/	Title	Issue	Issue Date
02	750V and 1500V DC Traction Power Cables	1	Dec 2020
05	Earthing and Bonding Cables for A.C. Electric Traction Energy Sub-systems	1	Dec 2020

NR/L2/ELP/23003	Technical Requirements for Transformers, Rectifiers, and Oil Containment Systems Used in A.C. & D.C. Electrification Issue 1; Mar 20	Compliance 05/09/20	Replaces See below
------------------------	--	-------------------------------	------------------------------

Replaces: NR/L2/ELP/27400, NR/PS/ELP/27185, NR/SP/ELP/21019, NR/SP/ELP/21020, NR/SP/ELP/21021, NR/SP/ELP/21036, NR/SP/ELP/21075 (All Iss 2)
This standard states the specific requirements of the design, manufacture, and testing of transformers and transformer rectifier units used for traction supplies on Network Rail infrastructure. It also includes the requirements of oil containment systems applicable to liquid-filled transformers utilised for this purpose.

NR/L2/ELP/23003/	Title	Issue	Issue Date
MOD A	Technical Requirements for A.C. Electrification Transformers	1	Mar 2020
MOD B	Technical Requirements for D.C. Electrification Transformers and Rectifiers	1	Mar 2020
MOD C	Insulating Oil and Secondary Oil Containment Measures for Transformers used in A.C. & D.C. Electrification	1	Mar 2020

NR/L2/ELP/24011	Booster Transformer Outages Issue 3; Jun 08	Compliance	Replaces NR/SP/ELP/24011 Iss 2; Dec 05
------------------------	--	-------------------	--

This specification defines the process for managing the outages of booster transformers on Network Rail's 25 kV a.c., 50 Hz electrified lines. It details the actions required to be taken. Further and more detailed information on booster transformer outages can be found in the Network Rail guidance notes NR/GN/ELP/24015

NR/L2/ELP/24013	Notification of Energisation of New AC and DC Electrified Lines Issue 4; Dec 10	Compliance 05/03/11	Replaces NR/SP/ELP/24013 Iss 3; Apr 06
------------------------	--	-------------------------------	--

This procedure states the requirements for the design and the display of posters, the publication of notices and the provision of advice concerning the energisation of new, or extensions to ac and dc electrified lines and distribution equipment forming part of the traction distribution system.

NR/L2/ELP/25001	Electrical Safety Principles for New Electrification Issue 1; Sep 17	Compliance 02/10/17	Replaces New at Issue 105
------------------------	--	-------------------------------	-------------------------------------

This document provides design principles for new electrification projects that will mitigate the risks of working on or near electrified railways.

NR/L2/ELP/27009	Overhead Line Equipment Campaign Changes Issue 3; Mar 17	Compliance 03/06/17	Replaces NR/L2/ELP/27009 Iss 2; Dec 11
------------------------	--	-------------------------------	--

This standard is a catalogue of all approved campaign changes which apply to overhead line equipment (OLE) installed on the Network Rail infrastructure. It enables improved OLE asset performance by achieving a clear understanding of the extent of the risk of the overhead contact system (OCS) failing.

NR/L2/ELP/27023 Conductor Rail Heating Standard
Issue 1; Dec 20

Compliance
06/03/21

Replaces
New at Issue 118

The standard states the specific requirements for the design, manufacture and testing components and systems comprising the conductor rail heating installations for use on Network Rail's d.c. electrification infrastructure. The conductor rail heating system is designed to manage icing risk that could prevent effective current collection between the conductor rail and the current collection shoes on the train.

NR/L2/ELP/23023/	Title	Issue	Issue Date
MOD A	Technical Requirement for Conductor Rail Heating	1	Dec 2020
MOD B	Design and Installation Requirement for Conductor Rail Heating	1	Dec 2020

NR/L2/ELP/27032	Management of Incidents Involving Damage to the OLE Issue 1; Jun 15	Compliance 01/06/16	Replaces NR/GN/ELP/00003 Iss 2; Apr 06
------------------------	---	-------------------------------	--

This procedure mandates the response by Network Rail staff when damaged overhead line equipment (OLE) has to be restored following an incident. This includes:

- Route Operations and Control staff
- Maintenance recovery teams
- Route asset management teams

It is intended principally for those cases where the severity of damage requires the appointment of a Rail Incident Officer (RIO) on site in accordance with NR/L2/OCS/250 - Network Rail National Emergency Plan

NR/L2/ELP/27172	Conductor Rail Guard Boarding Issue 1; Jun 21	Compliance 04/09/21	Replaces New at Issue 120
------------------------	--	-------------------------------	-------------------------------------

This document details the requirements for the design of supplementary guard boarding fitted to the outside of the conductor rail, or to the outside of where the conductor rail would be, in depots or sidings to protect staff against accidental passing contact with live shoe gear on stabled trains.

NR/L2/ELP/27212	Maintenance of Mark I Overhead Line Equipment Issue 3; Aug 08	Compliance 26/08/08	Replaces NR/SP/ELP/27212 Iss 2; Apr 06
------------------------	---	-------------------------------	---

This specification details the maintenance tolerances for mark i design overhead line equipment and shows the background information and method of formulation.

NR/L2/ELP/27213	Maintenance of Mark IIIa Overhead Line Equipment Issue 3; Aug 08	Compliance 26/08/08	Replaces NR/SP/ELP/27213 Iss 2; Apr 06
------------------------	--	-------------------------------	---

This specification details the maintenance tolerances for mark iii a design overhead line equipment and shows the background information and method of formulation.

NR/L2/ELP/27214	Maintenance of Mark IIIb Overhead Line Equipment Issue 3; Aug 08	Compliance 26/08/08	Replaces NR/SP/ELP/27214 Iss 2; Apr 06
------------------------	--	-------------------------------	---

This specification details the maintenance tolerances for mark iii b design overhead line equipment and shows the background information and method of formulation.

NR/L2/ELP/27229	Specification for Remote Control Equipment for Electrical Distribution Systems Issue 2; Aug 08	Compliance 26/08/08	Replaces See below
------------------------	---	-------------------------------	------------------------------

Replaces: NR/L2/ELP/27229 Iss 1; Oct 05; RT/E/WI/27124 Iss 1; Dec 04; RT/E/WI/27129 Iss 1; Dec 04; RT/E/WI/27222 Iss 1; Dec 04

This specification states the directorate's minimum requirements for remote control equipment (also known as supervisory control and data acquisition, SCADA equipment) and systems for remote monitoring and control to electric traction power supply equipment on ac and dc traction systems from Electrical Control Rooms.

NR/L2/ELP/27238	Maintenance Specification for Fixed Plant Equipment Issue 7; Jul 14	Compliance 01/11/14	Replaces NR/L2/ELP/27238 Iss 6; Sep 11
------------------------	---	-------------------------------	--

This Network Rail standard specifies the general requirements and specific tasks to be performed upon on Network Rail's mechanical and electrical fixed plant.

NR/L2/ELP/27239	Maintenance Specification for Electrification Distribution Equipment Issue 2; Jun 08	Compliance 26/08/08	Replaces NR/SP/ELP/27239 Iss 1; Oct 05
-----------------	--	---------------------	--

This specification states the Directorate's general requirements that apply to all maintenance undertaken on Network Rail's electrical and plant equipment.

NR/L2/ELP/27275	A.C. Electric Traction Energy Subsystems - System Design Principles Issue 1; Dec 17	Compliance 03/03/18	Replaces New at Issue 106
-----------------	---	---------------------	---------------------------

The purpose of this standard is to:

- describe the design principles for a.c. electric traction power systems that would lead to compliance with the legislative requirements of Commission Regulation (EU) No. 1301/2014 of 18 November 2014 on the technical specifications for interoperability relating to the 'energy' subsystem of the rail system in the Union;
- allow equipment to be specified so as to prevent danger (as required by the Electricity at Work Regulations 1989);
- provide a standardised approach for the design, dimensioning and assessment of a.c. traction power systems and the provision of economically efficient system designs.

NR/L2/ELP/27307	Management of M&EE Safety Related Event Reports Issue 4; Dec 17	Compliance 03/03/18	Replaces NR/L2/ELP/27307 Iss 3; Sep 17
-----------------	---	---------------------	--

This standard provides a common safety related event (SRE) reporting process for M&EE comprising Power Distribution HV/LV, Contact Systems AC/DC, Traction and Rolling stock (T&RS) and Plant.

NR/L2/ELP/27311	Engineering Assurance Requirements for Design and Implementation of Electrical Power Issue 6; Sep 20	Compliance 05/12/20	Replaces NR/L2/ELP/27311 Iss 5; Jun 19
-----------------	--	---------------------	--

The purpose of this specification is to support the control of risk to Network Rail's infrastructure and railway operations that may arise as a result of any changes to electrical power assets by mandating an electrical power specific engineering assurance process in support of the main engineering assurance process described in NR/L2/INI/02009.

NR/L2/ELP/27314	Construction Assurance for Overhead Contact Systems Issue 2; Sep 19	Compliance 07/12/19	Replaces NR/L2/ELP/27314 Iss 1; Dec 17
-----------------	---	---------------------	--

The purpose of this standard is to define the Construction Assurance requirements for new or modified Overhead Contact Systems (OCS).

NR/L2/ELP/27730	Specification for 750V dc Switchgear Issue 2; Mar 18	Compliance 03/03/18	Replaces NR/L2/ELP/27730 Iss 1, Jun 17
------------------------	---	-------------------------------	--

The purpose of this document is to define the specific requirements for Network Rail's 750 V d.c. switchgear, following as closely as possible those identified within the applicable British Standard BS EN 50123 parts 1 – 4, 6, 7 Railway applications – Fixed installations – D.C. Switchgear.

NR/L2/ELP/27800	Specification for 25 kV a.c. Earthing Pantographs and Interface with Vehicle (On Track Plant or Road Rail Vehicles) Issue 1; Dec 20	Compliance 06/12/20	Replaces New at Issue 118
------------------------	--	-------------------------------	-------------------------------------

This standard defines the requirement for the production, design and testing of an earthing pantograph fitted to rail mounted plant or machinery. The earthing pantograph mitigates the risk of electric shock by providing an earth on the 25 kV a.c. overhead contact system as part of an implementation of an isolation in line with Network Rail's electrical safety principles and isolation processes.

NR/L2/ELP/27801	Portable 25 kV Earths and Earth Continuity Jumpers Issue 1; Mar 20	Compliance 06/06/20	Replaces New at Issue 115
------------------------	--	-------------------------------	-------------------------------------

The purpose of this standard is to define the functionality and performance requirements for 25 kV portable earthing equipment such that, when devices are maintained, stored and operated correctly, the risk of staff being subjected to an electric shock is mitigated should an electrical isolation be inadvertently re-energised or become charged.

NR/L2/ELP/40045	Electric Point Heating Issue 6; Aug 08	Compliance 26/08/08	Replaces NR/SP/ELP/40045 Iss 5; Dec 05
------------------------	---	-------------------------------	--

This Specification states the minimum requirements for the components and systems comprising the electric point heating installations for use on Network Rail infrastructure
(Contains NR/BS/LI/106)

NR/L2/ELP/40068	Principal Supply Point (DNO + DG) Specification Issue 1; Aug 07	Compliance 06/10/07	Replaces
------------------------	---	-------------------------------	-----------------

This specification describes the requirements for a 'DNO and DG' (Distribution Network Operator and Diesel Generator set) based principal supply points.

NR/L2/ELP/40069	Specification for Railway Pumping Installations Issue 1; Aug 07	Compliance 06/10/07	Replaces
------------------------	---	-------------------------------	-----------------

This Network Rail standard specifies the fundamental requirements for all railway pumping installations on Network Rail Infrastructure.

NR/L2/ELP/CTM015	Competence & Training in DC Conductor Rail Engineering Issue 2; Jun 19	Compliance 05/06/21	Replaces NR/SP/CTM/015 iss 1; Dec 06
-------------------------	--	-------------------------------	--

This specification sets out the minimum requirements for the assessment of personnel who undertake DC Conductor Rail maintenance and/or isolation work on Network Rail controlled infrastructure. It defines processes that shall be implemented and the standards that shall be achieved to ensure that personnel who undertake d.c. conductor rail maintenance and/or isolation work are competent to perform the work.

011	DCCR 11: Manage the Isolation and Earthing / Short Circuiting of Equipment	2	Jun 2019

Level 3

NR/L3/ELP/00110	Maintenance of Electrification, Plant, Signalling and Telecommunications Equipment, Incorporating Asbestos Materials or Components Issue 2; Jun 08	Compliance 26/08/08	Replaces RT/E/WI/00110 Iss E1; May 04
------------------------	---	-------------------------------	---

This Work Instruction supplements existing maintenance instructions with asbestos related requirements for electrification, plant, signalling and telecommunications equipment incorporating asbestos materials or components to ensure compliance with current legislation.

NR/L3/ELP/3091	DC Conductor Rail Electrified Lines Working Instructions Issue 5; Sep 19	Compliance 07/12/19	Replaces NR/L3/ELP/3091 Iss 4; Sep 18
-----------------------	--	-------------------------------	---

This Level 3 standard comprises of a suite of main modules and supporting modules. These modules provide a consistent approach to working on the operational railway with d.c. conductor rail electrification, in relation to the dangers arising from working on, or near to exposed live parts. This standard sets out the requirements associated

NR/L3/ELP/21067	Instructions for Making out Issuing and Cancelling High Voltage Permits to Work, Sanctions for Test and Circuit State Certificates Issue 5; Dec 11	Compliance 03/12/11	Replaces NR/L3/ELP/21067 Iss 4; Jun 11
------------------------	---	-------------------------------	--

This Level 3 Standard gives instructions for the making out, issuing and cancelling of Permits-to-Work, Sanctions-for-Test and Circuit State Certificates for work on high voltage equipment as detailed in Section 2. It forms part of a set of Network Rail Standards which govern safe working on or near all its electrical equipment, distribution systems and traction supply systems.
(Contains NR/BS/LI/461)

NR/L3/ELP/22001	Procedure and Competence Requirements for Persons Undertaking Works in the Vicinity of High Voltage Cables Issue 1; Aug 08	Compliance 26/08/08	Replaces
------------------------	---	-------------------------------	-----------------

This standard is to confirm works undertaken in the vicinity of High Voltage cables are conducted in a manner which minimises risk to persons, cables and the environment.

NR/L3/ELP/25000	Electrical Safety Measures for Working on the Operational Railway with Overhead Electrification (Trial Areas Only) Issue 1; Sep 19	Compliance 02/03/20	Replaces New at Issue 113
------------------------	---	-------------------------------	-------------------------------------

This modular standard provides a consistent approach to working on the operational railway with overhead electrification, in relation to the dangers arising from working on, or near to, exposed Live parts.

NR/L3/ELP/27051	Working Instructions for DC Electrified Lines in the Liverpool Area – Manual Issue 6; Sep 19	Compliance 03/01/20	Replaces NR/L3/ELP/27051 Iss 5; Dec 17
------------------------	---	-------------------------------	--

The purpose of this standard is to set:

- electrical safety requirements for persons working on or near to 3rd rail DC. electrified lines in the Liverpool area that will enable them carry out their duties without risk of danger from the conductor rail to themselves or other persons and
- railway operating and safety requirements that apply specifically to the underground railway in the Liverpool area and
- requirements for working of trains on the 3rd rail DC electrified lines and associated depots and sidings in the Liverpool area

NR/L3/ELP/27051/	Module	Issue	Issue Date
01	General Instructions for Working On or Near Conductor Rail Equipment	2	Sep 2019
02	Isolation and Emergency Switch Off of Conductor Rails	2	Sep 2019
03	Working of Trains	2	Sep 2019
04	Additional Instructions in Respect of Mersey, Link and Loop Sections	2	Sep 2019
05	Fire and Dangerous Substances, Liquids etc.	2	Sep 2019

NR/L3/ELP/27052	Working Instructions for DC Electrified Lines on the Northern City Line Issue 6; Jun 21	Compliance 05/06/21	Replaces NR/L3/ELP/27052 Iss 5; Mar 20
-----------------	---	------------------------	---

This document contains the working instructions for the dc electrified lines on the Northern City line.

NR/L3/ELP/27052/	Module	Issue	Issue Date
01	Description of Electrification System	1	Mar 2020
02	General Instructions for Working On or Near Conductor Rail Equipment	2	Jun 2021
03	Isolation of Conductor Rails	2	Jun 2021
04	Working of Trains	2	Jun 2021
05	Engineering Work and Obstruction of the Line Within the Tunnel	1	Mar 2020
06	Shut Down Arrangements	2	Jun 2021
07	Station Emergency Evacuation Instructions	2	Jun 2021

NR/L3/ELP/27077	Single to Three Phase Converter Installations Issue 3; Aug 08	Compliance 26/08/08	Replaces NR/WI/ELP/27077 Iss 2; Feb 06
-----------------	---	------------------------	---

This document describes the periodic maintenance requirements for all Single to Three Phase Converter installations associated with Signalling Supplies.

NR/L3/ELP/27115	Arrangements for Isolation of the Conductor Rail for Pre-planned Possessions of the Line Issue 4; Sep 18	Compliance 01/12/18	Replaces NR/L3/ELP/27115 Iss 3; Aug 08
-----------------	--	------------------------	---

These instructions specify the actions and documentation required for staff undertaking isolation in connection with possessions. These instructions supplement the requirements of the DC Electrified Lines Instructions, NR/L3/ELP/3091.

NR/L3/ELP/27122	Loss of High Voltage Supply to, or the Tripping of, a High Voltage Circuit Breaker for no Known Reason in a Substation Building Containing Metal Clad Switchgear With Bitumastic Compound Filled Busbar Chambers Issue 3; Jun 08	Compliance 26/08/08	Replaces NR/WI/ELP/27122 Iss 2; Apr 06
-----------------	--	------------------------	---

This instruction applies to switchgear operating at 11kV and above. If the High Voltage (HV) supply is lost or a HV circuit breaker operates for no known reason in a building equipped with metal clad switchgear with bitumastic compound filled busbar chambers and staff are present at that location, the following instructions shall be carried out. A list of substations where this instruction is applicable shall be produced within each territory and made available in the appropriate electrical control room instructions.

NR/L3/ELP/27134	Reporting of Electric Track Equipment Defects Issue 3; Aug 08	Compliance	Replaces NR/WI/ELP/27134 Iss 2; Feb 06
-----------------	---	------------	---

This work instruction details the procedures to be adopted for reporting defects found during inspections of electric track equipment.

NR/L3/ELP/27135	Recording Method for DC Safe Setting Calculations Issue 3; Jun 08	Compliance 26/08/08	Replaces NR/WI/ELP/27135 Iss 2; Apr 06
-----------------	---	------------------------	---

This work instruction defines the responsibilities of the Area Electrification and Plant (E&P) Engineer for maintaining the up to date records of all previously calculated d.c. section "safe" settings and carrying out all future d.c. section "safe" setting calculations.

NR/L3/ELP/27140	Application of Short Circuits for Conductor Rail Isolations Issue 4; Mar 19	Compliance 02/03/19	Replaces NR/L3/ELP/27140 Iss 3; Sep 18
-----------------	---	------------------------	---

This Work Instruction specifies the actions necessary for the application of and removal of short circuits required for the protection of conductor rail isolations as required by:-

- the D.C. Electrified Lines Instructions (NR/L3/ELP/3091)
- the Liverpool Area DC Lines Operating Instructions (NR/L3/ELP/27051)

NR/L3/ELP/27171	Electrical Insulating Gloves Issue 3; Jun 21	Compliance 04/09/21	Replaces NR/WI/ELP/27171 Iss 2; Apr 06
-----------------	--	------------------------	---

The purpose of this specification is to detail the requirements for insulating gloves for use in live working on electrical equipment up to 1000V AC / 1500 V DC.

NR/L3/ELP/27218	Preparation or Modification of Comprehensive Track Diagrams Issue 3; Aug 08	Compliance 26/08/08	Replaces NR/SP/ELP/27218 Iss 2; Apr 06
------------------------	---	-------------------------------	--

This standard is to provide a basis for the preparation or modification of comprehensive track diagrams. It shall apply to all comprehensive track diagrams issued as from the date of this document. Each diagram completed to this standard shall be endorsed, "Drawn to NR/SP/ELP/27218". Any diagrams without this endorsement may contain dual standards for an interim period.

NR/L3/ELP/27232	Work Instruction for Defect Reporting Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/WI/ELP/27232 Iss 1; Dec 05
------------------------	--	-------------------------------	--

This instruction details the procedure to be adopted for written reporting of defects found on:

- Substation plant, remote control and protection equipment using the standard defect report form TPS/P/155/1; and,
- HV and pilot/supervisory cables and associated equipment using a standard tick box report form TPS/P/154/1.

NR/L3/ELP/27237	Overhead Line Work Instructions Issue 22; Mar 21	Compliance 05/06/21	Replaces NR/L3/ELP/27237 Iss 21; Dec 20
------------------------	---	-------------------------------	---

The OLE work instructions are provided to establish the approved methods for overhead line work.

NR/L3/ELP/27240	Distribution Work Instructions Issue 11; Dec 20	Compliance 06/03/21	Replaces NR/L3/ELP/27240 Iss 10; Sep 20
------------------------	--	-------------------------------	---

This document contains Distribution Work Instructions for use by competent persons to carry out maintenance and fault rectification activities.
(Contains NR/BS/LI/464)

NR/L3/ELP/27250	Conductor Rail Equipment Working Instructions Issue 4; Dec 18	Compliance 02/03/2019	Replaces NR/L3/ELP/27250 Iss 3; Mar 18 NR/L3/ELP/27424 Iss 1; Mar 18
------------------------	---	---------------------------------	---

This standard holds the index for the conductor rail work instructions modules which control a range of risks to staff, equipment and trains associated with working on conductor rail equipment.

NR/L3/ELP/27404	Management of Request for Extended DC Feeding Arrangements Issue 1; Dec 09	Compliance 05/06/10	Replaces New at Issue 74
------------------------	---	-------------------------------	------------------------------------

The purpose of this procedure is to define the method to be followed on receipt of a request for extended d.c. feeding.

NR/L3/ELP/27406	Engineering Deliverable Requirements for Electrical Power Asset Design Issue 2; Dec 11	Compliance 03/03/12	Replaces NR/L3/ELP/27406 Iss 1; Jun 11
------------------------	---	-------------------------------	--

The purpose of this specification is to provide the requirements for the engineering deliverables required to support the stages of assurance defined in NR/L2/ELP/27311

NR/L3/ELP/27406/	Title	Issue	Date
MOD A	Generic Requirements	2	Dec 2011

NR/L3/ELP/29987	Working on or About 25kV AC Electrified Lines Issue 5; Dec 18	Compliance 01/06/19	Replaces NR/SP/ELP/29987 Iss 4; Sep 15
------------------------	--	-------------------------------	--

This modular standard will produce a consistent approach to working on or about 25 kV electrified lines in relation to the dangers arising from proximity to live equipment. This overarching standard for the modules will provide an introduction to the suite of modules and produce consistent use of terminology in the application of the standard.
(Contains NR/BS/LI/457)

Work Instructions

NR/WI/ELP/27096	Work Instruction for Production of Mean and Peak Current Profiles for 25kV AC Electrification Issue 2; Dec 05	Replaces RT/E/S/27096 Iss 1; Dec 04
------------------------	--	---

This instruction sets out the methods followed when producing mean and peak current profiles for the 25 kV ac, 50 Hz overhead line electrification system.

NR/WI/ELP/27114	Work Instruction for Carrying out Testing on all Electrified Lines Issue 2; Dec 05	Replaces RT/E/WI/27114 Iss 1; Dec 04
------------------------	---	--

This instruction sets out the requirements for carrying out testing of electrification systems and equipment.

NR/WI/ELP/27116	Standard for Replacement Components to be Used on Electrification Equipment Issue 2; Apr 06	Replaces RT/E/WI/27116 Iss 1; Dec 04
------------------------	--	--

This instruction defines the requirements of replacement components to be used on electrification equipment.

NR/WI/ELP/27127	Work Instruction for Network Rail/Euro Tunnel Electrical Interface at Folkestone Operating and Maintenance Procedures Issue 2; Dec 05	Replaces RT/E/WI/27127 Iss 1; Dec 04
------------------------	--	--

This instruction sets out the electrical operating and maintenance procedures for work on the overhead catenary system, permanent way and distribution equipment at the interface between Network Rail and Eurotunnel at Folkestone.

NR/WI/ELP/27173	Application of a BR Standard Short Circuiting Bar in an Emergency Issue 2; Apr 06	Replaces RT/E/WI/27173 Iss 1; Dec 04
------------------------	--	--

This work instruction gives details of the short circuiting bars provided for use in an emergency to isolate the current to the dc third rail system, also the DC fourth rail systems between Richmond and Gunnersbury or Wimbledon and East Putney, in certain defined circumstances.

NR/WI/ELP/27231	Work Instruction for the Operation of 11kV Supplies at Slade Green Depot, Ashford IECC and Victoria Station Issue 1; Dec 05	Replaces
------------------------	--	-----------------

This instruction covers the working arrangements for the above named sites and should be read in conjunction with the appropriate drawings.

RT/E/WI/00112	Isolation and Earthing Instructions for Cauldwell Depot TSC Issue E1; Sept 04	Replaces
----------------------	--	-----------------

These instructions apply specifically to Cauldwell Depot TSC for the isolation and earthing of Cauldwell Depot TSC complete including interconnector cable BE/CL and outgoing feeder cable CL/635.

RT/E/WI/27130	Local Operation Instruction – Weymouth Station Alternative Track Feeding Arrangements Issue 1; Dec 04	Replaces TPS/O/805
----------------------	--	------------------------------

Former BRB standard, migrated to Network Rail template, December 04

Guidance Notes (including Codes of Practice)

NR/GN/ELP/00011	Guidance Note for Uninterruptible Power Supply (UPS) Equipment Issue 3; Oct 05	Replaces RT/E/G/00011 Iss 2; Aug 02
------------------------	---	---

These guidance notes are intended to advise Network Rail staff about the principal considerations regarding the application of Uninterruptible Power Supplies (UPS) for railway infrastructure. This document is aimed at UPS systems with a rating of 20kVA upwards for signalling installations however much of the guidance is applicable to smaller units and other installations.

NR/GN/ELP/00015	Guidance Note for Signalling Power Supply Design Issue 4; Feb 07	Replaces NR/GN/ELP/00015 Iss 3; Oct 05
------------------------	---	--

This guidance note provides advice to Network Rail engineers, principal contractors and designers about the process required to design a signalling power supply for railway infrastructure. The principles contained within this guide should be applied to any signalling supply installation.

NR/GN/ELP/24015	Guidance for the Technical Management of Booster Transformer Outages Issue 2; Dec 05	Replaces RT/E/G/24015 Iss 1; Feb 02
------------------------	---	---

These guidance notes support the Network Rail Company procedure for managing the outages of booster transformers on 25kV ac 50 Hz electrified lines and assist the Zone Electrification and Plant Engineer in assessing the actions required to be taken in the event of booster transformer outage(s).

NR/GN/ELP/27006	Calculation of Protection Settings for DC Track Feeders Issue 2; Apr 06	Replaces RT/E/C/27006 Iss 1; Oct 98
------------------------	--	---

This document sets out approved procedures and data for the calculation of protection settings for track feeders on dc electrified routes. It is designed to present best available practice in order to meet the requirements of Network Rail Business Process Standard RT/E/S/21051.

NR/GN/ELP/27019	Design and Installation of Composite Aluminium/stainless Steel Conductor Rail and Associated Equipment on DC Electrified Lines Issue 2; Apr 06	Replaces RT/E/C/27019 Iss 1; Mar 98
------------------------	---	---

This guidance note states the best practice for the design, manufacture, installation and testing of aluminium/stainless steel composite conductor rail and associated equipment on Network Rail dc electrified lines. This document is to be read in conjunction with the electric track equipment drawings and NR/SP/ELP/21104 'Design and installation of electric track equipment for dc electrified lines'.

NR/GN/ELP/27020	Design and Installation of Steel Conductor Rail and Associated Equipment for DC Electrified Lines Issue 2; Apr 06	Replaces RT/E/C/27020 Iss 1; Mar 98
------------------------	--	---

This guidance note states the best practice for the design and installation of steel conductor rail and associated electric track equipment on Network Rail dc electrified lines including those which are designated 'standard current' and 'high current' This document is to be read in conjunction with the electric track equipment drawings and NR/SP/ELP/21104 'Design and installation of electric track equipment for dc electrified lines'.

(Contains NR/BS/LI/091)

NR/GN/ELP/27022	Design and Installation of Negative Bonding and Associated Equipment on DC Electrified Lines Issue 2; Apr 06	Replaces RT/E/C/27022 Iss 1 Mar 98
------------------------	---	--

This specification states the best practice for the design, manufacture, installation and testing of negative bonding and associated equipment on Network Rail dc electrified lines including those which are designated 'standard current' and those designated 'high current'. This document is to be read in conjunction with the electric track equipment drawings and NR/SP/ELP/21104 'Design and installation of electric track equipment for dc electrified lines'

NR/GN/ELP/27036	Guidance for Electric Cable Installations Associated With Plant and Machinery in B.R. Underground and Other Specified Locations Issue 2; Dec 05	Replaces RT/E/C/27036 Iss 1; Dec 04
------------------------	--	---

The objective of this document is to give guidance to plant and machinery and BES engineers who are responsible for the design and installation of cable systems in BR underground and other specified locations.

NR/GN/ELP/27043	Protection Standards and Methods of Calculation for 25kV AC Electrified Lines Issue 2; Feb 06	Replaces RT/E/C/27043 Iss 1; Dec 04
------------------------	--	---

RT/E/C/27043 has been re-issued as a SAF3 Business Process Document NR/GN/ELP/27043.

NR/GN/ELP/27138	DC Electrified Track, Electrical Protection Arrangements for Work on or Near Conductor Rails Issue 2; Feb 06	Replaces RT/E/WI/27138 Iss 1; Dec 04
------------------------	---	--

RT/E/WI/27138 has been re-issued as a SAF3 Business Process Document NR/GN/ELP/27138. This guidance note details the electrical protection arrangements when working on or near the conductor rail.

NR/GN/ELP/27186	The Installation of Switching Station Slab Foundation Bases Issue 2; Feb 06	Replaces RT/E/S/27186 Iss 1; Dec 04
------------------------	--	---

This guidance note describes the method of installation of concrete slab bases for switching stations.

NR/GN/ELP/27198	Identification of Bonds on all Electrified Lines Except the Southern Areas of Network Rail Issue 2; Apr 06	Replaces RT/E/S/27198 Iss 1; Dec 04
------------------------	---	---

This document assists all staff patrolling the track who are required to report the location and identity of bond cables which they regard as being damaged or defective. Reports of damaged and defective bonding must be reported to the E.C.O. by patrolling staff.

NR/GN/ELP/27233	Characteristics of Railway Electrification Traction Power Supplies Issue 1; Dec 05	Replaces
------------------------	---	-----------------

This document describes the electrification traction power systems forming part of the Network Rail's railway infrastructure.

NR/GN/ELP/27244	Guidance for Signalling Power Supplies Issue 1; Aug 06	Replaces
------------------------	---	-----------------

This document supports NR/SP/ELP/27243: Specification for signalling power supplies. This document provides guidance on the requirements of its counterpart standard.

NR/GN/ELP/27247	Guidance for Electrical Installations on Rail Premises (Including Plugs, Sockets, Trailing Leads and Appliances) Issue 1; Dec 05	Replaces
------------------------	---	-----------------

This document provides guidance on the requirements to be adopted for electrical installations on railway premises (including plugs, sockets, trailing leads and associated appliances). It should be used in conjunction with the current edition of the BS 7671 (I.E.E. Regulations for Electrical Installations) and any other relevant Regulations and Legislation.

NR/GN/ELP/27310	Management of Signalling Power Supplies Issue 1; Apr 06	Replaces
------------------------	--	-----------------

This document provides guidance on the responsibilities associated with the management of signalling power supplies. The document ensures that members of the engineering function understand their responsibilities within the current organisation.

NR/GN/ELP/27312	Impedances of 25kV AC Overhead Lines for Classic System Issue 1; Dec 06	Replaces
------------------------	--	-----------------

This guidance note contains information on the impedances of the 25 kV ac overhead lines and related items, for use by electrical design engineers who calculate line voltage drops or the settings of the feeder protection relays.

NR/GN/ELP/27313	Management of Building Services Issue 1; Dec 06	Replaces
------------------------	--	-----------------

This document provides guidance on the responsibilities associated with the management of building services. The document ensures that members of the engineering function understand their responsibilities within the current organisation.

NR/GN/ELP/27315	Management of Power Supplies to Telecomms Equipment Issue 1; Aug 07	Replaces
------------------------	--	-----------------

This document provides guidance on the responsibilities associated with the management of telecomms power supplies. The document ensures that members of the engineering function understand their responsibilities within the current organisation

NR/GN/ELP/27319	Fixed Plant Standards Maps Issue 2; Aug 07	Replaces NR/GN/ELP/27139 Iss 1; Jun 07
------------------------	---	--

The purpose of this guidance note is to provide information on the standards which apply to different areas within fixed plant. The guidance is provided in the form of maps for individual topic areas.

NR/GN/ELP/27407	Guidance on Taking Possession of Withdrawable DC Circuit Breakers Issue 1; Mar 11	Replaces New at Issue 79
------------------------	---	------------------------------------

This Guidance Note will provide all areas where DC circuit breakers are used with access to the best practise procedure for taking and clearing possession of withdrawable DC circuit breakers under routine maintenance

NR/GN/ELP/27415	Calculation and Analysis of Overhead Contact System Geometry Issue 1; Dec 15	Replaces New at Issue 98
------------------------	--	------------------------------------

This document describes the basic Overhead Contact System geometry calculations that are required to demonstrate compliance to the Company Standard NR/L2/ELP/21087 Specification of Maintenance of 25kV Overhead Line Electrification Equipment.

NR/GN/ELP/27600	Index of Standard Electrical Power Forms Issue 2; Mar 17	Replaces NR/L3/ELP/27600 Iss 1; Sep 10
------------------------	---	--

This standard provides the index and version control for standard electrical power forms. These forms are used to control a range of risks across the electrification and power asset base. In particular, their use will reduce the risks associated with misunderstandings by enabling consistency of data capture and terminology.

RT/E/C/45002	The Installation of Electric Point Heating Issue 4; Jun 2003	Replaces RT/E/C/45002 Iss 3; Oct 01
---------------------	---	---

This document states the best practice for the design, layout, installation and commissioning requirements of generic types of electric point heating systems.

RT/E/G/27225	Guidance Manual for Stations and Depots – Equipment Maintenance Issue 1; Jun 05	Replaces See below
---------------------	---	------------------------------

Replaces: RT/E/S/40002 – 04, 07, 08, 10, 11, 13, 15, 16, 18, 19, 21, 23, 26, 27, 32, 33, 36, 44

This guidance manual describes maintenance practices, including minimum maintenance attention, for station and depot plant and equipment, and is to be read in conjunction with the relevant contract documentation.

Special Inspection Notices

NR/SIN/186	Special Inspection of Ring Main Units Issue 1; Feb 20	Compliance 03/02/21	Replaces New at Issue 115
-------------------	--	-------------------------------	-------------------------------------

The purpose of this Special Inspection Notice is to:

- Identify Ring Main Unit assets across the Network Rail estate;
- Record asset details;
- Update the Ellipse records (or other asset database records, where applicable) of all Ring Main Units; and
- Identify the assets liable to loss of SF₆ gas and manage the risks.

NR/SIN/189	DC Frame Leakage Protection Issue 1; Jun 20	Compliance 06/02/21	Replaces New at Issue 116
-------------------	--	-------------------------------	-------------------------------------

The purpose of this Special Inspection Notice (SIN) is to confirm the operational status of DC Frame leakage systems on both first and second generation metal clad DC traction switchboards and to address any deficiencies found.

NR/SIN/198	PCB Contaminated Equipment Issue 1; Dec 20	Compliance 12/03/21	Replaces New at Issue 118
-------------------	---	-------------------------------	-------------------------------------

The purpose of this Special Inspection Notice (SIN) is to identify all Electrical Power equipment on Network Rail infrastructure that contains, or may contain, Polychlorinated Biphenyls (PCBs), as defined by the following legislation:

- The Environmental Protection (Disposal of Polychlorinated Biphenyls and other Dangerous Substances) (England and Wales) Regulations 2000 and
- The Environmental Protection (Disposal of Polychlorinated Biphenyls and other Dangerous Substances) (Scotland) Regulations 2000.

4.8 ENVIRONMENT

Company Standards

NR/CS/ENV/001 Environment Management Standard Issue 1; Apr 06 **Replaces**

This standard sets out the process which Network Rail shall use to manage the environmental risks associated with its operations.

Level 1

NR/L1/ENV/100 Environment and Social Performance Policy Issue 1; Sep 17 **Compliance** 03/03/19 **Replaces** New at Issue 105

This policy mandates requirements to improve Network Rail's environment and social performance through the mitigation of risks and improved delivery of environment and social management to leave a sustainable legacy for future generations..

Level 2

NR/L2/ENV/015 Environment and Social Minimum Requirements for Projects – Design and Construction Issue 9; Jun 21 **Compliance** 04/09/21 **Replaces** NR/L2/ENV/015 Iss 8; Mar 19,

This standard sets out Network Rail's minimum requirements for the management of environment and social risks and opportunities during design and/or construction activities.

NR/L2/ENV/115 Environment and Social Management System Requirements Issue 1; Mar 18 **Compliance** 03/03/19 **Replaces** New at Issue 107

This business process provides the framework requirements for Network Rail's business units to implement and maintain an Environment and Social Management System (ESMS), which relates to the management of risks associated with Environment and Social activities.

NR/L2/ENV/120 Waste Management Issue 1; Dec 19 **Compliance** 07/03/20 **Replaces** See below

Replaces: NR/GN/ENV/004 Issue 1, NR/L3/MTC/EN0100 Issue 3, NR/L3/MTC/EN0102 Issue 2

This business process enables Network Rail to:

- a) manage risks and maximise opportunities around production and management of waste to protect the business and the environment;
- b) reduce the amount of material we use and minimise the amount of waste we produce; and
- c) comply with waste management legislation and enable good practice.

NR/L2/ENV/121 Managing Environmental and Social Impact of Noise and Vibration Issue 1; Dec 19 **Compliance** 07/03/20 **Replaces** See below

Replaces: NR/L3/MTC/EN0103 Issue 2, RT/D/P/003 Issue 2, RT/LS/G/00022 Issue 2, RT/LS/G/00023 Issue 2

This business process identifies how to design out noise and vibration impacts in the design process, as well as, how to plan and manage these to minimise noise and vibration risks, as well as statutory nuisance complaints.

NR/L2/ENV/122 Biodiversity Issue 1; Mar 21 **Compliance** 01/01/22 **Replaces** New at Issue 119

This manual defines the requirements for Network Rail and its contractors to meet legislation and other compliance obligations to sustainably manage land and activities for biodiversity.

NR/L2/ENV/122/	Module	Issue	Issue Date
01	Management of Biodiversity	1	Mar 2021
02	Habitat Management Plan	1	Mar 2021

NR/L2/ENV/123 Prevention of Pollution to Land and Water Issue 1; Dec 19 **Compliance** 07/03/2020 **Replaces** See below

Replaces: NR/L3/MTC/EN0098 Issue 3, NR/L3/MTC/EN0101 Issue 3, NR/L3/MTC/EN0104 Issue 2

This business process discharges the legal responsibility of Network Rail and its contractors to:

- a) manage compliant discharges produced by site activities;
- b) prevent damage to the environment from:
 - 1) stored fuels, chemicals and oils (e.g. diesel, petrol, waste oil, mineral oil, etc.) associated with activities on Network Rail land;
 - 2) leaks and spills resulting from Network Rail activities; and
 - 3) leaks and spills resulting from third party activities which impact Network Rail's land and infrastructure.

NR/L2/ENV/124	Managing Diesel Engine Exhaust Emissions within Stations and Depots Issue 1; Jun 21	Compliance 10/12/21	Replaces New at Issue 120
----------------------	--	-------------------------------	-------------------------------------

This business process mitigates these risks:

- a) diesel rolling stock entering, leaving, and in particular, idling within Network Rail facilities with the potential to expose staff and passengers to short periods of high pollution levels;
- b) improper management of diesel engine exhaust emissions (DEEEs) that puts operational platform staff, maintenance staff and passengers at risk.

Level 3

NR/L3/ENV/044	Track Maintenance Renewal or Alteration - Used Ballast and Excavation Waste Handling Issue 4; Jun 18	Compliance 01/09/18	Replaces NR/L3/ENV/044 Iss 3; Sep 11
----------------------	---	-------------------------------	--

This work instruction sets out the process to:

- correctly identify and handle used ballast and other excavated infrastructure waste when disposing of it from rail worksites; and
- comply with the requirements of waste management legislation.

NR/L3/ENV/305	How to Change Utility Supplies Issue 2; Mar 18	Compliance 02/06/18	Replaces NR/L3/CPR/305 Iss 1; Dec 11
----------------------	---	-------------------------------	--

The purpose of this Network Rail standard is to:

- reduce the likelihood of supply disconnections which would disrupt the operational railway;
- identify the Network Rail approved supplier for new utility supplies;
- identify the correct type of metering to minimise Network Rail's utility cost;
- reduce the lead times in developing and implementing new utility connections;
- identify available utility capacity for new utility connections and requirements for increased capacity at other locations;
- improve the accuracy of the asset information held in Network Rail Energy Database (Energylink).

Guidance Notes (including Codes of Practice)

RT/E/G/00007	Generic Environmental Management for Light Maintenance Depots Issue 2; Apr 04	Replaces RT/E/G/00007 Iss 1; Apr 01
---------------------	--	---

This guidance note is intended for use by Network Rail and its tenants at Light Maintenance Depots, to provide generic general advice on environmental management. It is not intended to be exhaustive nor does it constitute part of the Depot Access conditions or any other lease condition.

4.9 ERGONOMICS

Specifications (including Procedures)

NR/SP/ERG/00005	Signalling Centre Desks Issue 1; Apr 07	Compliance 07/04/07	Replaces
------------------------	--	-------------------------------	-----------------

Signalling centre desks are an important component in ensuring that signalling staff can perform their required tasks efficiently and safely. The desk supports access to the VDU-based Signalling Control System (VSCS) and to a variety of telecommunication and information systems. The purpose of this product specification is to ensure that desks for VSCS and for related equipment support safe and efficient signalling operations for the duration of their design life.

RT/E/S/24017	Control Room Design Specification, Process and Guidance Issue 2; Apr 04	Compliance	Replaces RT/E/S/24017 Iss 1; Apr 03
---------------------	--	-------------------	---

This standard, recognises the industries increased awareness of the implication of ergonomics on the effective, safe and reliable performance delivery. This draws on the ISO Standard, but sets specific requirements appropriate to the railway environment using recent research findings.

Level 2

NR/L2/ERG/24020	Engineering Assurance Requirements for Ergonomics Within Design and Development Projects Issue 3; Dec 11	Compliance 03/03/12	Replaces NR/SP/ERG/24020 (RT/E/P/24020) Iss 2; Apr 04
------------------------	---	-------------------------------	--

The purpose of this standard is to support the structured application of ergonomics in the development or modification of railway infrastructure and supporting systems.

Associated Document

NR/L2/ERG/24020/	Module	Issue	Issue Date
F003	Project Classification Tables	1	Dec 2011

4.10 FIRE SAFETY POLICY

Level 1

NR/L1/FIR/100	Fire Safety Policy Issue 6; Sep 10	Compliance 04/12/10	Replaces NR/CS/FIR/100 Iss 5; Oct 06
----------------------	---	-------------------------------	--

The Company Fire Safety Policy mandates requirements applicable to the control of risks arising from fire to the safety of Network Rail workforce, contractors, customers, assets and business activity

Level 3

NR/L3/FIR/101	Fire Safety – Managed Stations Issue 7; Sep 10	Compliance 04/12/10	Replaces NR/GN/FIR/101 Iss 6; Aug 06
----------------------	---	-------------------------------	--

This standard sets the minimum standard required to meet the requirements of Fire Safety Policy NR/L1/FIR/100.

NR/L3/FIR/102	Fire Safety – Operational Estate Issue 7; Sep 10	Compliance 04/12/10	Replaces RT/GN/FIR/102 Iss 6; Aug 06
----------------------	---	-------------------------------	--

This standard sets the minimum standard required to meet the requirements of Fire Safety Policy NR/L1/FIR/100.

NR/L3/FIR/103	Fire Safety – Offices and Competency and Training Delivery Centres Issue 5; Sep 10	Compliance 04/12/10	Replaces NR/GN/FIR/103 Iss 4; Aug 06
----------------------	---	-------------------------------	--

This standard sets the minimum standard required to meet the requirements of Fire Safety Policy NR/L1/FIR/100.

NR/L3/FIR/105	Fire Safety – Property: Business Space, Freight & Miscellaneous Portfolios Issue 4; Sep 10	Compliance 04/12/10	Replaces NR/GN/FIR/105 Iss 3; Aug 06
----------------------	---	-------------------------------	--

This standard provides guidance to all staff with responsibility for the management of fire safety within the Business Space, Freight & Miscellaneous portfolios ("the Portfolio"). The standard sets out guidance for implementation of the fire safety policy deliverables contained within the Fire Safety Policy NR/L1/FIR/100.

NR/L3/FIR/106	Fire Safety – Maintenance Issue 2; Sep 10	Compliance 04/12/10	Replaces NR/GN/FIR/106 Iss 1; Aug 06
----------------------	--	-------------------------------	--

This standard sets the minimum standard required within Maintenance to meet the requirements of Fire Safety Policy NR/L1/FIR/100.

NR/L3/FIR/107	Fire Safety – Fire Risk Assessment Issue 3; Sep 10	Compliance 04/12/10	Replaces NR/GN/FIR/107 Iss 2; Aug 06
----------------------	---	-------------------------------	--

This Standard details the procedure to be taken by the Person Responsible for Fire Safety (PRFS) when undertaking fire risk assessments within Network Rail premises.

NR/L3/FIR/108	Fire Safety – Fire Extinguishers Issue 3; Sep 10	Compliance 04/12/10	Replaces NR/GN/FIR/108 Iss 2; Aug 06
----------------------	---	-------------------------------	--

This standard provides information on fire extinguishers to all staff with the responsibility for the management of fire safety. The document sets out requirements for implementation of the fire safety policy deliverables contained within the NR/L1/FIR/100 Fire Safety Policy.

NR/L3/FIR/109	Fire Safety – Fire Log Book Issue 3; Sep 10	Compliance 04/12/10	Replaces NR/GN/FIR/109 Iss 2; Aug 06
----------------------	--	-------------------------------	--

The fire logbook is used to record details of fire safety training, inspections, maintenance and incidents etc. as required by fire safety legislation and regulations.

4.11 INFORMATION MANAGEMENT

Level 1

NR/L1/INF/02200	Digital Preservation Policy Issue 1; Sep 20	Compliance 05/12/20	Replaces New at issue 117
------------------------	--	-------------------------------	-------------------------------------

This policy mitigates the risk of damage and loss as a result of hardware or software obsolescence by preserving digital records that are of evidential and historical value to the company thereby making them accessible and authentic on a permanent basis.

NR/L1/INF/02230	Corporate Archive Policy Issue 3; Dec 20	Compliance 06/03/21	Replaces NR/L2/INF/02230 Iss 2; Jun 15
------------------------	---	-------------------------------	--

This policy establishes the remit under which the Network Rail Corporate Archive operates, by establishing how records that are to be kept permanently for legal and regulatory reasons will be acquired, catalogued and managed.

NR/L1/INF/02232	Information Security Policy Issue 2; Mar 16	Compliance 07/06/16	Replaces NR/L1/INF/02232 Iss 1; Dec 09
------------------------	--	-------------------------------	--

The purpose of this standard is to set Network Rail's policy and priorities for Information Security. Information Security supports Network Rail's objectives by protecting the information it requires to achieve these. Network Rail has legal and regulatory obligations relating to Information Security

Level 2

NR/L2/INF/02018	Management of Infrastructure Records Issue 7; Mar 21	Compliance 05/06/21	Replaces NR/L2/INF/02018 Iss 6; Dec 10
------------------------	--	-------------------------------	--

This document specifies the records management process for new and altered infrastructure records for which the National Records Group are custodians.

This record management process mitigates the risk of records being lost or unavailable for update.

NR/L2/INF/02202	Records Management of Health and Safety Files Issue 6; Mar 16	Compliance 05/06/16	Replaces NR/L2/INF/02202 Iss 5; Jun 11
------------------------	---	-------------------------------	--

This standard specifies the records management requirements for the management of health and safety (H&S) files. This standard is compliant with the Construction (Design and Management) Regulations 2015 (CDM Regulations).

NR/L2/INF/02203	Controlled Publications - Issue and Receipt Issue 2; Dec 11	Compliance 03/03/12	Replaces NR/CS/INF/02203 Iss 1; Jun 06
------------------------	--	-------------------------------	--

This document mandates the minimum requirement for the management of the process for issuing a publication and any associated updates when acknowledgement of receipt by the recipient is required.

NR/L2/INF/02220	Document and Records Management Issue 1; Mar 09	Compliance	Replaces
------------------------	--	-------------------	-----------------

This Network Rail Standard specifies requirements to fulfil the Document Management Policy and the Records Management Policy

NR/L2/INF/02223	Information Classifications - Security Issue 3; Jun 18	Compliance 07/12/19	Replaces NR/L2/INF/02223 Iss 2; Mar 10
------------------------	---	-------------------------------	--

This standard specifies how Network Rail is aligned to the 'Government Security Classifications' policy. The classification of Network Rail data and information, and its associated special handling instructions and security controls, help to mitigate the risk of failing to protect the organisation from incidents which might lead to the loss of confidentiality, integrity or availability of data and information.

NR/L2/INF/02237	Electronic Signatures Issue 1; Mar 12	Compliance 01/09/12	Replaces New at Issue 83
------------------------	--	-------------------------------	------------------------------------

The intent of this standard is to allow the use of electronic signature solutions within Network Rail that are practical, secure and that balance risk and cost and provides a framework for regulating the use of electronic signatures.

NR/L2/INF/02242	Information Security Manual Issue 4; Dec 16	Compliance 03/06/17	Replaces NR/L2/INF/02242 Iss 3; Sep 16
------------------------	--	-------------------------------	--

The purpose of this manual is to:

- support the consistent identification, understanding and assessment of information security risks;
- provide up to date information against government guidelines, legislation, information security industry best practise and relevant ISO standards; and
- provide guidance to those impacted to help them make the changes necessary to people, process and technology.

Through consistent identification, understanding and assessment of information security risks, Network Rail is able to apply appropriate controls in order to manage information security risk at the appropriate level for the company.

Module	Title	Issue	Issue Date
01	Acceptable use of Information and Information Systems	3	Sep 16
02	Information Access Management	2	Sep 16
03	Password Requirements for System Development and System Architecture	1	Sep 16

Module	Title	Issue	Issue Date
04	Security Management and Backup of Information Systems	1	Dec 16
05	Cloud Computing Security Principles	1	Dec 16

Level 3

NR/L3/INF/02204	Controlled Publications - Process and Accountabilities Issue 3; Dec 11	Compliance 03/03/12	Replaces NR/L2/INF/02204 Iss 2; Jun 08
------------------------	--	-------------------------------	--

This standard provides a process to demonstrate that recipients have been issued with, received and acknowledged Controlled Publications.

NR/L3/INF/02221	Document Creation and Approval Issue 1; Mar 09	Compliance 01/10/09	Replaces New at Issue 71
------------------------	---	-------------------------------	------------------------------------

This Network Rail Standard is part of a suite of standards published to support the Document Policy and the Records Management Policy

NR/L3/INF/02222	Metadata for Documents and Records Issue 1; Mar 09	Compliance 01/10/09	Replaces New at Issue 71
------------------------	---	-------------------------------	------------------------------------

This Network Rail standard specifies the corporate Network Rail core metadata for documents and records.

NR/L3/INF/02224	Sharing Framework for Information Issue 2; Mar 19	Compliance 07/12/19	Replaces NR/L3/INF/02224 Iss 1; Mar 09
------------------------	--	-------------------------------	--

This document specifies the process by which Network Rail shares information with external parties to mitigate the risk of the uncontrolled release of data and information from Network Rail.

NR/L3/INF/02225	Records Management Issue 1; Mar 09	Compliance 01/10/09	Replaces New at Issue 71
------------------------	---	-------------------------------	------------------------------------

This Network Rail standard specifies the minimum required process for managing Network Rail corporate records.

NR/L3/INF/02226	Corporate Records Retention Schedule Issue 3; Dec 17	Compliance 03/03/18	Replaces See below
------------------------	---	-------------------------------	------------------------------

Replaces: NR/L3/INF/02226 Iss 2 Sep 10, NR/L3/INF/02226/Schedules Iss 3; Jun 17
Implementation of a Corporate Records Retention Schedule will allow Network Rail to:

- retain records for no longer than necessary
- implement a consistent approach across Network Rail
- promote the prompt and auditable disposal of records when they are no longer required
- to be compliant with legislation and regulation relevant to the business of Network Rail including in relation to personal data the Data Protection Act and its principles – see Network Rail's Data Protection Policy
- protect Network Rail's rights and interests and those of its employees, customers, suppliers and the general public affected by its operations.

NR/L3/INF/02231	Disposal of Records Issue 1; Sep 10	Compliance 03/03/11	Replaces New at Issue 77
------------------------	--	-------------------------------	------------------------------------

To provide a standard approach to the disposal of records no longer required by Network Rail in line with the Corporate Records Retention Schedule.

NR/L3/INF/02236	Scanning of Documentation Issue 2; Mar 12	Compliance 02/06/12	Replaces NR/L3/INF/02236 Iss 1; Mar 10
------------------------	--	-------------------------------	--

Large quantities of Network Rail's records collection remain, as they were created, in hard copy. This is particularly the case with Engineering documentation such as drawings. These drawings are progressively being scanned to enable the image to be loaded and viewed on electronic systems such as CCMS and eB.

This standard provides a process to enable any future scanning activity to be carried out consistently and according to corporately-agreed principles.

NR/L3/INF/02245	Working with Information Classifications - Security Issue 1; Jun 18	Compliance 07/12/2019	Replaces New at issue 108
------------------------	---	---------------------------------	-------------------------------------

This standard sets out how users apply information security classifications to all of Network Rail data and information, and covers the marking and protection of artefacts, including those held in IT systems, and the security controls that are to be followed and provides a process to comply with NR/L2/INF/02223.

Guidance Notes

NR/GN/INF/00850	Controlled Publications - Document Control Handbook Issue 4; Mar 11	Replaces NR/GN/INF/00850 Iss 3; Dec 09
------------------------	--	--

The purpose of this document is to update the Document Control Handbook to include latest information and publish the handbook as a Network Rail "Guidance Note"

4.12 INFRASTRUCTURE MAINTENANCE

Level 2

NR/L2/MTC/006	Maintenance and Contents of the National Hazard Directory Issue 6; Dec 08	Compliance 01/03/09	Replaces NR/L2/MTC/006 Iss 5; Jun 08
----------------------	---	-------------------------------	--

This specification provides the minimum content of the National Hazard Directory and stipulates the management arrangements, data maintenance and hazard notification process so that contractors and others can be supplied with current details of hazards at site-specific locations.

NR/L2/MTC/089	Arrangements for the Exchange of Asset Data and the Continuing Maintenance of Assets Undergoing Change Issue 2; Dec 18	Compliance 01/04/19	Replaces See below
----------------------	--	-------------------------------	------------------------------

Replaces: NR/L2/ADG/003 Iss 1, NR/L2/EBM/088 Iss 4, NR/L3/EBM/089, NR/L2/MTC/MG0208 Iss 1
This document provides a process for introducing new assets or affecting existing assets on Network Rail infrastructure through the development and implementation of an asset management plan (AMP).

NR/L2/MTC/02020	Ellipse for Network Rail Work Management Issue 7; Jun 08	Compliance 26/08/08	Replaces NR/SP/INF/02020 Iss 5; Oct 05
------------------------	---	-------------------------------	--

This standard mandates the use of Ellipse and its associated processes and procedures.

NR/L2/MTC/10662	Process for the Creation of New or Revised Maintenance Regimes Using Reliability Centred Maintenance (RCM) Issue 12; Mar 20	Compliance 06/06/20	Replaces NR/L2/MTC/10662 Iss 11; Jun 18 NR/GN/SIG/10670 Iss 2; Mar 11
------------------------	---	-------------------------------	--

This standard specifies the minimum requirements for the development and implementation of new or revised maintenance regimes developed using Reliability Centred Maintenance (RCM) analysis techniques to develop scheduled maintenance plans that will provide an acceptable level of operability, with an acceptable level of risk, in an efficient and cost effective manner.

NR/L2/MTC/10662/	Document Title	Issue	Issue Date
01	Training and Mentoring for Reliability Centred Maintenance (RCM)	1	Jun 2018
02	Generic End to End Process	2	Mar 2020
03	Contact Systems End to End Process	2	Mar 2020
04	Signalling End to End Process	2	Mar 2020
05	Track End to End Process	1	Jun 2018

NR/L2/MTC/I10218	Intelligent Infrastructure Remote Condition Monitoring Process Issue 1; Sep 10	Compliance 04/12/10	Replaces New at Issue 77
-------------------------	---	-------------------------------	------------------------------------

Historically, a number of Remote Condition Monitoring systems and approaches have been implemented on a local basis resulting in a non-standard approach to equipment, systems and processes. In December 2009, the Intelligent Infrastructure Remote Condition Monitoring Strategy was signed off. This has been put in place because of a need for a standard approach to Remote Condition Monitoring going forward. In future, all Remote Condition Monitoring implementations will comply with the strategy, and with these associated Standards.

NR/L2/MTC/MG0012	Route Business (Non-Operations) Briefing Process Issue 6; Sep 18	Compliance 01/12/18	Replaces NR/L2/MTC/MG0012 Iss 5; Sep 16
-------------------------	--	-------------------------------	---

This standard describes the process for the briefing of general, safety and technical information to:

- Staff in Network Rail's Route Businesses within the scope of this document; and
- Maintenance contractors employed in contracts administered in Route Businesses.

The process is designed to achieve a thorough and consistent approach to briefing to mitigate the risk of staff (including contractors) not being made aware of key safety messages and changes to standards and controls.

NR/L2/MTC/MG0042	The Definition and Review of Maintenance Compliance Indicators Issue 5; Sep 18	Compliance 01/12/18	Replaces NR/L2/MTC/MG0042 Iss 4; Mar 10
-------------------------	---	-------------------------------	---

The purpose of this standard is to explain and mandate the process for defining and reporting the measures associated with Maintenance Compliance Indicators. This is to enable the business to report on issues that are aligned to risk in regard to the management of maintenance delivery and that the measure has been specified and agreed by the relevant Professional Head.

NR/L2/MTC/MG0215	Demarcation of Maintenance Boundaries Issue 1; Mar 20	Compliance 05/12/20	Replaces New at Issue 115
-------------------------	--	-------------------------------	-------------------------------------

The purpose of this document is to reduce the risk of maintenance activities not being undertaken on the railway network as a consequence of unclear responsibility for boundary areas between maintenance entities by providing a process for managing the demarcation of boundaries on the rail network between:

- a) Network Rail and third parties;
- b) areas controlled by different Section Managers;
- c) areas controlled by different Maintenance Engineers;
- d) routes; and
- e) regions

NR/L2/MTC/PL0175	Infrastructure Maintenance Planning Handbook Issue 7; Sep 20	Compliance 05/12/20	Replaces NR/L3/MTC/PL0175 Iss 6; Mar 18
-------------------------	--	-------------------------------	---

This manual with its modules comprises issue 5 of the Infrastructure Maintenance Planning Handbook The handbook establishes consistent national planning rules and guidance for Infrastructure Maintenance.

NR/L2/MTC/PL0175/	Document Title	Issue	Issue Date
01	Handbook – Planning Introduction and Guidance	3	Sep 2020
02	Maintenance Processes for Planning	3	Sep 2020
03	Weekly Section Planning Meeting	3	Sep 2020
04	Daily and Weekly Visualisation Control Room Meetings	2	Mar 2018
05	Planning Line Blockages	2	Mar 2018
06	Guidance on Safety Critical Roles in Possessions or Worksite	2	Mar 2018

NR/L2/MTC/SE0117	Planned Assurance Inspections and Site Surveillance Issue 4; Sep 18	Compliance 01/12/18	Replaces NR/L3/MTC/SE0117 Iss 3; Dec 11
-------------------------	---	-------------------------------	---

This document defines the process for planning and reporting of planned assurance inspections and site surveillance which form part of the Level 1 assurance regime and are carried out to check that formal controls are being implemented correctly and unsafe acts or conditions are identified and corrected in order to deliver compliance and continual improvement for the business function.

Level 3

NR/L3/MTC/CP009	COVID-19 Contingency Plan: Safe Working Practices Issue 8; Feb 21	Compliance 15/02/21	Replaces NR/L3/MTC/CP009 Iss 7; Nov 20
------------------------	---	-------------------------------	--

The purpose of this document is to provide instruction for protecting our workforce and implementing consistent safety measures in line with the UK Government's guidelines on protection controls and social distancing measures following the outbreak of COVID-19.

NR/L3/MTC/EN0099	Protected Sites and Species Management Issue 2; Jun 08	Compliance 26/08/08	Replaces NR/PRC/MTC/EN0099 Iss 1; Jul 06
-------------------------	---	-------------------------------	--

The purpose of this procedure is to define operational requirements to ensure compliance with legislation and to prevent damage to both protected sites and species. This document complements Network Rail's biodiversity action plan that provides practical guidance on good management practices that maintain biodiversity.

NR/L3/MTC/EN0105	Pest Management Issue 2; Jun 08	Compliance 26/08/08	Replaces NR/PRC/MTC/EN0105 Issue 1; Jul 06
-------------------------	--	-------------------------------	--

The purpose of this procedure is to outline the management mechanisms for the types of pests commonly encountered on Network Rail land by the maintenance function.

NR/L3/MTC/EN0225	Environment Management System for Infrastructure Maintenance Issue 1; Jun 12	Compliance 01/09/12	Replaces NR/L3/MTC/EN0123 Issue 2; Jun 08
-------------------------	---	-------------------------------	---

The purpose of this standard is to outline how to comply with Network Rail's Environment Management System as specified in NR/SP/ENV/001 Corporate Environment Manual and also meets the requirements of BS EN ISO 14001: 2004 Environmental Management Systems – Requirements with guidance for use.

Associated Document

NR/L3/MTC/EN0225/	Module	Issue	Issue Date
DEP	Environment Management System for Infrastructure Maintenance : Depot Environment Pack	1	Jun 2012

NR/L3/MTC/EP0036	Preventive Maintenance of Operational Plant, 25kV Distribution, ETE and ETM Assets Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/EP0036 Iss 1; Dec 05
-------------------------	---	-------------------------------	--

The purpose of this document is to define the roles and responsibilities in the planning of routine maintenance activities of operational plant, 25kV distribution, Electric Track Equipment (ETE) and Electric Track Maintenance (ETM) assets to fit in with the national planning process and timescales in accordance with NR/SP/MTC/0056 "Specification for: Work and possession planning for the railway infrastructure (meetings management pack)".

NR/L3/MTC/EP0037	Review and Commit Planned Work Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/EP0037 Iss 1; Dec 06
-------------------------	---	-------------------------------	--

This procedure describes the process of obtaining the outline work plan from Ellipse, reviewing the outline plan and confirming what tasks are to be carried out during the week under review.

NR/L3/MTC/EP0038	Do Maintenance Task Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/EP0038 Iss 1; Dec 06
-------------------------	--	-------------------------------	--

The purpose of this document is to describe what must be done by any person carrying out a maintenance task on any of Network Rail's operational electrification and plant assets.

NR/L3/MTC/EP0039	Urgent Corrective Maintenance of E&P Assets Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/EP0039 Iss 1; Feb 07
-------------------------	--	-------------------------------	--

The purpose of this document is to define the process for urgent corrective maintenance of Network Rail electrification & plant assets.

NR/L3/MTC/EP0140	Procedure for Creating a Technical Query Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/EP0140 Iss 1; Jul 06
-------------------------	---	-------------------------------	--

The purpose of this document is to describe the procedure for managing the creation and response of technical queries.

NR/L3/MTC/EP0141	3 Phase High Voltage Outage Management Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/EP0141 Issue 1; Apr 07
-------------------------	---	-------------------------------	--

The purpose of this document is to define the roles and responsibilities in the planning and execution of maintenance activities on 3 phase high voltage electrical equipment to ensure supplies are maintained to the operational railway whilst traction power equipment is removed from service, and to enable Network Rail's contractual obligations to its electricity suppliers to be met.

NR/L3/MTC/EP0143	Inspection and Maintenance of OLE Issue 2; Jun 08	Compliance 26/08/08	Replaces NR/PRC/MTC/EP0143 Iss 1; Dec 05
-------------------------	--	-------------------------------	--

The purpose of this document is to define the roles and responsibilities in the planning of routine inspection and maintenance activities of Overhead Line Equipment assets to fit in with the national planning process and timescales as described in NR/SP/MTC/0056 "Specification for: Work and possession planning for the railway infrastructure (meetings management pack)."

NR/L3/MTC/EP0152	Working on or Adjacent to Conductor Rail Issue 5; Dec 11	Compliance 01/03/14	Replaces NR/L3/MTC/EP0152 Iss 4; Mar 10
-------------------------	---	-------------------------------	---

This standard details the process for planning safe access for Infrastructure Maintenance staff and / or contractors working on or adjacent to conductor rail(s).

NR/L3/MTC/EP0184	The Removal and Reporting of OLE Defects by the OCR Team Issue 1; Jun 08	Compliance 26/08/08	Replaces New at Issue 68
-------------------------	---	-------------------------------	------------------------------------

This document details the procedure to be followed to make sure that in any Overhead Conditions Renewals (OCR) work areas, the OCR team have full visibility of all associated high level OLE defects in the Ellipse maintenance job bank and where any defects are removed from the line, that these defects are recorded and formally closed out.

NR/L3/MTC/EP0185	OCR Incident Support for LNW Route E&P Engineers Issue 1; Jun 08	Compliance 26/08/08	Replaces New at issue 68
-------------------------	---	-------------------------------	------------------------------------

This document details London North Western Route's strategy to deliver level 3 and 4 incident support by the OCR team to incidents involving OHL equipment

NR/L3/MTC/EP0187	The Collection and Recording of E&P Condition Data Issue 2; Jun 08	Compliance 26/08/08	Replaces NR/L3/MTC/EP0187 Iss 1; Sep 07
-------------------------	---	-------------------------------	---

This document details the procedure to be followed to ensure that electrification and plant assets undergo condition assessments at the correct frequency and in accordance with the methodology specified in work instructions NR/L3/ELP/27237, NR/L3/ELP/27240 and NR/L3/ELP/27241.

NR/L3/MTC/EP0189	Overhead Condition Renewals (OCR) - Allocation Design Issue 1; Jun 08	Compliance 26/08/08	Replaces New at issue 68
-------------------------	--	-------------------------------	------------------------------------

The purpose of this document is to detail the extent of design activities undertaken by the OCR team and the design control procedures employed by the team in association with these activities.

NR/L3/MTC/EP0196	Management and Control of Projects by the OCR Team Issue 1; Jun 08	Compliance 26/08/08	Replaces New at Issue 68
-------------------------	---	-------------------------------	------------------------------------

The purpose of this procedure is to detail the systems and processes utilised for the management and control of renewal projects delivered by the Overhead Condition Renewals (OCR) team.

NR/L3/MTC/EP0232	OCR Team Materials Process Issue 1; Sep 10	Compliance 04/09/10	Replaces New at Issue 77
-------------------------	---	-------------------------------	------------------------------------

This document details the procedure to be followed to make sure that correct materials are made available for specific worksites

NR/L3/MTC/II0219	Intelligent Infrastructure Remote Condition Monitoring Manual Issue 3; Mar 20	Compliance 05/09/20	Replaces NR/L3/MTC/II0219 Iss 2; Dec 18
-------------------------	--	-------------------------------	---

This document provides a process for installation, use and management of II RCM remote condition monitoring systems of infrastructure assets so they are used in a correct and consistent manner to:

- enable proactive maintenance of Network Rail assets to be undertaken based on historic performance data so that the performance of the asset continues to meet its specified level; and
- deliver improved fault finding on failed or failing assets through identifying in specific cases the system or component that has failed, thereby directing the fault staff to this component, resulting in reduced unavailability of the system or equipment.

NR/L3/MTC/II0219/	Module	Issue	Issue Date
01	Design, Configuration, Installation, Commissioning and Calibration of Intelligent Infrastructure Remote Condition Monitoring	3	Mar 2020
02	Management of Alerts and Alarms from Remote Condition Monitoring	3	Mar 2020
03	Maintenance of Assets Fitted with Remote Condition Monitoring	3	Mar 2020

NR/L3/MTC/MG0020	Management of Amey 3rd Line HABD Support Contract Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/MG0020 Iss 1; Feb 06
-------------------------	--	-------------------------------	--

This document is to ensure that the Amey 3rd line HABD support contract is reviewed both commercially and technically within the year.

NR/L3/MTC/MG0021	Corrective Maintenance (Faulting) of Operational Telecoms Assets Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/MG0021 Iss 1; Oct 05
-------------------------	---	-------------------------------	--

The purpose of this document is to define the process for corrective maintenance of Network Rail operational telecoms assets. It applies to all maintenance technical disciplines.

NR/L3/MTC/MG0043	Audit Protocol Preparation Within Maintenance Organisation Issue 3; Dec 08	Compliance 01/03/09	Replaces See below
-------------------------	---	-------------------------------	------------------------------

Replaces: NR/L3/MTC/MG0043 Iss 2; Jun 08, NR/L3/MTC/MG0044 Iss 2; Jun 08, NR/L3/MTC/MG0045 Iss 2; Jun 08

The procedure establishes arrangements for managing the biennial audits of the Maintenance Delivery Units which are part of Network Rail's National Core Audit Programme.

NR/L3/MTC/MG0063	Procedure for the Requisitioning of Railway Spares Issue 2; Jun 08	Compliance 02/08/08	Replaces NR/PRC/MTC/MG0063 Iss 1; Apr 06
-------------------------	---	-------------------------------	--

This procedure details the processes to be followed when requisitioning railway spares and consumables via the Exel Integrator system.

NR/L3/MTC/MG0082	Managing Claims Within Maintenance Organisation Issue 2; Jun 08	Compliance 02/08/08	Replaces NR/PRC/MTC/MG0082 Iss 1; Jun 06
-------------------------	--	-------------------------------	--

To ensure when damage to the infrastructure is caused by a third party, the incurred cost of remedial work, plant and materials is recorded and collated so that claims can be processed by Network Rail for re-imburement. Third party incidents are identified from the Integrated Fault Control (IFC) log.

NR/L3/MTC/MG0164	Exploiting New Technology Issue 2; Jun 08	Compliance 02/08/08	Replaces NR/PRC/MTC/MG0164 Iss 1; Jun 07
-------------------------	--	-------------------------------	--

This procedure sets out the process and controls for the introduction of new technology into the Maintenance Function within Network Rail, including sponsorship, research and development.

NR/L3/MTC/MG0173	Monitoring of Spoken Safety Communications Issue 3; Jun 19	Compliance 07/09/19	Replaces NR/L3/MTC/MG0173 Iss 2; Mar 18
-------------------------	---	-------------------------------	---

This document supports the delivery of NR/L2/OPS/037 and provides a process to mitigate risks to Network Rail caused by inadequate communication.

NR/L3/MTC/MG0176	Ellipse Management Handbook Issue 6; Sep 20	Compliance 05/12/20	Replaces NR/L3/MTC/MG0176 Iss 5; Mar 17
-------------------------	--	-------------------------------	---

Ellipse is Network Rail's primary asset register and Maintenance Work Management system. It is used by the Maintenance function to record details of cyclic tasks, work arising and other work.

NR/L3/MTC/MG0176/	Title (and any applicable Letters of Instruction)	Issue	Issue Date
01	Purpose, Scope, Definitions and Abbreviations	4	Sep 2010

NR/L3/MTC/MG0176/	Title (and any applicable Letters of Instruction)	Issue	Issue Date
11	Prioritisations, Reprioritisations and Cancellations	1	Mar 2017

* = Withdrawn

NR/L3/MTC/MG0180	Maintenance Compliance Indicator Reporting Issue 3; Sep 18	Compliance 01/12/18	Replaces NR/L3/MTC/MG180 2; Jun 09
-------------------------	---	-------------------------------	--

The purpose of this document is to provide a process for the reporting of the maintenance compliance indicators at all levels throughout the business. Maintenance compliance indicators are defined by each Professional Head [Discipline] to manage areas of significant risk to the business

NR/L3/MTC/MG0183	Maintenance Timesheet process Issue 2; Jun 08	Compliance 26/08/08	Replaces NR/L3/MTC/MG0183 Iss 1; Mar 08
-------------------------	--	-------------------------------	---

The purpose of this procedure is to improve the quality and consistency in timesheet reporting provided by frontline Maintenance staff in support of the Productivity Framework. It does this by identifying who is responsible for the various stages during the submission and processing of timesheets and when they need to do this by

NR/L3/MTC/MG0194	Management of Third Party Complaints Issue 4; Dec 18	Compliance 02/03/19	Replaces NR/L3/MTC/MG0194 Iss 3; Mar 12
-------------------------	---	-------------------------------	---

The purpose of this document is to provide a process for Infrastructure Maintenance (IM) to assist in delivering Network Rail's Contacts & Communities Key Performance Indicator relating to managing Service Requests arising from third party enquiries received by the National Helpline.

NR/L3/MTC/MG0197	Power Supply Outage Management Issue 2; Jun 12	Compliance 02/06/12	Replaces NR/L3/MTC/MG0197 Iss 1; Sep 11
-------------------------	---	-------------------------------	---

The purpose of this Network Rail standard is to specify the key activities within the power outage management process.

NR/L3/MTC/MG0210	Management of Maintenance Work Within a Worksite to Prevent a Possession Overrun Issue 3; Jun 19	Compliance 07/09/19	Replaces NR/L3/MTC/MG0210 Iss 2; Sep 10
-------------------------	---	-------------------------------	---

This document describes the procedure for identifying works which import a level of risk and how this risk is mitigated or controlled to prevent or reduce the impact of a possession overrun..

NR/L3/MTC/MG0213	Index of Standard Maintenance Forms Issue 18; Jun 21	Compliance 04/09/21	Replaces NR/L3/MTC/MG0213 Iss 17; Mar 21
-------------------------	---	-------------------------------	--

This standard provides the index and version control to the Standard Maintenance Forms

NR/L3/MTC/MG0214	Critical Asset – Repeat Failure Escalation Process Issue 2; Dec 18	Compliance 02/03/19	Replaces NR/L3/MTC/MG0214 Iss 1; Dec 09
-------------------------	---	-------------------------------	---

This procedure mandates the escalation process for managing the repeat failure of designated critical assets within a Route Delivery Unit.

NR/L3/MTC/MG0217	Infrastructure Maintenance Engineering Management Plan for Projects Issue 1; Dec 10	Compliance 05/03/11	Replaces New at Issue 78
-------------------------	--	-------------------------------	------------------------------------

This document specifies how Infrastructure Maintenance comply with NR/L2/INI/02009 Engineering Management for Projects. It shall be read in conjunction with NR/L2/INI/02009

NR/L3/MTC/MG0221	Network Operations Non-Operations Staff Management Self Assurance Procedure Issue 5; Sep 18	Compliance 01/12/18	Replaces NR/L3/MTC/MG0221 Iss 4; Jun 16
-------------------------	--	-------------------------------	---

To mandate the arrangements and set out the framework of self-assurance in the Network Operations function for non-operations staff.

NR/L3/MTC/MG0224	Infrastructure Maintenance Process for the Management of Fatigue and Control of Working Hours for Employees Undertaking Safety Critical Work Issue 1; Jun 11	Compliance 03/09/11	Replaces NR/L3/ERG/004 Iss 1; Mar 09 NR/L3/ERG/07 Iss 1; Dec 10
-------------------------	---	-------------------------------	--

This standard defines the requirements for managing fatigue and working hours for Infrastructure Maintenance employees, and those employed under contract by Infrastructure Maintenance, who undertake safety critical work. Its purpose is to reduce the risks to health and safety that are associated with working patterns, shift work and excessive working hours.

NR/L3/MTC/MG0229	Infrastructure Maintenance Restructure - Cross Boundary Working for S&T Response Issue 2; Sep 10	Compliance 05/03/11	Replaces
-------------------------	---	-------------------------------	-----------------

The Maintenance function restructure (Phase 2bc) has included a review and optimisation of the national signalling maintenance response organisation. Signalling maintenance response teams shall now be required to respond to failures on areas where they may not be currently familiar.

This standard is principally aimed at Infrastructure Maintenance Delivery Managers, Infrastructure Maintenance Engineers, Signalling & Telecoms Maintenance Engineers (S&TME), Route Control Managers, Incident Controllers, Section Manager [Signalling], Section Supervisor [Signalling], and Signalling Maintenance Response Team Leaders.

NR/L3/MTC/MG0230	Infrastructure Maintenance Restructure – Competency Matrix Issue 2; Dec 10	Compliance 05/03/11	Replaces NR/L3/MTC/TE0230 Iss 1*
-------------------------	--	-------------------------------	--

The procedure requires Line Managers to review the master competency matrix and create a bespoke 'section competency profile' for each of the roles within their section. This shall be based on the requirements of master competency matrix, company standards and business needs. The section competency profile shall be used to denote the required competencies against which each post holder may be assessed.

NR/L3/MTC/MG0231	Infrastructure Maintenance Restructure - Implementing Hosting Issue 2; Sep 10	Compliance 05/03/11	Replaces NR/L3/MTC/TE0230 Iss 1*
-------------------------	---	-------------------------------	--

This 'How to' guide gives details of the process to be followed to introduce a hosting arrangement between delivery units or specialist suppliers for maintenance and life extension/renewals activities.

*Not formally Issued

NR/L3/MTC/OTP0233	Rail Grinding Through Obstacles and Lineside Furniture Areas (In Traffic) Issue 1; Dec 20	Compliance 06/03/21	Replaces New at Issue 118
--------------------------	---	-------------------------------	-------------------------------------

This document sets the process for rail grinding through rail mounted equipment to address compatibility issues between rail mounted equipment installed in accordance with GIRT/7073 Issue 2, figure A.2 and the required grinding envelope specified to achieve NR1 and NRHR1 rail profiles in order to control the risk of striking rail mounted equipment at the lower regions of grinding activity when grinding trains encroach the area available for all infrastructure.

NR/L3/MTC/PL0067	Highways Interface Planning in Infrastructure Maintenance Issue 3; Mar 09	Compliance 07/03/09	Replaces NR/L3/MTC/PL0067 Iss 2; Jun 08
-------------------------	---	-------------------------------	---

This procedure defines the process for complying with highways legislation for maintenance work that occupies or closes publicly maintained highways.

NR/L3/MTC/PL0095	Planning of Overhead Line Condition Renewals Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/L3/MTC/PL0095 Iss 1; Jun 08
-------------------------	--	-------------------------------	---

The purpose of this document is to standardise the process, roles and responsibilities for the planning of Overhead Line Condition Renewals (OCR) activities on Network Rail Infrastructure.

NR/L3/MTC/PL0151	Works Planning Using PossMan Issue 3; Jun 09	Compliance 05/09/09	Replaces NR/L3/MTC/PL0151 Iss 2; Aug 08
-------------------------	--	-------------------------------	---

This standard maintenance procedure describes the national process for planning of work requiring track access on the railway using the PossMan software tool. In this document, 'track access' refers to possessions that affect the running of booked services. PossMan allows Infrastructure Maintenance to plan the work within access and secure the required resources. PossMan gives users accurate possession-related data with the minimum of manual intervention.

NR/L3/MTC/PL0159	Short-term Works Planning in Infrastructure Maintenance Issue 3; Jun 09	Compliance 05/09/09	Replaces NR/L3/MTC/PL0159 Iss 2; Aug 08
-------------------------	---	-------------------------------	---

This standard maintenance procedure describes the national process for short-term planning of maintenance work on the railway infrastructure and details individual responsibilities from the issuing of the Confirmed Period Possession Plan to the completion and closure of the work.

NR/L3/MTC/PL0160	Medium-term Works Planning in Infrastructure Maintenance Issue 3; Jun 09	Compliance 05/09/09	Replaces NR/L3/MTC/PL0160 Iss 2; Aug 08
-------------------------	--	-------------------------------	---

This standard maintenance procedure describes the national process for medium-term planning of maintenance work on the railway infrastructure and details individual responsibilities from the briefing of the Annual Integrated Work Plan to the Infrastructure Maintenance Delivery Unit at QT-38 to the issue of the quarterly plan on or before T-26

NR/L3/MTC/PL0211	Planning of Engineering Access & NDS-Supplied Resource for Infrastructure Maintenance Delivery Units Issue 1; Jun 09	Compliance 05/09/09	Replaces NR/L3/TRK/3220 Iss 3; Aug 08
-------------------------	--	-------------------------------	---

This standard defines how Infrastructure Maintenance Delivery Units apply, negotiate, confirm and change requests for the Planning of Engineering Access & NDS-Supplied Resource in accordance with NDS standard NR/L2/NDS/202.

NR/L3/MTC/PL0215	Communicating with the Public Issue 1; Mar 10	Compliance 05/06/10	Replaces New at Issue 75
-------------------------	---	-------------------------------	------------------------------------

This document details the process and requirements for public communication associated with infrastructure work that may cause public enquiries or complaints. Work that can cause a nuisance to the public in the immediate vicinity of the work or access points include:

- High Visual Impact e.g. fencing erection, structure erection, depot alterations, vegetation removal
- High Nuisance e.g. noise, light, heavy plant movement
- High Environmental Impact e.g. vegetation removal, permanent lighting

NR/L3/MTC/RCS0216 Risk Control Manual Issue 21; Jun 21

Compliance
04/09/21Replaces
NR/L3/MTC/RCS0216
Iss 20; Mar 21

This standard provides the index and version control of risk control sheets that mitigate risks associated with general activities, general hazards, small plant, mobile plant, live working and functional activities (track/signalling etc) within Maintenance.

Each risk control sheet provides a summary of the key hazards and controls identified within a standard work activity risk assessment. Risk control sheets standardise safe working arrangements across Network Rail's Maintenance function.

The RCS format is the preferred means to communicate risk controls to work teams

NR/L3/MTC/SE0089 New Starters Mentoring (Passport Scheme) Issue 2; Jun 08 **Compliance** 26/08/08 **Replaces** NR/PRC/MTC/SE0089 Iss 1; May 06

The purpose of this procedure is to ensure that the Maintenance function:

- fully understands the implications of new employees' perception of risk.
- understands and manages the needs of new employees.
- correctly incorporates new employees into the workforce, allowing them the time and variety of work to increase their experience levels.
- identifies inability within a new or transferred member of staff to comply with the requirements of company and Railway Group requirements in an environment which exposes them to the minimum of risk.

NR/L3/MTC/SE0090 Health & Safety Notice Boards Issue 3; Jun 10 **Compliance** 04/09/10 **Replaces** NR/L3/MTC/SE0090 Iss 2; Jun 08

This document details the minimum requirements for Health & Safety Notice Boards and offers a standardised approach to the content of Health and Safety Notice Boards. The document aims to provide a consistency of approach to the presentation of Health and Safety information to Network Rail Maintenance staff

NR/L3/MTC/SE0091 Worksafe Review Procedure Issue 2; Jun 08 **Compliance** 26/08/08 **Replaces** NR/PRC/MTC/SE0091 Iss 1; Jun 06

This document is to provide maintenance staff, either directly employed by Network Rail or via a third party, with a mechanism to deal with the review of situations where staff had felt that they or others may have been in serious or imminent danger and have used the Network Rail worksafe procedure NR/SP/OHS/00112.

NR/L3/MTC/SE0115 Confined Spaces – Working and Entry Procedure Issue 2; Jun 08 **Compliance** 26/08/08 **Replaces** NR/PRC/MTC/SE0115 Iss 1; Feb 06

This procedure defines the actions and controls to be applied before entering any Confined Space, to ensure the work can be carried out safely and without risk of injury or death.

NR/L3/MTC/SE0116 Work Activity Risk Management Issue 2; Jun 08 **Compliance** 26/08/08 **Replaces** NR/L3/MTC/SE0116 Iss 1; Dec 07

This procedure describes the process by which the Maintenance function will:

- assess new risks for routine and non-routine work activities carried out in Maintenance
- document and make available the findings from those risk assessments to Maintenance employees
- ensure the principles described in NR/SP/OHS/00102 are applied when carrying out Risk Assessments for new tasks in Maintenance

NR/L3/MTC/SE0120 Supply and Maintenance of Personal Protective Equipment Issue 2; Jun 08 **Compliance** 26/08/08 **Replaces** NR/PRC/MTC/SE0120 Iss 1; Dec 06

The purpose of this document is to describe how Network Rail complies with the Personal Protective Equipment (PPE) at Work Regulations, 1992. The procedure enables managers to ensure that suitable PPE is provided where staff may be exposed to a risk to their health or safety while at work.

NR/L3/MTC/SE0195	Hand Arm Vibration Management Issue 3; Mar 10	Compliance 01/12/08	Replaces NR/L3/MTC/SE0195 Iss 2; Dec 08
-------------------------	--	-------------------------------	---

This standards details the process by which Infrastructure Maintenance:

- Assess the risks to Infrastructure Maintenance function employees performing tasks with hand held tools and machines which have the potential to cause Hand Arm Vibration Syndrome (HAVS) or carpal tunnel syndrome;
- Identify Infrastructure Maintenance employees affected into the prescribed level of necessary health surveillance;
- Comply with the requirements described in NR/L2/OHS/00113 are applied when carrying out health surveillance with Infrastructure Maintenance.

NR/L3/MTC/SE0206	Introduction and Management of Lookout Operated Warning System (LOWS) Equipment Issue 1; Mar 09	Compliance 06/06/09	Replaces New at Issue 71
-------------------------	--	-------------------------------	------------------------------------

The purpose of this procedure is to detail the arrangements to manage the safe, consistent introduction and management of Lookout Operated Warning Systems (LOWS) equipment into operational use on Network Rail infrastructure by Maintenance Delivery Units and other Network Rail delivery functions.

NR/L3/MTC/SE0207	Use of Lookout Operated Warning System (LOWS) Equipment Issue 1; Mar 09	Compliance 06/06/09	Replaces New at Issue 71
-------------------------	--	-------------------------------	------------------------------------

The purpose of this work instruction is to detail the consistent set up and operation of Lookout Operated Warning System (LOWS) equipment in use on the infrastructure

NR/L3/MTC/SE0212	Management of Contractors Issue 2; Mar 12	Compliance 02/06/12	Replaces NR/L3/MTC/SE0212 Iss 1; Sep 09
-------------------------	--	-------------------------------	---

The purpose of this standard is to describe the controls to be applied in the safety management of Contractors undertaking work for the Network Operations (Maintenance) function in order to manage the imported safety risk.

NR/L3/MTC/SE0220	Planning and Delivering Safe Working at Height Issue 2; Sep 20	Compliance 06/03/21	Replaces NR/L3/MTC/SE0220 Iss 1; Dec 10
-------------------------	---	-------------------------------	---

This standard provides a process for how to plan and risk assess maintenance and works delivery activities which require work at height to comply with The Work at Height Regulations 2005 and control the risk of a person or object falling.

NR/L3/MTC/SG0019	Failure Escalation of Servo Type Hot Axle Bearing Detector (HABD) Equipment Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/SG0019 Iss 1; Feb 06
-------------------------	--	-------------------------------	--

This document covers the failure escalation process for failures of HABD equipment on Network Rail infrastructure.

NR/L3/MTC/TE0066	Inspection and Surveillance of Telecoms Activities Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/TE0066 Iss 1; Oct 06
-------------------------	---	-------------------------------	--

The purpose of this document is to define the process, roles and responsibilities for the inspection and surveillance of operational telecoms activities as laid out in company standard NR/SP/TEL/30033.

Guidance Notes

NR/GN/MTC/00011 Stock Rail Bolt Torque Application Issue 1; Aug 05

Replaces

This guidance note concentrates primarily on stock rail bolts specifically. The principles for effective torque application can also however be adopted for some other switch and crossing bolts.

NR/GN/MTC/089 Guidance for the Exchange of Asset Data and the Continuing Maintenance of Assets Undergoing Change Issue 1; Sep 20

Replaces
New at Issue 117

This guidance document provides support to the process for introducing new assets or affecting existing assets on Network Rail infrastructure through the development and implementation of NR/L2/MTC/089 asset management plan (AMP).

NR/GN/MTC/MG0226 Infrastructure Maintenance Restructure - Guidance on the Track and Off Track Organisation Issue 2; Sep 10

Replaces

This guidance note is principally aimed at Track Maintenance Engineers, Section Managers and the Section Supervisors who assist them. However, it should also be a useful reference document for Planners, Administrators, and other front line employees and contractors.

The purpose of this document is to:

1. Explain how the new organisation (Maintenance Restructure Phase 2bc) is designed to operate.
2. Communicate how productivity is measured and detail ways in which it can be maximised

NR/GN/MTC/MG0227 Infrastructure Maintenance Restructure - Guidance on the Electrification & Plant Organisation Issue 2; Sep 10

Replaces

This guidance note is principally aimed at Electrification and Plant Engineers, Section Managers and the Section Supervisors who assist them. However, it should also be a useful reference document for Planners, Administrators, and other front line employees and contractors.

The purpose of this document is to:

1. Explain how the new organisation (Maintenance Restructure Phase 2bc) is designed to operate.
2. Communicate how productivity is measured and detail ways in which it can be maximised

NR/GN/MTC/MG0228 Infrastructure Maintenance Restructure - Guidance on the Signalling Organisation Issue 2; Sep 10

Replaces

This guidance note is principally aimed at Signalling & Telecommunication Maintenance Engineers, Section Managers and the Section Supervisors who assist them. However, it should also be a useful reference document for Planners, Planner/Administrators, Administrators, and other front line employees and contractors.

The purpose of this document is to:

1. Explain how the new organisation (Maintenance Restructure Phase 2bc) is designed to operate.
2. Communicate how productivity is measured and detail ways in which it can be maximised

Special Inspection Notices

NR/SIN/199 Safety of Machinery in Network Rail Owned and Operated Depots and Facilities Issue 1; Jan 21

Compliance
21/01/21

Replaces
New at Issue 118

This Special Instruction Notice has been produced in response to a recent incident at Eastleigh Long Welded Rail Depot, where a member of staff received fatal injuries whilst undertaking machinery maintenance activities.

4.13 INTEGRATED RISK

Level 1

NR/L1/RSK/001	Network Rail Risk Policy Issue 3; Sep 19	Compliance 07/12/19	Replaces NR/L1/RSK/001 Iss 2; Mar 18
---------------	--	------------------------	---

This document outlines the mandated requirements for the management of risk (threat and opportunity) within Network Rail. It provides an overview of the risk management processes and procedures in place and what is required to satisfy corporate governance requirements. This policy is in place as part of the Enterprise Risk Management Framework (ERMF).

The ERMF has been developed to support the successful delivery of Network Rail's business objectives and regulatory obligations.

Level 2

NR/L2/RSK/001	Enterprise Risk Management Issue 3; Sep 19	Compliance 07/12/19	Replaces NR/L2/RSK/001 Iss 2; Sep 18
---------------	--	------------------------	---

This standard sets out a principle-based approach for the management of Enterprise Risks in Network Rail to enable:

- a) the effective and consistent management of all risks to strategic objectives;
- b) risks to be managed in accordance with NR/L1/RSK/001 and Board approved corporate risk appetite statements;
- c) the identification, prioritisation and management of interrelated enterprise risks to support successful delivery of the Company's strategic objectives;
- d) strategic objectives to be managed in accordance with the UK Corporate Governance Code and governance requirements under licence condition 15 of the Network Licence; and
- e) clarity on risks which Network Rail have responsibility to manage as part of a wider set of industry risk mitigation activity.

4.14 INVESTMENT PROJECTS

Standard Functional Procedures

NR/PRC/MPI/CP0037	Use of Work Activity Risk Assessment in a Safe System of Work (P&E). Issue 1; Jul 06	Compliance 09/06	Replaces New; Issue 1 not released.
--------------------------	---	----------------------------	---

This Standard Project Procedure describes how work activities are assessed in line with NR/SP/OHS/00102 "Work Activity Risk Assessment" and how the resulting control measures from Work Activity Risk Assessments (WARA) are to be used when setting up a Safe System of Work.

NR/PRC/MPI/ST0029	Signalling Scheme Plan Number Controls Issue 2; Apr 06	Compliance	Replaces New; Issue 1 not released.
--------------------------	---	-------------------	---

This document is designed to provide a clear guide to the process for allocation of signalling scheme plan numbers to be adopted in respect of all schemes that make alterations or otherwise impact on the functionality of signalling installations on Network Rail Controlled infrastructure.

NR/PRC/MPI/TK0022	Critical Rail Temperature (CRT) Management Plan Issue 1; Dec 05	Compliance	Replaces
--------------------------	---	-------------------	-----------------

The purpose of this document is to define procedures that are to be followed for the identification, recording and management of sites requiring CRT management by MP&I track Renewals. This procedure does not have precedence over the requirements of RT/CE/S/011.

Level 1

NR/L1/INI/P3M/100	Project, Programme and Portfolio Management (P3M) Framework Policy Issue 1; Sep 17	Compliance 31/03/18	Replaces New at Issue 105
--------------------------	---	-------------------------------	-------------------------------------

Network Rail delivers in excess of £2.5bn of CAPEX investment into use on the operation railway every year; this investment is delivered through projects and programmes initiated through our internal Long Term Planning process undertaken by the Systems Operator or directly remitted by an external Client/Funder.

Clarity of requirements, control and transparency in delivery, and the capability to provide assurance to our stakeholders that funding is being effectively managed provides confidence that the benefits, outcomes, and outputs remitted will be delivered.

Network Rail achieves this level of control through the project, programme and portfolio management (P3M) framework, implementation of which will reduce the reputational and financial risk related to the delivery of complex projects.

Level 2

NR/L2/INI/0300	Integrated Engineering Lifecycle for Projects (IELCP) Issue 1; Mar 19	Compliance 07/09/19	Replaces New at Issue 111
-----------------------	---	-------------------------------	-------------------------------------

The Integrated Engineering Lifecycle for Projects (IELCP) ties together the projects engineering activities, and acts as the integration, assurance and control layer between GRIP and the individual engineering discipline activities.

NR/L2/INI/CP0061	Access Through Land Belonging to an Outside Party Issue 1; Mar 09	Compliance 06/06/09	Replaces New at Issue 71
-------------------------	---	-------------------------------	------------------------------------

This Standard is applicable to all Infrastructure Investment disciplines and should be adhered to when an outside party has been identified as having an interest in the delivery of any project. The standard identifies how the delivery team will manage outside interests, what is required from the delivery team during the life cycle of the project and finally where and when the standard must be used.

NR/L2/INI/CP0070	Principal Contractor Licensing Scheme Issue 5; Jun 17	Compliance 02/09/17	Replaces NR/L2/INI/CP0070 Iss 4; Jun 14
-------------------------	--	-------------------------------	---

The implementation of this standard enables Network Rail to:

- verify that organisations/internal duty holders have the capability to discharge Principal Contractor (PC) duties when undertaking construction work where Network Rail is the client; and
- provide ongoing assurance that the organisations/internal duty holders capabilities are maintained or improved.

NR/L2/INI/CP0075	Entry into Operational Service Issue 2; Dec 19	Compliance 07/03/2020	Replaces NR/L2/INI/CP0075 Iss 1; Mar 11
-------------------------	---	---------------------------------	---

This purpose of this standard is to describe how Network Rail, as Infrastructure Manager, undertakes Entry Into Operational Service (EIS) of new or altered Railway Infrastructure. This is achieved by the demonstration that the assets provided, whether new, temporary or legacy assets, are suitable, sufficient and correctly configured to provide for the safe functional operational requirements of the Railway Infrastructure. This mitigates risks associated with the EIS of new or changed assets.

NR/L2/INI/EDT/CP0091	Specification for Computer Aided Design Issue 4; Dec 18	Compliance 02/03/19	Replaces NR/L2/INI/EDT/CP0091 Iss 3; Dec 17
-----------------------------	---	-------------------------------	--

The purpose of this standard is to specify requirements relating to the production of Computer Aided Design (CAD) files for models and drawings representing railway infrastructure and property.

NR/L2/INI/P3M/101	Governance for Railway Investment Projects (GRIP) – Projects (formerly NR/L1/INI/PM/GRIP/100) Issue 5; Sep 17	Compliance 31/03/18	Replaces NR/L1/INI/PM/GRIP/100 Iss 4 NR/L3/INI/PG115/PS/001 Iss 3
--------------------------	--	-------------------------------	--

“Governance for Railway Investment Projects” (GRIP) describes how Network Rail manages and controls projects that enhance or renew the national rail network. It forms part of the project, programme and portfolio (P3M) framework and outlines the six Level 3 standards for projects.

NR/L2/INI/P3M/102	Investment Decision Framework and Programme Delivery Lifecycle Issue 3; Mar 19	Compliance 07/12/19	Replaces NR/L1/INI/PM/GRIP/102 Iss 2
--------------------------	---	-------------------------------	--

This standard refers to 2 key process frameworks:

- Investment Decision Framework, and
- Programme Delivery Lifecycle, which replaces the previous GRIP for Programmes lifecycle for the development and delivery of infrastructure programmes.

NR/L2/INI/P3M/104	Network Rail Requirements (formerly NR/L1/INI/CP0095) Issue 2; Sep 17	Compliance 31/03/18	Replaces NR/L1/INI/CP0095 Iss 1
--------------------------	--	-------------------------------	---

The purpose of this standard is to further Network Rail’s commitment to embedding consistent requirements practice across its business; not only to improve project and programme outcomes, but to reduce costs, and to meet client expectations, legislative governance and assurance requirements.

NR/L2/INI/P3M/105	Assurance of Project, Programme and Portfolio Delivery Issue 2; Mar 19	Compliance 01/06/19	Replaces NR/L2/INI/P3M/105 Iss 1; Dec 17
--------------------------	---	-------------------------------	--

The purpose of this standard is to describe the Network Rail assurance activities undertaken in relation to the renewal and enhancement project, programme and portfolio (P3M) framework and identify who is accountable for carrying out the activities. The assurance activities provide Network Rail with oversight and confidence in the progress of its infrastructure portfolio (renewals and enhancements).

NR/L2/INI/P3M/106	Risk Management for Project, Programme and Portfolio Delivery Issue 1; Dec 19	Compliance 07/03/20	Replaces New at Issue 114
--------------------------	--	-------------------------------	-------------------------------------

This standard sets out a principle-based approach for the management of project, programme and portfolio (P3M) risks in Network Rail to enable:

- a) the effective and consistent management of P3M Risk;
- b) an understanding of delivery confidence; and
- c) P3M risks to be managed in accordance with NR/L1/RSK/001.

NR/L2/P3M/107	Contingency Management for Capital Delivery Projects, Programmes, and Portfolios Issue 1; Dec 20	Compliance 06/03/21	Replaces New at Issue 118
----------------------	---	-------------------------------	-------------------------------------

This standard describes the contingency management process for Capital Delivery projects, programmes, and portfolios. Its purpose is to enable:

- a) the effective and consistent management of contingency across Capital Delivery;
- b) a continuous link between risk and contingency throughout the delivery lifecycle; and
- c) the learning of lessons from significant instances of contingency utilisation.

NR/L2/P3M/201	Project Acceleration in a Controlled Environment (PACE) Issue 1; Mar 21	Compliance 05/06/21	Replaces New at Issue 119
----------------------	--	-------------------------------	-------------------------------------

Project Acceleration in a Controlled Environment (PACE) describes how Network Rail manages and controls investment projects on the rail network. Network Rail has developed this approach to managing projects in order to minimise and mitigate the risks associated with project development and delivery. The approach is based on best practice within comparable industries that undertake major investment projects. Implementation of this standard will reduce the reputational and financial risk related to the delivery of complex projects.

NR/L2/P3M/220	Project Acceleration in a Controlled Environment (PACE) - Manage Integration Issue 1; Jun 21	Compliance 04/09/21	Replaces New at Issue 120
----------------------	---	-------------------------------	-------------------------------------

This standard brings together the seven core PACE processes undertaken during project development and delivery:

- a) manage integration;
 - b) manage scope;
 - c) manage time;
 - d) manage cost and commercial;
 - e) manage risk;
 - f) manage assurance;
- and manage stakeholders.

NR/L2/P3M/221	Project Acceleration in a Controlled Environment (PACE) – Manage Scope Issue 1; Jun 21	Compliance 04/09/21	Replaces New at Issue 120
----------------------	---	-------------------------------	-------------------------------------

This standard enables the business to manage and reduce the risks associated with: a) developing, designing and delivering solutions based on incomplete, unverifiable, erroneous or missing scope; b) the inability to demonstrate /assure project requirement sets for completeness, and c) the inability to demonstrate the benefits enablement or realisation.

NR/L2/P3M/222	Project Acceleration in a Controlled Environment (PACE) - Manage Time Issue 1; Jun 21	Compliance 04/09/21	Replaces New at Issue 120
----------------------	--	-------------------------------	-------------------------------------

This standard sets out the requirements for project time management. This includes the processes required to manage the timely completion of the project.

NR/L2/P3M/223	Project Acceleration in a Controlled Environment (PACE) - Manage Cost and Commercial Issue 1; Jun 21	Compliance 04/09/21	Replaces New at Issue 120
----------------------	---	-------------------------------	-------------------------------------

Application of this standard during investment projects on the rail network can reduce the reputational and financial risk related to poor stakeholder engagement practices.

NR/L2/P3M/223/	Title	Issue	Issue Date
01	Manage Cost Planning	1	Jun 2021
02	Commercial Process and Cost Management	1	Jun 2021

NR/L2/P3M/224	Project Acceleration in a Controlled Environment (PACE) - Manage Risk Issue 1; Jun 21	Compliance 04/09/21	Replaces New at Issue 120
----------------------	--	-------------------------------	-------------------------------------

This standard sets out a principle-based approach for the management of project risks in Network Rail to enable:

- the effective and consistent management of P3M Risk;
 - an understanding of delivery confidence; and
- P3M risks to be managed in accordance with NR/L1/RSK/001.

NR/L2/P3M/224/	Title	Issue	Issue Date
01	Quantitative Risk Assessment (QRA)	1	Jun 2021

NR/L2/P3M/225	Project Acceleration in a Controlled Environment (PACE) - Manage Assurance Issue 1; Jun 21	Compliance 04/09/21	Replaces New at Issue 120
----------------------	---	-------------------------------	-------------------------------------

This standard describes the Network Rail assurance activities undertaken in relation to the project, programme and portfolio management of the capital delivery portfolio. The assurance activities provide Network Rail with oversight and confidence in the progress of its portfolio (renewals and enhancements). It creates a common set of working practices to assure Network Rail's portfolio, projects and programmes.

NR/L2/P3M/226	Project Acceleration in a Controlled Environment (PACE) - Manage Stakeholders Issue 1; Jun 21	Compliance 04/09/21	Replaces New at Issue 120
----------------------	--	-------------------------------	-------------------------------------

This standard describes the key steps required to help engage stakeholders in P3M context; from identifying and understanding stakeholders, to creating and managing the appropriate engagement with them. Good stakeholder engagement and management is essential to agreeing requirements, finding the best solution and delivering output that enables the desired outcome in a way which is acceptable to the majority of stakeholders.

Level 3

NR/L3/INI/CI0029	Project Procedure for Land Negotiations (Temporary and Permanent) Issue 2; Jun 08	Compliance 26/08/08	Replaces NR/PRC/MPI/CI0029 Iss 1; Sep 05
-------------------------	--	-------------------------------	--

This standard enables the business to manage and reduce the risks associated with:

- developing, designing and delivering solutions based on incomplete, unverifiable, erroneous or missing scope;
- the inability to demonstrate /assure project requirement sets for completeness, and
- the inability to demonstrate the benefits enablement or realisation.

NR/L3/INI/CP0036	The Provision of Welfare Facilities Issue 4; Aug 08	Compliance 26/08/08	Replaces NR/L3/INI/CP0036 Iss 3; Mar 08
-------------------------	--	-------------------------------	---

The purpose and intent of this document is to ensure all personnel working on P&E sites are provided with welfare facilities that are clean, comprehensively maintained and fit for purpose.

NR/L3/INI/CP0063	Piling Adjacent to the Running Line Issue 1; Mar 10	Compliance 05/06/10	Replaces New at Issue 75
-------------------------	--	-------------------------------	------------------------------------

This document will define the minimum standards which must be adopted for all piling works to be undertaken adjacent to an operational railway. It is also intended to assist the designers and operational teams of both Network Rail and outside party constructors/developers to understand, at an early stage, the constraints which may be imposed on the design solution selected.

NR/L3/INI/CP0074	Project Advice Note (PAN) Process Issue 1; Sep 10	Compliance 04/12/10	Replaces New at Issue 77
-------------------------	--	-------------------------------	------------------------------------

The purpose of this standard is to provide a mechanism by which formal advice and instructions may be communicated rapidly in a consistent way within a Programme, an engineering discipline or an engineering team within a Programme.

Associated Document

NR/L3/INI/CP0074/F0030	PAN (Project Advice Note) Register Issue 30; Jun 20	Replaces NR/L3/INI/CP0074/F0030 Iss 29
-------------------------------	--	--

NR/L3/INI/P3M/106	Risk Management for Project, Programme and Portfolio Delivery Issue 1; Dec 19	Compliance 31/03/18	Replaces New at Issue 114
--------------------------	--	-------------------------------	-------------------------------------

This standard sets out a principle-based approach for the management of project, programme and portfolio (P3M) risks in Network Rail to enable:

- the effective and consistent management of P3M Risk;
- an understanding of delivery confidence; and
- P3M risks to be managed in accordance with NR/L1/RSK/001.

NR/L3/INI/P3M/120	Governance for Railway Investment Projects (GRIP) – Starting a Project Issue 1; Sep 17	Compliance 31/03/18	Replaces New at Issue 105
--------------------------	---	-------------------------------	-------------------------------------

The overall purpose of this standard is to record the activities to be undertaken when supporting development on behalf of a Sponsor. This is in accordance with the Clienting Principles.

NR/L3/INI/P3M/121	Governance for Railway Investment Projects (GRIP) – Initiating a Project Issue 1; Sep 17	Compliance 31/03/18	Replaces New at Issue 105
--------------------------	---	-------------------------------	-------------------------------------

The purpose of this standard is to mandate that all projects define core project management activities for the management of the project and assessment of its overall success.

NR/L3/INI/P3M/122	Governance for Railway Investment Projects (GRIP) - Leading a Project Issue 1; Sep 17	Compliance 31/03/18	Replaces New at Issue 105
--------------------------	--	-------------------------------	-------------------------------------

This standard describes how Network Rail sponsors capital investment in the railway infrastructure across all lifecycle stages.

NR/L3/INI/P3M/123	Governance for Railway Investment Projects (GRIP) - Controlling a Stage Issue 1; Sep 17	Compliance 31/03/18	Replaces New at Issue 105
--------------------------	--	-------------------------------	-------------------------------------

The purpose of this standard is to define and mandate the processes for controlling individual project stages from initial concept to close out.

NR/L3/INI/P3M/124	Governance for Railway Investment Projects (GRIP) - Managing a Stage Boundary Issue 1; Sep 17	Compliance 31/03/18	Replaces New at Issue 105
--------------------------	--	-------------------------------	-------------------------------------

The purpose of this standard is to:

- provide a fixed point at which acceptance for the project product is confirmed; or
- confirm that the project has nothing more to contribute by continuing.

NR/L3/INI/P3M/125	Governance for Railway Investment Projects (GRIP) - Closing a Project Issue 1; Sep 17	Compliance 31/03/18	Replaces New at Issue 105
--------------------------	--	-------------------------------	-------------------------------------

The purpose of this standard is to:

- provide a fixed point at which acceptance for the project product is confirmed;
- recognise that objectives set out in the original Project Initiation Documentation (PID) have been achieved/approved changes to these objectives have been achieved; or
- confirm that the project has nothing more to contribute by continuation.

NR/L3/INI/P3M/126	Network Rail Requirements Manual Issue 1; Sep 17	Compliance 31/03/18	Replaces New at Issue 105
--------------------------	---	-------------------------------	-------------------------------------

This manual and its associated modules provide details on how the requirements principles set out in NR/L2/INI/P3M/104 are to be implemented.

NR/L3/INI/P3M/126/	Module	Issue	Issue Date
01	The Network Rail Requirements Framework	1	Sep 17
02	Requirements Development and Management	1	Sep 17
03	Project Delivery Standard Specification (PDSS)	1	Sep 17

NR/L3/INI/P3M/127	Peer Reviews of Project and Programme Delivery Issue 2; Mar 19	Compliance 01/06/19	Replaces NR/L3/INI/P3M/127 Iss 1
--------------------------	---	-------------------------------	--

The purpose of this standard is to describe where Peer Reviews fit into Network Rail's assurance activities as described in NR/L2/INI/P3M/105. The assurance activities provide Network Rail with an oversight and confidence in the progress of its infrastructure portfolio.

NR/L3/INI/P3M/128	Project, Programme and Portfolio Management (P3M), Commercial and Engineering Functions Assurance Issue 2; Mar 19	Compliance 01/06/19	Replaces NR/L3/INI/P3M/128 Iss 1
--------------------------	--	-------------------------------	--

The purpose of this standard is to describe the Network Rail assurance activities undertaken in relation to the project, programme and portfolio framework (P3M), and to identify who is accountable for carrying out the activities. The assurance activities provide Network Rail with oversight and confidence in the progress of its infrastructure portfolio and that the correct governance is being adhered to. This standard further supports and defines the controls, processes, responsibilities and accountabilities defined NR/L2/INI/P3M/105, which include the "Lines of Defence" model, see appendix A, for the assurance of activity undertaken in accordance with the P3M framework (NR/L1/INI/P3M/100).

NR/L3/INI/P3M/129	Planning and Scheduling Manual Issue 1; Jun 18	Compliance 01/09/18	Replaces NR/L3/INI/PG115/BIS/002 Iss 2
--------------------------	---	-------------------------------	--

This manual provides guidance and mandated requirements for planning and scheduling. The modules with this manual define and mandate the schedule requirements to develop and maintain quality project schedules.

NR/L3/INI/P3M/129/	Module	Issue	Issue Date
01	Schedule Adherence	1	Jun 2018

NR/L3/INI/P3M/130	Controls Manual Issue 1; Mar 18	Compliance 01/09/18	Replaces See below
--------------------------	--	-------------------------------	------------------------------

Replaces: NR/L3/INI/PG115/PS/015 Iss 2, NR/L3/INI/PG115/PS/016 Iss 2, NR/L3/INI/PG115/PS/017 Iss 1

The purpose of this manual and its modules is to define and mandate the processes for controlling individual project stages from initial concept to close out. It supports NR/L3/INI/P3M/123 which is included in the P3M Framework, NR/L2/INI/P3M/101.

NR/L3/INI/P3M/130/	Module	Issue	Issue Date
01	Earned Value Management	1	Mar 18

NR/L3/INI/P3M/132	Portfolio Integration Manual Issue 1; Mar 18	Compliance 01/09/18	Replaces New at Issue 107
--------------------------	---	-------------------------------	-------------------------------------

This manual specifies the Consolidated Planning and the Prioritisation Processes. This manual and its modules provides visibility of planned requirements for key resources to inform the future resourcing needs of the business and provides a prioritisation process to identify the methods to be followed in order to identify the key projects to take place.

NR/L3/INI/P3M/132/	Module	Issue	Issue Date
01	Consolidated Planning	1	Mar 18
02	Prioritisation Process	1	Mar 18

NR/L3/INI/P3M/133	Consolidated Assurance of Project, Programme and Portfolio Delivery Issue 1; Mar 19	Compliance 01/06/19	Replaces New at Issue 111
--------------------------	--	-------------------------------	-------------------------------------

The purpose of this standard is to describe the Network Rail assurance process and activities undertaken in relation to the Consolidated Assurance process which sits within the P3M assurance framework. It will identify who is accountable for carrying out the activities. The assurance activities provide Network Rail with oversight and confidence in the progress of its infrastructure portfolio and that the correct governance is being adhered to. This standard further supports and defines the controls, processes, responsibilities and accountabilities defined NR/L2/INI/P3M/105, which include the "Lines of Defence" model, see appendix A, for the assurance of activity undertaken in accordance with the P3M framework (NR/L1/INI/P3M/100).

NR/L3/INI/P3M/134	Quantitive Cost Risk Assessment (QCRA) for Project, Programme and Portfolio Delivery Issue 1; Dec 19	Compliance 07/03/2020	Replaces New at Issue 114
--------------------------	---	---------------------------------	-------------------------------------

The purpose of this standard is to describe the requirements for conducting a Quantitative Cost Risk Assessment (QCRA). The purpose of a QCRA is to assess the combined effect of identified risks using computerised statistical modelling techniques to understand overall delivery confidence against cost to inform management response.

NR/L3/INI/P3M/135	Quantitive Schedule Risk Assessment (QSRA) for Project, Programme and Portfolio Delivery Issue 1; Dec 19	Compliance 07/03/2020	Replaces New at Issue 114
--------------------------	---	---------------------------------	-------------------------------------

The purpose of this standard is to describe the requirements for conducting a Quantitative Schedule Risk Assessment (QSRA). The purpose of a QSRA is to assess the combined effect of identified risks using computerised statistical modelling techniques to understand overall delivery confidence against schedule to inform management response.

NR/L3/INI/TK0040	Reporting of Track Unit Rates (part of the Network Rail Cost Analysis Framework) Issue 2; Jun 08	Compliance 26/08/08	Replaces NR/PRC/MPI/TK0040 Iss 1; May 06
-------------------------	---	-------------------------------	--

Unit costs and output measurements are required for:

- Monitoring and reviewing efficiency
- Providing cost data for developing the Business Plan.
- Measuring contractor performance
- Benchmarking contractors and Business Units

NR/L3/P3M/131	Document Management Manual Issue 3; Jun 21	Compliance 04/09/21	Replaces NR/L3/INI/P3M/131 Iss 2; Dec 18
----------------------	---	-------------------------------	--

This manual specifies the Document management procedures. It defines how documentation of all kinds should be managed from conception to close out.

This manual, through its modules, mitigates and will reduce the reputational and financial risk related to the delivery of complex projects.

This manual supports the progressive adoption of the BS1192 document referencing system on all projects and is a fundamental requirement of applying Building Information Modelling (BIM) on projects.

NR/L3/P3M/131/	Module	Issue	Issue Date
01	Document Management Procedure	2	Jun 21
02	Document Referencing	2	Jun 21

Guidance Notes

NR/GN/INI/001	Guidance on the Management of Door to Door Work and Travel Time Issue 1; Dec 08	Compliance n/a	Replaces New at Issue 70
----------------------	--	--------------------------	------------------------------------

Excessive work and travel time can import risk to the infrastructure and the workforce. This Guidance Note identifies Network Rail's minimum expectations with regards to employers discharging their duty of care under the Health & Safety at Work Act 1974 relating to the management of work and travel time.

NR/GN/INI/0301	Integrated Engineering Lifecycle for Projects Guidance Manual Issue 1; Mar 19	Compliance n/a	Replaces New at Issue 111
-----------------------	--	--------------------------	-------------------------------------

The Integrated Engineering Lifecycle for Projects (IELCP) ties together the projects engineering activities, and acts as the integration, assurance and control layer between GRIP and the individual engineering discipline activities.

It applies an integrated systems approach for project engineering activities and processes to:

- help increase consistency across all engineering projects;
- check the right engineering activities are completed at the right time; and
- manage and reduce the associated

NR/GN/INI/P3M/150	Sponsor's Handbook Issue 1; Mar 18	Compliance n/a	Replaces New at Issue 107
--------------------------	---	--------------------------	-------------------------------------

This guidance note describes how Network Rail sponsors capital investment in the railway infrastructure across all lifecycle stages. It should be read in conjunction with NR/L3/INI/P3M/122.

This guidance note has been developed to mitigate the risk of investment being made or used inappropriately at any stage in the lifecycle. The aim is to protect tax payers or other party's capital investment which is being managed by Network Rail.

4.15 LEVEL CROSSINGS

Level 1

NR/L1/XNG/100	Level Crossing Asset Policy Issue 2; Mar 20	Compliance 06/06/20	Replaces NR/L1/XNG/100 Iss 1; Jun 16
----------------------	--	-------------------------------	--

The purpose of this document is to specify the asset management policy for the whole of the Network Rail Level Crossing estate. The Level Crossing asset management policy seeks to optimise the performance, risk and cost of ownership of the Level Crossing estate across all of its life cycle stages from concept to disposal to deliver minimum whole life cost.

NR/L1/XNG/100	Module	Issue	Issue Date
01	Workbank Planning	1	Sep 2017
02	Level Crossing Technology Strategy	2	Mar 2020
06	Level Crossing Asset Data and Information	2	Mar 2020

Level 2

NR/L2/XNG/001	Provision and Risk Management of Level Crossings Issue 3; Dec 20	Compliance 06/03/21	Replaces NR/L2/OPS/100 Iss 2; Jun 08
----------------------	---	-------------------------------	--

This procedure sets out the process requirements that enable Network Rail to manage the safety and convenience of its level crossings and fulfil its legal duties under health & safety legislation.

NR/L2/XNG/200	Supplementary Audible Warning Device (SAWD) for Footpath and Bridleway Level Crossing Systems Protected by a Whistle Board Issue 1; Dec 16	Compliance 04/03/17	Replaces New at Issue 102
----------------------	---	-------------------------------	-------------------------------------

The purpose of this product specification is to define the requirements of a supplementary Audible Warning Device (SAWD) for footpath and bridleway level crossing systems protected by a whistle board.

NR/L2/XNG/300	Supplementary Audible Warning Device (SAWD) Route Business Process Issue 1; Jun 17	Compliance 02/09/17	Replaces New at Issue 104
----------------------	---	-------------------------------	-------------------------------------

The purpose of this standard is to support the wider roll out and installation of Supplementary Audible Warning Devices (SAWDs) by setting out the maintenance arrangements that have been agreed for this product. This supports management of the risk associated with footpath and bridleway level crossings that are protected by whistle boards.

NR/L2/XNG/310	Product Specification for an Obstacle Detection System at Level Crossings Issue 1; Sep 18	Compliance 01/12/18	Replaces New at Issue 109
----------------------	--	-------------------------------	-------------------------------------

This specification defines the requirements of an Obstacle Detection System for use at Manually Controlled Barriers with Obstacle Detection (MCB-OD) level crossings and any similar crossing type that might be introduced later. It allows the procurement of an Obstacle Detection System that can be used at level crossings, in particular MCB-OD with minimum changes and at other level crossings where reduction in risk or automation is required.

NR/L2/XNG/30020	Level Crossings Design Handbook Issue 1; Jun 19	Compliance 07/09/19	Replaces New at Issue 112
------------------------	--	-------------------------------	-------------------------------------

This manual sets out requirements to enable design of level crossing systems and supports:

- safe development and design of new and altered level crossing systems impacting on Network Rail controlled infrastructure;
- safe interfaces between the level crossing and its users (both on the railway and those wishing to cross it);
- client's specified requirements being met by systems and designs that are fit for purpose.

G22	Efficient Delivery Guidance for Overlay Miniature Stop Light Level Crossings *	1	Jun 2019

Level 3

NR/L3/XNG/207	Level Crossing Manager Competence Framework Issue 1; Sep 20	Compliance 05/09/20	Replaces New at Issue 117 NR/L3/OPS/045/2.07 Iss 1
----------------------	--	-------------------------------	---

This standard details the competency assessment process used to assess the competencies required by Level Crossing Managers (LCMs) to undertake safety critical risk assessments of level crossings.

NR/L3/XNG/308	Risk Assessing Level Crossings Issue 1; Sep 20	Compliance 05/09/20	Replaces New at Issue 117 NR/L3/OPS/045/3.08 Iss 1
----------------------	---	-------------------------------	---

This standard provides a process for risk assessing level crossing assets. It contributes to the control of the following high-level risks:

- Level Crossings: vehicle, person or animal on the line at risk of collision; and
- Level Crossings – non-collision (with train) incident.

NR/L3/XNG/309	Level Crossing Administration Issue 1; Sep 20	Compliance 05/09/20	Replaces New at Issue 117 NR/L3/OPS/045/3.09 Iss 1
----------------------	--	-------------------------------	---

This standard provides a framework to allow Network Rail to respond to planning consultations and provides a process for maintenance of level crossing files as required by NR/L2/OPS/100. This procedure also provides a remit for Road Rail Partnership Groups (RRPGs).

Guidance Notes

NR/GN/XNG/30048	Index of Level Crossing Bowties Issue 1; Sep 19	Compliance NA	Replaces New at Issue 113
------------------------	--	-------------------------	-------------------------------------

This document provides the index and version control to the Level Crossings Bowties. Bowties are diagrams that are used to visualise how risks are managed.

NR/GN/XNG/30048	Module	Issue	Issue Date
01	Level Crossing Bow Tie – Animal, vehicle, object or person on the line at risk of collision	1	Sep 2019
02	Level Crossing Bow Tie – Incident on or near Level Crossing not involving a railway vehicle	1	Sep 2019

Special Inspection Notices

NR/SIN/158	Level Crossing Pedestal Trunion Bolts Issue 1; Nov 16	Compliance 09/12/17	Replaces New at Issue 102
-------------------	--	-------------------------------	-------------------------------------

The purpose of this Special Inspection Notice (SIN) is to inspect and replace all pedestal trunion bolts fitted to BR985 hydraulic barrier packs.

NR/SIN/160	Covtec Supplementary Audible Warning Device (SAWD) Issue 1; Dec 16	Compliance 30/04/17	Replaces New at Issue 103
-------------------	---	-------------------------------	-------------------------------------

This Special Inspection Notice (SIN) is issued to obtain confirmation that all Supplementary Audible Warning Devices (SAWDs) installed at level crossings meet the site selection criteria set out in NR/L2/SIG/30038 and have faulting and maintenance contracts in place with the manufacturer.

NR/SIN/165	Special Inspection of AOCL/AOCL+B and ABCL Level Crossings Including Power Supplies Issue 1; Sep 17	Compliance 16/03/18	Replaces New at Issue 105
-------------------	--	-------------------------------	-------------------------------------

The purpose of this Special Inspection Notice (SIN) is to:

- Review the power supply arrangements in place at all types of automatic locally monitored level crossings.
- Evaluate the practicality of remote condition monitoring of the power supply system, and key sub-systems whose failure can have the same effect as loss of power supply, at all locally monitored level crossings, so that prompt action can be taken to manage the failure.

NR/SIN/166	Inspection of Howells Re-Engineered Level Crossing Power Packs Issue 1; May 17	Compliance 22/10/17	Replaces New at Issue 104
-------------------	---	-------------------------------	-------------------------------------

The purpose of this Special Inspection Notice (SIN) is to:

- Inspect all top trunion coupling arrangements on Howells Re-Engineered BR985 level crossing power packs; and
- to take action to eliminate the risk of binding on the external damping assembly.

NR/SIN/170	Manage Risk of Extended Closure Times at Automatic Level Crossings Issue 2; Feb 19	Compliance 30/06/19	Replaces NR/SIN/170 Iss 1; Mar 18
-------------------	---	-------------------------------	---

This Special Inspection Notice (SIN) mandates the process to:

- assess the risk of automatic level crossings which present with excessive warning time, thus manifesting as extended level crossing closure times for the user; and
- develop a plan of action to manage these risks.

NR/SIN/173	Management of Risk at User Worked Level Crossings Equipped with Power Gate Openers (POGOs) or with Barriers and Miniature Stop Lights (MSLs) Issue 1; Apr 18	Compliance 31/7/18	Replaces New at Issue 108
-------------------	---	------------------------------	-------------------------------------

This Special Inspection Notice (SIN) has been issued to confirm:

- there are no further installations of POGO or commissioning into service of any previously installed POGO until reliability issues with the product have been addressed;
- POGOs are only operational at sites where users fully understand how to operate crossing equipment and can safely traverse the crossing, until known issues with signage and site layout are rectified;
- the signage and instructions at crossings where POGO remains operational are clear and give no cause for confusion.;

NR/SIN/180	Level Crossing Train Detection Configuration Issue 1; Mar 18	Compliance 31/03/19	Replaces New at Issue 108
-------------------	---	-------------------------------	-------------------------------------

The purpose of this Special Inspection Notice (SIN) is to identify and assess the configuration of train detection at level crossings to manage the risk of conflict between road and rail vehicles.

NR/SIN/188	Removal of Howells BR985 (Mk2) Re-Engineered Hydraulic Level Crossing Barrier Packs Issue 1; Mar 19	Compliance 27/09/19	Replaces New at Issue 112
-------------------	--	-------------------------------	-------------------------------------

The purpose of this Special Inspection Notice (SIN) is to instruct the removal of Howells BR985 (Mk2) re-engineered hydraulic level crossing barrier packs (Cat No. R086/027184) from Network Rail managed infrastructure and install a replacement using SPX BR985 (Mk2) hydraulic level crossing barrier packs (Cat No. 086/027218 or R086/027218)

4.16.1 NATIONAL DELIVERY SERVICE

Level 2

NR/L2/NDS/205	Rail Delivery and Recovery Systems Overview Issue 2; Dec 10	Compliance 04/12/10	Replaces NR/L2/NDS/205 Iss 2; Sep 10
----------------------	---	-------------------------------	--

The purpose of this Company Standard is to detail to Network Rail staff and applicable support service contractors the responsibilities of delivery and collection requirements associated with Network Rail rail delivery systems planning timescales.

This Company Standard will also standardise the methodology associated with planning delivery and collection of rail by Network Rail rail delivery systems. It will mandate planning time scales and responsibilities in the process for the planning of delivery and collection of rail with the Network Rail rail delivery systems.

Level 3

NR/L3/NDS/006	NDS Process for the Management of Fatigue and Working Hours for Employees Undertaking Safety Critical Work Issue 1; Sep 11	Compliance 03/12/11	Replaces NR/L2/ERG/006 Iss 1; Jun 10
----------------------	--	-------------------------------	--

This standard defines the requirements for managing fatigue and working hours for National Delivery Service (NDS) employees, and those employed under contract by NDS, who undertake safety critical work. Its purpose is to reduce the risks to health and safety that are associated with working patterns, shift work and excessive working hours.

NR/L3/NDS/305	Rail Delivery and Recovery Issue 2; Dec 10	Compliance 04/12/10	Replaces NR/L3/NDS/305 Iss 1; Sep 10
----------------------	---	-------------------------------	--

The purpose of this Company Standard is to detail to Network Rail staff and applicable support service contractors the responsibilities of delivery and collection requirements associated with Network Rail rail delivery systems planning timescales.

This Company Standard will also standardise the methodology associated with planning the delivery and collection of rail by Network Rail rail delivery systems. It will mandate planning time scales and responsibilities in the process for the planning of delivery and collection of rail with the Network Rail rail delivery systems.

NR/L3/NDS/306	Planned General Safety Inspections Issue 1; Jun 10	Compliance 04/09/10	Replaces New at Issue 76
----------------------	---	-------------------------------	------------------------------------

This procedure defines the process for planning, conducting and reporting planned health, safety and environmental general inspections in the National Delivery Service (NDS) department to check that formal controls are being implemented and unsafe acts or conditions are identified. The aim is also to check the management system is effective and to identify changes to be made that will improve and develop the business

4.16.2 SUPPLY CHAIN OPERATIONS

Level 2

NR/L2/SCO/203	Loading and Securing of Infrastructure Traffic Issue 4; Mar 19	Compliance 01/06/19	Replaces NR/L2/NDS/203 Iss 3; Mar 12
----------------------	---	-------------------------------	--

Network Rail produce loading patterns for infrastructure traffic loaded by Network Rail contractors, suppliers and their sub-contractors and carried by any freight operating company with a relevant Railway Safety Certificate, contracted to Network Rail for that purpose.

These are published in the Loading Manual for Infrastructure Traffic Employees.

Loading patterns for the safe loading and securing of infrastructure traffic are one aspect of the overall requirements for safe train operation.

NR/L2/SCO/302	Supplier Qualification Requirements Issue 1; Jun 20	Compliance 05/09/20	Replaces New at Issue 116
----------------------	--	-------------------------------	-------------------------------------

This document seeks to mitigate the risks that Supplier Assurance Providers import when assuring suppliers who wish to work on Network Rail Managed Infrastructure by setting out the management system and processes required for Supplier Assurance Providers who assure suppliers of products and services.

NR/L2/SCO/302/	Title	Issue	Issue Date
01	Core Requirements	1	Jun 2020
02	CDM Requirements	1	Jun 2020
03	Sentinel Scheme Requirements	1	Jun 2020
04	Rail Interface (Safe Work) Planning Requirements	1	Jun 2020
05	On Track Plant (OTP) Requirements	1	Jun 2020

NR/L2/SCO/306	Disposal of Redundant Assets Issue 4; Sep 19	Compliance 07/12/19	Replaces NR/L2/SCO/306 Iss 3; Jun 18
----------------------	---	-------------------------------	--

This document process sets out the rules governing the Disposal of Redundant Assets. It enables Network Rail to do this efficiently and effectively to meet its safety, regulatory, financial and HM Treasury obligations.

Level 3

NR/L3/SCO/204	Switches and Crossings Recycling Process Issue 1; Dec 20	Compliance 05/12/20	Replaces New at Issue 118
----------------------	---	-------------------------------	-------------------------------------

This standard provides the requirements for the processing of serviceable switches, crossings and other ancillaries.

This standard provides the controls that reduce the risk associated by recycling S&C units, this creates serviceable S&C units from recovered items that would have otherwise been scrapped.

This standard controls the recycling methods and processes used at a Network Rail Switch and Crossing (S&C) Recycling Facility.

NR/L3/SCO/204/	Title	Issue	Issue Date
01	Serviceable S&C Operations Process	1	Dec 2020
02	Sale Order Process	1	Dec 2020

NR/L3/SCO/306	Route Services - Disposal of Redundant Assets Issue 1; Sep 19	Compliance 07/12/19	Replaces New at Issue 113
----------------------	--	-------------------------------	-------------------------------------

This document sets out the rules which Route Services apply when undertaking the Disposal of Redundant Assets. It enables Network Rail to do this efficiently and effectively to meet its safety, regulatory, financial and HM Treasury obligations.

NR/L3/SCO/308	Loading Manual for Infrastructure Traffic Issue 3; Mar 19	Compliance 01/06/19	Replaces NR/L3/SCO/308 Iss 2; Dec 17
----------------------	--	-------------------------------	--

This standard enables Network Rail to meet the requirements of GO/RT3056, by detailing the minimum requirements for the safe loading and load examination of Network Rail Infrastructure Traffic's on rail vehicles. This standard mitigates the following high-level safety risks:

- Risk to Network Rail managed infrastructure from incorrectly loaded infrastructure traffic.
- Risk to staff undertaking loading activities from inadequately defined safe systems of work.

NR/L3/SCO/311	Supply Chain Operations, T&RS and OTM Engineering and Management Manual Issue 4; Mar 19	Compliance 01/06/19	Replaces NR/L3/SCO/311 Iss 3; Jun 18
----------------------	--	-------------------------------	--

This manual provides requirements and procedures to enable Supply Chain Operations (SCO) to comply with ROGS, with the requirements of NR/L1/RMVP/0001 and NR/L2/RMVP/0090 (where specified) and enables the implementation of an ISO 55001 compliant Asset Management System (AMS) within SCO.

NR/L3/SCO/314	Engineering Assurance for T&RS, OTM and OTP Projects Issue 1; Dec 18	Compliance 02/03/19	Replaces New at Issue 110
----------------------	--	-------------------------------	-------------------------------------

This standard defines the minimum project engineering assurance arrangements for all Supply Chain Operations (SCO) capital programmes for the enhancement and renewal of Traction & Rolling Stock (T&RS), On-Track Machines (OTMs) and On Track Plant (OTP). This standard defines the best practices and processes that should be used so that project engineering assurance is correctly managed.

Associated Documents

NR/L3/SCO/314	Title	Issue	Issue Date

T02	Technical Change Proposal	1	Dec 2018

NR/L3/SCO/320	Supplier Quality Assurance (SQA) Issue 2; Sep 20	Compliance 05/12/20	Replaces NR/L3/SCO/320 Iss 1; Sep 18
----------------------	---	-------------------------------	--

This document describes the framework for completion of Supplier Quality Assurance (SQA) activities to reduce the risk and likelihood of product failure potentially attributed to safety incidents or train delay posed by the introduction of poor quality material and product lines, provided from External Suppliers/Manufactures managed by Supply Chain Operations (SCO), Route Service (RS), into the Network Rail managed infrastructure.

4.17.1 OPERATIONS & CUSTOMER SERVICES

Level 2

NR/L2/OCS/009	Network Capability Management Procedure Issue 1; Mar 10	Compliance 06/03/10	Replaces New at Issue 75
----------------------	--	-------------------------------	------------------------------------

This standard sets out requirements for the management of Network Capability, so as to meet the company's regulatory and commercial obligations to its stakeholders. It defines procedures for making changes to the capability of the network and highlights that physical changes to the network shall not be made unless the correct procedure(s), including Network Change, where applicable, have been followed and completed. It also requires that the published capability of the network is amended concurrently with the completion of any physical change.

NR/L2/OCS/042	Railway Operational Code Implementation, Variation and Review Process Issue 3; Mar 11	Compliance 05/03/11	Replaces NR/L2/OCS/042 Iss 2; Dec 08
----------------------	--	-------------------------------	--

This specification describes the sections of the Railway Operational Code, how reviews will be conducted and the arrangements and processes for dealing with variations.

NR/L2/OCS/060	Customer requirements for the Provision of Train Running Information on Stations Issue 1; Dec 08	Compliance 01/12/08	Replaces New at Issue 70
----------------------	---	-------------------------------	------------------------------------

This standard provides customers at the railway station with a consistency as to the provision of information screens. The standard describes the type of screen (in terms of the content shown) and the location of each type of screen. This is provided for each type of station based on the station size standard A - F classification and applies to new and enhancement systems, as well as renewals where sufficient funding is available.

NR/L2/OCS/070	Major Infrastructure Changes – the Provision of Staff Briefing Material to Train Operators Issue 4; Mar 11	Compliance 05/03/11	Replaces NR/SP/OPS/070 Iss 3; Jun 06
----------------------	---	-------------------------------	--

To define the process by which Network Rail ensures that suitable and sufficient briefing materials are supplied to Train Operators to ensure a safe transition following significant infrastructure changes. Infrastructure Projects shall have adequate procedures in place to ensure compliance with the requirements of this procedure. This will normally be covered by the 'Guide to Railway Investment Projects'.

NR/L2/OCS/098	Management of Short-term Network Change Issue 2; Jun 09	Compliance 06/06/09	Replaces NR/L2/OCS/098 Iss 1; Dec 07
----------------------	--	-------------------------------	--

This document advises local managers of a change in procedure covering network capability whereby a reduced level of maintenance can be applied to sections of route commensurate with a reduced capability or temporary cessation of traffic. This arrangement shall be formalised through a revised Maintenance Regime Agreement and shall be conditional upon the satisfactory conclusion of Network Change consultation, including the arrangements for re-instatement.

4.17.2 OPERATIONS PRINCIPLES & STANDARDS

Company Standards

RT/LS/P/200	Network Rail Security Manual Issue 2; Apr 05	Replaces RT/LS/P/020 Iss E1; Aug 04
--------------------	---	---

The purpose of this standard is to mandate the use of the Network Rail security manual and to describe the processes that shall be used to control the issue, use and amendment of the content.

Level 1

NR/L1/OPS/010	Signals Passed at Danger (SPAD) and Signal Reversions Affecting Trains Issue 13; Sep 19	Compliance 07/12/19	Replaces NR/L1/OPS/010 Iss 12; Mar 10
----------------------	--	-------------------------------	---

The purpose of this standard is, in accordance with the requirements applicable to an Infrastructure Manager, to provide a consistent and structured process for the immediate actions required in dealing with SPADs or Movement Authority's passed without authority, gathering evidence following a SPAD incident and subsequent management of SPAD issues within Network Rail and in conjunction with Railway Undertakings.

NR/L1/OPS/290	Network Rail Business Continuity Management Issue 1; Jun 17	Compliance 02/09/17	Replaces New at Issue 104
----------------------	--	-------------------------------	-------------------------------------

This document outlines the mandated requirements for the management of Business Continuity within Network Rail. It provides an overview of the Business Continuity Management (BCM) processes and procedures in place and what is required to satisfy corporate governance requirements. This policy is in place as part of the Business Continuity Management Framework (BCMF).

Level 2

NR/L2/OPS/015	Working of Passenger Trains Over Non-Passenger Lines Issue 2; Sep 19	Compliance 07/12/19	Replaces NR/L2/OPS/015 Iss 1; Dec 08
----------------------	---	-------------------------------	--

The purpose of this Company Standard is to detail the arrangements to be put in place by Network Rail Routes for safe working of passenger trains over non-passenger lines.

NR/L2/OPS/021	Weather – Managing the Operational Risks Issue 8; Jun 19	Compliance 07/09/19	Replaces NR/L2/OCS/021 Iss 7; Sep 17
----------------------	---	-------------------------------	--

This document together with NR/L3/OPS/021 mandates how Network Rail:

- prepares, manages and responds to operational risks arising from adverse and extreme weather events;
- prepares for, mitigates and manages seasonal weather related activities.

NR/L2/OPS/031	Assessing and Assuring the Impact of Operational Risks Relating to Changes to the Train Plan Issue 10; Sep 19	Compliance 07/03/20	Replaces NR/L2/OCS/031 Iss 9; Sep 14
----------------------	--	-------------------------------	--

This standard provides a framework whereby Network Rail can identify, assess, evaluate and assure operational risks associated with prospective changes to the train service, prior to the publication of the Working Timetable (WTT).

NR/L2/OPS/033	Recording Spoken Safety Critical Communications between Possession Management and Engineering Trains / On-Track Plant Drivers when Working in Possessions and Worksites Issue 3; Jun 19	Compliance 07/03/20	Replaces NR/L2/OPS/033 Iss 2; Mar 09
----------------------	--	-------------------------------	--

The purpose of this business process is to implement a procedure which mitigates the risks associated with verbally controlling the movement of engineering trains and on track plant.

NR/L2/OPS/034	Management of Rule Book Change Issue 2; Jun 17	Compliance 02/09/17	Replaces NR/L2/OPS/034 Iss 1; Dec 09
----------------------	---	-------------------------------	--

This business process provides a framework for Network Rail to review proposed changes and additions to the GE/RT8000 Rule Book prior to validation at the RSSB Traffic Operations Management Standards Committee.

NR/L2/OPS/035	Dissemination of Urgent Operating Advice Issue 4; Aug 08	Compliance 26/08/08	Replaces NR/L2/OPS/035 Iss 3; Apr 07
----------------------	---	-------------------------------	--

This documents how Network Rail shall initiate or receive urgent operating advices and how these shall be distributed.

NR/L2/OPS/037	Management of Spoken Safety Communication Issue 2; Dec 07	Compliance 01/12/07	Replaces RT/LS/P/037 Iss 1; Oct 01
----------------------	--	-------------------------------	--

This document details Network Rail's arrangements for the management of spoken safety communications.

NR/L2/OPS/060	The Management of Heat Related Emergency Restrictions of Speed Resulting from High Air Temperatures Issue 3; Mar 10	Compliance 06/03/10	Replaces NR/L2/OPS/060 Iss 2; Aug 08
----------------------	--	-------------------------------	--

The purpose of this document is to set the procedure for the management of heat related Emergency Speed Restrictions (ESR) resulting from a forecast of Hot Weather. The purpose of the standard is to maintain operational safety yet reduce the performance impact of unnecessary heat related blanket ESR. the procedure supports NR/CS/OPS/021.

NR/L2/OPS/095	High Risk Sites for Wrong Side Track Circuit Failures in Leaf Areas and for Low Rail Adhesion Issue 6; Jun 19	Compliance 07/09/19	Replaces NR/L2/OCS/095 Iss 5; Sep 15
----------------------	--	-------------------------------	--

To establish a process to identify, risk rank and create a removal plan for any location which may be classified as a high risk site in respect of likely occurrences of wrong side track circuit failures (WSTCFs) under leaf fall contamination conditions.

NR/L2/OPS/101	Temporary Vehicular Level Crossings and Temporary Increased use of Existing Level Crossings Issue 3; Mar 10	Compliance 06/03/10	Replaces NR/L2/OPS/101 Iss 2; Jun 08
----------------------	--	-------------------------------	--

The purpose of this standard is to set out the protection requirements and safety precautions applicable to the provision of temporary vehicular level crossings and temporary special use of existing private vehicular crossings. It sets out the process for authorisation of the temporary use and of the protection arrangements.

NR/L2/OPS/104	Planning and Control of Steam Locomotive Operation Issue 1; Oct 07	Compliance 06/10/07	Replaces RT/D/S/009 Iss 3 RT/D/C/087 Iss 1
----------------------	---	-------------------------------	---

This standard has been created to enable Network Rail functions to correctly plan for steam locomotive/train operation on Network Rail Managed Infrastructure.

NR/L2/OPS/110	Requirements for the Weekly Operating Notice, Periodical Operating Notice and Local Operating Instructions (incl. Sectional Appendix) Issue 3; Dec 16	Compliance 04/03/17	Replaces NR/L2/OPS/110 Iss 2; Jun 08
----------------------	--	-------------------------------	--

This document mandates requirements for the production of information related to engineering work, alterations to track and signalling arrangements, and Local Operating Instructions.

NR/L2/OPS/202	Principles, Timescales and Functional Responsibilities for Engineering Work, Access and Heavy Resource Planning Issue 7; Jun 17	Compliance 02/09/17	Replaces NR/L2/NDS/202 Iss 6; Mar 12
----------------------	--	-------------------------------	--

This business process defines the business planning process that enables engineering access to Network Rail Managed Infrastructure to undertake inspection, maintenance, renewal and enhancement of the network in compliance with the Network Code and with the objective of controlling the safety and business risks associated with arrangements for engineering access.

NR/L2/OPS/250	Network Rail National Emergency Plan Issue 8; Jun 21	Compliance 04/09/21	Replaces NR/L2/OPS/250 Iss 7; Mar 19
----------------------	---	-------------------------------	--

This standard sets out the arrangements in place to provide an effective response to accidents, incidents, emergencies or crises on or affecting Network Rail controlled assets across Great Britain. It sets out the responsibilities of Network Rail, and it also outlines the responsibilities of passenger / freight operating companies and other interfacing organisations in relation to this plan. It enables Network Rail to comply with the requirements of the Civil Contingencies Act (2004) as a Category 2 responder.

NR/L2/OPS/253	Specification for Rail Operating Centres Issue 1; Mar 20	Compliance 06/06/20	Replaces New at Issue 115
----------------------	---	-------------------------------	-------------------------------------

The purpose of the specification is to bring together the technical requirements of the building, with the operational requirements of the Route and the personal needs of the individuals, which allow the ROC to operate effectively. So that the ROC can respond to different levels of occupation by signalling, control and electrical control teams, and to the introduction of new technology.

NR/L2/OPS/254	Manual for the Principles of Operational Simulation Issue 1; Dec 17	Compliance 03/03/18	Replaces New at issue 106
----------------------	--	-------------------------------	-------------------------------------

This business process states the principal requirements for operational simulation to test the operability of systems, deliver training and manage ongoing competence. The document provides a framework that matches levels of simulation to the delivery of operational competence outcomes. The document provides clarity on the level of simulation required to provide competent staff and reduce the risk of operational errors in safety critical roles.

NR/L2/OPS/254/	Title	Issue	Issue Date
01	Signalling Simulation Operational Specification	1	Dec 2017

NR/L2/OPS/290	Business Continuity Management Issue 1; Mar 18	Compliance 01/09/18	Replaces New at issue 107
----------------------	---	-------------------------------	-------------------------------------

This standard is aligned to BS ISO 22301:2012 and BS EN ISO 22313:2014, and sets out a principles-based approach for effective BCM to enable:

- The effective and consistent identification of organisational priorities, asset criticality, and the risks they face;
- Appropriate strategies and plans to be developed to manage disruption and restoration of services within the organisation's risk appetite;
- The effective governance and assurance of BCM, and consideration of BCM in the wider management and strategy decisions of Network Rail.

NR/L2/OPS/291	Railway Crime Risk Management Issue 1; Dec 19	Compliance 07/03/20	Replaces NR/L2/OCS/050 Iss 1*
----------------------	--	-------------------------------	---

This specification sets out the high-level requirements for Network Rail's management, monitoring, risk assessment and mitigation / reduction of railway crime activity. It is set within the context of the wider management of railway crime and so contains frequent references to railway crime matters.

* Withdrawn Dec 2018

NR/L2/OPS/292	Station Capacity and Crowd Management Business Process Issue 1; Jun 21	Compliance 04/09/21	Replaces New at Issue 120
----------------------	---	-------------------------------	-------------------------------------

The purpose of this standard is to:

- Clearly outline how the subject of passenger crowding in stations and associated risks are managed across Network Rail;
- Define roles and responsibilities of core operational teams, support functions and subject matter experts in the organisation;
- Set out requirements and processes that enable organisational best practice, achieve compliance with Network Rail's licence obligations and in doing so lead the industry in this subject matter;
- Strengthen the governance in the area setting out clear accountabilities and placing passenger experience and safety at the heart of our operational and planning procedures; and
- Confirm crowd management plans are based on data driven insights, thorough planning, subject matter expertise and consideration of passenger experience.

Level 3

NR/L3/OPS/002	Driving Cab Passes Issue 8; Mar 19	Compliance 02/03/19	Replaces NR/L3/OPS/002 Iss 7; Sep 18
----------------------	---	-------------------------------	--

This document allows Network Rail employees and its contract employees to conduct safe and efficient inspections of Network Rail managed infrastructure from the driving cab of a train.

It also enables Network Rail to meet its cab access control obligations under Department for Transport security instructions and the obligations towards train operator duty holders who are responsible for the safety critical driving cab environment.

NR/L3/OPS/009	Track Circuit Operating Device (TCOD) Identification of Locations for Use Issue 4; Dec 19	Compliance 07/03/2020	Replaces NR/L3/OPS/009 Iss 3; Aug 08
----------------------	--	---------------------------------	--

This standard specifies requirements to determine where a Track Operating Device -T-COD) may be used in order to comply with the Rule Book. It contains instructions for the use and application of Remote-Controlled Tracker Circuit Operating Devices (RC T-COD).

NR/L3/OPS/021	Weather Management Index Issue 5; Sep 20	Compliance 05/12/2020	Replaces NR/L3/OPS/021 Iss 4; Mar 20
----------------------	---	---------------------------------	--

This manual is an index of the weather management modules which manage the risk associated with adverse, extreme and seasonal weather conditions and forecasts.

(Contains NR/BS/LI/453, NR/BS/LI/454)

NR/L3/OPS/021/	Title	Issue	Issue Date
01	Autumn Management	1	Jun 2019
02	Summer Management	1	Sep 2020
03	Winter Management	1	Dec 2019
05	High Winds	1	Dec 2019
07	Tree Management for Adverse and Extreme Weather	1	Mar 2020
08	Earthworks (Contains NR/BS/LI/453)	1	Jun 2019
09	Management of Structures During Adverse and Extreme Weather	1	Jun 2019
10	Joint Seasons Management Groups	1	Sep 2019

NR/L3/OPS/0064	Delivering Works Within Possessions Issue 6; Jun 21	Compliance 04/09/21	Replaces NR/L3/INI/CP0064 Iss 5; Jun 17
-----------------------	--	-------------------------------	---

This document provides Network Rail with the operational readiness framework aimed at reducing and mitigating the risk of possession overruns for projects delivering works on the rail infrastructure. It enables Network Rail to maximise productive use of possession time whilst balancing the risks associated with this objective.

NR/L3/OPS/084	Line Clear Arrangements Following Engineering Works in Axle Counter Areas - Line Clear Verification Process Issue 5; Mar 20	Compliance 06/06/20	Replaces NR/L3/OPS/084 Iss 4; Sep 18
----------------------	--	-------------------------------	--

The purpose of this work instruction is to manage the risk of vehicles being left on track following engineering possession subject to the Line Clear Verification (LCV) process being completed.

NR/L3/OPS/111	Weekly Operating Notice - Format and Content Issue 4; Dec 16	Compliance 04/03/17	Replaces NR/L3/OCS/111 Iss 3; Mar 11
----------------------	---	-------------------------------	--

To mandate how Network Rail shall manage the format, content and production of the Weekly Operating Notice (WON) to give consistency.

NR/L3/OPS/250	National Emergency Plan Index Issue 1; Jun 21	Compliance 04/09/21	Replaces NR/LS/P/250 Iss 1
----------------------	--	-------------------------------	--------------------------------------

This document provides an index of the National Emergency Plan modules which manage the risk associated with incidents and emergencies on or impacting the railway network.

NR/L3/OPS/250/	Title	Issue	Issue Date
01	Incident Response Framework	01	Jun 2021
02	Escalation Stages	01	Jun 2021
03	Incident Roles and Responsibilities	01	Jun 2021
04	Strategic Commander Role	01	Jun 2021
05	Tactical Commander Role	01	Jun 2021
06	Other Railway Incident Roles	01	Jun 2021
07	Communications and Situation Reporting	01	Jun 2021
08	Site Recovery and Restoration	01	Jun 2021
09	Specialist Incident Response	01	Jun 2021
10	Strategic Crisis Management	01	Jun 2021
11	Post Incident Review and Feedback	01	Jun 2021

NR/L3/OPS/251	Unmanned Aircraft System (Drone / UAS) Operations Issue 3; Sep 19	Compliance 07/09/19	Replaces NR/L2/OPS/251 Iss 2; Mar 19
----------------------	---	-------------------------------	--

This work instruction sets out:

- a) the operating arrangements for in-house trained Drone Pilots, Framework Drone Pilots and Drone Pilots operating on behalf of lineside neighbours
- b) mitigates the risk of uncontrolled operation of Small Unmanned Aircraft (SUA / Drones) being operated near, on or over Network Rail infrastructure, as these may result in:
 - damage to overhead lines and electrical wires;
 - distractions for train drivers; and
 - system failure resulting in injury or derailment.

(Contains NR/BS/LI/462)

NR/L3/OPS/255	Mitigation of Point Run Throughs Within Engineering Worksites – Points Stop Equipment (PSE) Process Issue 1; Mar 21	Compliance 05/06/21	Replaces New at Issue 119
----------------------	---	-------------------------------	-------------------------------------

The purpose of this standard is to contribute to the safe management and control of engineering train / On-track machines (OTM) / On-track plant (OTP) movements over or near trailing points within the worksite to mitigate point run throughs.

NR/L3/OPS/303	Possession of the Line for Engineering Work Delivery Requirements Issue 4; Jun 17	Compliance 02/09/17	Replaces NR/L3/NDS/303 Iss 3; Jun 10
----------------------	--	-------------------------------	--

The purpose of this work instruction is (in conjunction with GE/RT8000/T3 Possession of the line for engineering work and associated Handbooks), to inform Network Rail staff and applicable support services contractors the responsibilities and delivery requirements associated with taking a possession of the line for engineering work. The work instruction reduces the potential for conflict between possessions and the operational railway during engineering work.

Guidance Notes

NR/OPS/DEV/009	COVID-19 Network Rail: Good Practice Guide for Working at Operational Locations (Signal Boxes, Electrical Control Rooms, Controls) during COVID 19 Issue 1; Jun 20	Replaces New at Issue 116
-----------------------	--	-------------------------------------

COVID 19 guidance document for Network Rail Staff

NR/GN/OPS/005	Control and Testing with Rolling Stock Using Special Operating Instructions Issue 2; Jun 09	Replaces RT/LS/C/005 Iss 1; Aug 02
----------------------	---	--

This document provides guidance for controlling, so far as is reasonably practicable, the hazards and risks arising from the testing using rolling stock without taking an absolute possession of the line in accordance with the Rule Book Module T3.

4.18 RAIL MOUNTED VEHICLE & PLANT

Specifications (including Procedures)

RT/E/S/40017	Core Maintenance Specification for Powered Scrubber/ Sweeper Issue 1; Feb 1996	Replaces
--------------	--	----------

This is a generalised maintenance specification for powered scrubbers/sweepers.

Product Specifications

RT/E/PS/00016	Lineside Hot Axle Bearing Detectors Issue 1; Oct 02	Replaces
---------------	--	----------

This product specification states the technical requirements for hot axle bearing detector systems to be installed on Network Rail's operational infrastructure. Their purpose is to observe the rolling stock and identify and provide warning of an overheating axle bearing.

Level 1

NR/L1/RMVP/0001	Plant and Traction and Rolling Stock Policy Issue 5; Jun 19	Compliance 07/09/19	Replaces NR/L1/RMVP/0001 Iss 4; Sep 17
-----------------	--	-------------------------------	--

The implementation of this policy supports the management of Network Rail Plant and Traction and Rolling Stock (T&RS) assets to mitigate the following:

- non-compliance with legislation and regulatory requirements;
- operational safety risks on Network Rail managed infrastructure; and
- operational commercial risks caused by non-availability or failure.

Level 2

NR/L2/RMVP/0001	Acquisition of Railbound Vehicles and On Track Plant Issue 4; Sep 19	Compliance 07/12/19	Replaces NR/L2/RMVP/0001 Iss 3; Jun 17
-----------------	--	-------------------------------	--

This Standard defines the minimum requirements for all technical and engineering activities related to the safe acquisition of Railbound Vehicles and On Track Plant assets within the Plant and Traction and Rolling Stock (T&RS) portfolio.

The implementation of this standard helps to mitigate the following risks:

- ordering of vehicles, supply of safety critical products and services as defined in NR/L1/RMVP/0001 that are not fit for purpose;
- inability to get NoBo/DeBo/AB/PAB approval of new vehicles or vehicle upgrades; and
- that vehicles do not meet end user's requirements.

NR/L2/RMVP/0002	Operation and Use of Railbound Vehicles and On-track Plant Issue 3; Sep 19	Compliance 07/12/19	Replaces NR/L2/RMVP/0002 Iss 2; Jun 17
-----------------	--	-------------------------------	--

This Standard defines the minimum requirements for all technical and engineering activities related to the operation and use of Railbound Vehicles and On Track Plant (OTP) assets within the Plant and Traction and Rolling Stock (T&RS) portfolio.

The implementation of this standard helps to mitigate the following risks:

- a) dangerous use of Network Rail (NR) owned or hired in vehicles due to
 - incorrect work planning;
 - operation by non-competent staff;
 - poor asset condition;
 - misuse of equipment
- b) operation of rail vehicles without the correct documentation in place; and
- c) lack of accident management process in place for rail vehicle accidents.

NR/L2/RMVP/0003	Assurance, Performance & Monitoring of Railbound Vehicles and On Track Plant Issue 2; Sep 19	Compliance 07/12/19	Replaces NR/L2/RVE/0003 Iss 1; Dec 10
-----------------	---	-------------------------------	---

This Standard defines the minimum requirements for all technical and engineering activities related to the provision of Assurance and Performance Monitoring for Railbound Vehicles and On Track Plant (OTP) assets within the Plant and Traction and Rolling Stock (T&RS) portfolio.

The implementation of this standard will control risk associated with the use of vehicles, supply of safety critical products and provision of services as defined in NR/L1/RMVP/0001 that are not fit for purpose.

Note: NR/L2/RMVP/00022 Issue 2, (aka NR/PS/ELP/00022) is no longer mandatory, as of July 2012

NR/L2/RMVP/0090	Management of Maintenance and Change for Railbound Vehicles and On Track Plant Issue 4; Sep 19	Compliance 07/12/19	Replaces NR/L2/RMVP/0090 Iss 3; Jun 12
-----------------	---	-------------------------------	--

This Standard defines the minimum requirements for all technical and engineering activities related to the management of maintenance and associated changes to assets or processes for Railbound Vehicles and On Track Plant (OTP) assets within the Plant and Traction and Rolling Stock (T&RS) portfolio.

The implementation of this Standard will mitigate the following:

- a) The deployment of vehicles, safety critical products and services that are not fit for use; and
- b) The risk to Network Rail (NR) staff, including agents acting on their behalf, contractors and the public through poorly controlled changes to assets or associated processes.

NR/L2/RMVP/0131	Design and Installation of Fuelling, Lubrication Oil and Coolant Storage and Delivery Systems Issue 1; Dec 09	Compliance 06/03/10	Replaces New at Issue 74
------------------------	--	-------------------------------	------------------------------------

This standard defines the technical requirement for the Design and Installation of Fuelling, Lub oil and Coolant Storage and Delivery Systems to ensure the equipment achieves its intended design life and maintains the required levels of availability and reliability.

NR/L2/RMVP/0139	Design and Installation of Traversers Issue 1; Dec 09	Compliance 06/03/10	Replaces New at Issue 74
------------------------	--	-------------------------------	------------------------------------

This standard defines the technical requirements for the Design and Installation of Traversers to ensure the equipment achieves its intended design life and maintains the required levels of availability and reliability.

NR/L2/RMVP/0140	Design and Installation of Turntables Issue 1; Dec 09	Compliance 06/03/10	Replaces New at Issue 74
------------------------	--	-------------------------------	------------------------------------

This standard defines the technical requirements for the Design and installation of Turntables to ensure the equipment achieves its intended design life and maintains the required levels of availability and reliability.

NR/L2/RMVP/0142	Refurbishment of Underfloor Wheel Lathes Issue 1; Dec 09	Compliance 06/03/10	Replaces New at Issue 74
------------------------	---	-------------------------------	------------------------------------

This standard defines the technical requirements for undertaking refurbishment of fixed underfloor wheel lathes to ensure the equipment achieves its intended design life and maintains the required levels of availability and reliability.

NR/L2/RMVP/0172	Management of the Control and Calibration of Inspection, Measuring and Test Equipment Issue 3; Jun 21	Compliance 04/09/21	Replaces NR/L2/RMVP/0172 Iss 2; Sep 11
------------------------	--	-------------------------------	--

The purpose of this standard is to detail the requirements for the Management, Control and Calibration of Inspection, Measuring and Test Equipment.

NR/L2/RMVP/0200	Infrastructure Plant Manual Issue 10; Dec 18	Compliance 02/03/19	Replaces NR/PLANT/0200 Iss 9; Jun 17
------------------------	---	-------------------------------	--

This manual details requirements and guidance when using plant for the installation, renewal and maintenance of Network Rail's Managed Infrastructure.

NR/L2/RMVP/0200/	Module Title	Issue	Issue Date
P100	Reporting and Investigation of Plant Related Events	3	Dec 2018
P101	Monitoring Plant Activities	3	Dec 2018
P102	Hand Arm Vibration Management	3	Dec 2018
P300	Plant Approval and Design	4	Dec 2018
P301	Road Rail Access Points	3	Dec 2018
P500	Competence and Fitness	3	Dec 2018
P501	Systems of Work	4	Dec 2018
P503	Lifting Operations	4	Dec 2018
P505	Safe Working With Plant	3	Dec 2018
P506	On-Track Machines	3	Dec 2018
P508	Mobile Elevating Work Platforms (MEWPS)	3	Dec 2018
P509	Trailers and Attachments	3	Dec 2018
P511	Vegetation Management	3	Dec 2018
P513	Mobile Plant (Non-Rail Mounted) and Road Vehicles	3	Dec 2018
P514	Hand-Controlled Trolleys	4	Dec 2018
P515	Portable and Transportable Plant	3	Dec 2018
P521	On-Track Plant Operations Scheme	3	Dec 2018
P700	Plant Maintenance	3	Dec 2018

NR/L2/RMVP/1332	Wheelsets and Axle Bearings Manual Issue 5; Sep 19	Compliance 07/12/19	Replaces NR/L2/RMVP/1332 Iss 4; Jun 17
------------------------	---	-------------------------------	--

The implementation of this standard helps to mitigate the following risks:

- a) non-compliance with current legislation and regulatory requirements; and
- b) operational safety risks on Network Rail managed infrastructure:
 - The dangerous use of Network Rail owned or hired in equipment containing wheelsets due to:
 - o incorrect work planning
 - o operation by non-competent staff
 - o poor asset condition
 - o misuse of equipment
 - operation of rail equipment containing wheelsets without the correct documentation in place; and
 - lack of accident management process in place for Equipment containing wheelsets accidents.

NR/L2/RMVP/01327	Maintenance Facilities for Rail Vehicles Issue 2; Dec 20	Compliance 06/03/21	Replaces NR/L2/RVE/01327 Iss 1: Jun 08
-------------------------	---	-------------------------------	--

This standard defines the minimum requirements for facilities owned, hired or leased by Network Rail, used for the servicing and maintenance of rail vehicles where Network Rail has engineering responsibility.

NR/L2/RMVP/27035	Depot Protection Systems Issue 2; Sep 20	Compliance 05/12/20	Replaces RT/E/C/27035 Iss 1; Dec 04
-------------------------	---	-------------------------------	---

The purpose of this standard is to set out the minimum requirements for the design and installation of Depot Protection Systems (DPS). DPS is designed to protect staff and equipment by the safe and controlled movement of rail vehicles within a rail vehicle depot. The correct implementation of this standard provides a framework for compliance with legislation and industry standards.

NR/L2/RMVP/27176	Controlled Emission Toilet Servicing Installation Issue 3; Sep 20	Compliance 05/12/20	Replaces NR/SP/ELP/27176 Iss 2; Feb 06
-------------------------	---	-------------------------------	--

This Standard defines the minimum requirements for technical and engineering activities related to the installation and use of Controlled Emission Toilet (CET) servicing facility.

NR/L2/RMVP/27178	Examination of Pressure Vessels Issue 3; Sep 19	Compliance 07/12/19	Replaces NR/SP/ELP/27178 Iss 2; Dec 05
-------------------------	--	-------------------------------	--

This standard describes the minimum requirements for the maintenance of pressure vessels fitted within mobile and installed pressure systems and to meet the obligations of NR/L1/RMVP/0001.

The management of pressure vessels and associated works, including maintenance, must be in accordance with the latest Pressure Systems Safety Regulations (PSSR).

By the implementation of this standard, it will assist to mitigate the following risks:

- dangerous use of Network Rail owned or hired in equipment containing pressure vessels due to:
 - o incorrect work planning
 - o operation by non-competent staff
 - o poor asset condition
 - o misuse of equipment
- operation of rail equipment containing pressure vessels without the correct documentation in place; and
- lack of accident management process in place for equipment containing pressure vessels.

NR/L2/RMVP/27701	Management of Industrial Rail Vehicles Issue 1; Jun 17	Compliance 31/01/18	Replaces New at Issue 104
-------------------------	---	-------------------------------	-------------------------------------

The implementation of this standard helps to mitigate the following risks:

- non-compliance with current legislation and regulatory requirements; and
- operational safety risks on Network Rail managed infrastructure.

NR/L2/RVE/0130	Design and Installation of Carriage Washing Machines Issue 1; Dec 08	Compliance 01/03/09	Replaces RT/E/C/27031 Iss 1; Dec 04
-----------------------	--	-------------------------------	---

This standard defines the technical requirements for carriage washing machines and shall be referenced when compiling project remits and technical workscopes for renewal and enhancement schemes.

NR/L2/RVE/0132	Design and Installation of Cranes Issue 1; Dec 08	Compliance 01/03/09	Replaces New at Issue 70
-----------------------	--	-------------------------------	------------------------------------

This specification defines the technical requirements to be considered when procuring new fixed cranes. This document shall be referenced when producing project remits and technical workscopes for the installation of cranes. It all also defines the information to be supplied to crane manufacturers when undertaking the procurement.

NR/L2/RVE/0133	Design and Installation of Underfloor Wheel Lathes Issue 1; Dec 08	Compliance 01/03/09	Replaces New at Issue 70
-----------------------	--	-------------------------------	------------------------------------

This specification lays down the technical requirements for the design and installation of underfloor wheel lathes used for the reprofiling of wheelsets whether attached to the rolling stock or individually. The standard shall be referenced whilst compiling project remits and technical workscopes for underfloor wheel lathe projects

NR/L2/RVE/0134	Shunting Vehicles for use with Underfloor Wheel Lathe Facilities Issue 1; Dec 08	Compliance 01/03/09	Replaces New at Issue 70
-----------------------	---	-------------------------------	------------------------------------

This standard defines the technical requirements for battery operated shunting vehicles whether they be permanently mounted on the rail or road/rail vehicles. The shunting vehicles are to be used solely for the haulage of rolling stock over fixed underfloor wheel lathes and are a replacement for capstan winch systems that have been used historically.

NR/L2/RVE/0135	Mobile Wheel Reprofiling Machines Issue 1; Dec 08	Compliance 01/03/09	Replaces New at Issue 70
-----------------------	--	-------------------------------	------------------------------------

This standard details the technical requirements for mobile wheel reprofiling machines and shall be referenced when compiling project remits and technical workscopes for the procurement of mobile wheel lathes. Mobile wheel lathes will be used as an alternative resource for tyre turning at Light Maintenance Depots whilst fixed underfloor wheel lathes are undergoing major overhaul or renewal.

NR/L2/RVE/0136	Vehicle Lifting Jacks Issue 1; Dec 08	Compliance 01/03/09	Replaces New at Issue 70
-----------------------	--	-------------------------------	------------------------------------

To define the technical requirements for electrically operated screw driven lifting jacks used to lift rail vehicles. This standard shall be referenced whilst compiling project remits and technical worksopes for the procurement of new rail vehicle lifting jacks.

NR/L2/RVE/1350	Control of Rail Vehicle Testing Issue 1; Dec 08	Compliance 01/09/08	Replaces New at Issue 70
-----------------------	--	-------------------------------	------------------------------------

This standard defines the requirement for the planning and control of risks during on-track testing involving any vehicle from Network Rail fleet of rail vehicles, or any rail vehicle on behalf of other Railway Undertakings excluding routine testing which does not require a physical change to the vehicle, or is deemed part of the normal operational or maintenance regime of the vehicle.

Level 3

NR/L3/RMVP/0201	Calibration Work Instruction Manual Issue 2; Sep 11	Compliance 03/12/11	Replaces NR/L3/MTC/ME0201 Iss 1; Mar 11
------------------------	--	-------------------------------	---

This standard provides the index and version control of Calibration Work Instructions for the internal calibration and comparison checking of Inspection, Measuring and Test Equipment (IMTE).

NR/L3/RMVP/1006	Technical Audit Procedure for Plant and Traction and Rolling Stock Issue 2; Jun 18	Compliance 01/09/18	Replaces NR/L3/RVE/1006 Iss 1; Dec 07
-----------------	--	------------------------	--

This procedure supports the Network Rail corporate assurance framework requirements specified in NR/L2/ASR/036 and NR/L2/RVE/0003. It is based on the guidance and principles of BS EN ISO 19011.

NR/L3/RMVP/40028	Core Maintenance for Traversers Issue 2; Sep 18	Compliance 01/12/18	Replaces RT/E/S/40028 Iss 1; Feb 1996
------------------	---	------------------------	--

This work instruction describes the minimum requirements for quarterly, twice yearly and annual maintenance routines for traversers. It supports the control; planned, preventative and reactive maintenance – inspect equipment in line with the maintenance plan and repair/replace defective parts or renew equipment. It helps to mitigate the risk; failure of fixed depot plant.

NR/L3/RMVP/40031	Core Maintenance for Wheel/Bogie Drops Issue 2; Sep 18	Compliance 01/12/18	Replaces RT/E/S/40031 Iss 1; Feb 1996
------------------	--	------------------------	--

This work instruction describes minimum requirements for the quarterly, twice yearly and annual maintenance routines for wheel/bogie drops. It supports the control: planned, preventative and reactive maintenance – inspect equipment in line with the maintenance plan and repair/replace defective parts or renew equipment. It helps to mitigate the risk of failure of fixed depot plant.

NR/L3/RMVP/40035	Rail Vehicle Welding Issue 1; Mar 19	Compliance 01/06/19	Replaces New at Issue 111
------------------	--------------------------------------	------------------------	------------------------------

This document defines the minimum requirements to manage and conduct welding activities on rail vehicles to maintain the required safety, quality and suitability of the weld. Also, through these controls the required certifications are set out so that welding on rail vehicles is carried out with the correct competency level. With this document, the associated risks to weld failures on rail vehicles are reduced.

Guidance Notes (including Codes of Practice)

NR/GN/RMVP/0200	Infrastructure Plant Manual Guidance Issue 1; Dec 18	Compliance NA	Replaces New at Issue 110
-----------------	--	------------------	------------------------------

This guidance note supports the NR/L2/RMVP/0200 modules when using plant for the installation, renewal and maintenance of Network Rail's managed infrastructure.

NR/GN/RMVP/27078	Routine Inspection and Maintenance of Diesel and Electrically Driven Air Compressor Installations Issue 4; Sep 19	Compliance NA	Replaces NR/L3/ELP/27078 Iss 3; Aug 08
------------------	---	------------------	---

It is intended that the application of this Guidance Note by a technically competent individual will enable them to author appropriate Level 3 maintenance documentation to allow the on-going routine maintenance of diesel or electrically driven compressed air installations associated with signalling supplies.

NR/GN/RMVP/27235	Guidance for the Specification, Design and Maintenance of Hydraulic Fluid Power Systems Issue 2; Sep 19	Compliance NA	Replaces NR/GN/ELP/27235 Iss 1; Dec 05 NR/SP/ELP/27234 Iss 1; Dec 05
------------------	---	------------------	--

This guidance note provides guidance in relation to the specification, design and maintenance of hydraulic fluid power systems. It will provide a consistent approach and defines requirements of a hydraulic system over and above the requirements of BS EN ISO 4413

NR/GN/RMVP/27700	Plant Product Introduction Process Issue 1; Jun 17	Compliance NA	Replaces New at Issue 104
------------------	--	------------------	------------------------------

The purpose of this guidance note is to:

- provide best practice for capturing and delivering the required function and purpose of plant products;
- indicate where to find the relevant standards, controls and processes required for compliant and effective introduction of plant products; and
- provide reference to additional information sources that might support the development of further best practice.

NR/GN/RMVP/27702 Plant Product Acceptance Process Issue 2; Mar 18**Compliance**
NA**Replaces**
NR/GN/RMVP/27702 Iss 1; Jun 17

The implementation of this standard helps to:

- a) provide a systematic, structured and robust assessment of risks associated with hazards during product acceptance of rail borne plant in line with the common safety method (CSM-RA) on risk evaluation and assessment. Where an alternative risk assessment approach is employed, this should adopt the principles of CSM-RA;
- b) confirm the safety requirements necessary to mitigate risks to an acceptable level i.e. as low as reasonably practicable (ALARP) or so far as is reasonably practicable (SFAIRP), have been determined, complied with and safety measures put in place; place, thereby reducing the risk of in-service incidents/accidents.

4.19 SAFETY & COMPLIANCE

ASR, HSS

4.19.2 Assurance, 4.19.3 Health & Safety Systems

ASR Level 2; HSS Co Stds / Level 1 / 2

4.19.2 Assurance

Level 2

NR/L2/ASR/036	Network Rail Assurance Framework Issue 5; Dec 17	Compliance 03/03/18	Replaces NR/SP/ASR/036 Issue 4; Apr 07
----------------------	---	-------------------------------	--

This specification describes the framework through which:

- it is confirmed that the risk controls defined in company standards and control documents are well designed and implemented as planned;
- the outputs from these assurance activities are analysed and reviewed;
- action is taken to improve risk controls and the assurance activities.

4.19.3 Health & Safety Systems

Company Standards

RT/LS/P/034	Safety Procedure Manuals Issue 3; Jun 05		Replaces RT/LS/P/034 Iss 2; Nov 05
--------------------	---	--	--

This standard establishes the framework and control processes for, and mandates the use of, safety procedure manuals.

Level 1

NR/L1/HSS/00126	Prevention Through Engineering and Design (PtED) Policy Issue 1; Dec 16	Compliance 04/12/17	Replaces New at Issue 102
------------------------	---	-------------------------------	-------------------------------------

This policy commits Network Rail to establish and continually improve the means of engineering or designing, the elimination or reduction of hazards and risks in areas of:

- a) safety; b) health and wellbeing; c) sustainability d) environmental protection e) security; and f) inclusion.

Level 2

NR/L2/HSS/020	Safety Validation of Organisational Change Issue 10; Sep 15	Compliance 05/12/15	Replaces NR/L2/HSS/020 Iss 9; Mar 09
----------------------	--	-------------------------------	--

This document is to provide assurance that proposals for organisational change and any consequential changes to Network Rail's Health & Safety Management System are reviewed.

4.19.4 Occupational Health & Safety

Company Standards

NR/CS/OHS/002	Policy on Working Safely Issue 1; Feb 07	Compliance 07/04/07	Replaces
----------------------	---	-------------------------------	-----------------

The purpose of this standard is to set out Network Rail's policy and related implementation arrangements to ensure that employees and contractors work safely.

NR/CS/OHS/005	Personal Security Issue 1; Aug 06		Replaces
----------------------	--	--	-----------------

The purpose of this standard is to set out Network Rail's policy and related implementation arrangements to control risks to the personal security of employees whilst at work.

Specifications (including Procedures)

NR/SP/OHS/00114	Specialist Risk Assessment - Hand Arm Vibration Issue 1; Aug 06	Compliance 07/04/07	Replaces
------------------------	--	-------------------------------	-----------------

This document details the process by which Network Rail will undertake specialist risk assessments for hand-arm vibration in support of NR/SP/OHS/00102, "Work activity risk assessment"; and ensure risk assessment is undertaken in compliance with the Control of vibration at work regulations 05 for hand-arm vibration.

NR/SP/OHS/00122	Specialist Risk Assessment - Workplace Noise Issue 1; Aug 06	Compliance 07/04/07	Replaces
------------------------	---	-------------------------------	-----------------

This document details the process by which Network Rail will:-

- undertake specialist risk assessments for workplace noise in support of NR/SP/OHS/00102, "Work activity risk assessment"; and
- ensure risk assessment is undertaken in compliance with the Control of noise at work regulations 05.

Level 1

NR/L1/OHS/051	Drugs and Alcohol Policy Issue 6; Dec 15	Compliance 05/03/16	Replaces NR/L1/OHS/051 Iss 5; Sep 11
----------------------	---	-------------------------------	--

Drugs and alcohol affect people's ability to work safely, which is a risk to individuals as well as to the organisation. Implementation of this policy contributes to controlling the risk of Network Rail employees and contractors working while under the influence of drugs and alcohol. It also helps achieve compliance with the requirements of the Transport and Works Act 1992, Network Rail's Health and Safety Management System, and Railway Group Standard GE/RT8070, Drugs and Alcohol.

Level 2

NR/L2/OHS/003	Fatigue Risk Management Issue 9; Dec 19	Compliance 29/10/2022	Replaces NR/L2/OHS/003 Iss 8; Jun 19
----------------------	--	---------------------------------	--

The purpose of this manual is to reduce the risk of fatigue related incidents and ill health within Network Rail and its supply chain to as low as reasonably practicable (ALARP). This process also demonstrates the means by which Network Rail complies with UK Health and Safety legislation in relation to fatigue risk.

NR/L2/OHS/003/	Title	Issue	Issue Date
01	Fatigue Risk Index Principles	1	Jun 2018
02	Roster Design and Working Patterns	1	Mar 2019
03	Exceedance Management	1	June 2019
04	Fatigue Assessment and Fatigue Management Plans	1	Dec 2019
05	Working Hours and On Call	1	Dec 2019

NR/L2/OHS/005	"High Street" Environment & Conditions for Work Outside Network Rail Managed Infrastructure Issue 7; Sep 10	Compliance 04/12/10	Replaces RT/LS/P/005 Iss 5: Apr 05*
----------------------	--	-------------------------------	---

The purpose of this standard is to specify the requirements for the segregation of work activities on, or adjacent to, Network Rail Managed Infrastructure (NRMI) from railway operations. This allows work to take place without the necessity to apply the specific control measures associated with the operational railway (i.e. in a "High Street" environment), but in doing so requires other controls and a controlled environment.

Price: C

* (Iss 6 withdrawn, unpublished)

NR/L2/OHS/019	Safety of People Working on or Near the Line Issue 10; Dec 20	Compliance 06/03/21	Replaces NR/L2/OHS/019 Iss 9; Mar 17
----------------------	--	-------------------------------	--

The purpose of the standard is to control the risks to personnel from site risks, activity risks and train movements by requiring effective planning of work activities "on or near the line", or which could affect the area termed "on or near the line".

4.19 SAFETY & COMPLIANCE

4.19.4 Occupational Health & Safety

OHS
Level 2

NR/L2/OHS/019/	Title	Issue	Issue Date
01	Planning and Working During Incident Response	1	Mar 2017
02	Planning and Working in a Possession	1	Mar 2017
03	Planning and Working Using Protection Arrangements	1	Mar 2017
04	Planning and Working Using Warning Arrangements	1	Mar 2017
05	Management of Runaway Risk	1	Dec 2020

NR/L2/OHS/020	Track Visitor Permits Issue 5; Aug 08	Compliance	Replaces
		01/12/08	RT/LS/S/020 Iss 4; Feb 05

To set out the revised arrangements for the issue and control of Track Visitor Permits (TVPs) issued in accordance with Network Rail Company Specification NR/SP/CTM/021 for people without Personal Track Safety (PTS) certification.

NR/L2/OHS/021	Personal Protective Equipment and Workwear Issue 3; Jun 09	Compliance	Replaces
		06/06/09	NR/L2/OHS/021 Iss 2; Jun 08

The Standard specifies the minimum levels of requirement for Personal Protective Equipment and work wear that is to be worn when working on Network Rail Controlled Infrastructure

NR/L2/OHS/022	Working Safely at Height Issue 2; Mar 20	Compliance	Replaces
		06/06/20	NR/L2/OHS/022 Iss 1; Sep 10

This business process enables employees who design, plan, manage and carry out work at heights to do so safely, and within the requirements of legislation.

It adopts a risk-based approach to working at height activities in line with the principles of the legislation and industry best practice. Under this approach measures taken to protect the safety of persons are proportionate to the risks involved.

NR/L2/OHS/032	Training, Competence and Assessment in Accident and Incident Investigation Issue 2; Dec 20	Compliance	Replaces
		31/03/21	NR/SP/CTM/032 Iss 1; Jun 07

This business process confirms that personnel who undertake accident and incident investigations and / or act as a Designated Competent Person (DCP) are competent to perform the work.

NR/L2/OHS/0044	Planning and Managing Construction Work Issue 5; Dec 16	Compliance	Replaces
		26/01/17	NR/L3/INI/CP0044 Iss 4; Jun 10

The implementation of this standard:

- allows for the right information to reach the right people at the right time for them to do their job safely;
- contributes to the safe management and control of work and tasks at a site of work;
- provides a consistent layout, content and information headings for Construction Phase Plans, Work Package Plans and Task Briefing Sheets

NR/L2/OHS/0047	Managing Health and Safety in Construction (Application of the Construction (Design and Management) Regulations to Network Rail) Issue 7; Jun 19	Compliance	Replaces
		07/09/19	NR/L2/INI/CP0047 Iss 6; Jun 15

This business process sets out the requirements and principles to be implemented by Network Rail to enable compliance with the legal requirements of the Construction (Design and Management) Regulations 2015 (CDM Regulations).

NR/L2/OHS/050	Sentinel Scheme Rules Issue 4; Mar 11	Compliance	Replaces
		04/06/11	RT/LS/P/050 Iss 3; Jun 05

To specify the rules and procedures for the management of the Sentinel Scheme.

To specify the roles and responsibilities of the companies and individuals who manage the Scheme, work within the Scheme or hold competences within the scope of the Scheme
(Contains NR/BS/LI/326)

NR/L2/OHS/052	Traumatic Incident Management Issue 1; Jun 16	Compliance	Replaces
		03/09/16	New at Issue 100

This standard is designed to:

- provide an effective and consistent process for how Network Rail supports employees following traumatic incidents in the workplace;
- manage the risk of trauma related mental ill health in the workplace; and
- reduce the effect of traumatic incidents at work on the mental wellbeing of employees.

NR/L2/OHS/053	Assessing the Risk of Stress in the Workplace Issue 2; Jun 21	Compliance	Replaces
		03/01/22	NR/L2/OHS/053 Iss1; Jun 16

This business process is designed to:

- provide an effective and consistent process for how line managers can assess, control and manage the risk of work factors adversely affecting the mental wellbeing of employees;
- outline how line managers and employees can discuss and identify support required for any non-work factors that may adversely affect the mental wellbeing of employees.

NR/L2/OHS/069	Lineside Facilities For Personnel Safety Issue 3; Dec 20	Compliance 05/06/21	Replaces RT/CE/S/069 Iss 2; Feb 05
----------------------	---	-------------------------------	--

This specification sets the safety requirements for the provision of facilities providing safe access onto, along and across the track for persons whose duties require them to be on or near the line or lineside.

NR/L2/OHS/00102	Work Activity Risk Assessments Issue 5; Jun 17	Compliance 02/09/17	Replaces NR/SP/OHS/00102 Iss 4; Aug 06
------------------------	---	-------------------------------	--

The standard describes the process by which Network Rail:

- conducts suitable and sufficient assessments of risk as required by Management of Health and Safety at Work Regulations 1999;
- assesses risks associated with the work activities carried out by Network Rail employees; and
- document and makes available the findings of work activity risk assessments.

NR/L2/OHS/00103	Specialist Risk Assessment COSHH Issue 3; Mar 09	Compliance 06/06/09	Replaces NR/SP/OHS/00103 Iss 2; Jun 05
------------------------	---	-------------------------------	--

This Level 2 standard specifies requirements for Network Rail employees working with or exposed to Substances Hazardous to Health.

NR/L2/OHS/00106	Management of Manual Handling Risk Issue 3; Jun 18	Compliance 01/09/2018	Replaces NR/SP/OHS/00106 Iss 2; Jun 05
------------------------	---	---------------------------------	--

This Business Process allows Network Rail to:

- meet the requirements of the Manual Handling Operations Regulations 1992 (as amended); and
- eliminate or reduce the risk of injury from manual handling operations across its range of activities; from heavy engineering

NR/L2/OHS/00107	Management Procedure - Display Screen Equipment Issue 3; Jun 10	Compliance 05/06/10	Replaces NR/SP/OHS/00107 Iss 2; Jun 05
------------------------	--	-------------------------------	--

This management procedure describes the process for implementing the requirements of the Health & Safety (Display Screen Equipment) Regulations 1992 as amended by the Health & Safety (Miscellaneous Amendments) Regulations 2002, and reducing the risk to the health of our employees.

NR/L2/OHS/00110	First Aid at Work Issue 6; Sep 17	Compliance 03/03/18	Replaces NR/L2/OHS/00110 Iss 5; Mar 10
------------------------	--	-------------------------------	--

The Health and Safety (First Aid) Regulations requires employers to provide employees with access to suitable and sufficient first aid equipment and facilities while they are at work.

NR/L2/OHS/00112	Worksafe Procedure Issue 3; Sep 20	Compliance 05/09/20	Replaces NR/L2/OHS/00112 Iss 2; Dec 09
------------------------	---	-------------------------------	--

This business process:

- enables work groups / employees to feel confident that if they have genuine concerns about the safety of a task or a system of work, their concerns will be given serious consideration and they will not face recriminations.
- allows for work to stop if there is a potential or imminent risk of an accident or incident arising;
- can be applied for example, by a work group / employee if they are asked to undertake a task without the required training, equipment or personal protective equipment, or if there are no adequate risk controls

NR/L2/OHS/00113	Health Surveillance and Management of Diagnoses for Hand-Arm Vibration Syndrome Issue 5; Mar 16	Compliance 04/06/16	Replaces NR/L2/OHS/00113 Iss 4; Mar 10
------------------------	--	-------------------------------	--

The implementation of this standard will help to mitigate the risk of hand-arm vibration (HAV) to employees who use hand-held vibrating tools in the workplace.

This standard complies with the requirements of the Control of Vibration at Work Regulations 2005 ('the Regulations'). Implementation of the process will enable Network Rail to comply with its legal obligations under the Regulations.

NR/L2/OHS/00117	Specialist Risk Assessment – New and Expectant Mothers Issue 2; Mar 10	Compliance 05/06/10	Replaces NR/SP/OHS/00117 Iss 1; Jun 06
------------------------	---	-------------------------------	--

This procedure defines the process for identifying hazards and assessing risks at work that may affect the health and safety of new and expectant mothers and their child (ren). Working conditions normally considered acceptable may no longer be so during pregnancy and while breastfeeding. This procedure is in response to the requirements of Regulation 16 of the Management of Health and Safety at Work Regulations 1999. Implementation of the standard will enable Network Rail to comply with its legal obligations under the regulations and meet its duty of care for new and expectant mothers.

NR/L2/OHS/00120	Testing for Drugs and Alcohol Issue 5; Dec 15	Compliance 05/03/16	Replaces See below
------------------------	--	-------------------------------	------------------------------

Replaces: NR/L2/OHS/00118 Iss 4; Sep 11, NR/L2/OHS/00119 Iss 4; Sep 11, NR/L2/OHS/00120 Iss 4; Sep 11

Drugs and alcohol affect people's ability to work safely, which is a risk to individuals and to Network Rail.

The implementation of this standard contributes to controlling the risk of individuals being unfit for duty due to drugs and alcohol.

NR/L2/OHS/00123	Health Screening and Health Surveillance for Noise Induced Hearing Loss Issue 1; Mar 08	Compliance 01/03/09	Replaces
------------------------	--	-------------------------------	-----------------

The document describes the system of health screening and health surveillance for employees and prospective employees of Network Rail whose health may be at risk due to exposure to noise at work.

NR/L2/OHS/00124	Competence Specific Medical Fitness Requirements and Occupational Health Provider Requirements for Medical Assessments Issue 3; Dec 16	Compliance 04/03/17	Replaces See below
------------------------	---	-------------------------------	------------------------------

Replaces: NR/L2/OHS/018 Iss 5; Sep 11, NR/L2/OHS/00124 Iss 2; Dec 09

The implementation of this standard contributes to:

- Controlling the risk of employees being appointed to roles they are not medically fit for;
- Reducing the risk of employees' health impacting on their work; and
- Supporting suppliers in providing safe, appropriate and effective services.

NR/L2/OHS/00127	Road Fleet Compliance Issue 1; Jun 21	Compliance 04/09/21	Replaces NR/L1/OHS/210 Iss 1; Mar 17
------------------------	--	-------------------------------	--

The Standard allows Network Rail to: •reduce road risk to as low as is reasonably practical(ALARP) and the business vision of 'Everyone Home Safe Every Day.' The processes and procedures are aligned to that cause;

- deliver a high standard of safety and compliance for the management of occupational road risk;
- deliver a positive cultural change in relation to our current and historic performance.

NR/L2/OHS/157	Health Surveillance for Silica and Asbestos and the Management of Diagnosed Occupational Respiratory Conditions Issue 1; Mar 17	Compliance 03/06/17	Replaces New at Issue 103
----------------------	--	-------------------------------	-------------------------------------

The purpose of this standard is to mitigate the health risks associated with exposure to respiratory hazards through inhalation; specifically those health risks associated with silica and asbestos.

It can be applied to other respiratory hazards, such as, but not limited to, welding fumes.

NR/L2/OHS/501	Trackworker Protection and Warning Systems Issue 2; Dec 20	Compliance 06/03/21	Replaces NR/SP/OHS/501 Iss 1; Aug 05
----------------------	---	-------------------------------	--

The purpose of this manual is to provide a framework within which the minimum standards for track worker protection and warning systems are contained.

NR/L2/OHS/501	Title	Issue	Issue Date
Mod P1	Track Circuit Operating Device (TCOD)	1	Dec 2020
Mod W1	Semi-Automatic Track Warning System (SATWS)	1	Dec 2020
Mod W2	Automatic Track Warning System (ATWS)	1	Dec 2020
Mod W3	Lookout Operated Warning System (LOWS)	1	Dec 2020

Level 3

NR/L3/OHS/019-IP	Planning and Delivering Safe Work - Implementation Principles for Infrastructure Projects Issue 1; Jun 18	Compliance 24/09/18	Replaces New at Issue 108
-------------------------	--	-------------------------------	-------------------------------------

This work instruction sets out the arrangements for all Infrastructure Projects functions and its supply chain to implement the Planning and Delivering Safe Work process. It reduces the risk of incidents and accidents by:

- increasing clarity associated with responsibilities;
- enhancing the planning process by involving those delivering the work;
- reducing the number of uncontrolled or late changes to the plan.

NR/L3/OHS/0046	The Reporting, Investigation and Recording of Safety and Sustainable Development Events and Close Calls within Infrastructure Projects Issue 3; Jun 18	Compliance 01/09/18	Replaces NR/L3/INI/CP0046 Iss 2; Jun 11
-----------------------	---	-------------------------------	---

This work instruction outlines the process to be followed to achieve compliance with NR/L2/INV/002, the reporting and investigation manual and associated modules by Contractors delivering projects on behalf of Network Rail Infrastructure Projects. This work instruction further explains the place of Life Savings Rules and Fair Culture investigation within the overarching process and clarifies the expectations Network Rail has of its Contractors in their management and close out of Close Calls.

NR/L3/OHS/00125	Specialist Risk Assessment - COSHH for Functions other than Maintenance, Operations and Customer Services and the National Delivery Service (NDS) Issue 1; Mar 09	Compliance 06/06/09	Replaces New at Issue 71
------------------------	--	-------------------------------	------------------------------------

This Network Rail standard facilitates a consistent approach to the requirements contained within the Control of Substances Hazardous to Health Regulations 2002 (COSHH) and NR/L2/OHS/00103 Occupational Health and Safety Manual – Specialist Risk Assessment – Hazardous Substances/products, across all Network Rail sites.

NR/L3/OHS/MTC/0150	Specialist Risk Assessment - COSHH for Infrastructure Maintenance Issue 3; Mar 09	Compliance 07/03/09	Replaces NR/L2/MTC/SE0150 Iss 2; Jun 08
---------------------------	--	-------------------------------	--

This procedure defines the process for the management of hazardous substances/products within Network Rail Maintenance using the sypol COSHH management system. The use of this COSHH compliance software helps ensure compliance with the Control of Substances Hazardous to Health (COSHH) Regulations 2002.

NR/L3/OHS/NDS/301	Specialist Risk Assessment - COSHH For NDS Issue 1; Mar 09	Compliance 06/06/09	Replaces New at Issue 71
--------------------------	---	-------------------------------	------------------------------------

This company standard defines the process for the management of hazardous substances and products within the National Delivery Service (NDS) utilising the Sypol COSHH Management System.

Guidance Notes

NR/GN/OHS/00150	Infection Control Guidance Issue 3; Mar 09	Replaces NR/GN/OHS/00150 Iss 2; Aug 06
------------------------	---	--

This guidance provides information on the identification, assessment and control of potential risk of infections at work and those that employees may bring into the workplace. In addition, it details the support available to staff who are accidentally exposed to blood borne infections through needle stick injury or body splash incidents. The application of this guidance assists Network Rail to meet its legal compliance, as well as demonstrating its commitment to the health, safety and welfare of its employees.

4.20 SIGNAL ENGINEERING

Specifications (including Procedures)

NR/SP/SIG/02023	Requirements for TASS Infrastructure – System Design Issue 2; Dec 05	Replaces RT/E/S/02023 Iss 1; Dec 03
------------------------	---	---

This specification defines the design requirements for the Tilt Authorisation and Speed Supervision (TASS) system developed to deliver the principal requirements of Railway Group standards GE/RT8012 "Controlling the speed of tilting trains through curves" and GE/RT8019 "Tilting trains: controlling tilt systems to maintain clearances".

NR/SP/SIG/02024	Requirements for TASS Infrastructure – Installation, Test and Maintenance Issue 2; Dec 05	Replaces RT/E/S/0204 Iss 1; Dec 03
------------------------	--	--

This specification defines the installation, test and maintenance requirements for the track-based equipment associated with the Tilt Authorisation and Speed Supervision (TASS) system developed to deliver the principal requirements of Railway Group standards GE/RT8012 "Controlling the speed of tilting trains through curves" and GE/RT8019 "Tilting trains: controlling tilt systems to maintain clearances".

NR/SP/SIG/10040	IECC Applications Manual Contents Issue 8; Dec 06	Replaces RT/E/S/10040 Iss 7; Dec 04
------------------------	--	---

This specification authorises the use of the Integrated Electronic Control Centre (IECC) applications manual for the design and maintenance of signalling schemes employing IECC equipment on Network Rail infrastructure. It lists all the documents contained within the IECC Applications Manual which are current and approved for use. It also provides a history of the upgrades to the IECC since April 94.

NR/SP/SIG/11130	Requirements for the Provision of SPAD Alarms at Signalling Control Centres Issue 2; Oct 06	Replaces RT/E/S/11130 Iss 1; Dec 02
------------------------	--	---

This specification defines the operational and technical requirements for the provision of SPAD alarms at signalling control centres. The objective is to present a consistent approach that reflects best practice and to ensure that human factors considerations are properly addressed.

NR/SP/SIG/19253	Westinghouse Signals Style 63 Point Machine (Sigwen 002) Issue 3; Jun 07	Compliance 02/06/07	Replaces RT/E/C/19253 Iss 2; Feb 99
------------------------	---	-------------------------------	---

This standard advises Network Rail's suppliers who manufacture, repair or service Westinghouse Signals style 63 point machines of processes that need to be adopted/amended before the equipment is released for re-use on Network Rail's infrastructure. This information is supplementary to manufacture, repair or servicing standards.

NR/SP/SIG/50002	Methodology for the Demonstration of Compliance with Single Rail Reed Track Circuits on the AC Railway Issue 2; Feb 07	Replaces NR/GN/SIG/5002 Iss 1; Feb 03
------------------------	---	---

The purpose of this document is to provide a methodology to demonstrate compatibility with "RT" type single rail track circuits on the ac railway on Network Rail controlled infrastructure.
(Contains NR/BS/LI/424 Issue 2)

NR/SP/SIG/50003	Methodology for the Demonstration of Electrical Compatibility with Double Rail Reed Track Circuits on the DC Railway Issue 2; Feb 07	Replaces NR/GN/SIG/5003 Iss 1; Feb 03
------------------------	---	---

The purpose of this document is to provide a methodology to demonstrate electrical compatibility with "RT" type double rail reed track circuits on the dc electrified railway on Network Rail controlled infrastructure.

NR/SP/SIG/50004	Methodology for the Demonstration of Electrical Compatibility with DC (AC-immune) Track Circuits Issue 2; Apr 06	Replaces RT/E/C/5004 Iss 1; Apr 03
------------------------	---	--

The purpose of this document is to provide a methodology to demonstrate compatibility with ac immune dc track circuits on the ac railway on Network Rail controlled infrastructure.

NR/SP/SIG/50006	Methodology for the Demonstration of Compatibility with 50Hz Double Rail Track Circuits Issue 1; Apr 06	Replaces
------------------------	--	-----------------

The purpose of this document is to provide a methodology for the demonstration of electromagnetic compatibility of rolling stock with 50 Hz double rail track circuits installed on Network Rail controlled infrastructure.

NR/SP/SIG/50012	Methodology for the Demonstration of Compatibility with TPWS Trackside Equipment Issue 2; Apr 06	Replaces RT/E/C/50012 Iss 1; Feb 03
------------------------	---	---

The purpose of this document is to provide a methodology to demonstrate compatibility with Train Protection and Warning System (TPWS) trackside equipment on the AC and DC railways on Network Rail controlled infrastructure.

RT/D/S/006	Retro-reflective Temporary Speed Equipment Issue 1; Mar 96	Replaces
-------------------	---	-----------------

This specification defines the appearance of temporary speed restriction retro-reflective equipment, the minimum technical requirements to achieve safety and safe interworking, and positioning of equipment clear of trains.

RT/E/P/10024	Signaller's Operating Guide for the use of the IECC Signalling Workstation Issue 4; Aug 04	Replaces RT/E/P/10024 Iss 3; Aug 03
---------------------	--	---

This document is the signaller's operating guide for the Integrated Electronic Control Centre (IECC).

RT/E/P/10025	IECC Timetable Processor Edit Facilities User Guide Issue 3; Dec 01	Replaces RT/E/P/10025 Iss 2; Feb 99
---------------------	--	---

This procedure provides instructions for the use of the IECC Timetable Processor User Edit Facilities.

RT/E/S/02026	Requirements for the Provision and Management of TASS Infrastructure Data Issue 1; Jun 05	Replaces
---------------------	---	-----------------

This specification gives information to those engaged in preparing, maintaining and managing TASS infrastructure data. The details provided set out the method by which TASS infrastructure data needs to be structured in order to meet the requirements of RT/E/S/02023. TASS system requirements are detailed in the three documents referenced in section 3.

RT/E/S/10029	Operation and Maintenance of Non-intrusive Earth Leakage Test Adapter for Reed FDM Systems Produced to Specification EDS 01/96 MOD State 3 Issue 1; Aug 98	Replaces
---------------------	--	-----------------

This standard specifies the user and maintenance requirements for the non-intrusive FDM earth leakage adapter. The adapter allows a standard multimeter to be adapted to allow it to measure the cable resistance to earth of the FDM system. Existing instruments for measuring the resistance pose the hazard of generating an interfering signal through its power supply and can therefore not be used on a live system.

RT/E/S/10060	Vital Signalling Timer Issue 1; Feb 99	Replaces
---------------------	---	-----------------

This document has been prepared to define the performance requirements for a "Vital signalling timer" unit for use in signalling circuitry.

RT/E/S/10062	Requirement Specification for Performance of Long Range Colour Light Signals Issue 1; Aug 99	Replaces
---------------------	---	-----------------

This specification is for the performance requirements of long range colour light signals.

RT/E/S/10067	VDU Based Signalling Control System Issue 2; Aug 03	Replaces RT/E/S/10067 Iss 1; May 97
---------------------	--	---

The purpose of this requirement specification is to define the essential and desirable requirements for a VDU based signalling control system for signalling applications.

Contains TI 176, TI 177

RT/E/S/10073	Barrier Boom Light Units for Level Crossings Issue 1; Feb 98	Replaces
---------------------	---	-----------------

This performance specification states the requirements for light units used on level crossing barrier booms.

RT/E/S/10081	Preventative and Corrective Maintenance of Lever Frames Issue 1; Dec 97	Replaces
---------------------	--	-----------------

This specification identifies the requirements for those managing and undertaking signalling maintenance activities on Network Rail infrastructure. It is particularly concerned with the preventative and corrective maintenance activities applicable to mechanical signalling lever frames in order that they remain available to perform their intended functions.

RT/E/S/10083	Preventative and Corrective Maintenance of Mechanical Signalling Wire Runs and Rodding Issue 1; Dec 97	Replaces
---------------------	---	-----------------

This specification identifies the requirements for those managing and undertaking signalling maintenance activities on Network Rail infrastructure. It is particularly concerned with the preventative and corrective maintenance activities applicable to mechanical signalling wire runs and rodding in order that they remain available to perform their intended functions.

RT/E/S/10110	Requirement Specification for Performance of Position Light Signals Issue 1; Aug 99	Replaces
---------------------	---	-----------------

This specification is for the performance requirements of position light signals.

RT/E/S/10127	Equipment Specification for the Filament Lamp (Type SL35) for use in the Long Range Colour Light Signal Issue 1; Apr 99	Replaces
---------------------	--	-----------------

This document specifies the requirements for SL35 filament lamps used with the Long Range Colour Light Signals.

RT/E/S/10131	Requirement Specification for "Signals On" Controls for SSI Schemes Issue 2; Aug 03	Replaces RT/E/S/10131 Iss 1; Apr 99
---------------------	---	---

The purpose of this specification is to define the requirements for "Signals On" controls for use with Railtrack infrastructure equipped with Solid State Interlocking (SSI).

RT/E/S/10133	TPWS Signalling Interface Design Requirements Issue 3; Apr 04	Replaces RT/E/S/10133 Iss 2; Oct 00
---------------------	--	---

This specification details the requirements for the design of the signalling interface associated with the fitment of the Train Protection and Warning System (TPWS) to Network Rail infrastructure.

RT/E/S/10134	TPWS – Track Sub-system Equipment Issue 3; Apr 04	Replaces RT/E/S/10134 Iss 2; Oct 00
---------------------	--	---

This specification defines the detailed requirements for the track sub-system equipment associated with TPWS.

RT/E/S/10137	TPWS – Selection of Signals and Other Locations for Provision of Track Sub-system Issue 3; Apr 04	Replaces RT/E/S/10137 Iss 2; Oct 00
---------------------	--	---

This Specification describes the process for assessing the requirement to provide Train Protection & Warning System (TPWS) equipment at signals, speed restrictions and buffer stops as defined in the Railway Safety Regulations 99.
(Contains TI 022)

RT/E/S/10138	TPWS – Transmitter Loop Requirements and Positioning Issue 3; Apr 04	Replaces RT/E/S/10138 Iss 2; Oct 00
---------------------	---	---

This Specification defines the criteria for the positioning of Train Protection and Warning System (TPWS) transmitter loops and determination of the need for Overspeed Sensor Systems (OSS).
(Contains TI 022)

RT/E/S/10178	TPWS in Areas Where the Control of Train Movements is by RETB Signalling Issue 1; Apr 04	Replaces
---------------------	---	-----------------

This specification mandates the requirements for installing Train Protection and Warning System (TPWS) in areas where the control of movement of trains is by Radio Electronic Token Block (RETB).

RT/E/S/11752	Train Detection Issue 2; Aug 01	Replaces RT/E/S/11752 Iss 1; Dec 00 RT/E/S/10002
---------------------	--	---

This specification gives the necessary requirements for train detection systems to satisfy the mandatory requirements laid down in GK/RT0011.

RT/E/S/17004	Requirement Specification for a SSI Technician's Terminal Issue 1; Feb 99	Replaces
---------------------	--	-----------------

This document specifies a Technician's Terminal (TT) for the Solid State Interlocking system. The system specified may be used as a replacement terminal for existing SSI schemes (currently using a TT built to the specification BR1960A) or for installation in new schemes.

RT/E/S/17005	SSI Long Line Link Telecommunications Issue 1; Aug 99	Replaces
---------------------	--	-----------------

This specification states Network Rail's functional requirements for telecommunications systems for use with solid state interlocking long line link incorporating long distance terminal modules.

RT/E/S/17503	IECC Internal Subsystems Communications Requirements Issue 1; Jun 99	Replaces
---------------------	---	-----------------

This specification mandates the internal subsystems communications requirements for all new and existing IECC schemes.

RT/E/S/17504	IECC Operating Specification for Signalling Control and Indications Purposes Issue 3; Dec 03	Replaces RT/E/S/17504 Iss 2; Dec 01
---------------------	---	---

This operating specification defines the mandatory requirements for signalling control and indications equipment based on the use of colour visual display units (VDUs), and which forms a subsystem of the Integrated Electronic Control Centre (IECC). It does not define the requirements for the PC SPAD Monitor (PSM), which are defined elsewhere.

RT/SRS/2001	Requirement for Powered Point Operating Equipment Issue 2; Dec 01	Replaces RT/SRS/01 Iss 1; Aug 00
--------------------	--	--

This company specification details the functional, physical, interface, performance and safety requirements for point operating equipment.

Product Specifications

NR/PS/SIG/00018	ERSE Mk.4 Product Specification Issue 1; Oct 06		Replaces
This product specification gives the requirements for a device that detects electrical noise from a train whilst it occupies a specific section of track, and then applies a shunt or disconnection to the track circuit containing that section of track.			
NR/PS/SIG/19802	Train Actuated Disconnecter (TAD) Issue 1; Aug 06		Replaces
This product specification gives the requirements for a device that detects electrical noise from a train whilst it occupies a specific section of track, and then applies a shunt or disconnection to the track circuit containing that section of track.			
NR/SPEC/1003	Overlay Miniature Stop Light Equipment Specification Issue 1; Jun 15	Compliance 05/09/15	Replaces New at Issue 96
This document specifies the product acceptance criteria for the Overlay Miniature Stop Light system for use at user worked, footpath and bridleway level crossings. the design of signalling works applicable to the infrastructure;			
RT/E/PS/00002	Adjustable Tie Bar for Rail Clamp Point Lock Issue 1; Dec 99		Replaces
This line specification details the design, functional, physical, interface, performance and safety requirements for an adjustable tie bar used on rail clamp point locks.			
RT/E/PS/00005	Railway Signalling Cable Issue 1; Apr 00		Replaces GS/ES0872 Iss 2; Sep 93
This document specifies the manufacturing requirements for railway signalling cables detailed in the scope of this Specification.			
RT/E/PS/00009	Message Handling and Data Transmission Requirements Between Processor Based Systems Issue 2; May 04		Replaces RT/E/PS/00009 Iss 1; May 01
To ensure that Network Rail's electronic signalling and telecommunications systems can be expected to communicate and interact with each other, a common protocol and message classification needs to be specified. This document builds on past experience and best practice to ensure future compatibility.			
RT/E/PS/00011	Train Protection and Warning System (TPWS) – Failure Indication Unit Issue 1; Apr 01		Replaces
This specification has been prepared to define the requirements for a Train Protection and Warning System (TPWS) failure indication unit that is to be provided for the reporting of failed TPWS trackside sub-systems within mechanically signalled areas.			
RT/E/PS/00012	Specification for the Preparation and Implementation of Train Describer System Parameter Tables Issue 1; Aug 01		Replaces
This product specification defines the necessary features and information required by a train describer database to ensure a standard format throughout Network Rail's infrastructure.			
RT/E/PS/00032	TPWS Self Powered Overspeed Sensor (SPOSS) Battery Procurement Specification Issue 1; Dec 03		Replaces
This product specification states the requirements for the design, manufacture and testing of a battery suitable for use in a Train Protection and Warning System (TPWS) Self Powered Overspeed Sensor System (SPOSS).			
RT/E/PS/00801	Requirement Specification for TDM Systems Issue 3; Apr 05		Replaces RT/E/PS/00801 Iss 2; Feb 05
The aim of this specification is to define the requirements for a basic bit to bit Time Division Multiplex (TDM) transmission system suitable for use in a variety of signalling applications on Network Rail.			
RT/E/PS/11755	DC Track Circuits Issue 1; Dec 00		Replaces
This line specification states the minimum requirements for DC track circuits. It includes life-cycle requirements from design, safety and environmental through to installation, testing and maintenance.			
RT/E/PS/11756	HVI Track Circuits Issue 2; Aug 01		Replaces RT/E/PS/11756 Iss 1; Dec 00
This company specification states the minimum requirements for Alstom High Voltage Impulse (HVI) track circuits. It includes lifecycle requirements from design, safety and environmental through to installation, testing and maintenance.			
RT/E/PS/11757	AC Phase-sensitive Track Circuits Issue 1; Dec 00		Replaces
This line specification states the minimum requirements for AC phase sensitive track circuits. It includes lifecycle requirements from design, safety and environmental to installation, testing and maintenance.			

RT/E/PS/11760	Westinghouse Signals FS2600 Track Circuits Issue 1; Dec 00	Replaces
This Product Specification gives details of best practice in respect of Westinghouse Signals FS2600 track circuits in order to achieve the requirements of RT/E/S/11752.		
RT/E/PS/11762	Track Circuit Assister Interference Detectors Issue 1; Dec 00	Replaces
This line specification states the minimum requirements for track circuit assister interference detectors. It includes lifecycle requirements from design, safety and environmental to installation, testing and maintenance.		
RT/E/PS/11763	Reed Type RT Track Circuits Issue 1; Dec 00	Replaces
This line specification states the minimum requirements for Alstom Reed Type RT track circuits. It includes lifecycle requirements from design, safety and environmental to installation, testing and maintenance.		
RT/E/PS/11764	Track Circuit Interrupters Issue 1; Dec 00	Replaces
This line specification states the minimum requirements for track circuit interrupters. It includes lifecycle requirements from design, safety and environmental to installation, testing and maintenance.		
RT/E/PS/11765	Impedance Bonds Issue 1; Dec 00	Replaces
This line specification states the minimum requirements for impedance bonds. It includes lifecycle requirements from design, safety and environmental to installation, testing and maintenance.		
RT/E/S/10015	Rail Clamp Point Lock Performance Specification for the Microswitch with Independent Contacts Issue 1; Feb 98	Replaces
This standard defines the performance requirements for microswitches with independent contacts used in rail point clamp lock detection circuitry.		
RT/E/S/10031	Miniature Stop Light Unit Issue 1; Mar 97	Replaces
This document has been prepared to define the detailed requirements for a "Miniature stop light" unit for use on a level crossing.		
RT/E/S/10041	Requirement Specification for an IECC System Monitor Terminal Issue 1; Dec 99	Replaces
This document specifies the requirements for an IECC System Monitor (ISM) Terminal. This terminal is a replacement for the Lynwood J500 which is now obsolete and no longer available for purchase.		
RT/E/S/10059	Non-intrusive Earth Leakage Test Adapter for Reed FDM Systems Issue 1; Aug 98	Replaces
This standard specifies the requirements for the non-intrusive FDM earth leakage adapter. The adapter allows a standard multi-meter to be adapted to allow it to measure the cable resistance to earth of the FDM system. Existing instruments for measuring the resistance pose the hazard of generating an interfering signal through its power supply and can therefore not be used on a live system.		
RT/E/S/10065	Requirement Specification for a Barrier Operation Relay for L.C. Barriers Issue 1; Feb 99	Replaces
This specification identifies the requirements for a barrier operation relay (24V dc working) for controlling level crossing barriers.		
RT/E/S/21136	Track Circuit Operating Device Issue 2; Oct 99	Replaces RT/E/S/21136 Iss 1; Apr 99
This specification states the performance requirements for track circuit operating devices.		

Level 1

NR/L1/SIG/30040	EMC Strategy for Network Rail Issue 1; Aug 08	Compliance	Replaces
NR/L1/RSE/30040	EMC Strategy for Network Rail	01/12/08	New at Issue 69
The purpose of this project is to address Network Rail's legal obligations under the EMC Directive and set high level EMC compliance statement.			
Note: The renumbering of NR/L1/SIG/30040 to NR/L1/RSE/30040 denotes change of ownership only			
NR/L1/SIG/50021	Signalling Asset Policy Issue 3; Dec 16	Compliance	Replaces
		01/04/19	NR/L1/SIG/50021 Iss 2; Sep 16
The purpose of this document is to specify the asset management policy for Control, Command and Signalling (CCS) systems for CP6 and beyond.			

NR/L1/SIG/50021	Module	Issue	Issue Date
01	Workbank Planning	1	Jun 2016
02	Technology	2	Dec 2016
03	Maintenance	1	Jun 2016
04	Environmental and Social Performance	1	Jun 2016

Level 2

NR/L2/SIG/10013	Investigation of Signalling Equipment	Issue 3; Sep 11	Compliance	Replaces
			03/09/11	NR/L2/SIG/10013 Iss 2; Aug 08

This standard defines the requirements for authorising the technical investigation of signalling equipment on Network Rail infrastructure or property, undertaking the investigation, and distributing Investigation Reports.

NR/L2/SIG/10016	Requirements for an Asset Maintenance Process	Issue 4; Sep 11	Compliance	Replaces
			03/09/11	NR/L2/SIG/10016 Iss 3; Aug 08

To define the requirements for an asset maintenance process for Network Rail's infrastructure assets to consistently operate within required safety, business and technical parameters.

NR/L2/SIG/10027	Surveillance of Signal Engineering Activities	Issue 4; Dec 15	Compliance	Replaces
			05/03/16	NR/L2/SIG/10027 Iss 3; Sep 11

The business process for surveillance of signal engineering activities:

- provides assurance on staff competency when working on signalling assets;
- confirms that work on signalling assets is being completed correctly;
- gathers evidence to support IRSE licensing processes.

NR/L2/SIG/10028	Inspection of Signal Engineering Maintenance Assests	Issue 7; Dec 15	Compliance	Replaces
			05/03/16	NR/L2/SIG/10028 Iss 6; Sep 11

The business process for inspection of signalling assets:

- provides assurance that assets are being maintained to the correct standard;
- verifies the asset condition is as expected for the current maintenance regime and the age of installation;
- provides verification of ellipse data against the asset information specification for a sample of the asset inspected.

NR/L2/SIG/10047	Management of Safety Related Reports for Signalling and Telecoms Failures	Issue 16; Jun 17	Compliance	Replaces
			02/09/17	NR/L2/SIG/10047 Iss 15; Jun 12

This process enables the management of safety related failures of signalling & telecoms equipment and services on Network Rail Managed Infrastructure.

NR/L2/SIG/10157	Signal Sighting Assessment Process	Issue 4; Mar 21	Compliance	Replaces
			05/06/21	NR/L2/SIG/10157 Iss 3; Mar 17

This business process describes the process to assess signal sighting of proposed or applied signalling assets to be read and understood by train drivers and staff influencing train movements.

NR/L2/SIG/10158	Specification for Signal Sighting Assessment	Issue 2; Mar 21	Compliance	Replaces
			05/06/21	NR/L2/SIG/10158 Iss 1; Mar 17

This specification details the requirements to be applied when assessing signal sighting of proposed or applied signalling assets to be read and understood by train drivers and staff influencing train movements.

NR/L2/SIG/10158	Module	Issue	Issue Date
01	Guidance on the Production, Checking and Approval of Signal Assessment Records	1	Mar 2021
02	Guidance on Completing Supplementary Readable Time Assessment	1	Mar 2021
03	Specification of Signal Sighting Competency	1	Mar 2021

NR/L2/SIG/10160	Specification for Application of the IRSE Licensing Scheme	Issue 3; Dec 20	Compliance	Replaces
			05/06/21	NR/L2/SIG/10160 Iss 2; Sep 11

This standard sets out the requirement for application of the IRSE licensing scheme.

NR/L2/SIG/10173	TPWS – Track Sub-system Installation Requirements	Issue 4; Aug 08	Compliance	Replaces
			26/08/08	RT/E/S/10173 Iss 3; Apr 04

This specification has been prepared to define the detailed requirements for installation of the track sub-system equipment associated with the Train Protection and Warning System (TPWS).

NR/L2/SIG/11010	Management of Signalling and Communication Systems Issue 3; Sep 11	Compliance 03/09/11	Replaces NR/L2/SIG/11010 Iss 2; Aug 08
------------------------	--	-------------------------------	--

The purpose of this standard determines that the managerial responsibility for train control and communications systems is not divided in any way which increases risk.

NR/L2/SIG/11107	Silver Migration Issue 4; Mar 12	Compliance 03/03/12	Replaces NR/L2/SIG/11107 Iss 3; Dec 11
------------------------	---	-------------------------------	--

Silver Migration can lead to wrong side failures. This standard specifies:

- The required inspection regime
- Remedial actions to be taken
- Competence for staff undertaking inspections

The high risk conditions are also described.

NR/L2/SIG/11120	Process for Management of Signal Engineering Technical Instructions and Notice Boards Issue 10; Aug 08	Compliance 26/08/08	Replaces RT/E/P/11120 Iss 9; Feb 05
------------------------	---	-------------------------------	---

This standard details the process for managing the production of information that is specific to signal engineering and needs to be published quickly to facilitate safe working and good practice.

NR/L2/SIG/11129	Life Management of Signalling Relays, Searchlight and Banner Signals Issue 6; Sep 11	Compliance 30/09/14	Replaces NR/L2/SIG/11129 Iss 5; Aug 08
------------------------	---	-------------------------------	--

This standard details the requirement to control the risks presented by failures of signalling relays and electromechanical searchlight and banner signal mechanisms. The aim of life management, as it relates to signalling relays, searchlight and banner signals performing safety critical or safety related functions, is to check that equipment continues to operate within its specified parameters. Relay replacement /servicing shall be considered as part of the renewals programme as it is a life extension activity. However, some applications will require periodic maintenance servicing of particular relays to demonstrate safety.

NR/L2/SIG/11201	Signalling Design Handbook Issue 14; Jun 21	Compliance 04/09/21	Replaces NR/L2/SIG/11201 Iss 13; Mar 21
------------------------	--	-------------------------------	---

This standard, details mandatory requirements and mandates standards for the production of signalling design detail to support:

- safe development and design of new and altered signalling systems impacting on Network Rail controlled infrastructure;
- safe interfaces between all parties and systems;
- design details are prepared and presented clearly, accurately, consistently and unambiguously; and
- client's specified requirements are met and the design is fit for purpose

NR/L2/SIG/11213	Signalling Cable Equivalent Sizes Issue 2; Sep 11	Compliance 03/09/2011	Replaces RT/E/C/11213 Iss 1; Aug 00
------------------------	--	---------------------------------	---

This standard authorises the use of cables to NR/L2/SIG/00005 or GS/ES0872 as alternatives to BR 872 and older imperial sized cables which are shown on the design record. This is in order to eliminate the need to specially order obsolete types of cable where there is an equivalent in the current NR/L2/SIG/00005 range.

NR/L2/SIG/11400	HPSS Handbook Issue 7; Mar 19	Compliance 01/06/19	Replaces NR/L2/SIG/11400 Iss 6; Jun 12
------------------------	--------------------------------------	-------------------------------	--

This manual provides instruction and guidance on the application of HPSS on Network Rail Infrastructure.

NR/L2/SIG/11400/	Module	Issue	Issue Date

NR/L2/SIG/11655	Management of Cable & Wire Insulation Issue 3; Dec 11	Compliance 03/12/11	Replaces NR/L2/SIG/11655 Iss 2; Aug 08
------------------------	--	-------------------------------	--

The safety integrity of the signalling system is at risk if cable/wire insulation is allowed to degrade. This standard specifies:

- The requirements for inspections
- The precautions to be taken during inspections
- Constraints to be placed on work where degradation is detected, and
- Action to be taken to remove degraded wiring/installations.

When the insulation degrades, the inner conductor can become exposed and come into contact with other exposed wires and terminals. The risks are that:

- Contacts are bypassed in a circuit
- Circuits are falsely energised
- Electrical shock, especially when carrying out hand tracing.

NR/L2/SIG/11704	Signalling Requirements for the Application Design & Management of Points Issue 5; Dec 19	Compliance 07/03/2020	Replaces NR/L2/SIG/11704 Iss 4; Mar 19
------------------------	--	---------------------------------	--

This business process defines the signalling requirements to manage risk associated with application design and management of points used on Network Rail controlled infrastructure.

NR/L2/SIG/11711	Digital Railway Ready Signalling Issue 2; Mar 18	Compliance 31/05/18	Replaces RT/E/C/11711 Iss 1; Jun 03
------------------------	---	-------------------------------	---

The purpose of this document is to provide a specification for a Digital Railway Ready or 'ETCS Ready' signalling renewal. This will enable any signalling works undertaken in advance of a future Digital Railway deployment to be upgraded with minimum disruption and cost to the existing signalling, allowing a staged approach to future ETCS/TMS deployment to be adopted. Therefore the ETCS trackside might not be fully operational or installed at the time a re-signalled area is commissioned into service.

NR/L2/SIG/11766	Aster and Aster21 Track Circuit Manual Issue 1; Jun 16	Compliance 03/09/16	Replaces New at Issue 100
------------------------	---	-------------------------------	-------------------------------------

This document mandates the application of the Aster and Aster21 application manuals and provides instruction and guidance on the application of Aster and Aster21 track circuits.

NR/L2/SIG/19608	Level Crossing Asset Inspection and Implementation of Minimum Action Codes Issue 7; May 14	Compliance 06/09/14	Replaces NR/L2/SIG/19608 Iss 6; Jun 11
-----------------	--	------------------------	---

This document provides Level Crossing Managers (LCMs) and Delivery Unit staff, see RACI in clause 4, with acceptable means of compliance for the inspection of level crossing assets.

NR/L2/SIG/19609	Requirements for Colour Light Junction Signalling Issue 1; Oct 07	Compliance 01/01/08	Replaces BP 5400 Iss 1; Dec 13
-----------------	---	------------------------	-----------------------------------

With changes in driving techniques and the need for more intensive use of the network, the rules for signalling junctions have changed and developed. With the object of “one railway, one way” this standard lays down the principles to be followed and states how GK/RT0031 and GK/RT0032 should be interpreted in the light of various national derogations.

NR/L2/SIG/19803	Signalling Scope of Work for Switch and Crossing Renewal Projects Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/SP/SIG/19803 Iss 1; Dec 06
-----------------	---	------------------------	---

This Level 2 document provides clarity of what signalling should be included within the track budget for S&C work and ensures a consistent approach.

NR/L2/SIG/19807	Prioritisation of Signal Engineering Equipment Defects Issue 3; Jun 10	Compliance 04/09/10	Replaces NR/L2/SIG/19807 Iss 2; Aug 07
-----------------	--	------------------------	---

This Level 2 document provides uniform guidance for prioritising signal engineering defects (i.e. work arising from signalling maintenance activities or asset inspection where the task cannot be undertaken at the time it was identified.)

NR/L2/SIG/19809	Business Process for Selection of Point Operating Equipment Issue 2; Sep 16	Compliance 04/03/17	Replaces NR/SP/SIG/19809 Iss E1; Apr 07
-----------------	---	------------------------	--

This document enables Routes to select the Point Operating Equipment (POE) to meet the company's safety, reliability and performance objectives in line with whole life costs.

NR/L2/SIG/19812	Cross Track Cable Management Issue 2; Dec 20	Compliance 06/03/21	Replaces NR/SP/SIG/19812 Iss 1; Feb 07
-----------------	--	------------------------	---

Cable management is essential to the safe and reliable operation of the railway. This specification sets out the installation requirements for cross track cables to control risks to the public and rail infrastructure while protecting and maintaining the required access to the cable assets. It defines requirements for both ground level and overhead cables crossing the track.

NR/L2/SIG/19820	Signalling and Level Crossing Product Specifications Issue 7; Jun 21	Compliance 04/09/2021	Replaces NR/L2/SIG/19820 Iss 6; Dec 20
-----------------	--	--------------------------	---

This manual contains Signalling product specifications that define Network Rail customer requirements. Product specifications provide the following benefits:

- Signalling products are developed and manufactured to Network Rail requirements;
- improved asset compatibility and reliability through the setting of customer requirements to follow the process set out in NR/L2/RSE/0005;
- helps manufacturers to understand Network Rail's requirements and gain product acceptance.

NR/L2/SIG/30004	CAD Cell Library Issue 2; Jun 10	Compliance 05/06/10	Replaces NR/L2/SIG/30004 Iss 1; Dec 07
-----------------	----------------------------------	------------------------	---

This document, in support of Company standard NR/SP/SIG/11201, "Signalling design: production", defines the symbols, nomenclature and presentation for use on all CAD signalling circuit diagrams to ensure that the correct information is always conveyed without ambiguity. It specifies the characteristics of the cells and the process for requesting additions and changes to the library.

NR/L2/SIG/30009	Signalling Principles Handbook Issue 19; Dec 20	Compliance 06/03/21	Replaces NR/L2/SIG/30009 Iss 18; Dec 19
-----------------	---	------------------------	--

This document mandates the application of the sections of the Signalling Principles Handbook which is intended to provide instruction and guidance to signalling designers, testers and operators on the application of signalling principles on Network Rail Infrastructure.

NR/L2/SIG/30010	Tracklink 2/HSD2000 Platform Identification Beacon System (PIBS) For Selective Door Operation (SDO) Issue 1; Dec 09	Compliance 06/03/10	Replaces New at Issue 74
-----------------	---	---------------------	--------------------------

The purpose of this standard is to define Network Rail's role in the operation of the Platform Identification Beacon System (PIBS) that works in conjunction with the "base SDO system" on Class 377 Electric Multiple Units, which, in turn, is based on Global Positioning System (GPS) technology.

NR/L2/SIG/30014	Signalling Works Testing Handbook Issue 17; Dec 20	Compliance 05/06/21	Replaces NR/L2/SIG/30014 Iss 17; Dec 20 RT/E/C/11724 Iss 01; Jun 02
-----------------	--	---------------------	---

This document mandates the application of the sections of the Signalling Works Testing Handbook.

It provides instruction and guidance to testers on the procedures and process controls so that new signalling installations, and alterations to existing installations, are independently tested in a manner that confirms:

Compliance with the project Concept Design and Engineering Details, and fitness for purpose before the signalling system is offered for entry into service.

The Signalling Works Testing Handbook has been created to collate together all the documents describing the procedures and process controls for signal works testing.

NR/L2/SIG/30015	Specification for Station, Footpath, Bridleway, and User Worked Level Crossings Issue 1; Mar 10	Compliance 05/06/10	Replaces New at Issue 75
------------------------	--	-------------------------------	------------------------------------

This specification provides the preferred layouts for renewal of crossings as defined in the Scope, and is applicable to new crossings or those assets that are to be renewed during maintenance works. The standard guides the installer/maintainer on how to position equipment based on regulation and the latest human factors research.

NR/L2/SIG/30017	Requirements for Level Crossings Issue 2; Sep 11	Compliance 03/09/11	Replaces NR/L2/SIG/30017 Iss 1; Sep 09
------------------------	---	-------------------------------	--

This document mandates the requirements for the design, construction, inspection, maintenance, operation and decommissioning of level crossings.

NR/L2/SIG/30017/	Module	Issue	Issue Date
Module D	Telephone Systems at Level Crossings	1	Sep 09
Module F	Track and Electrification Systems at Level Crossings	1	Sep 09
Module G	Level Crossing Geometry and Surfaces	1	Sep 09
Module H	Lighting and CCTV Systems at Level Crossings	1	Sep 09
Module J	Construction, Testing and Commissioning of Level Crossings	1	Sep 09
Module K	Operation, Maintenance and Inspection of Level Crossings	1	Sep 09
Module L	Change of Legal Status and Decommissioning of Level Crossings Following Closure	1	Sep 09

NR/L2/SIG/30019	Process for Closing or Downgrading Public Level Crossings Issue 1; Sep 10	Compliance 04/09/10	Replaces New at Issue 77
------------------------	--	-------------------------------	------------------------------------

The purpose of this standard is to define the process for public level crossing closure or downgrade through provision of all relevant information and formal consultation of interested parties. This will enable the provision of an accurate remit for the renewal, closure or reclassification of public level crossings.

NR/L2/SIG/30021	Alterations to Authorised Line Speeds Issue 2; Sep 11	Compliance 03/03/11	Replaces NR/L2/SIG/30021 Iss 1; Aug 08
------------------------	--	-------------------------------	--

The purpose of this standard is to set out the process requirements prior to making alterations to Authorised Line Speeds. The aim is to provide a consistent means of managing such changes so that the risk to passengers, the workforce and public is reduced so far as is reasonably practicable. It also defines the documentation to be produced and retained of the considerations made and decisions taken in the process.

NR/L2/SIG/30027	Product Specification - Plug Couplers for Connection of Cables to Lineside Signalling Equipment Issue 2; Dec 10	Compliance 04/12/10	Replaces NR/L2/SIG/30027 Iss 1; Sep 09
------------------------	--	-------------------------------	--

This specification has been created to identify a standardised family of accepted plug coupler products that can be selected for use on future signalling schemes.

NR/L2/SIG/30035	Signalling and Level Crossing Scheme Approval Process Issue 4; Sep 19	Compliance 07/12/19	Replaces NR/L2/SIG/30035 Iss 3; Jun 12 NR/L2/SIG/30003 Iss 1; Jun 11
------------------------	--	-------------------------------	---

This business process delivers signalling and level crossing schemes that are consistent in interpretation and application of principles across the Network. The application of this business process gives a level of assurance that the signalling proposal and the protection system choice for level crossing is fit for purpose.

NR/L2/SIG/30036	Intelligent Infrastructure Management - Data Logging Specification Issue 1; Jun 09	Compliance	Replaces RT/E/P/11305 Iss 1; Feb 03 RT/E/S/11304 Iss 1; Feb 03
------------------------	---	-------------------	---

This standard for data logging, which replaces both NR/SP/SIG/11304 and NR/SP/SIG/11305, addresses existing Non-Compliances pending standards change, and includes the required interface for the Network Rail Data Management System

NR/L2/SIG/30038	Supplementary Audible Warning Devices (AWDs) at Footpath and Bridleway Level Crossings Protected by a Whistle Board Issue 1; Jun 16	Compliance 03/09/16	Replaces New at Issue 100
------------------------	--	-------------------------------	-------------------------------------

This document defines the application constraints and describes the operating characteristics for a Supplementary Audible Warning Device (AWD) for use at footpath and bridleway level crossings protected by a whistle board. It enables the identification of sites suitable for the installation of a supplementary AWD where it can provide a safety benefit.

NR/L2/SIG/30050	Signalling Power Circuit Principles Issue 1; Dec 08	Compliance 06/06/09	Replaces New at Issue 70
------------------------	--	-------------------------------	------------------------------------

This standard states the requirements on designers, suppliers, installers and testers of functional signalling power supply circuits and equipment. Additionally it identifies the need for the designer of the functional circuits to agree load requirements and protection arrangements with the designer of the distribution system.

NR/L2/SIG/30060	Product Specification for AzLM Axle Counter Cable Issue 3; Mar 12	Compliance 02/06/12	Replaces NR/L2/SIG/30060 Iss 2; Sep 11
------------------------	--	-------------------------------	--

The aim of this standard is to clearly define to cable manufacturers the construction and performance requirements for AzLM Axle Counter cable. Manufacturers should therefore submit evidence intended to demonstrate compliance with this standard when seeking Network Rail Product Acceptance. It also provides background information to Signalling Designers, Signalling Installers and Signalling Maintainers.

NR/L2/SIG/30070	Signalling of Modular Switch and Crossing Renewals Issue 1; Jun 09	Compliance 06/06/09	Replaces New at Issue 72
------------------------	---	-------------------------------	------------------------------------

This standard details the signalling processes to be followed when planning and implementing a switch and crossing renewal using the pre-fabricated, modular techniques.

NR/L2/SIG/30080	Axle Counter System – Operational and safety principles Issue 1; Sep 09	Compliance 05/12/09	Replaces NR/SP/SIG/10129 Iss 2; Apr 06
------------------------	--	-------------------------------	--

This standard details the operational rules and safety principles for axle counter systems including the methods of reset following failure, provisions for engineering work and for trains which may fail to count correctly. The standard includes details of the core functionality to enable signallers to fulfil their responsibilities and identifies the core procedural steps to be enforced by the systems.

NR/L2/SIG/30081	Axle Counter System Design Principles & Generic Application Rules Issue 1; Sep 09	Compliance 05/12/09	Replaces See below
------------------------	--	-------------------------------	------------------------------

Replaces: NR/SP/SIG/10129 Iss 2; Apr 06, NR/GN/SIG11900 Iss 1; Apr 06, NR/GN/SIG11901 Iss 1; Apr 06

This standard details Network Rail's generic application rules for axle counter systems and the fundamental design principles to be adopted. This standard relates to the physical attributes that the system should have and technical application of various systems.

NR/L2/SIG/30097/001	Modular Signalling Handbook Issue 3; Apr 14	Compliance 01/06/14	Replaces NR/L2/SIG/30097 Iss 2; Jun 12
----------------------------	--	-------------------------------	--

This Level 2 standard introduces Modular Signalling and mandates use of module NR/L2/SIG/30097/001 Modular Signalling Handbook when developing and implementing a Modular Signalling Scheme.

NR/L2/SIG/30099	Mechanical Locking Handbook Issue 1; Jun 12	Compliance 01/12/12	Replaces NR/L3/SIG/SG0190 Iss 2; Sep 11
------------------------	--	-------------------------------	---

The purpose of this Handbook is to consolidate processes and requirements relating to the maintenance and overhaul of mechanical signalling equipment into one place. These processes and requirements are currently contained in various standards and some requirements have yet to be published in an appropriate document.

Module	Title	Issue	Issue Date
005	Mechanical Locking: Process & Management	1	Jun 2012
010	Mechanical Locking: Lever Frame Overhaul – 10 Yearly Periodic Activity	1	Jun 2012
011	Mechanical Locking: Electrical Locking Equipment Overhaul - 7 Yearly Activity	1	Jun 2012
091	Mechanical Locking: Replace an Annette's Key	1	Jun 2012

094	Mechanical Locking: Replace a Token Lock	1	Jun 2012

NR/L2/SIG/31000	Provision of Off-Grid Power Supply for Signalling and Level Crossings Issue 1; Dec 20	Compliance 06/03/21	Replaces New at Issue 118
------------------------	--	-------------------------------	-------------------------------------

This standard describes the off-grid power supply system design process and requirements providing a standard level of functionality across Network Rail for level crossings and other remote rail infrastructure locations.

NR/L2/SIG/50010	Methodology for the Demonstration of Electrical Compatibility with Train Detection System in use on Non-Electrified Lines Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/L2/SIG/50010 Iss 1; Dec 07
------------------------	--	-------------------------------	---

The methodologies provided in these documents apply to rolling stock manufacturers and infrastructure maintenance project managers, who are providing the EMC safety case with respective parts of Network Rail controlled infrastructure as part of the acceptance process.

NR/L2/SIG/50019	Control of the Issue of S & T Keys from Unipart Rail Issue 4; Mar 12	Compliance 03/03/12	Replaces NR/L2/SIG/50019 Iss 3; Sep 10
------------------------	---	-------------------------------	--

To explain the agreed process between Network Rail and Unipart Rail for control of S&T key issue.

To control the issue of S&T keys allowing access to operational signalling and telecoms equipment so that only competent people can access sites and minimise risk to the operational railway.

NR/L2/SIG/50030	Management of ERTMS National Identities Issue 1; Mar 20	Compliance 06/06/20	Replaces New at Issue 115
------------------------	--	-------------------------------	-------------------------------------

Interoperable European Rail Traffic Management System (ERTMS) equipment is primarily used for ERTMS applications, however, it can also be used for other national applications utilising Packet 44. All systems using the equipment need to be able to identify the equipment uniquely.

NR/L2/SIGELP/27408	Product Specification for Signalling Power Distribution Cables Issue 3; Mar 17	Compliance 03/06/17	Replaces NR/L2/ELP/27408 Iss 2; Jun 15
---------------------------	---	-------------------------------	--

This specification defines cable construction and performance requirements for signalling power distribution cables to be used in railway signalling systems.

NR/L2/SIGELP/27409	Product Specification for Functional Supply Points (FSP) Issue 2; Jun 15	Compliance 06/06/15	Replaces NR/L2/ELP/27409 Iss 1; Dec 11
---------------------------	--	-------------------------------	--

This specification details the product manufacturers requirements for Class I and Class II functional supply point (FSP) switchgear assemblies and FSP assemblies for use within railway infrastructure signalling power distribution systems.

NR/L2/SIGELP/27410	Specification for Class II Based Signalling Power Distribution Systems Issue 2; Jun 15	Compliance 06/06/15	Replaces NR/L2/ELP/27410 Iss 1; Dec 11
---------------------------	--	-------------------------------	--

This document specifies the requirements for the design, installation and testing of Class II based signalling power distribution systems on Network rail managed infrastructure. This specification also includes requirements for introducing Class II equipment into legacy signalling power distribution systems to provide fault protection.

NR/L2/SIGELP/27416	Alterations to Signalling Power Systems Issue 1; Mar 17	Compliance 03/06/17	Replaces New at Issue 98
---------------------------	---	-------------------------------	------------------------------------

This standard defines the functional and electrical requirements to be applied when undertaking alterations to existing Signalling Power Systems (SPSs).

NR/L2/SIGELP/27417	Signalling Power Distribution Diagrams Issue 1; Dec 15	Compliance 05/03/16	Replaces New at Issue 98
---------------------------	--	-------------------------------	------------------------------------

This standard sets out the detailed requirements for the provision, management and maintenance of signalling power supply network drawings and associated documentation, to enable safe isolations for any purpose, including:

- Stage work;
- Entry into service;
- Operational planning;
- Maintenance;
- Fault finding;
- Signalling possession planning;
- Emergency shutdown works;
- Recoveries.

NR/L2/SIGELP/27417	Title	Issue	Issue Date	Price
MOD A	Requirements for Technical Content of Each Type of Schematic	1	Dec 2015	D
MOD B	Guidance on Arrangement and Presentation of Drawings	1	Dec 2015	B
MOD C	CAD Cell Symbol Library – EP Low Voltage Operational Equipment	1	Dec 2015	C

NR/L2/SIGELP/27418	Design, Installation and Testing of Earthing in Signalling Power Systems Issue 1; Sep 15	Compliance 05/09/15	Replaces New at Issue 97
---------------------------	--	-------------------------------	------------------------------------

This specification details the design, installation, construction, testing and commissioning requirements for safety earthing systems to limit touch voltage potentials on exposed conductive parts forming part of signalling power systems, to meet the requirements of BS EN 50122-1.

NR/L2/SIGELP/27418	Title	Issue	Issue Date
MOD A	Earth Electrode Installation Process	1	Sep 2015
MOD B	Earth Mat Installation Process	1	Sep 2015
MOD C	Template Earthing Construction Drawings	1	Sep 2015
MOD D	Earthing Testing Methods	1	Sep 2015
MOD E	RDU Scanner Selection	1	Sep 2015

NR/L2/SIGELP/27419	Product Specification for Distribution Interface Transformer Assemblies (DITA) for Signalling Power Distribution Systems Issue 1; Jun 15	Compliance 06/06/15	Replaces New at Issue 96
---------------------------	--	-------------------------------	------------------------------------

This specification defines the requirements for the design, installation, integration and testing of distribution interface transformer assemblies (DITA) into Network Rail managed infrastructure.

NR/L2/SIGELP/27421	Product Specification - Flexible Conduits for Class II Based Signalling Power Distribution Systems Issue 1; Jun 15	Compliance 06/06/15	Replaces New at Issue 96
---------------------------	--	-------------------------------	------------------------------------

This specification defines the requirements for flexible insulating conduits to be used in Class II based signalling power distribution systems.

NR/L2/SIGELP/27422	Product Specification - Cable Glands for use in Class II Based Signalling Power Distribution Systems Issue 1; Jun 15	Compliance 06/06/15	Replaces New at Issue 96
---------------------------	--	-------------------------------	------------------------------------

This specification defines the requirements for glands suitable for flexible insulating conduits to be used in Class II based signalling power distribution systems.

NR/L2/SIGELP/27423	Product Specification for Connectors and Joints for Signalling Power Cables Issue 1; Sep 15	Compliance 05/09/15	Replaces New at Issue 97
---------------------------	--	-------------------------------	------------------------------------

This specification details the performance, construction and test requirements for connectors and joints suitable for connecting armoured and unarmoured power cables, used in signalling power distribution systems.

NR/L2/SIGELP/27501	Temporary Insulating Covers for Network Rail Signalling Location Cases Issue 1; Dec 16	Compliance 04/03/17	Replaces New at Issue 102
---------------------------	---	-------------------------------	-------------------------------------

The standard defines the requirements for an electrically insulating temporary insulating cover for Network Rail signalling location cases which will assist in promoting electrical safety to align with the Electricity at Work Regulations 1989, specifically by preventing persons touching the external metalwork of a location case which may have an unsafe touch potential under certain circumstances.

NR/L2/SIGELP/27725	Insulation Monitoring and Fault Location Systems for Use on Signalling Power Systems Issue 1; Mar 17	Compliance 03/06/17	Replaces New at Issue 103
---------------------------	---	-------------------------------	-------------------------------------

This standard defines Network Rail's requirements for Insulation Monitoring Devices/Systems (IMDs) and Insulation Fault Location Systems (IFLSs).

NR/L2/SIGELP/30007	Product Specification for Power Transformers for Signalling Systems Issue 3; Jun 15	Compliance 31/12/15	Replaces NR/L2/SIG/30007 Iss 2; Dec 11
---------------------------	--	-------------------------------	--

This specification defines the requirements for signalling functional supply point (FSP) isolating transformers and any intermediate transformers used to power signalling loads. The primary function of this specification is to clearly define to manufacturers the minimum performance requirements that need to be achieved for product acceptance to be considered. The secondary function of this specification is to provide background information to Electrical power designers, Signalling designers, Signalling installers and Signalling maintainers.

NR/L2/SIGELP/50000	Safe Working and Maintenance on or near Signalling Power Distribution Equipment above 175 Volts Issue 3; Mar 17	Compliance 03/06/17	Replaces See below
---------------------------	--	-------------------------------	------------------------------

Replaces: NR/GN/ELP/27318 Iss 1; Apr 07, NR/L2/SIGELP/50000 Iss 2; Dec 16

This standard describes the minimum requirements for working on or near signalling power distribution equipment above 175 Volts on Network Rail managed Infrastructure, which includes:

- Safe working practices.
- Maintenance and testing requirements.
- Active fault and defect management.

This standard describes the means of compliance with the requirements of the Electricity at Work Regulations 1989 when working on or near signalling power supplies. This has been written in accordance with HSE publication HSG85 – Electricity at Work Safe Working Practices (3rd Edition).

NR/L2/SIGELP/50000	Title	Issue	Issue Date
MOD A	Inspection and Maintenance Periodicities (including risk based maintenance criteria) for Signalling Power Distribution Equipment above 175 Volts	1	Dec 2016

Level 3

NR/L3/SIG/0077	Signalling Pre-Commissioning Readiness Requirements Issue 2; Jun 21	Compliance 04/09/21	Replaces NR/L3/INI/CP0077 Iss 1; Mar 11
-----------------------	--	-------------------------------	---

This work instruction provides Network Rail with a framework to manage and reduce the risks associated with signalling pre-commissioning testing activities on Projects and verify readiness for commissioning by ensuring that an appropriate level of assurance is undertaken at key points in advance of commissioning.

NR/L3/SIG/10046	SINCS (Signalling) For Network Rail Fault Management Issue 1; Mar 11	Compliance 29/05/11	Replaces NR/GN/SIG/18301 Iss 2; Aug 08 NR/L3/SIG/SG0165 Iss 2; Aug 07
------------------------	---	-------------------------------	--

To provide a consistent method of data entry to SINCS. Records should be

- Accurate
- Auditable
- Cross referenced to other documentation.

Complete and that it addresses both immediate and underlying deficiencies.

This supports Railway Group Standard GE/RT8106 – Management of Safety Related Control, Command and Signalling (CCS) System Failures

NR/L3/SIG/10064	General Instructions to Staff Working on S & T Equipment Issue 9; Dec 20	Compliance 05/06/21	Replaces NR/L2/SIG/10064 Iss 8; Jun 19
------------------------	---	-------------------------------	--

This Handbook covers personal safety issues and the essential features of S&T equipment. The handbook also includes information not covered by the Rule Book which is necessary for any S&T staff involved in lineside or technical work.

NR/L3/SIG/10661	Signalling Maintenance Task Intervals Issue 20; Dec 20	Compliance 05/06/21	Replaces NR/L3/SIG/10661 Iss 19; Mar 20
------------------------	---	-------------------------------	---

The purpose of this document is to set the safety and performance intervals applicable for carrying out signalling maintenance tasks and tests. The intervals shown are intended to maintain the designed safety and reliability by detecting and correcting deficiencies to signalling infrastructure before there is deterioration or failure.

NR/L3/SIG/10663	Signal Maintenance Specifications Issue 12; Dec 20	Compliance 05/06/21	Replaces NR/L3/SIG/10663 Iss 11; Mar 20
------------------------	---	-------------------------------	---

This document contains the index to the Signal Maintenance Specifications (NR/SMS) for signalling equipment on Network Rail Managed Infrastructure (NRM).

NR/SMS/Part	Title	Issue	Issue Date
A	General	13	Dec 2020

NR/L3/SIG/10665	Reliability Centred Maintenance of Signalling Equipment Issue 19; Dec 20	Compliance 05/06/21	Replaces NR/L3/SIG/10665 Iss 18; Mar 20
------------------------	---	-------------------------------	---

This document contains the prerequisites, allowing Reliability-Centred Maintenance to be implemented on signalling equipment as an alternative to the default maintenance regime.

NR/L3/SIG/11231	Signalling Maintenance Testing Handbook Issue 15; Dec 20	Compliance 05/06/21	Replaces NR/L3/SIG/11231 Iss 14; Mar 20
------------------------	---	-------------------------------	---

The SMTH provides a maintenance testing regime for the replacement or installation of signalling equipment that does not affect the application logic of the system, or the controls of the system that have previously been tested to signal works testing specifications

NR/L3/SIG/11303	Signalling Installation Issue 8; Mar 19	Compliance 01/06/19	Replaces NR/L3/SIG/11303 Iss 7; Dec 16
------------------------	--	-------------------------------	--

This standard requires that any installation of signalling equipment on Network Rail Managed Infrastructure provides:

- An operationally safe installation of new or altered systems and equipment, with safe interfaces between systems;
- That safe methods of work are adopted, with safe interfaces between all parties involved or affected;
- A correct and consistent interpretation of design detail;
- A neat and tidy appearance;
- Compliance with the client's specified requirements, so that the installation is dependable, fit for purpose and free from defect;
- Adequate testability; and
- Safe and easy maintenance.

NRL/L3/SIG/19102	Advanced SSI Go/No-Go Tester Specification Issue 1; Aug 08	Compliance 01/12/08	Replaces New at Issue 69
-------------------------	---	-------------------------------	------------------------------------

This document is the Network Rail Specification for a second-generation SSI (Solid State Interlocking) Go/No-Go Tester.

NR/L3/SIG/19272	Signalling Equipment Workshop Engineering Notice (SIGWEN021) Signalling Relays Issue 5; Jun 11	Compliance 04/06/11	Replaces NR/L3/SIG/19272 Iss 4; Dec 10
------------------------	---	-------------------------------	--

This standard has been prepared to advise manufacturers, repair and service agents about problems affecting railway signalling relays used on Network Rail's Signalling Infrastructure. The methods and processes used to satisfy the requirements of this standard should be detailed within the manufacturers and/or service agents documented procedures, as applicable.

NR/L3/SIG/19808	Hy-Drive Supplementary Point Drive System Issue 4; Mar 20	Compliance 06/06/20	Replaces NR/L3/SIG/19808 Iss 3; Aug 14
------------------------	--	-------------------------------	--

This work instruction supports the installation and maintenance of the Hy-Drive Supplementary Point Drive System. It is intended to control the risk of incorrect componentry and setup being applied in Hy-Drive systems. It is a reference document to support staff working with the system.

NR/L3/SIG/19810	Signal Engineering Involvement in Civil Engineering Work Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/WI/SIG/19810 Iss E1; Feb 07
------------------------	---	-------------------------------	---

This standard is to check that signal engineering resources are coordinated in support of civil and permanent way engineering work for maintenance and minor renewals.

NR/L3/SIG/20047	Management of Safety Related Reports for Signalling Failures Appendix Issue 2; Jun 17	Compliance 02/09/17	Replaces NR/L3/SIG/20047 Iss 1; Jun 12
------------------------	--	-------------------------------	--

This document contains the hazard index system and the MCF (Monitored common failures) of safety related failures of signalling equipment and services, owned by Network Rail or provided by third parties for railway operational purposes.

NR/L3/SIG/30011	Signalling Equipment Support Specification Issue 1; Jun 08	Compliance 01/09/08	Replaces New at Issue 68
------------------------	---	-------------------------------	------------------------------------

This standard specifies the minimum support levels to be provided under contract for the principal categories of signalling equipment. The service levels are defined for the required support tasks to ensure consistency across all signalling support contracts.

NR/L3/SIG/30051	Signalling Functional Power Loads Data Management Issue 1; Mar 10	Compliance 05/06/10	Replaces New at Issue 75
------------------------	--	-------------------------------	------------------------------------

This document describes the processes that shall be used to capture and update electrical characteristic data related to signalling products for the signalling functional power loads database. This procedure supports Network Rail standard NR/L2/SIG/30050 and applies to all signalling electrical products that have product approval certification or have been submitted for approval.

NR/L3/SIG/30071	Specification For Point Interface Location Issue 1; Jun 09	Compliance 06/06/09	Replaces New at Issue 72
------------------------	---	-------------------------------	------------------------------------

The Point Interface Location is a concept to enable a new point operating equipment to be connected to the existing control location with minimal alteration to the existing circuitry and power supplies.

This specification describes:-

- the interfaces required for the new point operating equipment,
- the interfaces required for connection to the existing control circuitry (and how those interfaces may be configured) and
- the facilities provided for maintenance.

NR/L3/SIG/30082	Axle Counter System Handbook Issue 2; Dec 10	Compliance 05/03/11	Replaces NR/L3/SIG/30082 Iss 1; Mar 10
------------------------	---	-------------------------------	--

This handbook defines requirements and provides guidance to those involved with axle counter systems for use on Network Rail infrastructure. It has been produced following lessons learnt from a number of applications.

NR/L3/SIG/30082/	Title	Issue	Issue Date
002	Axle Counter Installation, Testing and Commissioning Requirements	1	Mar 2010
003	Axle Counter Software / Data Rules	1	Dec 2010
004	Product Specification for Axle Counter Equipment	1	Mar 2010
010	Design and Application Rules - Thales Axle Counter Systems	1	Dec 2010

NR/L3/SIG/31655	Inspection of Cable & Wire Degradation Issue 1; Dec 11	Compliance 03/12/11	Replaces NR/L3/SIG/SG0059 Iss 2; Aug 08
------------------------	---	-------------------------------	---

This standard describes how an inspection of signalling cabling and wiring is to be undertaken to identify signs of degradation. When the insulation degrades, the inner conductor may become exposed and come into contact with other exposed wires and terminals. The risks are that:

- Contacts are bypassed in a circuit
- Introduction of connections between different circuits. The other risk being to staff is of electrical

NR/L3/SIG/MG0110	Imposition and Removal of Emergency and Temporary Speed Restrictions Issue 3; Jun 12	Compliance 01/09/12	Replaces NR/L3/SIG/MG0110 Iss 2; Aug 08
-------------------------	---	-------------------------------	---

This procedure details the process for the imposition and subsequent removal of emergency and temporary speed restrictions by maintenance staff on Network Rail infrastructure.

NR/L3/SIG/SG0053	Preventative Maintenance of Signalling Assets Issue 3; Sep 11	Compliance 03/09/11	Replaces NR/L3/SIG/SG0053 Iss 2; Aug 08
-------------------------	---	-------------------------------	---

This procedure details the roles and responsibilities in the planning of all routine preventative maintenance activities on signalling assets to fit in with the national planning process and timescales as detailed in NR/PRC/MTC/PL0056.

NR/L3/SIG/SG0054	Corrective Maintenance of Signalling Assets Issue 3; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/SG0054 Iss 2; Apr 07
-------------------------	--	-------------------------------	--

The purpose of this document is to define the process for corrective maintenance of Network Rail signalling assets.

NR/L3/SIG/SG0057	Management of Signal Relay Reservicing Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/SG0057 Iss 1; Jun 07
-------------------------	---	-------------------------------	--

This procedure details the responsibilities for establishing and maintaining a signal relay reservicing database along with a relay reservicing programme.

NR/L3/SIG/SG0058	Management of Defective Cables Issue 2; Sep 11	Compliance 03/09/11	Replaces NR/L3/SIG/SG0058 Iss 1; Sep 08
-------------------------	---	-------------------------------	---

The purpose of this procedure is to define the specific responsibilities of maintenance staff for the diversion of working circuits following identification of one or more faulty cable cores, and the associated testing and monitoring of cables.

NR/L3/SIG/SG0065	Management of Disconnections that Affect Signalling Equipment Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/SG0065 ss 1; Jun 07
-------------------------	--	-------------------------------	---

This procedure details the roles and responsibilities for the disconnection of signalling equipment for preventative or corrective maintenance, minor renewals, or safety that will or may affect the normal running of trains.

NR/L3/SIG/SG0079	Signalling Responsibilities for S&C Maintenance Issue 3; Jun 10	Compliance 04/09/10	Replaces NR/L3/SIG/SG0079 Iss 2; Aug 08
-------------------------	---	-------------------------------	---

This document defines the additional signalling procedures for S&C inspection and maintenance over and above that detailed in NR/L3/SIG/SG0053 (preventative maintenance of signalling assets) and NR/L3/SIG/SG0054 (corrective maintenance of signalling assets).

NR/L3/SIG/SG0093	Signalling Equipment Affected by Emergency and Temporary Speed Restrictions Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/SG009 Iss 1; Jun 07
-------------------------	--	-------------------------------	---

This procedure details the process for situations where the imposition of an emergency or temporary speed restriction will result in existing signalling warning equipment (e.g. automatic warning systems or automatic train protection) giving contrary or misleading indications to the driver of an approaching train to that of the warning system associated with the speed restriction.

NR/L3/SIG/SG0108	Signalling Maintenance Vehicle Stock Check and Replenishment Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/SG0108 Iss 1
-------------------------	---	-------------------------------	--

This document details the process for routinely checking signalling maintenance rapid response vehicles of all types for minimum spares holding, and that stock shortages are replenished from local minor stocking points.

NR/L3/SIG/SG0111	Design of Emergency and Temporary Speed Restrictions Issue 3; Sep 11	Compliance 03/09/11	Replaces NR/L3/SIG/SG0111 Iss 2; Aug 08
-------------------------	--	-------------------------------	---

This procedure identifies the process and allocates responsibilities for the design of both emergency and temporary speed restriction that are requested by maintenance.

NR/L3/SIG/SG0138	Management of Signalling Wrong Side Failures Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/SG0138 Iss 1; Apr 07
-------------------------	--	-------------------------------	--

This document details the process to ensure that the investigation, escalation, rectification, and recording of signalling wrong side failures is undertaken by maintenance according to Network Rail company specifications NR/SP/SIG/10047 and NR/SP/SIG/11231.

NR/L3/SIG/SG0139	Management of Right On Arrival and Repeat Signal Failures Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/SG0139 Iss 1; Apr 07
-------------------------	---	-------------------------------	--

This document details the process to ensure that right on arrival and repeated failures are investigated sufficiently to ensure the fundamental cause of the failure is found and rectified.

NR/L3/SIG/SG0154	Management of Signalling Defects Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/SG0154 Iss 1; Apr 07
-------------------------	---	-------------------------------	--

This document details the process to ensure signalling defects that have been found during preventative or corrective maintenance and cannot be corrected at the time of their discovery are entered on the Ellipse system and are managed to conclusion according to the engineering standard NR/SP/SIG/19807.

NR/L3/SIG/SG0155	Management of Isolation, Re-sets & Restoration On Axle Counter Equipment Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/SG0155 Iss 1; Jun 07
-------------------------	---	-------------------------------	--

This document details the procedure for the isolation of axle counter equipment from the interlocking for preventative or corrective maintenance activities along with the re-set and restoration of the equipment back to the interlocking.

NR/L3/SIG/SG0162	Management of Signalling Maintenance Diagrams Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/SG0162 Iss 1; Jun 07
-------------------------	--	-------------------------------	--

The purpose of this procedure is to define the methods of control of maintenance diagrams within signalling maintenance. Such controls shall ensure that the correct issue of diagrams are maintained at the work sites, that amendments are carried out in a controlled manner, and that obsolete diagrams are removed to avoid inadvertent use.

NR/L3/SIG/SG0163	Management of Data from Logging Systems & Event Recorders Issue 3; Sep 11	Compliance 03/09/11	Replaces NR/L3/SIG/SG0163 Iss 2; Aug 08
-------------------------	--	-------------------------------	---

This document details the process of retrieving, checking and storing data from signalling logging systems connected to or part of interlockings, control systems or control centres. It also covers the process of retrieving, checking and storing data from signalling event recorders that are permanently or temporarily connected to signalling equipment.

NR/L3/SIG/SG0166	Management of Operational Signalling Equipment Involved in Wrong Side Failures and Incidents Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/SG0166 Iss 1; Aug 07
-------------------------	---	-------------------------------	--

This document details the process for the Network Rail signal maintenance function managing operational signalling equipment that has or has been suspected of causing a wrong side failure or major incident and is required to undergo an independent specialist or technical investigation to find the fundamental or root cause of the reason for the equipment failing or causing a failure.

NR/L3/SIGELP/27420	Target Earth Calculation Methodology for Signalling Power Systems Issue 1; Jun 15	Compliance 06/06/15	Replaces New at Issue 96
---------------------------	--	-------------------------------	------------------------------------

This standard sets out a method for calculating the maximum target earth value at signalling apparatus housings and power supply sources to afford protection against electric shock in the event of first earth fault in Class I and Class II signalling power distribution systems using IT electrical systems.

NR/L3/SIGELP/27425	Equivalent Cable Sizes for Signalling Power Distribution Cables Issue 1; Sep 16	Compliance 09/01/17	Replaces New at Issue 101
---------------------------	--	-------------------------------	-------------------------------------

This standard authorises, subject to constraints specified, the replacement of signalling power supply cables complying with BR 880, BR 872 or RT/E/PS/00005 with cables complying with NR/L2/SIGELP/27408. This standard is intended to facilitate replacement of cables without resorting to design, subject to exclusions, in order to improve the availability and safety of signalling power supply systems.

NR/L3/SIGELP/27427	Identification and Colours for Signalling Power Distribution Cables Issue 1; Sep 16	Compliance 09/01/17	Replaces New at Issue 101
---------------------------	--	-------------------------------	-------------------------------------

This standard specifies the cable identification requirements for signalling power supply distribution cables. This reduces the risk of cables being mis-identified during installation, isolations and incorrect connections leading to potential mal operation of signalling systems.

NR/L3/SIGELP/50001	Signalling Power Distribution Equipment above 175 Volts Issue 3; Mar 17	Compliance 07/12/18	Replaces NR/L3/SIGELP/50001 Iss 3; Mar 17
---------------------------	--	-------------------------------	---

This manual contains the work instructions which are to be used when maintaining, fault finding and repairing signalling power distribution equipment above 175 V.

NR/SPS/	Title	Issue	Issue Date

NR/L3/SIGELP/50002	Safe Working Practices When Working on or Near Signalling Power Distribution Equipment Above 175 Volts Issue 1; Dec 16	Compliance 03/06/17	Replaces New at Issue 102
---------------------------	--	-------------------------------	-------------------------------------

The purpose of this standard is to define the safe working practices to be employed when working on or near signalling power distribution equipment above 175 V.

Associated Document

NR/L3/SIGELP/50002/	Title	Issue	Issue Date
BRIEFING	Briefing	1	Dec 2016

NR/L3/SIGELP/50003	Safe Working Practices When Working on or Near Signalling Equipment Issue 1; Mar 18	Compliance 02/06/18	Replaces New at Issue 107
---------------------------	--	-------------------------------	-------------------------------------

This standard provides guidance on the potential electrical safety risks that exist when working on or near signalling equipment and defines the safety requirements for different work activities. By reviewing the risks of a particular work activity and applying the safety requirements in this standard, work can be pre-planned so that the necessary safeguards are in place for work to be carried out safely.

Work Instruction

NR/WI/SIG/00111	Points General – Supplementary Drives – Mechanical Issue 2; Apr 06	Compliance 31/07/07	Replaces
------------------------	--	-------------------------------	-----------------

This standard gives additional information to supplement and support the information given in RT/E/C/11772, regarding best practice for the installation and adjustment of mechanically operated supplementary (back) drives.

Guidance Notes (including Codes of Practice)

NR/GN/SIG/02022	Requirements for TASS Infrastructure – System Description Issue 2; Dec 05	Replaces RT/E/C/02022 Iss 1; Dec 03
------------------------	--	---

This guidance note describes the Tilt Authorisation And Speed Supervision (TASS) system developed to deliver the principal requirements of Railway Group standards GE/RT8012 "Controlling the speed of tilting trains through curves" and GE/RT8019 "Tilting trains: controlling tilt systems to maintain clearances".

NR/GN/SIG/02025	Guidance for Consideration of TASS Balises During Railway Engineering Activities Issue 2; Dec 05	Replaces RT/E/G/02025 Iss 1; Dec 03
------------------------	---	---

This guidance note gives advice to those engaged in various engineering activities on the treatment of the TASS system and the precautions they should take in respect of it.

NR/GN/SIG/17901	SSI Configuration Guide Issue 4; Jun 12	Replaces RT/E/C/17901 Iss 3; Oct 99
------------------------	--	---

This document is a guide to the permitted configurations of SSI hardware, as in use by Network Rail.

Associated Document

NR/GN/SIG/17901/	Module	Issue	Issue Date
A	Appendix	1	Jun 12

NR/GN/SIG/17902	SSI Program and Data Problems Issue 5; Mar 09	Replaces RT/E/C/17902 Iss 4; Dec 04
------------------------	--	---

This Guidance Note describes installed program and site specific data problems that have occurred with Solid State Interlocking (SSI) equipment, and been notified to Network Rail. The guidance includes a description of the problem, and states where to find information in Standards to prevent re-occurrence.

NR/GN/SIG/17903	SSI Hardware Problems Issue 4; Mar 11	Replaces RT/E/C/17903 Iss 3; Dec 04
------------------------	--	---

This Guidance Note summarises significant SSI hardware problems that have been identified on Network Rail infrastructure as a result of technical investigation, and the resultant changes made. It supersedes RT/E/C/17903 Issue 3. This information will be useful to those wishing to fully understand the reasoning behind a particular change to SSI equipment or its application.

NR/GN/SIG/19002	WRSL – Style 63 Point Machine (SIGTAN 002) Issue 3; Jun 07	Replaces RT/E/C/19002 Iss 2; Aug 98
------------------------	---	---

This SIGTAN has been prepared to provide advice on significant problems associated with Westinghouse Signals style 63 point machines.

NR/GN/SIG/19012 **SIGTAN012 Cables and Wiring Used for Signalling Systems** Issue 4; Aug 08 **Replaces**
RT/E/C/19012 Iss 3; Feb 01

This Guidance Note provides information relating to cables and wiring insulation, both degradation that has been encountered on Network Rail Signalling Infrastructure and testing methods. It also contains relevant technical information and the historical background. Some notes on inspection techniques, alterations to affected wiring and some miscellaneous cable problems are included in the appendices. The purpose of insulation testing is to detect the deterioration or failure of the insulation of wires, cables and other circuit components. Testing may be by continuous monitoring or by regular testing depending on the required level of integrity.

NR/GN/SIG/19020 **Signalling Relays (SIGTAN020)** Issue 7; Sep 11 **Replaces**
NR/L3/SIG/19020 Iss 6; Jun 11

This document has been prepared to summarise problems affecting railway signalling relays used on Network Rail's Signalling Infrastructure.

NR/GN/SIG/19047 **SIGTAN047 Points (General)** Issue 3 Aug 08 **Replaces**
RT/E/C/19047 Iss 2; Dec 02

This code of practice summarises a range of general issues relating to points on Network Rail's signalling infrastructure

NR/GN/SIG/19053 **IECC Technicians Manual** Issue 2; Dec 08 **Replaces**
NR/GN/SIG/19053 Iss 1; Dec 05

This Manual authorises the use of the IECC Technicians Manual for signalling schemes employing Integrated Electronic Control Centre equipment on Network Rail infrastructure, and lists all documents therein to provide a record of which constituent documents are current and approved for use.

NR/GN/SIG/19054 **SSI Technicians Manual (Parts A, B & C)** Issue 2; Dec 09 **Replaces**
NR/GN/SIG/19054 Iss 1; Dec 05

This document is to provide an updated version of the SSI guidance provided to maintainers, and to eliminate temporary standards such as TIs and NBs where possible.

NR/GN/SIG/19054/	Title	Issue	Issue Date
1	Part 1 Introduction	2	Dec 2009

NR/GN/SIG/19101 **Good Practice Guide - Acic Track Circuit Leaf Fall Detection Unit** **Replaces**
Issue 1; Aug 05

A new standard: to provide guidance on the provision and use of the ACIC track circuit leaf fall detection unit.

NR/GN/SIG/19800 **Bedford - Bletchley: Control and use of VHLC Local Panels** Issue 1; Feb 06 **Replaces**

This document describes the control and operating principles of the Vital Harmon Logic Controller (VHLC) Local Control Panels (LCPs).

NR/GN/SIG/19801 **Sittingbourne - Sheerness: Control and use of VHLC Local Control Panels** **Replaces**
Issue 1; Feb 06

This document describes the control and operating principles of the Vital Harmon Logic Controller (VHLC) Local Control Panels (LCPs).

NR/GN/SIG/50011 **Methodology for the Demonstration of Compatibility with Axle Counters** **Replaces**
Issue 2; Mar 20 NR/SP/SIG/50011 Iss 1; Apr 06

This Guidance Note aids safe and reliable rolling stock introduction by:
a) defining how interference from electric traction systems can enter axle counter systems; and
b) providing a methodology for demonstration of compatibility.

NR/GN/SIG/50013 **Methodology for the Demonstration of Compatibility with Route Relay and Solid State Interlockings** Issue 2; Sep 19 **Replaces**
RT/E/C/50013 Iss 1; Feb 03

By describing how interference from electric tractions systems can enter RRI and SSI interlocking systems and providing a methodology for demonstration of compatibility, this Guidance Note aids safe and reliable rolling stock introduction.

NR/GN/SIG/50014	Methodology for the Demonstration of Compatibility with Lineside Equipment Issue 2; Aug 08	Replaces RT/E/G/50014 Iss 1; Feb 03
------------------------	--	---

The purpose of this document is to provide a methodology to demonstrate compatibility with lineside equipment installed on the ac and dc electrified railway on Network Rail controlled infrastructure.

NR/GN/SIG/50015	Methodology for the Demonstration of Electrical Compatibility with Reed FDM Systems on the AC and DC Railways Issue 3; Sep 20	Replaces NR/SP/SIG/50015 Iss 2; Feb 07
------------------------	--	--

This Guidance Note aids safe and reliable rolling stock introduction by:
a) defining how interference from electric traction systems can enter reed FDM systems; and
b) providing a methodology for demonstration of compatibility

RT/E/C/11772	Supplementary Point Drives and Detection Issue 1; Apr 01	Replaces
---------------------	---	-----------------

This code of practice contains information which represents current best practice for supplementary point drives and detection developed under British Rail.

RT/E/C/11821	Siting Requirements for Lineside Apparatus Housings Issue 1; Aug 00	Replaces
---------------------	--	-----------------

This code of practice defines best practice for the support of, and safe working area around lineside apparatus housings in order to minimise the risks associated with work on lineside signalling equipment and satisfy Railway Group Standard GK/RT0208, Installation of Signalling and Operational Telecommunications Equipment, and Line Specification RT/E/S/11303, Requirements for Signalling Installation.

RT/E/C/17904	Risk Analysis of Signalling Relays Issue 1; Aug 04	Replaces
---------------------	---	-----------------

This code of practice defines a process to assess the risks presented by failure of specific applications of signalling control relays. By applying the process it is possible to determine which relays (if any) may be exempt from routine replacement for a specific interlocking design.

RT/E/C/19008	SIGTAN008 Sangamo/Schlumberger Time Switches Used at Level Crossings Issue 2; Oct 00	Replaces RT/E/C/19008 Iss 1; Jun 95
---------------------	--	---

An investigation (Technical Investigation Report 94507) into the setting of Sangamo time switches highlighted the lack of information available to staff relating to the use of these devices. Also, a separate investigation (Technical Investigation Report 94535) into an incident at a level crossing identified the slow running timer switches, provide advice on their subsequent replacement and to inform staff of the correct application of these devices.

RT/E/C/19010	SIGTAN010 Circuit Controllers Used with BR843 Level Crossing Lifting Barriers Issue 1; Jun 96	Replaces
---------------------	--	-----------------

In 95, Opal Engineering were commissioned to investigate the reliability of circuit controllers used with the BR 843 Standard Mk1 and Mk2 lifting barriers. The study reported that some re-serviced circuit controllers were not supplied pre-set for installation and recommended that existing stocks should be examined and any unsuitable circuit controllers withdrawn and not used. This document provides advice on identifying these unsuitable circuit controllers and also addresses the method for carrying out fine adjustment during installation, when this is made necessary by individual site conditions.

RT/E/C/19014	SIGTAN014 Mechanical Handbook Issue 1; Mar 97	Replaces
---------------------	--	-----------------

This SIGTAN contains a draft copy of the mechanical handbook and is intended as a guidance document only.

RT/E/C/19015	SIGTAN015 Relay Plugboard Problems Issue 1; Feb 98	Replaces
---------------------	---	-----------------

As a result of an investigation (Technical Investigation report 96626), into the contamination of relay plugboards, this document has been prepared to give advice on dealing with such contamination. Advice on recognition, contributory factors and preventative measures is also provided.

RT/E/C/19016	SIGTAN016 Westinghouse M3 Point Machine Issue 1; Feb 98	Replaces
---------------------	--	-----------------

An investigation (Technical Investigation Report 96508) revealed various Westinghouse M3 point machine problems. This document provides advice on examining the locking of the main shaft bearing and includes the temporary measures necessary until the point machine can be replaced.

RT/E/C/19019	SIGTAN019 Westinghouse Signal Machines Issue 2; Apr 99	Replaces RT/E/C/19019 Iss 1; Apr 98
---------------------	---	---

Investigations (Technical Investigation Reports 96051 and 98070) into two separate incidents, where signals were stuck in the "off" position due to jammed signal machines have revealed that on both occasions, some onsite repairs had been carried out and replacement components had been incorrectly fitted. This document has been prepared to discuss the problems associated with carrying out on-site repairs and recommends that all repairs (other than those considered to be associated with first line maintenance) and re-servicing are carried out in a controlled workshop environment by staff who have received specialised craft training.

RT/E/C/19023	SIGTAN023 Signal Post Replacement Switches Issue 1; Jun 00	Replaces
This document has been prepared to provide advice on significant problems associated with the signal post replacement Switch.		
RT/E/C/19024	SIGTAN024 Signalling Control Panels Issue 1; Apr 99	Replaces
This document has been prepared to provide advice on problems affecting equipment/components associated with signalling control panels.		
RT/E/C/19025	SIGTAN025 Electric Lever Locks and Circuit Controllers Issue 2; Feb 01	Replaces RT/E/C/19025 Iss 1 Apr 99
This code of practice summarises technical information and advice on problems relating to electric lever locks and circuit controllers that form part of Network Rail's signalling infrastructure.		
RT/E/C/19026	SIGTAN026 Track Circuit Equipment Issue 1; Dec 99	Replaces
This document has been prepared to provide advice on problems affecting track circuit equipment that forms part of the railway infrastructure signalling control system.		
RT/E/C/19030	SIGTAN030 Earth Testing of Bus-bars Issue 1; Oct 00	Replaces
This document has been prepared to provide advice on earth testing of bus-bars.		
RT/E/C/19032	SIGTAN032 Alignment of Colour Light Signals Issue 1; Oct 00	Replaces
This code of practice details the methods to be used for checking and adjusting the beam alignment of colour light signals, so as to achieve compliance with Network Rail group standard GK/RT0037 "Signal sighting", Issue 3.		
RT/E/C/19036	SIGTAN036 Test and Measurement Meters Issue 1; Feb 01	Replaces
This document has been prepared to provide advice on significant problems associated with the use of certain models of Fluke® digital multimeters.		
RT/E/C/19039	SIGTAN039 Signals (General) Issue 1; Feb 01	Replaces
This document summarises a range of general issues relating to signals on Network Rail's signalling infrastructure.		
RT/E/C/19040	SIGTAN040 Train Protection Systems Issue 2; Aug 01	Replaces
This code of practice summarises a range of general issues relating to train protection systems on Network Rail's signalling infrastructure.		
RT/E/C/19041	SIGTAN041 Battery Cells Issue 1; Feb 01	Replaces
This document summarises a range of general issues relating to cells on Network Rail's signalling infrastructure		
RT/E/C/19044	SIGTAN044 Level Crossings Issue 1; Feb 01	Replaces
This code of practice summarises a range of general issues relating to level crossings on Network Rail's signalling infrastructure		
RT/E/C/19045	SIGTAN045 Power Supplies Issue 1; Feb 01	Replaces
This code of practice summarises a range of general issues relating to power supplies on Network Rail's signalling infrastructure		
RT/E/C/19046	SIGTAN046 Treadles Issue 1; Feb 01	Replaces
This code of practice summarises a range of general issues relating to treadles on Network Rail's signalling infrastructure		
RT/E/C/19048	SIGTAN048 TPWS Trackside Equipment Issue 1; Apr 03	Replaces
This Code of Practice provides a record of best practice general information relating to the trackside sub-system of the Train Protection and Warning System (TPWS) used on Network Rail signalling infrastructure, together with relevant technical information		
RT/E/C/19050	SIGTAN050 Western Region Type Barrier Machine Hydraulic Ram – Ram Pin Failure Issue 1; Dec 02	Replaces
This document has been prepared to provide advice on a potential failure mode of level crossing barrier machines manufactured by the former Western Region. The pins that connect the hydraulic ram to the rear strut of the barrier machine side arms and the bottom fulcrum bracket may not be compliant with the design specification.		

RT/E/C/19051	SIGTAN051 GEC FDM Reed Equipment Issue 1; Dec 02	Replaces
<p>The aim of this code of practice is to describe the nature of certain in-service problems that have arisen with GEC reed equipment, the symptoms manifested, show how they can be avoided and where possible, what remedial action can be taken if these problems are experienced. It also describes best practice for jointing the transmission line cable used on reed systems.</p>		
RT/E/C/19052	SIGTAN052 TPWS in Radio Electronic Token Block (RETB) - Faulting Guidance Issue 1; Apr 04	Replaces
<p>This code of practice provides details of the faulting procedures, or cross-references to other faulting information necessary to locate anomalies in the operation of the Trackside Radio Control Unit and its associated subsystems, such that a fault can be determined down to the level of a Line Replaceable Unit. For further information regarding the Train Protection and Warning System/Radio Electronic Token Block system see RT/E/S/10178.</p>		
RT/E/C/19254	SIGWEN003 GEC-GS HW Point Machine Issue 4; Dec 02	Replaces RT/E/C/19254 Iss 3; Apr 98
<p>This document advises Network Rail's suppliers who manufacture, repair or service the GEC-GS types HW 1000 and HW 00 point machines of additional/revised processes to be applied before the equipment is released to the customer. This information is supplementary to manufacturing, repair or servicing standards.</p>		
RT/E/C/19257	SIGWEN006 Smiths Industries Clamp Lock Power Pack Issue 1; Aug 95	Replaces
<p>This document advises Network Rail's suppliers who manufacture, repair or service the Smiths Industries clamp lock power pack of additional/revised processes to be applied before the equipment is released to the customer. This information is supplementary to manufacturing, repair or servicing standards.</p>		
RT/E/C/19258	SIGWEN007 BR843 Level Crossing Lifting Barriers Issue 1; Jun 96	Replaces
<p>This document advises Network Rail's suppliers who manufacture, repair or service BR843 level crossing lifting barriers, including composite components, of additional/revised processes that need to be applied adopted before the equipment is released to the customer. This information is supplementary to manufacturing, repair or servicing standards.</p>		
RT/E/C/19259	SIGWEN008 Westinghouse Signal Machines Issue 1; Apr 98	Replaces
<p>This document advises Network Rail's suppliers who repair or service Westinghouse signal machines of processes that need to be adopted/amended before the equipment is released for re-use on Network Rail's infrastructure. This information is supplementary to repair or servicing standards.</p>		
RT/E/C/19262	SIGWEN011 BR817 Hydraulic Clamp Lock Power Packs Issue 2; Dec 02	Replaces
<p>This document advises Network Rail's suppliers who repair or service hydraulic clamp lock power packs to BR817 of processes that need to be adopted/amended before the equipment is released for re-use on Network Rail's infrastructure. This information is supplementary to manufacture, repair or servicing standards.</p>		
RT/E/C/19265	SIGWEN014 Labelling of Signalling Equipment Issue 1; Jun 03	Replaces
<p>This document advises servicing agents who repair or service signalling equipment of the labelling requirements that should be applied before the equipment is released for re-use onto Network Rail's Infrastructure.</p>		
RT/E/C/19269	SIGWEN018 GEC FDM Reed Equipment Issue 1; Dec 02	Replaces
<p>The aim of this document is to identify to servicing agents specific additional servicing requirements that are required on GEC FDM reed receiver amplifiers.</p>		
RT/E/C/50005	Methodology for the Demonstration of Compatibility with 50Hz Single Rail Track Circuits Issue 1; Feb 03	Replaces
<p>The purpose of this document is to provide a methodology for the demonstration of electromagnetic compatibility of rolling stock with 50Hz single rail track circuits installed on Network Rail controlled infrastructure. It is based upon previously accepted safety assessments which were undertaken for traction and rolling stock thereby allowing them to operate over 50Hz single rail track circuits.</p>		
RT/E/C/50007	Methodology for the Demonstration of Compatibility with HVI Track Circuits Issue 1; Feb 03	Replaces
<p>The purpose of this document is to provide a methodology to demonstrate compatibility of trains with HVI track circuits on the ac and dc railways on Network Rail controlled infrastructure.</p>		

RT/E/C/50008	Methodology for the Demonstration of Compatibility with TI 21 Track Circuits Issue 1; Feb 03	Replaces
---------------------	---	-----------------

The purpose of this procedure is to provide a method for calculating the safe permissible maximum levels of electrical interference that may be generated by electric trains designed to be used on tracks employing TI 21 track circuits. The procedure lists all of the infrastructure aspects to be taken into account, characteristics of the TI 21 track circuits and possible failure modes. Worked examples are given for calculating maximum permissible levels of electrical interference due to traction current, and axle-to-axle voltages.

RT/E/C/50009	Methodology for the Demonstration of Compatibility with FA2600 Track Circuits on the DC Railway Issue 1; Feb 03	Replaces
---------------------	--	-----------------

The purpose of this document is to provide a methodology to demonstrate compatibility with FS2600 track circuits on Network Rail 750Vdc electrified railway.

RT/E/C/50018	Methodology for the Determination of Interaction with Neighbouring Railways Issue 1; Feb 03	Replaces
---------------------	--	-----------------

The purpose of this code of practice is to provide a methodology to demonstrate compatibility of traction and rolling stock operating on Network Rail electrified lines with the infrastructure of neighbouring railways & vice versa.

RT/E/G/00013	Guidance For Consideration of TPWS During Railway Engineering Activities Issue 1; Jun 02	Replaces
---------------------	---	-----------------

This guidance note gives advice to those engaged in various activities on the treatment of TPWS and the precautions they should take in respect of TPWS.

RT/E/G/00028	General Guidelines on Train Protection and the Provision of Signalling Issue 1; Dec 03	Replaces
---------------------	---	-----------------

These guidelines form a detailed set of methodologies to cover this concept. The development of a significant number of signalling schemes are presently at that critical position, where much signalling would be built without these provisions, unless they are adopted for projects being developed and designed now. These principles are already being applied to the west coast main line upgrade and speed enhancement projects.

Special Inspection Notices

NR/SIN/161	Permanent Speed Restrictions Fitted with TPWS Issue 1; Feb 17	Compliance 20/02/18	Replaces New at Issue 103
-------------------	--	-------------------------------	-------------------------------------

The purpose of this Special Inspection Notice (SIN) is to identify and assess the effectiveness of infrastructure controls provided to manage the risk of overspeed at Permanent Speed Restrictions.

NR/SIN/162	Inspection of Dorman Classic and CLS LITE LED Signals Issue 2; Nov 18	Compliance 31/10/22	Replaces NR/SIN/162 Iss 1; Jul 17
-------------------	--	-------------------------------	---

The purpose of this Special Inspection Notice (SIN) is to inspect E-clips and vertical tilt adjustment clamp assemblies to inspect/replace missing E-clips on Unipart Dorman Classic LED and CLS LITE Signals and to rectify any issues arising from the inspection.

NR/SIN/169	VT1 Type Relays Inspection Issue 3; Jun 20	Compliance 31/12/21	Replaces NR/SIN/169 Iss 2; Jan 19
-------------------	---	-------------------------------	---

The purpose of this Special Inspection Notice (SIN) is to:

- inspect the vane front-stop assemblies of all VT1 style relays;
- inspect all the slipper stop and vane stop-plates;
- locate all the Westalite stabiliser unit manufactured by NRS;
- replace any relays deemed to be defective.

NR/SIN/181	Signal Overrun Risk Assessment - Gap Analysis Issue 1; July 18	Compliance 25/09/18	Replaces New at Issue 109
-------------------	---	-------------------------------	-------------------------------------

This Special Inspection Notice (SIN) has been issued to identify the number of plain line signals requiring steady state Signalling Overrun Risk Assessment (SORA) and the type of assessment required.

NR/SIN/190	Electronic Boundary Inspection (End to End) Issue 1; Apr 20	Compliance 20/04/20	Replaces New at Issue 115
-------------------	--	-------------------------------	-------------------------------------

The purpose of this Special Inspection Notice (SIN) is to identify the end-to-end management processes associated with Boundary Measure Inspections. Specifically, the SIN must identify, to what extent, either paper only or dual [paper/electronic] processes are being used for the undertaking of Boundary Measure Inspections.

NR/SIN/192**Dorman Phantom Aspect Mitigation** Issue 1; Aug 20**Compliance**
31/07/21**Replaces**
New at Issue 117

The purpose of this Special Inspection Notice (SIN) is to check that all Unipart Dorman signals that have a high safety and performance risk of displaying a phantom aspect from reflected light (from any source of sufficient luminosity) are aligned in accordance guidance provided in NB 179.

4.21 SYSTEM ENGINEERING

4.21.1 Engineering Programme Management

Level 1

NR/L1/AMG/1010	Policy on Working Safely in the Vicinity of Buried Services Issue 1; Dec 08	Compliance 01/03/09	Replaces New at issue 70
----------------	---	-------------------------------	------------------------------------

To set out Network Rail's policy and related implementation arrangements for employees and contractors to be able to work safely in the vicinity of buried services.

Level 2

NR/L2/AMG/1020	Buried Services Data Provision Issue 1; Dec 08	Compliance 01/03/09	Replaces NR/L2/AMG/028 Iss 4; Jun 08 NR/L3/AMG/00114
----------------	---	-------------------------------	---

This standard defines a consistent method for obtaining buried services search information before work is started on site.

NR/L2/AMG/1030	Working Safely in the Vicinity of Buried Services Issue 1; Dec 08	Compliance 01/03/09	Replaces See below
----------------	---	-------------------------------	------------------------------

Replaces: NR/SP/BUS/011, NR/L3/INI/CP024, NR/L3/INI/CP0026, NR/L3/MTC/SE0113

This standard identifies the process for a consistent method of planning a safe system of work and how to work safely with these assets when on site.

NR/L2/AMG/1040	Buried Services Data Feedback Issue 1; Dec 08	Compliance 01/03/09	Replaces New at issue 70
----------------	--	-------------------------------	------------------------------------

This standard identifies the process for the supply of as-built buried services drawings/plans following completion of ground disturbance work on Network Rail infrastructure.

NR/L2/AMG/02106	The Provision of Track Category and Traffic Data - Procedure (Formerly – Management of the Effects of Changing Traffic Flows on Maintenance) Issue 4; Jun 08	Compliance 26/08/08	Replaces NR/L2/BUS/02106 Iss 3; Dec 07
-----------------	--	-------------------------------	---

This document defines the process for identifying, evaluating and providing information about track category, planned traffic flows and short-term changes to traffic. This enables informed decisions to be made about asset stewardship, inspection, maintenance and renewal.
(Contains NR/BS/LI/305)

NR/L2/HAM/02201	Management of Risk Arising from Deferred Renewals Issue 5; Jun 16	Compliance 03/09/16	Replaces NR/L2/HAM/02201 Iss 4; Mar 12
-----------------	---	-------------------------------	--

This standard sets out the process to mitigate the risks arising from a re-scheduled prioritised renewal or an incomplete delivery of the scope of a renewal.

Level 3

NR/L3/AMG/02107	Provision of Track Category and Traffic Data - Work Instruction Issue 3; Jun 08	Compliance 01/12/07	Replaces NR/L3/BUS/02107 Iss 2; Dec 07
-----------------	--	-------------------------------	--

This standard defines the process for identifying, evaluating and providing information about track category, planned traffic flows and short-term changes to traffic. This enables informed decisions to be made about asset stewardship, inspection, maintenance and renewal.

4.21.3 Railway System Engineering

Level 2

NR/L2/RSE/0005	Product Design for Reliability Issue 5; Dec 20	Compliance 05/12/20	Replaces NR/L2/RSE/0005 Iss 4; Mar 20
-----------------------	---	-------------------------------	---

This business process integrates proven tools and methodologies into a supplier's existing design processes to create documented, traceable, controlled evidence of reliability, availability and maintainability. It helps enable compliance with BS EN 50126 before product acceptance (PA) is granted by Network Rail and addresses train delay risk resulting from asset reliability.

NR/L2/RSE/070	Engineering Verification Issue 2; Dec 11	Compliance 03/03/12	Replaces NR/L3/EBM/070 Iss 1 NR/L3/EBM/071 Iss 1
----------------------	---	-------------------------------	---

Engineering Verification is a part of Network Rail's assurance process for confirming that infrastructure assets are fit for purpose.

NR/L2/RSE/100	Network Rail Assurance Panel Processes Issue 5; Jun 19	Compliance 07/09/19	Replaces NR/L2/RSE/100 Iss 4; Dec 17
----------------------	---	-------------------------------	--

Network Rail Assurance Panel (NRAP) governs a number of Network Rail processes on behalf of Network Rail's Executive through the STE Business Performance Management Group (STE BPMG).

These processes help Network Rail comply with its statutory responsibilities and Health and Safety Management System when a change is introduced that could change the risk profile of Network Rail Infrastructure.

This module sets out how NRAP carries out these responsibilities and delegates authority to bodies and individuals within Network Rail.

NR/L2/RSE/100/	Module	Issue	Issue Date
01	Network Rail Assurance Panel	2	Dec 2015
02	Application of the Common Safety Method for Risk Evaluation and Assessment	3	Dec 2015
03	The Application of the Interoperability Regulations for Infrastructure Projects	2	Dec 2015
04	Introduction of New or Modified Vehicles	2	Dec 2015
05	Product Acceptance and Change to Network Rail Operational Infrastructure	3	Dec 2017
07	System Review Panels	3	Jun 2019

NR/L2/RSE/02009	Engineering Management for Projects Issue 7; Mar 21	Compliance 04/09/21	Replaces NR/L2/INI/02009 Iss 6; Sep 15
------------------------	--	-------------------------------	--

This standard aligns engineering management practices with elements of legislative instruments, including the Construction (Design and Management) Regulations 2015, Common Safety Method for Risk Evaluation and Assessment Regulation (EU) and The Railways (Interoperability) Regulations 2011, where work is undertaken on the Network Rail Infrastructure.

NR/L2/RSE/02009/	Module	Issue	Issue Date
01	Assessment for Project Engineering Roles	2	Mar 21
02	The Management and Review of Engineering Deliverables	2	Mar 21

NR/L2/RSE/30041	Electromagnetic Compatibility (EMC) Assurance Process Issue 2; Jun 12	Compliance 01/09/12	Replaces NR/L2/RSE/30041 Iss 1; Sep 08
------------------------	---	-------------------------------	--

This standard specifies how Network Rail manages the risks of asset failure associated with known uncontrolled electromagnetic phenomena. It supports the Network Rail policy requirements as specified in NR/L1/RSE/30040, Electromagnetic Compatibility (EMC) Strategy for Network Rail, and its legal obligations under the EMC Regulations (2006).

4.22 TELECOMS ENGINEERING

Company Standards

NR/CS/TEL/30101 **Telecoms Assurance and Compliance** Issue 1; Feb 06 **Replaces**

This company standard sets out the process which Network Rail shall use to ensure compliance of telecoms assets with regulations and the requirements of the service and that staff working on the assets are competent to do so.

Specifications

NR/SP/TEL/30024 **Fault Priority and Response Times for Operational Telecommunications Services** Issue 4; Dec 06 **Compliance** 03/03/07 **Replaces** RT/E/S/30024 Iss 3; Jun 05

This document defines the fault priority and associated response and target corrective action times which shall be applied as a minimum requirement for Operational Telecommunications Services.

NR/SP/TEL/30032 **Positioning and Labelling of Lineside Telephones** Issue 3; Apr 06 **Replaces** RT/E/S/30032 Iss 2; Aug 03

This specification defines how the requirements of the Railway Group Standard GE/RT8048 issue 1 - Positioning and Labelling of Lineside Telephones, are to be applied to Network Rail controlled infrastructure. It revises the emergency issue of RT/E/S/30032 to include retrospective actions to bring the position of telephones installed since April 02 into compliance and to bring the labelling of all telephones irrespective of age up to date

NR/SP/TEL/30035 **Telecoms Network Terminating Points** Issue 2; Dec 05 **Replaces** RT/E/S/30035 Iss 1; Jun 03

This specification defines the boundaries between different parts of the telecoms network. It sets out a clear demarcation of maintenance responsibilities. In particular, it provides clear direction when failures arise as to what extent a contractor needs to investigate to establish whether their equipment is working normally.

NR/SP/TEL/50016 **Methodology for the Demonstration of Compatibility with Telecoms Systems** Issue 3; Apr 06 **Replaces** NR/GN/TEL/50016 Iss 2; Dec 05

The purpose of this document is to provide a methodology to demonstrate electro-magnetic compatibility with operational telecommunications equipment and systems on the ac and dc electrified railway on Network Rail controlled infrastructure.

RT/E/S/11189 **Testing Telephones at Level Crossings** Issue 3; Jun 05 **Replaces** RT/E/S/11189 Iss 2; Aug 01

This instruction details the tests and inspection required for the commissioning of new and altered level crossing installations equipped with a level crossing telephone system.

Product Specifications

NR/PS/TEL/00014 **Telecommunications Optical Fibre Cable** Issue 4; Apr 06 **Replaces** RT/E/PS/00014 Iss 3; Jun 03

This document is for use in procuring polyethylene sheathed ZHLS sheathed optical fibre trunk telecommunications cables.

NR/PS/TEL/00015 **Unit Twin Copper Telecommunications Cable** Issue 3; Apr 06 **Replaces** RT/E/PS/00015 Iss 2; Jun 03

This document is for use in procurement contracts for polyethylene sheathed and ZHLS sheathed external copper telecommunications cables.

NR/PS/TEL/00025 **Synchronous Digital Hierarchy Multiplexing Equipment** Issue 2; Apr 06 **Replaces** RT/E/PS/00025 Iss 1; Feb 02

This product specification states the minimum requirements for synchronous digital hierarchy multiplexing equipment forming part of telecommunications systems providing services for operational railway and business applications.

NR/PS/TEL/00026 **Primary PCM Multiplex Equipment** Issue 2; Apr 06 **Replaces** RT/E/PS/00026 Iss 1; Feb 02

This product specification states the minimum requirements for primary PCM multiplex equipment forming part of telecommunications systems providing services for operational railway and business applications.

NR/PS/TEL/00027 **Digital Subscriber Line Transmission Equipment** Issue 2; Apr 06 **Replaces** RT/E/PS/00027 Iss 1; Feb 02

This product specification states the minimum requirements for digital subscriber line transmission equipment forming part of telecommunications systems providing services for operational railway and business applications.

NR/PS/TEL/00028	Controlled Climate Trayside Housing for Telecommunications Equipment Issue 2; Apr 06	Replaces RT/E/PS/00028 Iss 1; Feb 02
------------------------	--	--

This Product Specification states the minimum requirements for Controlled Climate Trayside Housings for Telecommunications Equipment supporting operational railway and business services.

NR/PS/TEL/30107	Telecoms Lineside Copper Cable Enclosures Issue 1; Jun 06	Replaces
------------------------	--	-----------------

To specify the core requirements for non-climate controlled, non power fed lineside telecom copper cable enclosures. The primary function of these enclosures is to accommodate copper cable terminations, and as such the enclosures may be in the form of cabinets or small distribution boxes mounted on their associated posts.

NR/PS/TEL/31102	Screening Conductor for the Immunisation of Telecommunications Cables Issue 1; Dec 06	Replaces
------------------------	---	-----------------

A product specification which shall be used when procuring a screening conductor for the immunisation of telecommunications cables on Network Rail infrastructure.

Level 1

NR/L1/TEL/30029	Telecoms Installation Issue 4; Mar 10	Compliance 06/03/10	Replaces NR/L1/TEL/30029 Iss 3; Aug 08
------------------------	--	-------------------------------	--

This company standard details the process which shall be used for the installation of telecoms assets on Network Rail infrastructure.

NR/L1/TEL/30092	Telecoms Testing and Commissioning Procedure Issue 4; Dec 16	Compliance 04/03/17	Replaces NR/L1/TEL/30092 Iss 3; Mar 10
------------------------	--	-------------------------------	--

The purpose of the standard is to detail the procedure for testing and commissioning of telecoms equipment and systems installed on Network Rail controlled infrastructure.

The testing and commissioning activity is essential for validating and verifying the design meets the requirements.

NR/L1/TEL/30099	Telecoms Asset Management Issue 4; Mar 10	Compliance 06/03/10	Replaces NR/L1/TEL/30099 Iss 3; Aug 08
------------------------	--	-------------------------------	--

This standard sets out the process which Network Rail shall use to manage its telecoms assets.

NR/L1/TEL/30100	Telecoms Design Issue 3; Mar 10	Compliance 06/03/10	Replaces NR/L1/TEL/30100 Iss 2; Aug 08
------------------------	--	-------------------------------	--

This company standard details the procedure for the design of telecoms equipment and systems on Network Rail controlled infrastructure. It also details the procedure for the management, control and safety requirements of the design process.

NR/L1/TEL/30102	Network Rail Asset Management Policy – Telecommunications Engineering Issue 1; Sep 09	Compliance 05/09/09	Replaces New at Issue 73
------------------------	--	-------------------------------	------------------------------------

The purpose of this document is to set the principles of how Telecommunications Assets are to be managed through their life-cycle to meet the defined output requirements of each Route.

Level 2

NR/L2/TEL/00013	Specification for Cable Troughing Issue 4; Mar 16	Compliance 04/06/16	Replaces NR/L2/TEL/00013 Iss 3; Mar 10
------------------------	--	-------------------------------	--

This document is to provide a performance specification for cable troughing products. The specification recognises that apart from the traditional reinforced concrete troughing, troughing can be made from a wide range of materials.

NR/L2/TEL/013	Competence in Telecommunications Engineering Issue 3; Mar 20	Compliance 06/06/20	Replaces NR/L2/CTM/013 Iss 2; Sep 10
----------------------	--	-------------------------------	--

This document sets out the minimum requirements for the training and competency assessment of individuals who undertake telecoms engineering activities on Network Rail managed infrastructure to confirm that individuals who undertake telecoms engineering work are competent and have the individual role profile to perform the work safely and correctly.

NR/L2/TEL/30002	Operational Concentrator System (OCS) Issue 5; Mar 20	Compliance 06/06/20	Replaces NR/SP/TEL/30002 Iss 4; Apr 06 NR/SP/TEL/30031 Iss 2; Apr 06
------------------------	--	-------------------------------	---

This document defines the minimum technical requirements for new Operational Internet Protocol Concentrator System (OCS) concentrators using IP technology. These systems are used in Network Rail to facilitate communications and mitigate the risk of communications being directed to the incorrect person.

NR/L2/TEL/30003	Immunity Test Requirements for Lineside Communications Systems Issue 4; Dec 16	Compliance 04/03/17	Replaces NR/L2/TEL/30003 Iss 3; Jun 09
------------------------	---	-------------------------------	--

Network Rail's overhead AC electrification infrastructure can induce interference into lineside copper telecommunications cables. This process provides the methodology to test telecommunications equipment and systems for performance suitability when connected to these copper cables with induced interference.

NR/L2/TEL/30022	Engineering Assurance Arrangements for Communications Engineering Schemes and Services Issue 7; Jun 11	Compliance 03/09/11	Replaces NR/L2/TEL/30022 Iss 6; Mar 10
------------------------	---	-------------------------------	--

To define procedures for the technical acceptance requirements for changes to the infrastructure to telecommunications schemes and services.

NR/L2/TEL/30025	Standby Power Supply Requirements for Telecommunications Equipment Issue 5; Dec 17	Compliance 03/03/18	Replaces NR/L2/TEL/30025 Iss 4; Sep 09
------------------------	---	-------------------------------	--

This specification sets out requirements for the provision of a standby power supply to enable Network Rail owned operational telecommunications equipment to continue to operate for a given period after the loss of the normal or primary power supply source.

NR/L2/TEL/30028	Installation of Operational Telecommunications Equipment Issue 3; Mar 10	Compliance 06/03/10	Replaces NR/SP/TEL/30028 Iss 2; Oct 05
------------------------	---	-------------------------------	--

This specification in support of NR/L1/TEL/30029 sets out the minimum requirements for the management of installation of Operational Telecommunications equipment on Network Rail Infrastructure. These requirements are based on Railway Group Standard GK/RT0208.

NR/L2/TEL/30033	Inspection and Surveillance of Telecommunications Engineering Activities Issue 7; Mar 10	Compliance 06/03/10	Replaces NR/L2/TEL/30033 Iss 6; Jun 08
------------------------	---	-------------------------------	--

This specification is intended to verify that maintenance contractors are effective in the application of group and company standards and have a suitable understanding of the maintenance requirements

NR/L2/TEL/30034	Radio Mast Lightning Protection and Earthing Systems Issue 4; Mar 10	Compliance 06/03/10	Replaces NR/L2/TEL/30034 Iss 3; Aug 08
------------------------	---	-------------------------------	--

This standard details the design requirements for a lightning protection and earthing system (LP&ES) for permanent radio mast or tower structures located on Network Rail land, property or TOC leased land to minimise the risk to personnel and equipment.

NR/L2/TEL/30036	Booster Transformer Outages: Managing the Consequences for Telecommunication Systems Issue 4; Aug 08	Compliance 26/08/08	Replaces NR/SP/TEL/30036 Iss 3; Apr 06
------------------------	---	-------------------------------	---

This specification details the actions to be taken during a booster transformer outage to protect staff from the possibility of receiving an electric shock from contact with telecoms cables or circuits connected to them.

NR/L2/TEL/30066	Clearance from Fixed Radio Frequency Transmitters Issue 8; Dec 20	Compliance 06/03/21	Replaces NR/L2/TEL/30066 Iss 7; Mar 10
------------------------	--	-------------------------------	--

This standard specifies the maximum allowable radio frequency field strength of fixed installation of radio frequency transmitters to:

- a) Protect Network Rail workers and contractors on Network Rail property
- b) Protect passengers, and
- c) Limit Radio Frequency (RF) interference for the operation of trackside systems.

NR/L2/TEL/30067	The Transmission of Safety Related Information Issue 2; Dec 11	Compliance 03/03/12	Replaces NR/L2/TEL/30067 Iss 1; Jun 11
------------------------	---	-------------------------------	--

This standard specifies control measures to reduce risks associated with the transmission of Safety Related Information across Network Rail Communications Infrastructure and independently owned infrastructure so far as is reasonably practicable (SFAIRP).

NR/L2/TEL/30069	Specification for the Inspection and Minor Maintenance of Lineside S&T Cable Routes Issue 2; Mar 09	Compliance 05/09/09	Replaces NR/WI/TEL/30069 Iss 1; Jun 06
------------------------	--	-------------------------------	--

This telecoms maintenance instruction defines the inspection and minor maintenance requirements for S&T lineside cable routes so that they can be kept in good order to suitably protect the cables within.

NR/L2/TEL/30070	Specification for the Maintenance of Telecoms Copper Cables Issue 2; Mar 09	Compliance 05/09/09	Replaces NR/WI/TEL/30070 Iss 1; Jun 06
------------------------	--	-------------------------------	--

This telecoms maintenance instruction defines the maintenance requirements for copper cables in use on Network Rail infrastructure.

NR/L2/TEL/30072	Specification for the Maintenance of DOO(P) CCTV, Guard-Assisted CCTV and DOO Mirror Systems Issue 3; Dec 12	Compliance 02/03/13	Replaces NR/L2/TEL/30072 Iss 2; Mar 09
------------------------	---	-------------------------------	--

This standard defines the maintenance requirements for DOO CCTV(Driver Only Operated Closed Circuit television) guard-assisted and DOO mirror systems used on Network Rail infrastructure.

NR/L2/TEL/30075	Specification for the Maintenance of Electro-mechanical Concentrators Issue 2; Mar 09	Compliance 05/09/09	Replaces NR/WI/TEL/30075 Iss 1; Jun 06
------------------------	--	-------------------------------	--

This instruction defines the maintenance requirements for electro-mechanical concentrators used by Network Rail.

NR/L2/TEL/30078	Specification for the Maintenance of Network Control Processor Systems Issue 2; Mar 09	Compliance 05/09/09	Replaces NR/WI/TEL/30078 Iss 1; Jun 06
------------------------	---	-------------------------------	--

This instruction defines the maintenance requirements for Network control processor systems in use on Network Rail infrastructure.

NR/L2/TEL/30085	Specification for the Maintenance of Electronic PABX Concentrators Issue 2; Mar 09	Compliance 05/09/09	Replaces NR/WI/TEL/30085 Iss 1; Jun 06
------------------------	---	-------------------------------	--

This instruction defines the maintenance requirements for Electronic PABX concentrators used by Network Rail.

NR/L2/TEL/30086	Specification for the Maintenance of Telecoms Digital Transmission Systems Issue 3; Dec 12	Compliance 02/03/13	Replaces NR/L2/TEL/30086 Iss 2; Mar 09
------------------------	---	-------------------------------	--

This telecoms maintenance instruction defines the maintenance requirements form telecoms digital transmission systems in use on Network Rail infrastructure.

NR/L2/TEL/30087	Specification for the Maintenance of UHF Spot Scheme and Marine Radio Systems Issue 2; Mar 09	Compliance 05/09/09	Replaces NR/WI/TEL/30087 Iss 1; Jun 06
------------------------	--	-------------------------------	--

This instruction defines the maintenance requirements for UHF spot and marine radio system in use on Network Rail infrastructure.

NR/L2/TEL/30094	Installation of Telecommunications Equipment and Systems Issue 2; Mar 10	Compliance 06/03/10	Replaces NR/SP/TEL/30094 Iss 1; Jun 06
------------------------	---	-------------------------------	--

This specification, in support of Company Standard NR/L1/TEL/30029 - Telecoms Installation, details the minimum acceptable requirements for the installation of Telecommunications equipment on Network Rail infrastructure through the use of associated business process documents.

NR/L2/TEL/30095	Specification for the Maintenance of Radio Electronic Token Block Telecoms Equipment Issue 2; Mar 09	Compliance 05/09/09	Replaces NR/WI/TEL/30095 Iss 1; Jun 06
------------------------	---	-------------------------------	--

This instruction defines the telecoms maintenance requirements for Radio Electronic Token Block in use on Network Rail infrastructure.

NR/L2/TEL/30097	Specification for the Maintenance of Lineside Plug Points and Tunnel Emergency Communication Systems (Pinch Wires) Issue 2; Mar 09	Compliance 05/09/09	Replaces NR/WI/TEL/30097 Iss 1; Jun 06
------------------------	---	-------------------------------	--

This telecoms maintenance instruction defines the maintenance and functional testing that Network Rail requires for their lineside telephone plug points and tunnel emergency communications systems (excludes Severn Tunnel installations).

NR/L2/TEL/30098	Testing and Commissioning of Telecommunications Equipment and Systems Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/SP/TEL/30098 Iss 1; Feb 06
------------------------	--	-------------------------------	---

This specification, in support of Company Standard NR/CS/TEL/30092 Telecommunication Testing and Commissioning Procedure, expands upon the requirements for the testing and commissioning of telecoms assets on Network Rail controlled infrastructure.

NR/L2/TEL/30105	Compliance with Fixed Telecoms Network Design Criteria Issue 2; Dec 10	Compliance 04/12/10	Replaces NR/SP/TEL/30105 Iss E1; Feb 07
------------------------	---	-------------------------------	---

This specification mandates the use of Fixed Telecoms Network design criteria for projects supplying telecoms cables and transmission equipment for use as Network Rail infrastructure

NR/L2/TEL/30121	Specification for the Maintenance of Recorded Announcement Equipment Issue 2; Mar 09	Compliance 05/09/09	Replaces NR/WI/TEL/30121 Iss 1; Aug 06
------------------------	---	-------------------------------	--

This instruction defines the requirements for an inspection regime by the telecoms maintainers of recorded announcement equipment used by Network Rail and/or the SFO.

NR/L2/TEL/30122	Specification for the Maintenance of Electronic PABX Switches Issue 2; Mar 09	Compliance 05/09/09	Replaces NR/WI/TEL/30122 Iss 1; Aug 06
------------------------	--	-------------------------------	--

The purpose of maintaining PABX switches is to decrease the incidence of failures through deterioration and to identify potential failures before they become service affecting.

NR/L2/TEL/30124	Specification for the Maintenance of GSM-R Radio BTS, BSC, TCU, Repeater & IVRS Equipment Issue 2; Dec 12	Compliance 02/03/13	Replaces NR/L2/TEL/30124 Iss 1; Mar 09
------------------------	--	-------------------------------	--

The purpose of maintaining and testing these radio systems is to decrease the incidence of failures through deterioration and to identify potential failures before they become service affecting.

NR/L2/TEL/30125	Communications with Electrical Control Rooms - ETD Network Testing Specification Issue 1; Mar 09	Compliance 05/09/09	Replaces New at Issue 71
------------------------	---	-------------------------------	------------------------------------

This document defines the requirements for the functional testing of the 17x short code dialling service provided on the railway voice communications system either by Network Rail's own operational switches or those provided to Network Rail under contractual agreements by third parties.

NR/L2/TEL/30126	Specification for the Maintenance of Analogue Transmission Systems Issue 1; Mar 10	Compliance 06/03/10	Replaces New at Issue 75
------------------------	---	-------------------------------	------------------------------------

This telecoms maintenance instruction defines the maintenance requirements for Telecoms Analogue Transmission systems in use on Network Rail infrastructure.

NR/L2/TEL/30127	GSM-R Air Interface Functionality, Availability Management and Compliance Validation Issue 4; Jun 18	Compliance 02/09/18	Replaces NR/L2/TEL/30127 Iss 3; Mar 10
------------------------	---	-------------------------------	--

This specification defines how the technical and operational functionality of the Global System for Mobile Communications (Rail) (GSM-R) system air interface will be assured throughout its operational life.

NR/L2/TEL/30130	Electronic Visual Customer Information Systems Issue 3; Sep 09	Compliance 02/11/09	Replaces NR/L2/TEL/30130 Iss 2; Aug 08
------------------------	---	-------------------------------	--

This standard sets out the minimum requirements that shall be met by electronic visual customer information systems installed on stations. These minimum standards have been defined to meet statutory requirements and to ensure that there is some consistency between installations undertaken in different locations and by different contractors/suppliers.

NR/L2/TEL/30132	Asset Management of Station Information and Surveillance Systems (SISS) Issue 1; Jun 11	Compliance 03/09/11	Replaces New at Issue 80
------------------------	--	-------------------------------	------------------------------------

The purpose of this standard is to define the process to be undertaken when a change is made to any part of the 'Station Information Security Systems' (SISS) owned by Network Rail on any Franchised or managed station.

NR/L2/TEL/30134	Design and Installation Requirements for Public Announcement, Voice Alarm and Long Line Public Announcement Systems Issue 2; Sep 09	Compliance 05/12/09	Replaces NR/L2/TEL/30134 Iss 1; Dec 07
------------------------	--	-------------------------------	--

This standard details the requirements for public announcement, voice alarm and long line public announcement systems on Network Rail infrastructure.

NR/L2/TEL/30135	Video Surveillance Systems (VSS) Issue 5; Sep 20	Compliance 05/12/2020	Replaces NR/L2/TEL/30135 Iss 4; Dec 19
------------------------	---	---------------------------------	--

This standard provides a minimum performance level for high quality Video Surveillance Systems (VSS) to improve passenger safety, station operation and to combat crime, terrorism and disorder.

NR/L2/TEL/30136	Testing Requirements - Security CCTV Issue 1; Jun 09	Compliance 05/09/09	Replaces New at Issue 72
------------------------	---	-------------------------------	------------------------------------

This Standard, in support of NR/L2/TEL/30098 – Testing and Commissioning of Telecommunications Equipment and Systems, details the tests that are required to be carried out on a Security CCTV installation that falls under the scope of NR/L1/TEL/30092, Telecommunication Testing and Commissioning Procedure.

NR/L2/TEL/30141	Tunnel Emergency Communication Wire Product Specification Issue 1; Jun 10	Compliance 04/09/10	Replaces New at Issue 76
------------------------	--	-------------------------------	------------------------------------

This document details the parameters which Tunnel Emergency Communication wires shall be assessed to demonstrate their suitability to be used on Network Rail's infrastructure.

NR/L2/TEL/30143	Line Side Telephones Product Specification Issue 1; Jun 10	Compliance 04/09/10	Replaces New at Issue 76
------------------------	---	-------------------------------	------------------------------------

Provides a reference for line side telephone product specification proposed for operational communications.

NR/L2/TEL/30146	Product Specification for UMTS, GSM and GSM-R Modems Issue 2; Dec 10	Compliance 04/12/10	Replaces NR/L2/TEL/30146 Iss 1; Sep 10
------------------------	--	-------------------------------	--

Provides requirements and guidance for the selection of a UMTS/GSM/GSM-R modem capable of transmitting speech and/or data to a defined control point via the public UMTS/GSM/GPRS networks, or via Network Rail's GSM-R network.

NR/L2/TEL/30147	Product Specification for Wireless Connectivity Solutions Issue 1; Sep 10	Compliance 04/09/10	Replaces New at Issue 77
------------------------	---	-------------------------------	------------------------------------

Provides requirements and guidance for the selection of wireless devices exempt of product acceptance requirements.

NR/L2/TEL/30151	Design and Installation of Station Cabling Issue 1; Dec 10	Compliance 05/03/11	Replaces New at Issue 78
------------------------	---	-------------------------------	------------------------------------

The purpose of this standard is to promote better cabling standards on stations. Its aims are to deploy best practice, to encourage standardisation, to promote fitness for purpose and longevity, to provide for future needs and to produce visually pleasing station cabling. Through this standard, Network Rail as the Infrastructure Manager or Landlord sets out the telecom cabling requirements for all stations owned by Network Rail, including franchised stations.

NR/L2/TEL/30156	Functional Requirements for Safety Related Communications Equipment for On Track Plant Working Issue 1; Dec 11	Compliance 03/03/12	Replaces New at Issue 82
------------------------	---	-------------------------------	------------------------------------

Provides technical requirements and guidance for the selection of a full duplex voice communication system to allow conference style communication, which can be utilised during On Track Plant (OTP) activities, such as Tandem Lifting. There is a requirement for such a system during safety critical OTP operations where constant communication between machinery & its operators are essential. The specification must be used as a part of wider suite of documentation describing the equipment and processes forming a safe system of work.

NR/L2/TEL/30160	Specification for Optical Fibre Network Design Issue 2; Mar 17	Compliance 03/09/11	Replaces NR/L2/TEL/30160 Iss 1; Jun 11
------------------------	--	-------------------------------	--

The purpose of this standard is to set out the principles and considerations to be taken into account for additions to, or modifications of, Network Rail's optical fibre infrastructure with the objectives of maximise its potential capacity and applying a consistent approach that will perpetuate reliability, availability and maintainability.

NR/L2/TEL/30161	Supply of Optical Fibre Patchcord and Pigtail Assemblies Issue 1; Jun 11	Compliance 03/09/11	Replaces New at Issue 80
------------------------	--	-------------------------------	------------------------------------

This standard sets out the technical requirements that optical patchcords and pigtails procured for use in Network Rail's optical fibre telecommunications network shall meet.

NR/L2/TEL/30175	Ethernet Services Commissioning Tests Issue 1; Mar 20	Compliance 06/06/20	Replaces New at Issue 115
------------------------	--	-------------------------------	-------------------------------------

This document details the tests which enable Ethernet transport circuits and Ethernet services on Network Rail's packet-based transmission networks to be commissioned uniformly and provide assurance that the services are fit for handover to operations.

NR/L2/TEL/30176	Telecoms Asset Data Requirements Issue 1; Jun 21	Compliance 04/09/21	Replaces New at Issue 120
------------------------	---	-------------------------------	-------------------------------------

This standard sets out Network Rail's strategy to:

- Manage telecommunication asset data; and
- Its specification, collection and use.

NR/L2/TEL/30182	Specification for Secure Configuration and Management of Network Rail Telecom Internet Protocol (IP) Networks, Systems and Devices Issue 2; Mar 19	Compliance 01/06/19	Replaces NR/L2/TEL/30182 Iss 1; Mar 17
------------------------	---	-------------------------------	--

The purpose of this standard is to specify the application of security controls required to protect Network Rail Telecom Internet Protocol (IP) networks in order to manage security risks to IP networks, network devices and connected systems throughout their operational lifecycle.

NR/L2/TEL/30184	Specification for Network Rail Telecoms Systems Architecture, Technical Design and Test Assurance Issue 1; Jun 17	Compliance 02/09/17	Replaces New at Issue 104
------------------------	---	-------------------------------	-------------------------------------

The purpose of this L2 Specification is to set the necessary standards and controls to be applied to all Systems Architecture, Technical Design and Test Assurance activities required for business capability deployment, capability uplift, changes to current Business Support Systems (BSS), Operations Support Systems (OSS) applications and/or IT infrastructure.

NR/L2/TEL/30185	Principles for Operational Telecommunications, Signalling and E&P Sub-Access Internet Protocol Networks Issue 1; Jun 19	Compliance 07/09/19	Replaces New at Issue 112
-----------------	---	-------------------------------	-------------------------------------

This principles document defines a set of consistent rules for the design of sub-access telecommunication networks to support Operational Railway Systems or Applications allowing:

- consistent end-to-end architecture and configuration;
- remotely managed and monitored networks;
- consistent Internet Protocol (IP) address usage and management;
- consistent products and product life cycles; and
- modelled end-to-end services and infrastructure in a Telecommunications Network Assets tool.

NR/L2/TEL/31001	Telecom Maintenance Testing & Fault Investigation Process Issue 4; Mar 18	Compliance 02/06/18	Replaces NR/L2/TEL/31001 Iss 3; Dec 09
-----------------	---	-------------------------------	--

The purpose of the Telecom Maintenance Testing & Fault Investigation Process handbook (TMT&FIP) is to manage and minimise risks associated with Moving Train / Loss of /miscommunication of voice and data transmission for Safety and Operational Critical Services (e.g. SSI, Axle Counters, SCADA) by making certain the fundamental causes of safety related telecommunications failures are identified and through maintenance testing, equipment is returned to service in a safe and controlled manner and that any replacements are working correctly

NR/L2/TEL/31002	Maintenance of Telecommunications Equipment Issue 5; Jun 18	Compliance 01/09/18	Replaces NR/L1/TEL/30093 Iss 3; Mar 10, NR/L2/TEL/31002 Iss 4; Mar 10
-----------------	---	-------------------------------	--

This specification sets out the maintenance and management responsibilities for persons engaged in the maintenance of telecommunication equipment used by Network Rail.

NR/L2/TEL/31107	Limits and Test Method of Induced Voltages on Telecommunications Cables due to Electrification Systems Issue 2; Mar 10	Compliance 06/03/10	Replaces NR/L2/TEL/31107 Iss 1; Jun 09
-----------------	--	-------------------------------	--

This standard defines the test limits and test methods for induced voltages on copper telecommunications cables due to AC electrification systems in normal and credible failure modes.

NR/L2/TEL/31108	Specification for B.T. Circuits – Procurement Requirements Issue 3; Mar 10	Compliance 06/03/10	Replaces NR/L2/TEL/31108 Iss 2; Aug 08
-----------------	--	-------------------------------	--

This standard defines the requirements to be used when BT circuits are procured by Network Rail for use in signalling, operational telecommunications or traction electrification control systems.

NR/L2/TEL/31111	Design and Installation Requirements for Driver Only Operation (Passenger) Systems Issue 3; Jun 11	Compliance 02/07/11	Replaces NR/L2/TEL/31111 Iss 2; Dec 09
-----------------	--	-------------------------------	--

This standard in support of NR/L1/TEL/30100 – Telecoms Design, mandates the requirements for the design of Driver Only Operation (DOO) viewing systems on Network Rail infrastructure when this is the chosen method of train dispatch.

NR/L2/TEL/31114	Product Specification For Telecoms Jumper Wire Issue 1; Dec 08	Compliance 01/03/09	Replaces New at Issue 70
-----------------	--	-------------------------------	------------------------------------

This specification details the requirements for single twisted pair telecommunications jumper wire which is suitable for use on Network Rail's infrastructure.

Level 3

NR/L3/TEL/0022	Preventive Maintenance of Operational Telecoms Assets Issue 3; Mar 10	Compliance 06/03/10	Replaces NR/L3/MTC/TE0022 Iss 2; Aug 08
----------------	---	-------------------------------	--

The purpose of this document is to define the roles and responsibilities in the planning of routine maintenance activities of telecom assets to fit in with the national planning process and timescales. It applies to Network Rail maintenance staff.

NR/L3/TEL/0023	Management of SINCS Records for Telecoms Assets Issue 3; Mar 10	Compliance 26/08/08	Replaces NR/L3/MTC/TE0023 Iss 2; Aug 08
----------------	---	-------------------------------	--

The purpose of this procedure is to define the management of the SINCS sign off process for telecoms assets maintained by Network Rail maintenance staff.

NR/L3/TEL/0092	Process for the Disconnection and at Risk Process for Telecom Bearer Circuits and Systems Issue 5; Jun 17	Compliance 02/09/17	Replaces NR/L3/TEL/0092 Iss 4; Jun 11
-----------------------	---	-------------------------------	---

The purpose of this standard is to define the processes to be followed and the requirement to reach a clear understanding when applying for and agreeing the method of temporary handover/ hand-back of Network Rail telecom assets or on any other equipment that can affect operational telecoms equipment that may carry safety critical circuits between NRT and authorised site engineer. Application of the process minimises the risk to the safety of the operational railway and personal injury to staff and customers of the railway.

NR/L3/TEL/30005	Working at Height When Accessing Telecoms Assets Issue 1; Dec 19	Compliance 07/03/2020	Replaces New at Issue 114
------------------------	--	---------------------------------	-------------------------------------

This instruction defines the maintenance requirements for optical fibre cables and fibre terminations in use on Network Rail telecoms infrastructure.

NR/L3/TEL/30071	Specification for the Maintenance of Telecoms Optical Fibre Cables Issue 3; Sep 11	Compliance 03/09/11	Replaces NR/L2/TEL/30071 Iss 2; Mar 09
------------------------	---	-------------------------------	--

The purpose of this standard is to provide a process for safe access and working practices when working on telecom assets where Working at Height Regulations 2005 apply.

NR/L3/TEL/30074	Specification for the Maintenance of Telecommunication Earths and Screening Systems Issue 3; Sep 11	Compliance 03/09/11	Replaces NR/L2/TEL/30074 Iss 2; Mar 09
------------------------	--	-------------------------------	--

This instruction defines the maintenance requirements for telecoms earths and screening systems in use on Network Rail infrastructure.

NR/L3/TEL/30076	The Maintenance of Processor Controlled Concentrators Issue 3; Mar 18	Compliance 02/06/18	Replaces NR/L2/TEL/30076 Iss 2; Mar 09
------------------------	---	-------------------------------	--

This instruction directs the maintainer to the requirements for the maintenance of processor controlled concentrators in use within Network Rail. It is intended to maintain the required availability and manage the asset life efficiently; this is intended to mitigate the risk of loss of or miscommunication at level crossings.

NR/L3/TEL/30077	Specification for the Maintenance of Cable Distribution Frames and Location Cases Issue 3; Sep 11	Compliance 03/09/11	Replaces NR/L2/TEL/30077 Iss 2; Mar 09
------------------------	--	-------------------------------	--

This telecoms maintenance instruction defines the maintenance and inspection requirements for telecommunications cable distribution frames, distribution cases and location cases used for cable terminations in use on Network Rail infrastructure.

NR/L3/TEL/30081	Work Instruction for the Maintenance of Telecommunication Power Plant, Batteries, Inverters and Uninterruptible Power Supplies Issue 4; Dec 17	Compliance 03/03/18	Replaces NR/L2/TEL/30081 Iss 3; Jun 14
------------------------	---	-------------------------------	--

The purpose of the document is to set out the requirements for maintaining and testing telecoms power plant, inverters, batteries and uninterruptible power supplies in order to decrease the incidence of failures through deterioration and to identify potential failures before they become service affecting.

NR/L3/TEL/30082	Work Instruction for the Maintenance of Voice Recorders Issue 4; Jun 17	Compliance 02/09/17	Replaces NR/L2/TEL/30082 Iss 3; Jun 11
------------------------	---	-------------------------------	--

The purpose of this standard is to mandate the maintenance requirements for voice recorders in use on Network Rail telecoms infrastructure.

NR/L3/TEL/30088	Radio Structure Inspections and Maintenance of Antenna Systems and Feeders Issue 5; Dec 19	Compliance 06/06/2020	Replaces NR/L3/TEL/30088 Iss 4; Dec 16
------------------------	---	---------------------------------	--

The purpose of this document is to specify a set of maintenance requirements designed to provide assurance to the asset owners that the equipment will achieve its required availability and asset life.

NR/L3/TEL/30090	Inspection of Telecoms Equipment Rooms Issue 4; Jun 18	Compliance 01/09/18	Replaces NR/L3/TEL/30090 Iss 3; Sep 11
------------------------	---	-------------------------------	--

The purpose of this standard is to mitigate the risks associated with the condition and environment in which Network Rail Telecom (NRT) assets are housed by mandating checks and methods of recording to allow better visibility and rapid rectification.

NR/L3/TEL/30105	Installation of Operational Voice Recorders Issue 3; Mar 10	Compliance 06/03/10	Replaces NR/L3/TEL/30105 Iss 2; Aug 08
------------------------	--	-------------------------------	--

This work instruction in support of NR/SP/TEL/30094 - "Installation of telecoms equipment and systems", mandates the requirements for the installation of operational voice recorders on Network Rail infrastructure which are used to record operational voice circuits.

NR/L3/TEL/30106	Installation of Lineside Telephones Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/WI/TEL/30106 Iss 1; Jun 06
------------------------	--	-------------------------------	---

This work instruction in support of NR/SP/TE/30094 – “Installation of telecommunications equipment and systems”, mandates the installation requirements for the installation of lineside telephones on Network Rail infrastructure.

NR/L3/TEL/30108	Work Instruction for the Manual Installation of Telecommunications Cables Issue 1; Aug 07	Compliance 01/10/07	Replaces
------------------------	--	-------------------------------	-----------------

This document sets out the principles to be adopted when installing all types of telecommunications cables by hand pulling techniques or the use of motorised winches.

NR/L3/TEL/30123	Communications with Emergency Services - ETD Network Testing Procedure Issue 2; Jun 19	Compliance 07/09/19	Replaces NR/WI/TEL/30123 Iss 1; Dec 06
------------------------	---	-------------------------------	--

This instruction defines the requirements for the functional testing of the emergency facilities provided on Network Rail telecoms infrastructure or that provided to Network Rail under contractual agreements. The testing of emergency calls assures connection to the emergency operator can be successfully established and the correct location of calling party is recorded on the emergency operator database.

NR/L3/TEL/30133	Asset Condition Assessments for Telecoms Renewals & Enhancement Planning Issue 2; Jun 18	Compliance 01/09/18	Replaces NR/SP/TEL/30133 Iss 1; Apr 07
------------------------	---	-------------------------------	--

The purpose of this business process is to define the methodology by which information is to be gathered during asset condition assessment of Telecoms Assets to mitigate the risk associated with management of a large portfolio of assets by considering the asset maintainability, operability, condition, reliability, policy and Route requirements in prioritisation of renewal interventions across the portfolio.

NR/L3/TEL/30162	Work Instruction for Jointing, Terminating and Testing Optical Fibre Cables Issue 2; Mar 17	Compliance 03/06/17	Replaces NR/L2/TEL/30162 Iss 1; Jun 11
------------------------	--	-------------------------------	--

This standard sets out the specific requirements and parameters for jointing, terminating and site acceptance testing of optical fibre cables that comprise, or connect to, Network Rail’s optical fibre infrastructure.

NR/L3/TEL/30170	Work Instruction for the Maintenance of Public Address Voice Alarm (PAVA) Equipment Issue 2; Sep 19	Compliance 07/12/19	Replaces NR/L3/TEL/30170 Iss 1; Dec 16
------------------------	--	-------------------------------	--

The purpose of this document is to manage the risk arising from the failure of Public Address Voice Alarm (PAVA) equipment by providing a process for a set of periodic tests to assure that the asset is fit for purpose.

NR/L3/TEL/30175	Ethernet Services Commissioning Tests Issue 1; Mar 20	Compliance 06/06/20	Replaces New at Issue 115
------------------------	--	-------------------------------	-------------------------------------

This document details the tests which enable Ethernet transport circuits and Ethernet services on Network Rail’s packet-based transmission networks to be commissioned uniformly and provide assurance that the services are fit for handover to operations.

NR/L3/TEL/30181	Telecommunications Maintenance Work Instructions Handbook Issue 6; Jun 21	Compliance 06/03/2021	Replaces See below
------------------------	--	---------------------------------	------------------------------

Replaces: NR/L2/TEL/30110 Iss 2, NR/L2/TEL/30111 Iss 2, NR/L2/TEL/30115 Iss 2, NR/L3/TEL/30181 Iss 5

This document specifies work instructions for maintenance activities on Network Rail telecoms equipment. This contributes to reducing the risk of equipment failure.

NR/L3/TEL/30181/	Title	Issue	Issue Date
001	Netrix Switch	1	Mar 2016
002	Thameslink Cisco Layer 2/3 Switches	1	Mar 2016
004	FTNx Infinera Maintenance	1	Mar 2016
005	Northgate Call Touch	1	Mar 2016
006	GSM-R/GSM Lineside Telephones	1	Jun 2018
007	CISCO Unified Communications Manager and BT Trader Turret Server System	2	Sep 2020
008	BT Trader Board and HMI backup telephone Maintenance	2	Sep 2020
009	Maintenance of Telecoms Cable/Equipment Housings	1	Dec 2019
011	Maintenance of Operational Telephones	1	Sep 2020
012	Maintenance of GSM-R Fixed Terminal Sub-system (Dicora)	1	Sep 2020
013	Maintenance of Whiteley PETS	1	Sep 2020
015	Maintenance of Closed Circuit Television Cameras	1	Jun 2021
016	Maintenance of Closed Circuit Television Monitoring Equipment	1	Jun 2021
018	Maintenance of Clocks	1	Sep 2020

NR/L3/TEL/30181/	Title	Issue	Issue Date
019	Maintenance of Customer Information System Control Equipment	1	Sep 2020
020	Maintenance of Closed Circuit Television Video Recorders	1	Jun 2021
021	Maintenance of Help Points	1	Dec 2020
022	Maintenance of Customer Information Displays	1	Sep 2020
023	Maintenance of Public Address PCs and Recorded Announcement Equipment	1	Dec 2020
024	Maintenance of Public Address Systems	1	Dec 2020

NR/L3/TEL/31103	Energisation of Commercial and Operational Radio Antenna Systems Issue 3; Mar 10	Compliance 06/03/10	Replaces NR/L3/TEL/31103 Iss 2; Aug 08
------------------------	---	-------------------------------	--

This Work Instruction specifies the requirements for testing new and upgraded radio antenna systems for compliance with the electric field limits specified in NR/L2/TEL/30066 prior to introducing the system into service.

NR/L3/TEL/31104	Process for Managing Telecoms Software/Hardware Changes Issue 4; Mar 21	Compliance 05/06/21	Replaces NR/L3/TEL/31104 Iss 3; Mar 10
------------------------	--	-------------------------------	--

The standard mandates a process for all software and hardware changes to existing telecommunications equipment and services. These changes need to be carried out in a structured, controlled manner to minimise the risks to safety and performance.

NR/L3/TEL/33000	Document Index for In-sourcing of Thales Issue 3; Jun 10	Compliance 05/06/10	Replaces NR/L3/TEL/33000 Iss 2; Jun 09
------------------------	---	-------------------------------	--

This document lists the master index of former Thales documentation that has been transferred into Network Rail as part of the in-sourcing project.

NR/L3/TEL/33001	Document Index for Transfer of Stoke Telecoms Engineering Centre Staff from the FTN/GSM-R Project Issue 1; Mar 10	Compliance 06/03/10	Replaces New at Issue 75
------------------------	--	-------------------------------	------------------------------------

This document lists the master index of former FTN/GSM-R documentation that has been transferred into Infrastructure Maintenance. These documents have been updated and are presently published on the Telecoms Technical Documentation pages of Connect.

NR/L3/TEL/40047	Process for the Management of Safety Related Reports for Telecoms Failures Issue 4; Mar 21	Compliance 06/03/21	Replaces NR/L3/TEL/40047 Iss 3; Sep 20
------------------------	---	-------------------------------	--

This process contains the hazard index system of safety related failures of telecommunications equipment and services, owned by Network Rail or provided by third parties for railway operational purposes.

Work Instructions

NR/WI/TEL/30102	Testing Requirements – Operational Voice Recorders Issue 1; Feb 06	Replaces
------------------------	---	-----------------

This work instruction, in support of NR/SP/TEL/30098 – “Testing and commissioning of telecommunications equipment and systems”, details the tests that are required to be carried out on a voice recorder installation that falls under the scope of NR/CS/TEL/30092, “Telecommunication testing and commissioning procedure”.

NR/WI/TEL/30103	Testing Requirements – Public Emergency Telephone Systems Issue 1; Apr 06	Replaces
------------------------	--	-----------------

This work instruction in support of NR/SP/TEL/30098 – “Testing and commissioning of telecommunications equipment and systems” details the tests that are required to be carried out on a public emergency telephone system installation that falls under the scope of NR/CS/TEL/30092 - “Telecommunication testing and commissioning procedure”.

NR/WI/TEL/30104	Testing Requirements – Signal Box Concentrator Issue 1; Apr 06	Replaces
------------------------	---	-----------------

This work instruction in support of NR/SP/TEL/30098 – “Testing and commissioning of telecommunications equipment and systems” details the tests that are required to be carried out on a telephone concentrator installation that falls under the scope of NR/CS/TEL/30092, “Telecommunication testing and commissioning procedure”.

RT/E/WI/00113	Wiring of Copper Telecoms Terminations Issue 1; Apr 05	Replaces
----------------------	---	-----------------

The purpose of this standard is to ensure that all Network Rail employees, contractors and maintenance employees who are responsible for the installation and maintenance of infrastructure telecommunications cables are aware of the fundamental principles that shall be adhered to regarding: cable terminations, distribution frame labelling and circuit jumpering.

Guidance Notes (including Codes of Practice)

NR/GN/TEL/30037	Office Telephone System Installations Issue 2; Apr 06	Replaces RT/E/C/30037 Iss 1; Aug 03
------------------------	--	---

This Code of Practice provides information on details to be considered when designing, configuring and installing telephone systems in Network Rail offices. Its purpose is to provide comprehensive advice on all aspects of telephone system design and installation and to recommend a standardised approach from initial work requests to complete telephone system and peripheral equipment installations.

NR/GN/TEL/30065	Guidance Note for the Management of Safety Related Reports for Telecoms Failures Issue 3; Jun 08	Replaces Iss 2; Dec 05
------------------------	---	----------------------------------

The purpose of this guidance note is to provide information, help and worked examples to Network Rail and its contractors to ensure compliance with Network Rail specification NR/SP/TEL/30047.

NR/GN/TEL/30137	Loudspeaker Selection for PA and VA Systems Issue 1; Dec 09	Replaces New at Issue 74
------------------------	--	------------------------------------

This document provides guidance for the selection of loudspeakers for PA and VA. It does not provide any detailed design guidance for system installation. It supports NR/L2/TEL/30134 which mandates the Design and Installation requirements.

NR/GN/TEL/30138	Buried Cable Route and Cable Route Through Station Platform Issue 1; Mar 10	Replaces New at Issue 75
------------------------	--	------------------------------------

This document provides guidance to the Principal Contractor for the provisioning of new lineside cable routes buried in the cess as well as cable routes through station platforms.

NR/GN/TEL/30139	The Survey and Design of Telecoms Cable and Route Issue 1; Mar 10	Replaces New at Issue 75
------------------------	--	------------------------------------

This document provides guidance to the design and surveying of telecom cables and telecoms cable route.

NR/GN/TEL/30140	Telecom Cable and Route Installation Issue 1; Jun 10	Replaces New at Issue 76
------------------------	---	------------------------------------

This document provides guidance to the installation of telecom cables and telecoms cable route.

NR/GN/TEL/31106	Overview of Electromagnetic Coupling Between Traction Systems and Telecommunications Cables Issue 1; Jun 09	Replaces New at Issue 72
------------------------	--	------------------------------------

This guidance note provides an overview of the coupling between traction current and induced voltages on lineside cables and the effects this has on personal safety, and equipment malfunction.

NR/GN/TEL/31109	Telecoms Back Up Power Selection Guidance Issue 1; Aug 08	Replaces New at Issue 69
------------------------	--	------------------------------------

This document aims to explain at a fairly generic level the functions of the various different power plant systems used by telecoms and provide some guidance in compiling the required systems from the approved modules.

Special Inspection Notices

NR/SIN/092	STS Concentrator Auto Line Card Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/SIN/092 Iss 1; Apr 06
-------------------	--	-------------------------------	---

To address two separate technical issues affecting the STS Auto Line card when used to terminate either a Whiteley PETS system or BT exchange lines.

4.23 TRACK ENGINEERING

Specifications (including Procedures)

NR/SP/TRK/0133	Control of Wheel Impact Forces Issue 3; Jun 06	Compliance	Replaces RT/LS/P/030 Iss E2; Dec 00
This specification mandates the action to be taken when vertical wheel-rail forces exceed 200kN due to wheel flats or other vehicle irregularities.			
NR/SP/TRK/1110	Qualification and Certification of NDT Personnel Written Practice – Ultrasonic Testing Issue 1; Feb 06	Compliance 01/06/07	Replaces
This Written Practice establishes the control and administration system for the training, examination and certification programme for personnel who perform non-destructive testing (NDT) on Network Rail infrastructure. Responds to BS EN 473 / ISO 9712 and guidelines laid down in SNT-TC-1A (01).			
NR/SP/TRK/8011	Management of Pan 8 and Lockspiked Track Issue 1; Dec 05	Compliance	Replaces
The failure of the lockspike is difficult to detect as it tends to occur beneath the baseplate. Therefore the following specification must be applied to the management of Pan 8 and other lockspiked track.			
NR/SP/TRK/9003	Installation and Maintenance of Longitudinal Timbers Issue 1; Dec 05	Compliance	Replaces
This specification provides direction on the installation, maintenance and inspection of longitudinal timber systems on Network Rail infrastructure. It also provides requirements on design matters. Requirements for the installation, maintenance and inspection of supporting structures is not provided			
RT/CE/P/018	Requirements for the Operation of the Dynamic Track Stabiliser on or Adjacent to Structures Issue 1; Aug 97		Replaces
This procedure defines the procedures to be followed to permit the use of the dynamic track stabiliser and the limitations on its use over or adjacent to structures to ensure the integrity of structures is safeguarded. Responds to GC/RT5100			
RT/CE/P/027	Use of Ballast Gluing to Increase the Lateral Resistance of Track Issue 1; Jan 96		Replaces
This procedure sets out the Network Rail's policy on ballast gluing as means of providing increased lateral restraint of the permanent way. Responds to GC/RT5014			
RT/CE/S/002	Serviceable Rail for use in Running Lines and Sidings Issue 2; Aug 99		Replaces RT/CE/S/002 Iss 1A; Oct 97
This specification gives the requirements for the selection and use of serviceable rail in jointed and welded applications, and for replacement of isolated defects. Responds to GC/RT5019			
RT/CE/S/008	Saw and Disc Cutting and Drilling of Rail Issue 2; Feb 98		Replaces RT/CE/S/008 Iss 1; Feb 95
This specification gives the quality of finish and dimensional tolerance requirements for saw- or disc-cut rail ends and for holes drilled in rails, both factory and site situation. Responds to GC/RT5019, GC/RT5020			
RT/CE/S/009	Track Ballast Returned by Automatic Ballast Cleaners Issue 1; Jul 96		Replaces
This specification gives the requirements for track ballast returned directly to the track by use of ontrack automatic ballast cleaners, including physical properties and test. Material specification. Responds to GC/RT5014			
RT/CE/S/014	Rail Testing – Detection Criteria Issue 1A; Oct 97		Replaces
This document defines the performance specification for non – destructive testing of normal (pearlitic) rail and is expressed in terms of defect size thresholds and their probabilities of detection. Responds to GC/RT5019			
RT/CE/S/034	Requirements for Processes for Cold-expanding Fishbolt Holes by the Split Sleeve Method Issue 1; Aug 97		Replaces
This specification gives the requirements for processes to be used for the cold-expansion of fish bolt holes in railway rails and cast crossings using the split sleeve method. Responds to GC/RT5020			

RT/CE/S/037	Requirements for Maintenance of Trackwork in Depots by Depot Facility Operators Issue 3; Dec 00	Replaces RT/CE/S/037 Iss 2; Jun 98
--------------------	--	--

This document specifies the requirements for inspection and maintenance of trackwork within depots by depot facility operators having depot leasing agreements with Network Rail.
Can only mandate through terms of lease.

RT/CE/S/042	Track Geometry Recording Issue 1; Apr 95	Replaces
--------------------	---	-----------------

This specification gives the requirements for the provision of a track geometry recording service. It defines the parameters to be recorded, the types of report to be produced and the mode of up – loading recording data to the mainframe Track Quality System. It is intended to accord with, but in some respects enhance, Railway Group standard GC/HE038 "Track recording handbook".
Responds to GC/RT5010, GC/RT5017.

RT/CE/S/050	Process for Cold-expanding New Fishbolt Holes by the Split Sleeve Method Using FTI Tooling and Consumables Issue 1; Jan 96	Replaces
--------------------	---	-----------------

This specification gives the procedure to be used for the cold-expansion of new fishbolt holes in railway rails and cast crossings using the split sleeve method and FTI tooling and consumables.
Responds to GC/RT5019, GC/RT5020

RT/CE/S/051	Process for Cold-expanding Existing Fishbolt Holes by the Split Sleeve Method Using FTI Tooling and Consumables Issue 1; Jan 96	Replaces
--------------------	--	-----------------

This specification gives the method to be used for the coldexpansion of existing fishbolt holes in railway rails by the split sleeve process, using FTI tooling and consumables.
Responds to GC/RT5019, GC/RT5020

RT/CE/S/056	Rail Testing: Non-ultrasonic Procedures Issue 1; Mar 96	Replaces
--------------------	--	-----------------

This specification defines the procedures to be adopted for the testing of rail by nonultrasonic means. The methods described are magnetic particle inspection, dye penetrant inspection, visual examination and rail measurement using calipers.
Responds to GC/RT5019

RT/CE/S/057	Rail Failure Handbook Issue 4; Oct 01	Replaces RT/CE/S/057 Iss 3; Aug 01
--------------------	--	--

This specification defines reporting requirements for rail failures and the different types of rail failure that may occur.
Responds to GC/RT5019

RT/CE/S/064	Assembly of BR Mk111 4-and 6-hole insulated Joints Issue 2; Dec 03	Replaces RT/CE/S/064 Iss 1; Mar 96
--------------------	---	--

To set out the process for the assembly of BR MkIII glued insulated rail joints, so that when installed in Network Rail's infrastructure they are reliable and durable.

RT/CE/S/077	Storage, Installation & Testing of TSR & ESR AWS Magnets Issue 1; Oct 03	Replaces
--------------------	---	-----------------

This specification defines the storage, installation and testing requirements for AWS speed restriction magnets. It is primarily aimed at front line staff responsible for the correct installation of speed restriction magnets.
(Contains NR/BS/LI/101)

Product Specifications

RT/CE/S/001	Flash-weld Rails: Depot-welded Strings Issue 3; Aug 03	Replaces RT/CE/S/001 Iss 2; Dec 98
--------------------	---	--

This specification covers long welded strings manufactured by the flash welding of new rails at fixed plant. Only joints between rails of the same grade are covered.

RT/CE/S/005	Rail Testing: Portable Ultrasonic Equipment Issue 1; Aug 96	Replaces
--------------------	--	-----------------

This document defines the performance specification for portable ultrasonic rail flaw detector units used for testing rail on Network Rail owned permanent way. This document applies to all portable ultrasonic rail flaw detectors used to carry out the procedures defined in Network Rail line specification RT/CE/S/055 "Railtesting: ultrasonic procedures".
Responds to GC/RT5019

RT/CE/S/010	Geotextiles Issue 2; Oct 96	Replaces RT/CE/S/010 Iss 1; Nov 95
--------------------	------------------------------------	--

This specification gives the requirements for geotextiles, including physical properties and tests.
Responds to GC/RT5014

RT/CE/S/013	Electroslag Welded Vees for Part-welded Crossings Issue 1; Jun 96	Replaces
This specification gives the requirements for welded crossings manufactured using the electroslag welding process. Responds to GC/RT5011		
RT/CE/S/016	33C1 Check Rails Issue 1; Oct 97	Replaces
This specification lays down the requirements for new check rails of the 33C1 profile (previously known as U69 or UIC33) to be supplied to Network Rail or for use on Network Rail's infrastructure. Responds to GC/RT5019		
RT/CE/S/019	Cast Chairs, Baseplates and Blocks Issue 1; Apr 95	Replaces
This specification gives the requirements for the material and dimensions of cast chairs, baseplates and blocks for use in Network Rail's permanent way. Responds to GC/RT5015		
RT/CE/S/021	Steel Sleepers Issue 2; Feb 03	Replaces RT/CE/S/021 Iss 1; Aug 97
This material specification gives the requirements for the performance of steel sleepers which are to be installed for use in Network Rail's permanent way. Responds to GC/RT5015		
RT/CE/S/023	Insulated Rail Joints Issue 1; Mar 96	Replaces
This specification gives the requirements for the geometry and the mechanical and electrical performance of insulated rail joints for use in Network Rail. Responds to GC/RT5020		
RT/CE/S/024	Component Kits for BR MkIII 4- and 6-Hole Glued Insulated Joints Issue 1; Mar 96	Replaces
This specification defines the items required (excluding rails, bolts, MGL pins and adhesive) to make up a component kit for the production of glued insulated rail joints of the BR MkIII 4- or 6-hole design. Responds to GC/RT5020		
RT/CE/S/025	Steel Keys for Bullhead Rail Issue 1A; Oct 97	Replaces
This specification gives the requirements for the material and dimensions (by reference to drawings) of steel rail keys for use in Network Rail's permanent way. Responds to GC/RT5013		
RT/CE/S/026	Oak Keys For Bullhead Rail Issue 1; May 95	Replaces
This specification gives the requirements for the material and dimensions of oak rail keys for use in Network Rail's permanent way. Responds to GC/RT5013		
RT/CE/S/027	Plastic Ferrules Issue 1; Apr 95	Replaces
This material specification gives the requirements for the materials and dimensions of plastic ferrules for use in Network Rail's permanent way. Responds to GC/RT5013		
RT/CE/S/028	Insulators for Concrete Sleepers with Pandrol Shoulders Issue 1; Apr 95	Replaces
This specification gives the requirements for the material and dimensions of thermoplastic insulators for use with concrete sleepers with 'Pandrol' shoulders. Responds to GC/RT5013		
RT/CE/S/033	Track Blanketing Sand Issue 2; Feb 98	Replaces RT/CE/S/033 Iss 1; Jan 95
This specification gives the requirements for blanketing sand, including physical properties and tests, for use as filter layers in track substructures. Responds to GC/RT5014		
RT/CE/S/043	Rail Anchors Issue 1A; Oct 97	Replaces
This specification gives the performance requirements for rail anchors. Responds to GC/RT5010, GC/RT5013.		
RT/CE/S/130	Flash-welded Rails: Site-welded Strings Issue 1; Aug 03	Replaces
This specification is to ensure the serviceability of flash welded strings installed in Network Rail's permanent way. (Contains NR/BS/LI/163)		

RT/CE/S/131	Flash-welded Rails: Crossings, Switch Rails and Transition Rails Issue 1; Aug 03	Replaces
--------------------	--	-----------------

This specification is to ensure the serviceability of flash welded joints incorporated in cast austenitic manganese steel crossings, switch rails and transition rails.

Level 1

NR/L1/TRK/002	Categorisation of Track Issue 1; Mar 11	Compliance 05/03/11	Replaces New at Issue 79
----------------------	--	-------------------------------	------------------------------------

This standard specifies the process for categorising track in running lines by usage and speed.

NR/L1/TRK/100	Management of Track Assets Issue 1; Mar 20	Compliance 07/03/20	Replaces New at Issue 115
----------------------	---	-------------------------------	-------------------------------------

This standard sets out the high level requirements to be followed when undertaking any activity as part of the life cycle management of the track asset.

Level 2

NR/L2/OTK/5100	Boundary Measure Management Manual Issue 4; Mar 21	Compliance 04/09/21	Replaces NR/L2/OTK/5100 Iss 3; Mar 20
-----------------------	---	-------------------------------	---

The management of the boundary measure is a process using risk assessment that contributes to the safe performance of the railway infrastructure and our duty of care to the public. Loss of an effective boundary measure affects the safety and performance of the railway.

NR/L2/OTK/5100/	Title	Issue	Issue Date
01	Boundary Measure Inspection and Risk Assessment	4	Mar 2021
02	Boundary Measure Repair by Maintenance or Renewal	2	Mar 2021
03	Boundary Measure Specification	1	Mar 2021

NR/L2/OTK/5201	Lineside Vegetation Management Manual Issue 5; Dec 20	Compliance 05/06/21	Replaces NR/L2/OTK/5201 Iss 4; Mar 20
-----------------------	--	-------------------------------	---

Lineside vegetation management is a process that uses risk assessment to contribute to the safe running of the railway infrastructure.

NR/L2/OTK/5201/	Title	Issue	Issue Date
01	Lineside Vegetation Inspection and Risk Assessment	4	Dec 2020
02	Lineside Vegetation Management Requirements	3	Sep 2019
03	Route Vegetation Management Plans	1	Mar 2020
04	Tree Management	1	Dec 2020

NR/L2/TRK/001	Inspection and Maintenance of Permanent Way Issue 19; Jun 21	Compliance 04/09/2021	Replaces NR/L2/TRK/001 Iss 18; Apr 21
----------------------	--	---------------------------------	---

The purpose of this standard is to prescribe the inspections, limits and actions required to prevent track caused derailments, and to describe the inspections, limits and actions required to optimise track performance, cost and asset life.
(Contains NR/BS/LI/440)

NR/L2/TRK/012	Railway Crossings Issue 3; Mar 19	Compliance 07/09/19	Replaces RT/CE/S/012 Iss 2; Feb 02
---------------	-----------------------------------	------------------------	---------------------------------------

The purpose of this module is to define the product specification and requirements that control safety and performance risks associated with cast Austenitic Manganese Steel crossings. Compliance with this specification supports mitigation of the risks associated with in-service failure of cast crossing components.

NR/L2/TRK012/	Title	Issue	Issue Date
01	Production Process for Cast Austenitic Manganese Steel Crossings	1	Mar 2019
02	Fatigue Life Evaluation and Structural Integrity	1	Mar 2019

NR/L2/TRK/029	Wood Sleepers, Bearers and Longitudinal Timbers Issue 5; Sep 15	Compliance 05/12/15	Replaces NR/PS/TRK/029 Iss 4; Dec 05
---------------	---	------------------------	---

The purpose of this product specification is to define Network Rail's requirements for the supply of wood sleepers, wood bearers and longitudinal timbers.

NR/L2/TRK/030	Specification: Concrete Sleepers and Bearers Issue 4; Mar 16	Compliance 05/03/16	Replaces NR/L2/TRK/030 Iss 3; Dec 15
---------------	--	------------------------	---

The purpose of this product specification is to define Network Rail's requirements for the supply of concrete sleepers and bearers.

NR/L2/TRK/0032	Joining of Rails by Aluminothermic Welding Issue 7; Mar 18	Compliance 02/06/18	Replaces NR/L2/TRK/0032 Iss 6; Jun 17
----------------	--	------------------------	--

This specification defines the standards to be achieved when aluminothermic welding is carried out, whether in or out of the track, and defines the welding procedures to be used. By adhering to the specifications and standards within this document, the risk of weld failure/break is reduced. The quality of the weld cast is improved and kept within the process supplier's parameters. The safety of the traveling public and staff undertaking aluminothermic welding activities is maintained to the highest levels.

NR/L2/TRK/036	Gauge Compatibility Certification and Gauging Delegated Authority Issue 3; Sep 19	Compliance 07/12/19	Replaces NR/L2/TRK/036 Iss 2; Dec 17
---------------	---	------------------------	---

This standard specifies the process to be used to certify gauge compatibility of rail vehicles, the required levels of delegated authority (gauging) and applicable ruleset for Out of Gauge load movements applied to RIS-2773-RST compliant static vehicle models. This ties into the design/install/renew optimised track system, non-track infrastructure infringement and vehicle compatibility process controls on the gauging bowtie NR/GN/TRK/8001/0701.

NR/L2/TRK/038	Track Geometry: Management of Recording and of Intervention and Immediate Actions Limits Issue 7; Jun 21	Compliance 04/09/21	Replaces NR/L2/TRK/038 Iss 6; Jun 18
---------------	--	------------------------	---

The purpose of this document is to describe the control process to prevent the risk of derailment caused by track faults of a severity known as 'Immediate Action Level' & 'Intervention Level' faults. This document specifies process to be taken where sub-standard track is identified. It is the prequel to actions undertaken by NR/L2/TRK/001/mod11; so that the safety of the line can be maintained until any necessary track repair is completed.

NR/L2/TRK/038/	Module	Issue	Issue Date
01	Train Borne Recording	2	Jun 2021
02	Manual Track Geometry Recording	1	Jun 2018

NR/L2/TRK/052	Rail, Baseplate and Under-Sleeper/Bearer Pads Issue 4; Jun 20	Compliance 05/09/20	Replaces RT/CE/S/052 Iss 3; Oct 02
---------------	---	------------------------	---------------------------------------

The purpose of this document is to improve the performance, longevity and suitability for use on UK infrastructure of rail, baseplate and under sleeper/bearer pads.

NR/L2/TRK/053	Inspection and Repair to Control the Risk of Derailment at Switches Issue 9; Mar 20	Compliance 07/03/20	Replaces NR/L2/TRK/053 Iss 8; Sep 19
---------------	---	------------------------	---

This specification describes the inspection and monitoring procedures and essential maintenance to be undertaken at switches to reduce the risk of derailment. It identifies the potential derailment hazards associated with switch wear and damage and the remedial measures necessary.

NR/L2/TRK/061	Pearlitic Rails Issue 3; Sep 15	Compliance	Replaces
		05/09/15	RT/CE/S/061 Iss 2; Aug 02

The purpose of this product specification is to define Network Rail's requirements for the manufacture of pearlitic rails and the properties required of the rail.

NR/L2/TRK/070	S&C System Specification for the Design of Switches and Crossings Issue 1; Aug 07	Compliance	Replaces
		31/08/07	

To define the system specification for the design of S&C systems This is a high level document which defines the interface arrangements for S&C components between the Track, Signalling and Electrification and Plant functions.

NR/L2/TRK/0132	Maintenance Arc Welding of Rails, Switches and Crossings Issue 6; Dec 10	Compliance	Replaces
		04/06/10	NR/L2/TRK/0132 Iss 5; Aug 08

This specification defines the methods to be used when weld repairs to plain rail and switch and crossing components are carried out. The document has been amended to reflect the previous Engineering re-organisation and has had the requirements for Training and Competence removed. The Standard specifies the addition of hardened rails, changes to proximities to rail features and requirements for weld repair to rail features previously not permitted. The Standard also specifies the restriction on weld repairs when carried out in Red Zones
(Contains NR/BS/LI/305)

NR/L2/TRK/1019	Lighting Requirements for Visual Track Inspection Issue 1; Mar 18	Compliance	Replaces
		01/09/18	New at Issue 107

This standard defines the minimum lighting required:

- for effective visual track inspection so defects are detectable and can be reported; and
- to comply with legislation, European standards and NR/L2/TRK/001.

NR/L2/TRK/1054	Inspection, Maintenance and Repair Procedures for Cast, Welded and Fabricated Crossings in the Track Issue 5; Oct 14	Compliance	Replaces
		31/10/14	NR/L2/TRK/1054 Iss 4; Jun 12

The majority of defects and wear detected in crossings are repairable if detected at an early enough stage. The identification and timely rectification of crossing wear, or associated track condition issues, will reduce the risk of crossing failure or premature replacement.

The early detection of a crack in all steel grades is paramount.

The benefits of this standard are the early identification and rectification of defects which, when discovered in a timely manner, will prevent costly replacement of crossings. Risks of crossing failure will also be reduced as a result.

This Network Rail standard specifies the requirements for the inspection and identification of defects and wear in crossings. The specification now includes guidance for maintenance arc weld repair with appropriate minimum actions and also gives details of minimum actions to be taken when significant defects are discovered.

This standard is intended to be read in conjunction with other standards concerning the inspection and rectification of defects in crossings.

(Contains NR/BS/LI/442)

NR/L2/TRK/2102	Design and Construction of Track Issue 10; Jun 21	Compliance	Replaces
		05/06/21	NR/L2/TRK/2102 Iss 9; Mar 21

This standard is intended to control the risk of incorrect materials and components being specified and to control the required quality of installation of track. It specifies the design principles and minimum standards for the construction of new or relayed track, including the materials to be used. It also specifies acceptance criteria for new or relayed track in terms of workmanship and the track geometry requirements for both newly installed and existing track.

NR/L2/TRK/2500	Engineering Assurance Arrangements for the Design and Construction of Track Issue 4; Dec 20	Compliance	Replaces
		06/03/21	NR/L2/TRK/02500 Iss 3; Jun 11

This document describes the engineering assurance processes that apply to the design and construction of track assets on Network Rail owned infrastructure.

NR/L2/TRK/3011	Continuous Welded Rail (CWR) Track Issue 7; Dec 12	Compliance	Replaces
		01/12/12	NR/L2/TRK/3011 Iss 6; Jun 08

This specification defines the requirements for the design, installation and maintenance of continuous welded rail (CWR) track (for the purposes of this specification "design" means "configuration"). It also specifies the methods to be used when stressing CWR in plain line and switches and crossings.

NR/L2/TRK/3038	Longitudinal Bearer Systems – Inspection, Maintenance and Design Issue 7; Mar 20	Compliance	Replaces
		30/06/20	NR/L2/TRK/3038 Iss 6; Sep 14

The purpose of this manual is to prescribe:

- the inspections required to support prevention of derailments caused by longitudinal bearer systems;
- the inspections, limits and actions required to support optimisation of longitudinal bearer performance, cost and asset life; and
- the survey and design requirements for the replacement of a Longitudinal Bearer System (LBS).

NR/L2/TRK/3038/	Title	Issue	Issue Date
01	Definitions, Types and Responsibilities	1	Mar 2020

NR/L2/TRK/3038/	Title	Issue	Issue Date
02	Management Plans, Inspections and Examinations of Longitudinal Bearer Systems	1	Mar 2020
03	Survey, Design and Replacement of a Longitudinal Bearer System	1	Mar 2020

NR/L2/TRK/3100	Topographic, Engineering, Land and Measured Building Surveying – Strategy and General	Compliance	Replaces
	Issue 5; Mar 19	01/06/19	NR/L2/TRK/3100 Iss 4; Dec 17

The standard sets out requirements for the project manager and engineer to specify topographic survey work, by identifying key stages to deliver good quality work for current and future needs. This lowers the risks associated with poor survey work for projects. "Survey once and use many times" also provides better value for the money spent.

NR/L2/TRK/3100/	Title	Issue	Issue Date
Mod 01	Topographic, Engineering, Land and Measured Building Surveying – Track	2	Sep 2017
Mod 03	Topographic, Engineering, Land and Measured Building Surveying – Survey and Mapping Techniques	2	Sep 2017
Mod 04	Asset Data Extraction and Topographic Surveying – Signalling (formerly NR/L3/TRK/3104)	3	Dec 2017
Mod 05	Topographic, Engineering, Land and Measured Building Surveying - Overhead Line Electrification	1	Mar 2019

NR/L2/TRK/3201	Management of Tight Clearances and Track Position	Compliance	Replaces
	Issue 3; Dec 10	04/12/10	NR/L2/TRK/3201 Iss 2; Jun 08

This document sets out the activities and control mechanisms which shall be applied across the network to define, monitor, assess, correct and advise gauge and clearances on routes to enable the safe passage of prescribed rolling stock.

NR/L2/TRK/3203	Structure Gauge Recording	Compliance	Replaces
	Issue 1; Sep 11	03/12/11	New at Issue 81

This system specification gives the minimum requirements for Gauging Surveying and the data within Network Rail's National Gauging Database (NGD). This Standard specifies detail of Network Rail compliance with GC/RT5212 Sections E and K.

NR/L2/TRK/4040	Level Crossing Surface Systems	Compliance	Replaces
	Issue 2; Dec 10	04/06/11	RT/CE/S/040 Iss 1; Dec 97

This standard specifies the performance of manufactured proprietary level crossing surface systems so that they are fit for purpose and have an adequate life expectancy.

NR/L2/TRK/4100	Serviceable Concrete Sleepers for use in Running Lines and Sidings	Compliance	Replaces
	Issue 4; Sep 11	03/09/11	RT/CE/S/062 Iss 3; Oct 01

This specification is for use in the selection of serviceable concrete sleepers for installation in Network Rail Infrastructure's running lines and sidings.

NR/L2/TRK/4239	Track Bed Investigation, Design and Installation	Compliance	Replaces
	Issue 2; Sep 20	05/12/20	NR/L2/TRK/4239 Iss 1; Dec 15

The document sets out a consistent technical approach to track bed diagnosis, investigation and design to reduce the risk of premature track bed failures and high frequency of maintenance interventions following track renewals work. This standard is a key control for the risk of loss of geometry (cyclic top/twist fault) beyond safety limits as illustrated in NR/GN/TRK/8001/0203.

NR/L2/TRK/4900	Inspection Gauges for Plain Line Track and S&C	Compliance	Replaces
	Issue 2; Mar 20	04/09/21	NR/L3/TRK/4900 Iss 1; Mar 11

This standard facilitates consistent and quality manufacture of track gauges which allows for accurate recording of elements of the track system so that any identified corrective maintenance work can be planned and actioned accordingly.

NR/L2/TRK/6001	Renewals Workbank Management	Compliance	Replaces
	Issue 2; Aug 08	26/08/08	NR/PRC/TRK/6001 Iss 1

To define the processes for the management of work items to create annual workbanks which reflect our customers needs, business priorities and the asset policy.

NR/L2/TRK/6100	The Installation and Maintenance of Stretcher Bars	Compliance	Replaces
	Issue 4; Dec 20	06/03/21	NR/L2/TRK/6100 Iss3; Jun 17

This standard provides one reference document for stretcher bars. It details the limits and actions required to prevent derailments associated with stretcher bar components.

NR/L2/TRK/6100/	Title	Issue	Issue Date
mod01	Glossary of Stretcher Bar Terminology	1	Mar 2015
mod02	Roles and Responsibilities for Installation, Inspection and Maintenance of Stretcher Bars	1	Mar 2015

NR/L3/TRK/0027	Excavation and Ballast As Built Issue 3; Mar 21	Compliance 06/06/21	Replaces NR/L3/INI/TK0027 Iss 2; Jun 08
----------------	---	------------------------	--

This document sets out the requirements and process for measuring and recording hidden works including the excavation and reinstatement of track bed layers and the installation of geosynthetics compliance to Network Rail standards, Site Particular Specifications and the Contract Technical Specification (or equivalent). This document controls the risk of inadequately or incorrectly recording hidden works.

NR/L3/TRK/0030	Reinstatement of Absolute Track Geometry (ATG) West Coast Main Line (WCML) Routes Issue 2; Jun 17	Compliance 02/09/17	Replaces NR/L3/TRK/0030 Iss 1; Jun 08
----------------	---	------------------------	--

This procedure defines how Infrastructure Projects (IP) and other approved suppliers:

- Manage the reinstatement of the ATG track alignment for plain line and Switch & Crossing (S&C)
- Will manage changes to the ATG Design
- Design track adjacent to ATG alignments

NR/L3/TRK/055	Work Instructions for Ultrasonic Rail Testing Issue 4; Dec 20	Compliance 05/12/20	Replaces NR/L3/TRK/055 Iss 3; Mar 20
---------------	---	------------------------	---

This document defines the ultrasonic inspection procedures to be used to inspect track as specified in NR/L2/TRK/001 Inspection and Maintenance of Permanent Way to detect cracks in the rail and prevent rail breaks

NR/L3/TRK/063	Recycling and Reuse of Switches & Crossings Issue 2; Dec 20	Compliance 05/12/20	Replaces RT/CE/S/063 Iss 1; Oct 96
---------------	---	------------------------	---------------------------------------

This document specifies the criteria for the reuse of switches and crossings (S&C) to:

- control the specification of the re-production of used switch and crossing (S&C) units;
- ascertain their suitability for reuse;
- define permitted remedial work which economically maximises their viability; and
- identify restrictions of reuse in certain circumstances.

NR/L3/TRK/063/	Title	Issue	Issue Date
01	Scoping and Assessment of S&C Units for Recycling	1	Dec 2020
02	Removal, Handling and Storage of S&C Units for Recycling	1	Dec 2020
03	Rectification and Inspection of Recycled S&C Units	1	Dec 2020

NR/L3/TRK/1010	Management of Responses to Extreme Weather Conditions at Structures, Earthworks and Other Key Locations Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/L3/MTC/TK0167 Iss 1; Oct 07
----------------	---	------------------------	--

This process outlines the roles and responsibilities for the maintenance organisation to manage the necessary actions in order to protect the line as a result of extreme weather conditions including water action (including flooding, storm, wave action, scour) at structures, earthworks and other key locations.

(Contains NR/BS/LI/292)

NR/L3/TRK/1011	Management of Permanent Way Inspections Issue 3; Aug 08	Compliance 26/08/08	Replaces See below
-----------------------	--	-------------------------------	------------------------------

Replaces: NR/PRC/MTC/TK0070 Iss 1, NR/PRC/MTC/TRK/0075 Iss 2, NR/PRC/MTC/TK0135 Iss 1

This Procedure defines the standard process, roles and responsibilities for Permanent Way inspections on the network in accordance with Inspection and Maintenance of Permanent Way NR/L2/TRK/001 and Track Inspection Handbook NR/WI/TRK/001 and lineside standards as detailed in the references.

NR/L3/TRK/1012	Management of Manual Ultrasonic Weld Testing Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/TK0084 Iss 1; Feb 06
-----------------------	---	-------------------------------	--

This Procedure defines the standard process, roles and responsibilities for manual ultrasonic rail testing on the network in accordance with:

- NR/L2/TRK/001 Inspection and Maintenance of Permanent Way
- NR/L2/TRK/055 Rail Testing: Ultrasonic Procedures
- NR/SP/TRK/1110 Qualification and Certification of NDT personnel written practice – Ultrasonic Testing

The procedure covers the initial creation of the testing programme through to removal or further management of the defect.

The procedure includes the monitoring and review of the programme.

NR/L3/TRK/1013	Maintenance of Track Assets Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/TK0136 Iss 1 NR/PRC/MTC/TK0127 Iss 2
-----------------------	--	-------------------------------	---

The purpose of this document is to define the roles and responsibilities in the planning and undertaking of routine maintenance activities of track and lineside assets to fit in with the national planning process and timescales.

NR/L3/TRK/1014	Management of Broken Rails Issue 3; Aug 08	Compliance 26/08/08	Replaces NR/L3/MTC/TK0068 Iss 2; Oct 07
-----------------------	---	-------------------------------	---

This document defines the process to be adopted for the management of broken rails, including the recording of details and trend monitoring.

NR/L3/TRK/1015	Management of Basic Visual Inspection Issue 5; Dec 19	Compliance 07/03/2020	Replaces NR/L3/TRK/1015 Iss 4; Mar 17
-----------------------	--	---------------------------------	---

This modularised standard describes the management of Basic Visual Inspection by patrolling or other recognised alternative methods of providing tier 1 Safety Inspections

NR/L3/TRK/1015/	Description	Issue	Issue Date
01	Track Patrolling	1	Sep 2015
02	Plain Line Pattern Recognition Introduction and Support	3	Dec 2019

NR/L3/TRK/1016	Managing the Raising / Removing of Track Speed Restrictions and Inspecting the Line After Track Engineering Work Issue 1; Dec 10	Compliance 05/03/11	Replaces New at Issue 78
-----------------------	---	-------------------------------	------------------------------------

This document details the requirements for the management of competence, including training and certification, for persons who will be inspecting the track for the purpose of raising / removing speed restrictions and inspecting the line after track renewal, maintenance and refurbishment work.

NR/L3/TRK/1017	Inspection for Raising/removing Speed Restrictions and Inspecting the Line After Track Renewal Work Issue 1; Dec 10	Compliance 05/03/11	Replaces NR/L3/INI/CP0023 Iss 2; Jun 08
-----------------------	--	-------------------------------	---

Track work affects each of the primary components of the Railway System: track, signalling, telecommunication, electrification systems, plant, and structures. This Network Rail standard specifies the process for inspecting track renewals work undertaken on Network Rail infrastructure. It specifies a structured, comprehensive and consistent approach that achieves compliance with the requirements of NR/L2/TRK/001/A01 Inspection and maintenance of permanent way - Inspection.

NR/L3/TRK/1018	Inspection for Raising / Removing Speed Restrictions And Inspecting the Line After Track Maintenance and Refurbishment Work Issue 1; Dec 10	Compliance 05/03/11	Replaces New at Issue 78
-----------------------	--	-------------------------------	------------------------------------

This document details the requirements for persons who will be inspecting the permanent way for the purpose of raising / removing speed restrictions and inspecting the line after track maintenance and refurbishment work and gives the process to be applied when these activities are undertaken.

NR/L3/TRK/1101	The Management of Rail Defect Removal Timescales Issue 3; Sep 10	Compliance 04/09/10	Replaces NR/L3/TRK/1101 Iss 2; Aug 08
-----------------------	---	-------------------------------	---

This Procedure defines the process, roles and responsibilities in the management of occasional short term dispensations for the exceedance of maximum allowable timescales for the removal of discrete rail defects.

NR/L3/TRK/1102	Management of Rail Defects Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/TK0069 Iss 1; Oct 06
-----------------------	---	-------------------------------	--

This document details the procedure to be adopted for the management of rail defects.

NR/L3/TRK/2049	Track Design Handbook Issue 14; Jun 17	Compliance 02/09/17	Replaces NR/L2/TRK/0049 Iss 13; Mar 16
-----------------------	---	-------------------------------	--

This specification gives the requirements for the design of track alignments and layouts. Information provided on track geometry, the mathematics of track layouts, switch and crossing (S&C) assemblies, sleepers and rail fastenings is intended to ensure that designs take proper account of the speed of traffic.

NR/L3/TRK/2049/	Title	Issue	Issue Date
mod01	Guidance and Principles	1	Mar 2016
mod02	Mathematics	1	Mar 2016
mod03	Assembly	1	Mar 2016
mod04	Components	1	Mar 2016
mod05	System Interfaces	2	Jun 2017
mod06	Miscellaneous	1	Mar 2016
mod07	Gauging	2	Jun 2017

NR/L3/TRK/2070	Design Specification S&C System:- NR60/HPSS and NR60/ Hydrive Configurations Issue 1; Aug 07	Compliance 31/08/07	Replaces
-----------------------	---	-------------------------------	-----------------

To define the design specifications for NR60 / HPSS and NR60 / Hydrive configurations This document defines the interface dimensions for S&C components between the Track, Signalling and Electrification and Plant functions for these configurations.

NR/L3/TRK/02201	Management of Risk Arising from Deferred Renewals (Track) Issue 1; Mar 17	Compliance 03/06/17	Replaces New at Issue 103
------------------------	--	-------------------------------	-------------------------------------

This standard sets out how to manage the deferred renewal process and the actions required during each stage

NR/L3/TRK/3001	Standard Maintenance Procedure: Ordering of Switch and Crossing Components Issue 3; Aug 08	Compliance 26/08/08	Replaces NR/L3/MTC/TK0122 Iss 2; Dec 07
-----------------------	---	-------------------------------	---

The purpose of this document is to advise all parties within the maintenance function of their roles and responsibilities in the planning and ordering process for maintenance switch & crossing Units.

NR/L3/TRK/3011	Management of Rail Stress and Critical Rail Temperatures Issue 3; Aug 08	Compliance 26/08/08	Replaces NR/L3/MTC/TK0077 Iss 2; Oct 07
-----------------------	---	-------------------------------	---

This Procedure defines the standard process, roles and responsibilities related to the management of stress in rails.

NR/L3/TRK/3012	Management of Hot Weather Precautions (Track) Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/L3/MTC/TK0074 Iss 1; Dec 07
-----------------------	--	-------------------------------	---

This Standard Maintenance Procedure details the roles and responsibilities within the Maintenance organisation in the management of weather precautions relating to hot weather situations.

NR/L3/TRK/3013	Management of Cold Weather Precautions (Track) Issue 1; Oct 07	Compliance 26/08/08	Replaces NR/L3/MTC/TK0174 Iss 1; Oct 07
-----------------------	---	-------------------------------	---

This Standard Maintenance Procedure details the roles and responsibilities within the maintenance organisation in the management of weather precautions relating to cold weather situations.

NR/L3/TRK/3122	Management of Coal Mining Subsidence Affecting Track Infrastructure Issue 1; Dec 09	Compliance 06/03/10	Replaces New at Issue 74
-----------------------	--	-------------------------------	------------------------------------

This document gives direction and information to technicians, engineers and managers who are engaged in the management of coal mining subsidence affecting track infrastructure. Information includes how to interpret mining reports and other information provided by the Network Rail Principal Mining Engineer (PME).

NR/L3/TRK/3201	Management of Tight Clearances and Track Position Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/L3/MTC/TK0071 Iss 1; Mar 08
-----------------------	--	-------------------------------	---

This process outlines the requirements of the maintenance organisation to manage the monitoring and survey of track position relative to fixed structures, manage and undertake the work associated with the process in accordance with:

- NR/L2/TRK/001 Inspection and Maintenance of Permanent Way
- NR/L2/TRK/3201 Management of Tight Clearances and Track Position

NR/L3/TRK/3202	Management of Track Geometry Recording and Remedial Actions Issue 3; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/TK0072 Issue 2; Apr 06
-----------------------	--	-------------------------------	--

This procedure details how the Maintenance Organisation is to manage its responsibility for measurement of track geometry and for identifying and undertaking work arising.

NR/L3/TRK/3220	Planning of On-track Machines Issue 3; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/TK0002 Iss 1; Jun 06
-----------------------	--	-------------------------------	--

The purpose of this document is to standardise the process, roles and responsibilities for the planning of On Track Machine (OTM) operations on the Network Rail network.

NR/L3/TRK/3230	Control of On-track Machines Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/TK0003 Iss 1; Jun 06
-----------------------	---	-------------------------------	--

This procedure defines the standard process, roles and responsibilities for the control on site of on track machine operations in maintenance worksites.
(Contains NR/BS/LI/305)

NR/L3/TRK/3240	Preparation for use of On-track Machines Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/TK0004 Iss 1; Jun 06
-----------------------	---	-------------------------------	--

To ensure that tamping, stone blowing, dynamic track stabilisers and ballast regulating works deliver the required results in terms of agreed outputs, productivity, track geometry and longevity by mandating activities in the preparation of track for treatment with on-track machines (OTM). This maintenance procedure shall be used when planning, preparing & delivering OTM works and links to standard maintenance procedure NR/PRC/MTC/TK0002: "Planning of 'On-track' Machines".

NR/L3/TRK/3241	Marking of Track for Tamping Machines Issue 3; Dec 19	Compliance 07/03/2020	Replaces NR/L3/TRK/3241 Iss 2; Mar 19
-----------------------	--	---------------------------------	---

This document is one of two related control documents, the other being NR/L3/TRK/3242, that specify correct and accurate track marking for On Track Machines (OTM). Consistent track marking:

- helps to avoid confusion between the operators and Network Rail (NR) Technical Staff about the work required;
- helps to reduce or remove damage to infrastructure and prevents delays;
- enables tamping closer to obstructions where previously whole sleepers may otherwise have been missed by the On Track Machine which leads to better quality, and more accurately tamped track; and
- provides intangible benefits of:
 - increased engagement of the Track Geometry Supervisor (TGS) on site;
 - improved relationships and communication between NR and operators (external contractors) on site; and
 - greater "buy-in" to the pre-site preparation and design process.

NR/L3/TRK/3242	Marking of Track for Stoneblowing Machines Issue 1; Dec 11	Compliance 01/04/12	Replaces New at Issue 82
-----------------------	---	-------------------------------	------------------------------------

This standard is part of a pair of related standards, the other being NR/L3/TRK/3241, Marking of track for tamping machines, that specify correct and accurate track marking. Consistent track marking will:

- avoid confusion between the operators and Network Rail Technical Staff about the work required;
- reduce or remove damage to infrastructure, preventing delays caused due to overrun as the damage is repaired. Sometimes such damage necessitates planning of further shifts which further reduce access for other works;
- provide intangible benefits of:
 - increased engagement of the TQS on site;
 - improved relationships and communication between NR and operators (external contractors) on site;
 - greater "buy-in" to the pre-site preparation and design process.

NR/L3/TRK/3250	Post-work Activities Following Works Using On-track Maintenance Machines Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/TK0005 Iss 1; Jun 06
-----------------------	---	-------------------------------	--

To ensure that on track machine treatment works deliver the required results in terms of agreed outputs, productivity, track geometry and longevity by mandating activities after treatment has been completed.

NR/L3/TRK/3260	Maintenance of an EPS (Enhanced Permissible Speed) Railway Issue 1; Mar 09	Compliance 07/03/09	Replaces New at Issue 71
-----------------------	---	-------------------------------	------------------------------------

This document defines the roles, responsibilities and process within the track maintenance delivery units for the maintenance of Enhanced Permissible (EPS) routes.

NR/L3/TRK/3261	ATG (Absolute Track Geometry) Maintenance Process Using 'ATG Geometry Methods' Issue 1; Mar 09	Compliance 07/03/09	Replaces New at Issue 71
-----------------------	---	-------------------------------	------------------------------------

This document defines the roles, responsibilities and process within the track maintenance delivery unit to maintain track alignment using 'ATG Geometry methods'.

NR/L3/TRK/3262	ATG (Absolute Track Geometry) Maintenance Process Using 'ATG Lite Method' Issue 1; Mar 09	Compliance 07/03/09	Replaces New at Issue 71
-----------------------	--	-------------------------------	------------------------------------

This document defines the roles, responsibilities and process within the track maintenance delivery units to maintain track alignment using the 'ATG Lite method'.

NR/L3/TRK/3310	Re-gauging of Switch Units – Field Face to Field Face Method Issue 1; Jun 12	Compliance 31/06/12	Replaces New at Issue 84
-----------------------	---	-------------------------------	------------------------------------

This document defines the roles, responsibilities and process within the track maintenance delivery units to maintain track alignment using the 'ATG Lite method'.

NR/L3/TRK/3402	Welding Process – Repair of Wheelburns and Squats Issue 3; Dec 08	Compliance 01/03/09	Replaces NR/WI/TRK/03402 Iss 2; Aug 06
-----------------------	--	-------------------------------	--

The equipment and processes described in this Work Instruction are to be used by Network Rail and Contractor's welding staff when carrying out welding repairs to wheelburn and squat type defects in track.

NR/L3/TRK/3405	Recording on Site Derailment Information Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/L3/TRK/3405 Iss 1; Feb 07
-----------------------	---	-------------------------------	---

The purpose of this standard is to confirm the standardised track information requirements to be collected after a derailment occurs.

NR/L3/TRK/3406	Design, Installation and Maintenance of Modular Bearer Joints Issue 5; Mar 21	Compliance 05/06/21	Replaces NR/L3/TRK/3406 Iss 4; Sep 19
-----------------------	--	-------------------------------	---

This standard gives requirements for the design, installation and maintenance of modular Switch and Crossing systems. The standard is split into modules for each aspect. The purpose of the document is to control the risk of the following failure modes occurring in modular S&C layouts:

- a) wide gauge;
- b) damaged and ineffective thread on dowels at the bearer joint;
- c) bearers cracking;
- d) screws breaking (in shear at end of thread or head breaking off);
- e) loose screws; and
- f) twist faults around joints.

NR/L3/TRK/3406/	Title (and any applicable Letters of Instruction)	Issue	Issue Date
01	Design and Positioning of Bearer Joints in Modular Switch and Crossing Layouts	2	Mar 2021
02	Installation of Modular S&C	1	Sep 2018
03	Inspection and Maintenance of Modular Switch and Crossing Bearer Joints	2	Mar 2021

NR/L3/TRK/3407	Management of Rail Welding Issue 3; Aug 08	Compliance 26/08/08	Replaces NR/L3/MTC/TK0081 Iss 2; Oct 07
-----------------------	---	-------------------------------	--

This procedure applies to all aluminothermic and arc welding activities. It sets out the arrangements through which Network Rail complies with the minimum requirements for the management of rail welding on the permanent way, and of any consequent actions.

NR/L3/TRK/3415	Refurbishment of Switches and Crossings Issue 2; Mar 21	Compliance 06/03/21	Replaces NR/L3/TRK/3415 Iss 1; Dec 19
-----------------------	--	-------------------------------	---

This document provides a process for the refurbishment of S&C assets. The aim of this process is to:

- a) increase levels of workforce safety during construction on S&C refurbishment sites;
- b) improve scoping and planning of S&C refurbishment works;
- c) improve quality of S&C refurbishment works;
- d) improve reliability of S&C assets following refurbishment works; and
- e) deliver life extension of S&C assets and lower whole life cost in accordance with the Track Asset Policy.

NR/L3/TRK/3416	Management of Rails Ultrasonically Tested by the Ultrasonic Test Unit (UTU) Issue 1; Mar 20	Compliance 06/06/2020	Replaces NR/L2/TRK/1120 Iss 2; Aug 08
-----------------------	--	---------------------------------	---

This document provides a process for the management of UTU ultrasonic suspects and UTU ultrasonically untested track sections.

This supports:

- a) the requirements outlined in NR/L2/TRK/001/06; and
- b) the Non-Actionable Repeat Marked Object (NARMO) process.

NR/L3/TRK/3417	Specification, Installation and Maintenance of Managed Track Position Issue 1; Dec 19	Compliance 07/03/2020	Replaces New at Issue 114
-----------------------	--	---------------------------------	-------------------------------------

There are safety and performance benefits to retaining track to an approved design alignment.

The purpose of this document is to provide:

- a) a more robust means of control for controlling track position and clearances; and
- b) a process for specifying, installing and maintaining track to a Managed Track Position (MTP).

NR/L3/TRK/3418	Repair of Concrete Bearer and Sleeper Fastening Systems and Bearer Joints Issue 1; Dec 20	Compliance 06/03/21	Replaces New at Issue 118
-----------------------	--	-------------------------------	-------------------------------------

The purpose of this standard is to:

- a) mitigate the risk of derailment through wide gauge,
- b) control the methods used to repair concrete sleeper and bearer housings;
- c) control methods of replacing dowels; and d) document stakeholders' responsibilities in the integrity or the repair..

NR/L3/TRK/3510	Rail Friction Management Issue 2; Sep 11	Compliance 03/09/11	Replaces NR/L3/TRK/3510 Iss 1; Mar 11
-----------------------	---	-------------------------------	---

This standard gives the minimum requirements for the installation, inspection, filling and maintenance of rail-mounted rail head friction management systems designed and approved for Network Rail's permanent way.

(Contains NR/BS/LI/305 & NR/BS/LI/428)

NR/L3/TRK/3510/	Title (and any applicable Letters of Instruction)	Issue	Issue Date
A01	Lubrication of Plain Line Running Rails, S&C and Check Rails (Contains NR/BS/LI/305 & NR/BS/LI/428)	1	Mar 2011
B01	Use of Top of Rail Friction Modifiers (Contains NR/BS/LI/305)	1	Mar 2011
C01	Use of Traction Gel Applicators	1	Sep 2011

NR/L3/TRK/3530	Track Lubricants Issue 1; Jun 12	Compliance 01/09/12	Replaces New at Issue 84
-----------------------	---	-------------------------------	------------------------------------

Correct selection and use of track lubricants contributes to delivery of asset safety, reliability and life cycle cost reduction, by managing the friction at key track component interfaces and at the wheel-rail interface.

This product specification defines the minimum requirements for track lubricants used by Network Rail to lubricate:

- Running rails and check rails in plain line curves / switches and crossings;
- Switch and crossing slidechairs;
- Fishplated joints.

NR/L3/TRK/3530/	Title	Issue	Issue Date
A01	Curve Lubricants	1	Jun 2012
B01	S&C Slidechair Lubricants	1	Jun 2012
C01	Fishplated Joint Lubricants	1	Jun 2012

NR/L3/TRK/3701	Preparation of Site Specific Method Statement for Rail Delivery Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/PRC/MTC/TK0060 Iss 1; Oct 05
-----------------------	--	-------------------------------	---

To provide a site specific method statement to complement national delivery service's generic method statements for the delivery of rail to maintenance worksites.

NR/L3/TRK/4004	Switch & Crossing Assemblies Issue 3; Dec 19	Compliance 07/03/2020	Replaces NR/L3/TRK/4004 Iss 2; Mar 11
-----------------------	---	---------------------------------	---

This standard is intended to control the risk of incorrect components and processes being specified during the manufacture and assembly of switches and crossings (S&C).

It refers to component specifications and controls found in other Network Rail standards. It specifies the components and processes that are subject to individual and collective product acceptance. It specifies the controls in place intended to minimise the risk from non-standard designs of S&C.

NR/L3/TRK/4041	Maintaining Track Assets at Level Crossings Issue 1; Jun 12	Compliance 01/09/12	Replaces New at Issue 84
-----------------------	--	-------------------------------	------------------------------------

This standard specifies the requirements for managing the installation, inspection, maintenance of track assets at operational level crossing infrastructure. It demonstrates that level crossing systems are compliant with legislation, reliable and safe.

NR/L3/TRK/6001	Management of a Problem Statement Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/SP/TRK/6001 Iss 1; Feb 07
-----------------------	--	-------------------------------	--

The purpose of the document is to define:

- the process for the identification and development of a problem statement
- the information which must be presented to support a problem statement.

NR/L3/TRK/6002	The Specification and Design of Plain Line Track Renewals Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/L3/TRK/6002 Iss 1; Oct 07
-----------------------	--	-------------------------------	---

The purpose of the document is to define the procedure to be used for the specification and design of plain line track renewals that are required to address asset condition.

NR/L3/TRK/7002	Reporting of Permanent Way Failures and Incidents Issue 2; Aug 08	Compliance 26/08/08	Replaces NR/L3/TRK/7002 Iss 1; Mar 08
-----------------------	---	-------------------------------	---

This document describes a numerical system for Hazard Ranking of Permanent Way failures and incidents. The system is based on the principles of the Network Rail Standard RT/E/S/10047: Management of Safety Related Reports for Signalling and Operational Telecom (S&T), which ranks failures and incidents on a scale of 0 to 228 based on impact to operational safety.

NR/L3/TRK/7004	Track Standard Drawings (RE/PW Series) Issue 3; Mar 11	Compliance 04/06/11	Replaces NR/L2/TRK/7004 Iss 2; Aug 08
-----------------------	---	-------------------------------	---

The purpose of this standard is to specify a consistent presentational style for the production of Network Rail Standard Track Component and General Arrangement Drawings.

NR/L3/TRK/7005	Track Quality Requirements at Wheel Impact Load Detection System Locations Issue 1; Dec 17	Compliance 02/06/18	Replaces New at Issue 106
-----------------------	---	-------------------------------	-------------------------------------

Wheel Impact Load Detection systems, such as Gotcha, identify vehicles with significant wheel defects and produce real-time information. This allows the risk of track damage or derailment to be reduced through identifying trains with wheel defects which are then run at slower speed or, in extreme cases, stopped.

Failure to maintain the track in accordance with this document will result in equipment being switched off, and track damaging wheelsets going undetected, which could result in broken rails and derailment.

NR/L3/TRK/7006	Creation and Application of Initial ESR Design Issue 2; Jun 21	Compliance 04/09/21	Replaces NR/L3/TRK/7006 Iss 1; Mar 19
-----------------------	---	-------------------------------	---

This document provides a process for completing an initial emergency speed restriction to support the control of the hazards associated with a train exceeding an emergency speed restriction, allowing the safe passage of rail traffic.

NR/L3/TRK/7012	Critical Rail Temperature Management for Projects Issue 1; Dec 20	Compliance 06/03/21	Replaces NR/PRC/MPI/TK0022 Iss 1
-----------------------	---	-------------------------------	--

The purpose of this standard is to provide procedures for the identification, recording and management of sites requiring Critical Rail Temperature (CRT) determined by NR/L2/TRK/001/mod14, to manage track in hot weather and mitigate the risk of track buckle given in the bow tie NR/GN/TRK/8001/0403 whilst undertaking activities covered in scope of this standard

NR/L3/TRK/7014	Inspection and Maintenance of Permanent Way using Risk Based Maintenance (Plain Line CWR Track) Issue 1; Mar 21	Compliance 05/06/21	Replaces New at Issue 119
-----------------------	--	-------------------------------	-------------------------------------

This standard defines alternative inspection and maintenance regimes to those mandated in NR/L2/TRK/001 based on the application of Risk Based Maintenance (RBM). This simplifies the implementation of Risk Based Maintenance regimes detailed in NR/L2/MTC/10662/05.

Work Instructions

NR/WI/TRK/03401	Welding Process – Use of Welding Tents Issue 2; Feb 07	Compliance	Replaces NR/WI/TRK/03401 Iss 1; Jan 06
------------------------	---	-------------------	--

The equipment and processes described in this Business Process Document are to be used by Network Rail and Contractors welding staff for the protection from the weather of staff, materials and worksites whilst installing aluminothermic welds.

NR/WI/TRK/03404	Welding Process – Use of Welding Umbrella and Support Clamp Issue 1; Feb 07	Compliance	Replaces
------------------------	--	-------------------	-----------------

The equipment and processes described in this work instruction are to be used by Network Rail and Contractor's welding staff for the protection from the weather of staff, materials and worksites whilst installing aluminothermic welds and carrying out maintenance arc welding.

Guidance Notes

NR/GN/OTK/5000	Index of Off-Track and Drainage Drawings Issue 2; Mar 21	Compliance N/A	Replaces NR/GN/OTK/5000 Iss 1; Jun 19
-----------------------	---	--------------------------	---

This guidance note provides the index and version control for:

- a) drainage and off-track standard drawings; and
- b) drainage and off-track bowtie risk management diagrams

NR/GN/OTK/6201	How to Manage Invasive, Non-Native and Harmful Plants Issue 1; Mar 19	Compliance N/A	Replaces New at Issue 111
-----------------------	---	--------------------------	-------------------------------------

This work instruction provides the methods and techniques for identifying, recording and managing infestations of invasive, non- native species (INNS) and harmful plants for those who undertake vegetation management activities on or near Network Rail Infrastructure.

NR/GN/OTK/6202	Protecting Railway Assets During Vegetation Work Issue 1; Mar 19	Compliance N/A	Replaces New at Issue 111
-----------------------	--	--------------------------	-------------------------------------

Wood waste generated from vegetation management can become hazardous when left on the lineside and when large amounts of cut material is collected or processed in one location.

NR/GN/TRK/058	S&C Track Design Good Practice Guide Issue 1; Dec 16	Compliance N/A	Replaces New at Issue 102
----------------------	---	--------------------------	-------------------------------------

This guidance note enables better specification and design of S&C, leading to a significant improvement in layout performance, reliability, longevity and safety.

It also forms part of Infrastructure Projects - Track's 'Safe by Design' initiative to

- Drive safety by design across the National S&C Programme
- Lead the optimal specification for S&C renewals and refurbishment
- Evolve design philosophy nationwide and
- Drive S&C system reliability.

NR/GN/TRK/059	Delivering High Quality S&C Renewals Issue 1; Jun 17	Compliance N/A	Replaces New at Issue 104
----------------------	---	--------------------------	-------------------------------------

This document forms part of a comprehensive set of resources available to the Supply Chain Community involved in the Specification, Design, Manufacture and Installation of Switch and Crossings on Network Rail Controlled Infrastructure. Its aim is to provide instruction, reference, guidance and training in the fulfilment of providing a consistent and quality service in the delivery of Switch and Crossings to our customers.

NR/GN/TRK/060	A Guide to Track Geometry Trend Analysis as a Precursor to Speed Restrictions Issue 1; Jun 17	Compliance N/A	Replaces New at Issue 104
----------------------	--	--------------------------	-------------------------------------

This guidance document enables the identification of potential speed restriction and track safety related risks, through data analysis so that appropriate remedial or preventative actions can be applied (short/medium/long-term) to manage poor track conditions and reduce the likelihood of an unsafe condition or a speed restriction being imposed.

Best practice guide to track geometry trend analysis

NR/GN/TRK/065	NR 60 Mark 2 Standardised S&C – Assembly and Maintenance Issue 2; Sep 19	Compliance N/A	Replaces NR/GN/TRK/065 Iss 1; Sep 18
----------------------	---	--------------------------	--

The purpose of this document is to provide guidance on the NR60 Mark 2 Standardised S&C System to:

- improve confidence in the system;
- increase reliability and productivity; and
- mitigate risks caused by installation errors introduced during assembly.

NR/GN/TRK/7001	Index of Track Work Information Sheets (TWI) Issue 16; Sep 19	Compliance N/A	Replaces NR/GN/TRK/7001 Iss 15; Sep 18
-----------------------	---	--------------------------	--

This Guidance Note provides the index and version control to the Track Work Information Sheets (TWIs) to be used in connection with Standard Maintenance Procedures, Method Statements, Work Instructions and Track Training Framework training documentation.

NR/GN/TRK/8203	NR 56V Standardised S&C - Assembly and Maintenance Issue 2; Sep 18	Compliance	Replaces
		N/A	NR/GN/TRK/8203 Iss 1; Dec 16

The purpose of this document is to give an overview of the NR56V Standardised S&C System. The document covers the differences between NR56V and the previous designs, and also details the main components used in NR56V.

Guidance is also included on recommended tooling for installation and maintenance. This will improve confidence in the system, and lead to increased reliability and productivity.

Special Inspection Notices

NR/SIN/163	Identification and Inspection of Two-Levelled S&C Issue 1; Jun 17	Compliance	Replaces
		23/02/18	New at Issue 104

The purpose of this SIN is to identify all two levelled S&C layouts within the network and to check that all baseplates are installed in the correct locations throughout each layout. The SIN will also enhance the quality of data held on two levelled layouts in Ellipse, identify the limits of two levelling with bearer mounted labels and increase the awareness of two levelled layouts at a local level.

NR/SIN/184	Control and Documentation of Maintenance Boundaries (track) Issue 1; Jan 20	Compliance	Replaces
		15/09/20	New at Issue 115

The purpose of this Special Inspection Notice (SIN) is to establish and agree a single point for track maintenance boundaries. To achieve this gaps and overlaps will be corrected and demarcation signs will be installed then logged into the Ellipse system. The SIN will also put into place mitigating action to address any gaps or overlaps mitigating immediate risk.

NR/SIN/196	Risk Assessment and Inspection of Longitudinal Bearer Systems Issue 1; July 20	Compliance 05/08/20	Replaces New at Issue 116
-------------------	---	-------------------------------	-------------------------------------

Following recent failures of Longitudinal Bearer Systems (LBS) the purpose of this SIN is to

- a) understand the existing risk level presented by LBS;
- b) prioritise the tactile inspection of the highest risk assets;
- c) instigate a deliverable plan of work to manage the risk presented by LBS; and
- d) provide assurance to the business that the risks from longitudinal bearer systems are reduced to as low a level as possible.

NR/SIN/200	Inspection of Track Circuits where ZKL3000RC T-COD has been Installed Issue 1; Feb 20	Compliance 01/04/22	Replaces New at Issue 119
-------------------	--	-------------------------------	-------------------------------------

The purpose of this SIN is to determine the following for all track circuits where a ZKL3000RC T-COD has been fitted:

1. confirm a maintenance track circuit test has been carried out since the ZKL3000RC T-COD was fitted;
2. fit additional cable protection where the ZKL3000RC T-COD cables pass under rails;
3. confirm use of Intelligent Infrastructure (II) RCM monitoring for T-COD fitted track circuits;
4. provide T-COD sighting form.

NR/SIN/201	Point machine operated multi ended sets of points which share a Common Detection Circuit Issue 1; Apr 21	Compliance 31/10/21	Replaces New at Issue 119
-------------------	---	-------------------------------	-------------------------------------

The purpose of this SIN is to:

- a) carry out Defined Test: Point Detection and Correspondence Test (NR/SMTH/Part 03/Test B08) on all multi-ended sets of points operated by a point machine which shares a common detection circuit;
- b) secure points where a wiring deficiency is identified;
- c) carry out remedial work where deficiencies are identified.
