Commentary on the Sussex Timetable Planning Rules 2023
Version 1
Preliminary Proposal for Principal Change Timetable 2023

This document is a covering note for the Timetable Planning Rules – Preliminary Proposal for Principal Change 2023 - and provides a specific commentary to the route described above.

In the Timetable Planning Rules document each change in content is indicated by the following convention:

New or Amended text is red
Deleted text is green and struck through

The change is also highlighted with a thick vertical line at the right hand side of the page.

The following is a summary of changes in content from Version 1 of the December 2023 Timetable Planning Rules.

1. Introduction and General Notes

1.1 Index of Routes

No change

1.2 Sectional Appendices and Rule Book

No change

1.3 Definitions

1.3.1 Train Classification

No change

1.3.2 Days of Operation

No change

1.3.3 Traction and Rolling Stock

No change

1.3.4 Line Codes

New line code DH added

New line code UH added

1.3.5 Activity and Other Codes

No change

2. Route Description

2.1 Planning Geography

SO520 Havant Signal HT501 new entry

SO550 Tonbridge West Yard TIPLOC information added

SO600 Rye Signal AD898 added in Up direction

SO600 Appledore new line codes in Up direction

SO600 Appledore Signal AD895 added in Down direction

SO600 Ham Street new line codes in Up direction

SO600 Ham Street Signal AD893 added in Down direction

SO600 Ashford Signal AD892 added in Up direction

SO600 Ashford Signal AD891 added in Down direction

SO600 Ashford International new line code added

SO620 Signal TLW20 added in the Up direction

SO600 Notes added around Newhaven Town Yard Junction

2.2 Route Opening Hours

No change

3. Electrification

3.1 Electrification Limits

No change

3.2 Electrification Supply Restrictions

No change

4. Rolling Stock Restrictions

4.1 Locomotive Route Availability

No change

4.2 Passenger Stock Restrictions

No change

4.3 Freight Wagon Restrictions

No change

4.4 Freight Train Load Limits

No change

4.5 Freight Train Length Limits

No change

4.6 Driver Only Operation Limits

No change

4.7 Engineers' Trains Restrictions

No change

5. Running Times, Margins and Allowances

5.1 Sectional Running Times

New SRT's in line with new Timing Point in Up direction at TLW20 signal

5.2.1 Headways

No change

5.2.2 General Capacity Constraints

No change

5.3 Junction Margins and Station Planning Rules

SO500 London Victoria Junction Margin addition and wording amendments

SO500 Redhill new Junction Margins

SO500 Crawley New Yard Planning Restrictions added

SO500 Three Bridges Berthing Facilities update

SO500 Brighton Adjustment to Sectional Running Time amendments

SO500 Brighton Junction Margin addition

SO500 Brighton Permissive Working Platform 4 update

SO500 Brighton Planning Restrictions wording amendments

SO500 Brighton Station Working updates

SO510 Norwood Junction headway application notes

SO510 Norwood Junction Planning Restriction wording amendments

SO520 Horsham Junction Margin addition and wording amendments

SO520 Barnham Junction Margin addition and wording amendments

SO600 Hastings Junction Margin addition and wording amendments

SO600 Hove Junction Margin addition and wording amendments

SO650 Streatham Hill Up Siding East Berthing Facilities update

SO680 Epsom Junction Margin addition and wording amendments

SO680 Leatherhead Junction Margin addition and wording amendments

5.4 Platform Lengths

No change

5.4.1 Loop Lengths

No change

5.5 Timing Allowances

No change

5.5.1 SX Daytime

No change

5.5.2 SX Night Time

No change

5.5.3 SO Daytime

No change

5.5.4 SO Night Time

No change

5.5.5 Sundays Daytime

No change

5.5.6 Sundays Night Time

No change

6 Timing Considerations

6.1 Advertised and Working Times

No change

6.2 Timing of Light Locomotives

No change

6.3 Two-Track Railway Timetable

No change

These represent the revised Timetable Planning Rules (the “Principal Rules”) for the Preliminary Proposal for Principal Change 2023 timetable in accordance with Part D of the Network Code, Condition D2.2.3.

As per Condition D2.2.4 of Part D of the Network Code, following distribution of the Final Rules and by D-54, Timetable Participants may make representations to Network Rail in respect of any changes they propose or objections they may have to the Final Rules provided to them in accordance with D2.2.3.

Please send any responses to michael.fox@networkrail.co.uk by Friday 25th November 2022 in order that any queries and concerns can be dealt with in advance of the publication of any revision required of the Final Rules at D-59. It is appreciated that this might not be achievable in all cases and this request does not affect any timetable participant’s ability to respond after D-59 in accordance with Network Code D2.2.4 and 2.2.5.

Regards

Mark Sleet

Timetable Production Manager (South East and Wessex)

1 Introduction and General Notes

Network Rail provide the Timetable Planning Rules document to Train Operators and other interested parties to set out the rules which are applicable to Bids for scheduling of train paths on the Network Rail network. Separate sections of Timetable Planning Rules are prepared for each Route with a National Timetable Planning Rules document setting out procedures to be followed and other nationally applicable rules.

Network Rail will determine the contents of Timetable Planning Rules through consultation with Train Operators with the primary aim of achieving the optimal balance between access to the network for train operations and performance robustness of the resulting train plan. This consultation is in line with the Network Code Part D, and Train Operators have a right of appeal to Timetabling Sub-Committee against the contents of the Final Timetable Planning Rules.

Final Timetable Planning Rules are issued with timetable Bidding Information before the commencement of the development period for the Principal Change timetable to which the Rules apply and cover a 12-month period. Revised Timetable Planning Rules are issued with timetable Bidding Information before the commencement of the Subsidiary Change timetable development period and show changes applicable to the Subsidiary Change timetable period which has been agreed since the issue of the annual Timetable Planning Rules.

Timetable Planning Rules may be changed only through this twice-yearly process or by the change procedure described in the National Timetable Planning Rules.

Train Operators' Bids for train paths must be compliant with Timetable Planning Rules. If a Train Operator wishes to submit a Bid for a train path which is not compliant with Timetable Planning Rules, they should consult the Network Rail Operational Planning team to establish whether an amendment to Timetable Planning Rules is likely to be agreed and, if appropriate, submit an amendment proposal which will be considered by Network Rail in accordance with the Change Procedure set out in the National Timetable Planning Rules. The Timetable Planning Rules amendment proposal should be submitted to Network Rail as early as possible and certainly no later than the time of submission of the Bid. If the proposed change is likely to involve the calculation of new sectional running times or a physical investigation then the Train Operator should liaise with the Operational Planning team to establish a realistic timescale for evaluation of the proposed change before submission of the Bid.

1.1 Index of Routes

Information arranged on a line of route basis in this document is presented in the following order:

SO250	Factory Junction to Mitre Bridge Junction
SO250A	Grosvenor Bridge Junction to Factory Junction
SO250B	Battersea Pier Junction to Longhedge Junction
SO250C	Pouparts Junction to Longhedge Junction
SO250D	Falcon Junction to Latchmere Junction (No1)
SO500	London Victoria to Brighton
SO500A	Selhurst Junction to Gloucester Road Junction
SO500B	Copyhold Junction to Ardingly
SO500C	Preston Park to Hove
SO510	London Bridge to Epsom Downs
SO510A	Sydenham to Crystal Palace
SO510B	Norwood Junction to Windmill Bridge Junction
SO511A	Highbury and Islington to New Cross Gate (Values for TfL Infrastructure determined in conjunction with TfL – Boundaries shown in section 2.1)
SO511B	Canal Junction to New Cross (Values for TfL Infrastructure determined in conjunction with TfL – Boundaries shown in section 2.1)
SO520	Three Bridges to Havant (via Horsham)
SO520A	Ford Junction to Littlehampton Junction
SO530	South Croydon Junction to East Grinstead
SO540	Hurst Green Junction to Uckfield
SO550	Redhill to Tonbridge
SO560	Redhill to Gomshall
SO590	Keymer Junction to Eastbourne
SO600	Willingdon Junction to Ashford International
SO610	Appledore to Lydd Town
SO620	Brighton to Seaford
SO620A	Newhaven Harbour to Newhaven Marine (Old Station)
SO630	Brighton to Littlehampton
SO640	Barnham to Bognor Regis
SO645	Battersea Park to Peckham Rye (Atlantic Lines)
SO650	Balham Junction to Beckenham Junction
SO650A	Bromley Junction to Norwood Junction
SO660	Purley to Caterham
SO660A	Purley to Tattenham Corner
SO680	South Bermondsey Junction to Horsham
SO680A	Herne Hill to Tulse Hill
SO680B	Tulse Hill to Leigham Junction
SO680C	Tulse Hill to West Norwood Junction
SO680D	Streatham Junction to Streatham Common
SO680E	Streatham North Junction to Streatham South Junction
SO681	Surrey Quays (Silwood Junction) to Old Kent Road Junction (Values for TfL Infrastructure determined in conjunction with TfL – Boundaries shown in section 2.1)
SO700	Streatham South Junction to Sutton (via Wimbledon)

1.2 Sectional Appendices and Rule Book

1.2.1 Sectional Appendix

The Sectional Appendix to the Working Timetable and Books of Rules and Regulations shall be used.

The Sectional Appendix is the sole source of information regarding the following:

Electrification limits refer to relevant Table 'A'

Permissive Working refer to relevant Table 'A', then see below.

Route Clearance refer to 'tab' associated with relevant Table 'A'

To identify the type of Permissive Working that applies at a given location refer to the appropriate Sectional Appendix Table A for that location. If there is authority for Permissive Working, this will appear in the Signalling and Remarks. There are different authorities that depend upon the signalling and layout of the location. The following list identifies the types of Permissive Working that will appear in the Sectional Appendix.

Type	Description
PP	Permissive Working – Full use for class 1, 2, 3 ECS, 5, 9 and 0 trains
PP – A	Permissive Working – Attaching and Detaching use only for class 1, 2, 3 ECS, 5, 9 and 0 trains
PP – C	Permissive Working – Contingency use only for class 1, 2, 3 ECS, 5, 9 and 0 trains
PP – S	Permissive Working – Platform Sharing use only for class 1, 2, 3 ECS, 5, 9 and 0 trains
PF	Permissive Working – For class 3 to 8 and 0 trains

Source: Sectional Appendix – General Instructions – National - Explanation of Table A terms and symbols

1.2.2 Rule Book

The following Modules of the Rule Book GE/RT8000 affects all sections unless specified. The sections listed affect railway operations and train movements. The listed section does not apply to Train Planning directly, but its application will affect how trains operate, and it is for that reason the item appears here.

RULE BOOK MODULE	SECTION	NOTES
G1 General safety responsibilities and personal track safety for non-track workers	5.5 Using the phonetic alphabet;	Operational Principals
OTM Working of on-track machines (OTM)	2.2 Before starting a journey	Timetable Planning Rules Section 4.6
	5.6 Carrying out a running brake test	Timetable Planning Rules Section 5.1.2
P1 Single line working	6.5 Warning anyone working on or near the line used for single line working	When planning Single Line Working
	9.3 Right-direction movements	
	9.4 Wrong-direction movements	
S1 Signals and indicators controlling train movements		Operational Principals
S2 Observing and obeying fixed signals	3.1 Passenger train at a position-light, shunt-ahead or shunting signal	Operational Principals
SP Speeds	2.4 Differential permissible speed indicators	Timetable Planning Rules Section 5.1.2
	2.5 Permissible speed indicators with letters	Timetable Planning Rules 5.1.2

RULE BOOK MODULE	SECTION	NOTES
	2.6 Enhanced permissible speed (EPS) indicators	Timetable Planning Rules 5.1.2
T11 Movement of engineering trains and on-track plant under T3 arrangements	3 Movements entering the possession	When planning trains entering possessions
	7 Instructing the driver or machine controller	When planning trains entering possessions
TW1 Preparation and movement of trains General	7.1 Authority and arrangements for movements (Hauling dead traction units)	Operational Principals
TW2 Preparation and movement of multiple-unit passenger trains	6.5 Carrying out a running brake test	Timetable Planning Rules Section 5.1.2
TW3 Preparation and movement of locomotive hauled trains (including HSTs, push-pull, postal, parcels)	2.1 Locomotives running light or hauling trains (Maximum speed of);	Timetable Planning Rules Section 5.1.2
	2.2 Maximum permitted speed of locomotive-hauled trains	Timetable Planning Rules Section 5.1.2
	2.3 Electric-traction speed restrictions	Timetable Planning Rules Section 5.1.2
	3.16 Carrying out a running brake test	Timetable Planning Rules Section 5.1.2
	Section 14.1 Working trains with locomotives at both ends, when this type of working is permitted	Operational Principals
Rule Book Handbook 5 Hand Signalling Duties	Section 5.2 Entrance signal	When planning Temporary Block Working (TBW)
	5.3 Exit signal	When planning Temporary Block Working (TBW)
	5.4 Where TBW is divided into two sections	When planning Temporary Block Working (TBW)

1.3 Definitions

The list below is not an exhaustive one but is intended to give readers an understanding of some of the terminology as used for the purposes of this document.

If any term in Timetable Planning Rules is unclear please contact the compiler on the telephone number shown on the cover.

1.3.1 Train Classification

Classification	Description
1	Express passenger train; or Nominated postal or parcels train; or Breakdown or overhead line equipment train going to clear the line or returning from there (1Z99); or Traction unit going to assist a failed train (1Z99) or Snow plough going to clear the line (1Z99) Z headcode must NOT be used for WTT services or STP additional trains conforming to specified route codes
2	Ordinary passenger train; or Breakdown or overhead line equipment train not going to clear the line (2Z99) Officers' special train (2Z01) Z headcode must NOT be used for WTT services or STP additional trains conforming to specified route codes
3	Freight train which can run at more than 75 mph; or A parcels train; or Autumn railhead treatment train; or Empty coaching stock train if specially authorised or Sandite (M P V) Z headcode must NOT be used for WTT services or STP additional trains conforming to specified route codes
4	Freight train which can run up to 75 mph Z headcode must NOT be used for WTT services or STP additional trains conforming to specified route codes
5	Empty coaching stock train Z headcode must NOT be used for WTT services or STP additional trains conforming to specified route codes
6	Freight train which can run up to 60 mph Z headcode must NOT be used for WTT services or STP additional trains conforming to specified route codes
7	Freight train which can run up to 45 mph Z headcode must NOT be used for WTT services or STP additional trains conforming to specified route codes
8	Freight train which can run at, or is timed to run at, 35 mph or less Z headcode must NOT be used for WTT services or STP additional trains conforming to specified route codes
9	Class 373 or Class 374 train; or London Overground East London Line services and Thameslink services; or Other passenger train if specially authorized Z headcode must NOT be used for WTT services or STP additional trains conforming to specified route codes
0	Light locomotive or locomotives Z headcode must NOT be used for WTT services or STP additional trains conforming to specified route codes

Source: The Rule Book GE/RT8000/TW1 Preparation and Movement of Trains General Section 2 Classification and speed of trains

FOUR CHARACTER TRAIN NUMBERING SYSTEM

Inserted at the head of each timing column in the Working Timetable and Special Notices is a train number composed of four characters.

FIRST AND SECOND CHARACTER

The first character is a number indicating the classification of the train in accordance with industry standards (GE/RT8000 etc).

The second character is a letter indicating the routing or service group to which that train belongs.

The tables below indicate the passenger train numbering principals for classes 1, 2 and 9.

TID	Class 1 services (WTT)
1Axx	London Victoria and Brighton (fast) – not to be used for Gatwick Express services
1Bxx	London Victoria/London Bridge and Bognor Regis/Portsmouth Harbour via Three Bridges and Horsham
1Cxx	Horsham and Bognor Regis/Portsmouth Harbour (portion of 1Bxx / 1Jxx) Trains terminating at Chichester from London to be numbered in the range 1C80-99
1Dxx	London Victoria and Gatwick Airport DOWN DIRECTION London Waterloo and Dorking via Epsom (Class 2 not available)
1Exx	London Bridge and Uckfield
1Fxx	London Victoria/London Bridge and Eastbourne / Hastings / Ore / Seaford
1Gxx	Brighton and Hastings
1Hxx	London Victoria/London Bridge and Littlehampton via Hove
1Ixx	London Victoria and Sutton / Epsom / Dorking / Horsham via Mitcham Junction (semi-fast) <i>Stops ONLY at Clapham Junction between London Victoria and Streatham North Junction, regardless of its booked line</i>
1Jxx	London Victoria/London Bridge and Southampton Central via Three Bridges and Horsham Trains terminating at Chichester to be numbered in the range 1J80-99
1Kxx	London Bridge and Epsom / Guildford via West Croydon (semi-fast)
1Lxx	London Victoria and East Grinstead
1Mxx	Brighton and London Victoria (Gatwick Express) UP DIRECTION
1Nxx	Brighton and Southampton Central via Swanwick Trains terminating at Chichester to be numbered in the range 1N80-99 Southampton Central and Littlehampton
1Oxx	Reading and Redhill / Gatwick Airport West of England / South Wales to Brighton via Salisbury and Havant
1Pxx	London Bridge and Caterham (semi-fast)
1Qxx	Network Rail Test Trains
1Rxx	London Victoria and Reigate
1Sxx	Brighton and Portsmouth Harbour Trains terminating at Chichester from Brighton to be numbered in the range 1S80-99
1Txx	London Victoria and Gatwick Airport/Three Bridges via Redhill
1Uxx	Gatwick Airport and London Victoria (Gatwick Express) UP DIRECTION
1Vxx	Gatwick Airport / Redhill and Reading Brighton and West of England / South Wales via Salisbury and Havant
1Wxx	London Victoria and Brighton (Gatwick Express) DOWN DIRECTION
1Xxx	NOT USED
1Yxx	Brighton and Southampton Central via Eastleigh (1Y50 to 1Y99 range) London Victoria and Caterham (1Y00 to 1Y49)
1Zxx	Special Traffic/Charter services Must NOT be used for WTT services STP additional trains conforming to any route code

TID	Class 2 services (WTT)
2Axx	Redhill and Tonbridge
2Bxx	Victoria and Sutton / Epsom Downs via Balham and Selhurst East/South Croydon and London Victoria via Selhurst and Balham (stopping) UP DIRECTION
2Cxx	Brighton and Seaford
2Dxx	Eastbourne / Hastings and Ashford International London Waterloo and Guildford via Epsom (Class 1 not available) Redhill and Gatwick Airport (Up services ODD, Down services as EVEN)
2Exx	Brighton and Littlehampton Clapham Junction and Shepherds Bush (ARL services only)
2Fxx	London Victoria and London Bridge via Crystal Palace
2Gxx	Brighton and Ore London Bridge and Caterham via Sydenham (stopping)
2Hxx	London Bridge and Beckenham Junction
2Ixx	London Victoria and Sutton / Epsom / Dorking / Horsham via Mitcham Junction (stopping) <i>Stops at additional stations other than just Clapham Junction between London Victoria and Streatham North Junction and is booked to use the Slow Line</i>
2Jxx	London Bridge and Caterham via Tulse Hill and Selhurst
2Kxx	London Bridge and West Croydon or Sutton via Sydenham
2Lxx	Brighton and Lewes Clapham Junction to Stratford via Willesden Junction
2Mxx	East Croydon and Watford Junction / Hemel Hempstead
2N01-79	Brighton and Hove
2N80-99	London Victoria to East Croydon / South Croydon via Norbury (Up services ODD, Down services as EVEN)
2Oxx (even numbers)	Reading to Redhill / Gatwick Airport
2Oxx (odd numbers)	Hemel Hempstead / Watford Junction to Clapham Junction / East Croydon
2Pxx	Purley and Tattenham Corner (portion working with London Bridge – Caterham services) Littlehampton and Bognor Regis
2Qxx	Network Rail Test Trains
2Rxx	Redhill and Reigate
2Sxx	Littlehampton and Portsmouth & Southsea London Victoria and West Croydon via Crystal Palace
2Txx	London Bridge and Coulsdon Town or Sutton via Sydenham
2Uxx	Brighton and West Worthing
2Vxx	Gatwick Airport /Redhill and Reading
2Wxx	London Bridge and Blackfriars via Mitcham Junction, Sutton and Wimbledon
2Xxx	NOT USED
2Yxx	Purley and Tattenham Corner (portion working with London Victoria – Caterham services) Stratford to Clapham Junction via Willesden Junction
2Zxx	Special Traffic Trains Must NOT be used for WTT services STP additional trains conforming to any route code

TID	Class 9 services (WTT)
9Axx	East London Line to Crystal Palace
9Bxx	East London Line from Crystal Palace
9Cxx	East London Line to West Croydon
9Dxx	East London Line from West Croydon

9Exx	East London Line to New Cross St Albans City and St Pancras International (all stations services) – Not to be used for services through the Thameslink Core beyond St Pancras and south thereof
9Fxx	East London Line from New Cross
9Gxx	East London Line to Clapham Junction Bedford and St Pancras International (semi-fast services) – Not to be used for services through the Thameslink Core beyond St Pancras and south thereof
9Hxx	East London Line from Clapham Junction and Battersea Park Luton and St Pancras International (all stations services) – Not to be used for services through the Thameslink Core beyond St Pancras and south thereof
9lxx	East London Line to/from New Cross Gate
9Jxx	Peterborough and Horsham via London Bridge and Redhill
9Kxx	Luton / Kentish Town and Orpington via Catford
9Lxx	Bedford and East Grinstead via London Bridge – Northbound services terminating at London Bridge (Central) must be allocated numbers between 70 and 99
9Mxx	Bedford and St Pancras International (all stations services) – Not to be used for services through the Thameslink Core beyond St Pancras and south thereof East London Line services to Battersea Park
9N80 – 9N99	Bedford and Littlehampton via London Bridge and Hove
9O01-79	St Albans and Sutton via Mitcham Eastfields, Sutton and St Albans via Wimbledon
9O80-88	Sutton via Wimbledon to West Hampstead, Kentish Town or Blackfriars
9O90-98	Sutton via Wimbledon to Luton or Bedford
9P01-75	Luton and Rainham
9P76-88 (even numbers)	Rainham/Gillingham to West Hampstead
9P81-89 (odd numbers)	Bedford to Rainham / Gillingham (fast from St Albans)
9P90-99	Shuttle services between London Bridge / Dartford and Rainham / Gillingham
9Qxx	NOT USED
9R00-69	Bedford and Gatwick Airport/Three Bridges / Brighton via London Bridge and Redhill - Northbound services terminating at London Bridge (Central) must be allocated numbers between 70 and 79 and 70 to 99 SO and SUN
9R80-99	Bedford and Gatwick Airport/Three Bridges/Brighton via London Bridge and Redhill that have a maximum of four station calls between Bedford and St Pancras (applies SX)
9Sxx	Cambridge and Gatwick Airport/Three Bridges/Brighton via London Bridge and Quarry Lines
9T00-9T73	Bedford and Gatwick Airport/Three Bridges / Brighton via London Bridge and Quarry Lines - Northbound services terminating at London Bridge (Central) must be allocated numbers between 74 and 79 SX and 74 to 99 SO and SUN
9T80 – 9T99	Bedford and Brighton via London Bridge and Quarry Lines that have a maximum of four station calls between Bedford and St Pancras (applies SX)
9Uxx	NOT CURRENTLY USED – will be allocated to relevant service group when 24tph Thameslink service is confirmed
9V01-79	St Albans and Sutton via Wimbledon, Sutton and St Albans via Mitcham Eastfields
9V80-88	Sutton via Mitcham Eastfields to West Hampstead, Kentish Town or Blackfriars
9V90-98	Suton via Mitcham Eastfields to Luton or Bedford
9W01-9W89	Bedford and Gatwick Airport/Three Bridges / Brighton via Tulse Hill and Streatham
9W90-9W99	Horsham or Three Bridges and Peterborough via Tulse Hill and Streatham
9Xxx	NOT USED
9Y01-74	Welwyn Garden City / Blackfriars and Sevenoaks via Catford and Swanley
9Y76-98	Sevenoaks to Welwyn Garden City via Swanley and Catford (SX) or London Victoria (Sundays)
9Zxx	Not to be used in the WTT

THIRD AND FOURTH CHARACTERS

Thameslink services †
Northbound Services
Southbound Services

EVEN NUMBERS*
ODD NUMBERS*

* Some services during the AM & PM peak will be given numbers between 80 and 99 to illustrate differences with the off-peak pattern. These may deviate from the numbering convention, by exception, with prior consultation between Network Rail and the Operator.

† This includes Thameslink operated services which start and terminate short of the Thameslink Core route.

Note:

The use of number range 80 to 99 should be used to illustrate trains which deviate from their normal pattern behaviour, be that calling pattern, unusually long dwells, or detachments / attachments in locations where this is not often undertaken.

EMPTY COACHING STOCK MOVEMENTS

Outbound from Depot / stabling location:

5xxx where xxx = the corresponding departing train ID minus 1 (e.g. 5G07 forms 1G08)

In the event of a digit clash, the second train would take the next available digit e.g. if 07 used, 09 is the next

Incoming to Depot / stabling location:

5xnn:

Where nn = the corresponding arriving train ID plus 1 (e.g. 2B87 forms 5T88)

Where x =

VICTORIA (Departing with EVEN numbers)

T = Stewarts Lane T&RSMD
F = Streatham Hill Depot
B = Selhurst Depot via Norbury
S = Selhurst Depot via Crystal Palace
V = Victoria C.S.
H = Battersea Pier Sidings

LONDON BRIDGE (Departing with ODD numbers)

N = Stewarts Lane T&RSMD via Denmark Hill
Y = Stewarts Lane T&RSMD via any other route
J = Selhurst Depot via Tulse Hill and Norbury
G = Selhurst Depot via Forest Hill
H = Selhurst Depot via Tulse Hill and Crystal Palace
F = Streatham Hill Depot via Crystal Palace
K = Streatham Hill Depot via Tulse Hill

ANY OTHER LOCATIONS

Sussex Coast = use incoming/outgoing digits with class 5

East Croydon/Caterham/Tattenham/East Grinstead/Sutton/Epsom/Dorking to Streatham Hill Depot via Crystal Palace
= 5Sxx **ODD numbers**

East Croydon/Caterham/Tattenham/East Grinstead/Sutton/Epsom/Dorking to Selhurst Depot via Fork Arrival or Norwood Junction = 5Gxx **EVEN numbers**

East Croydon/Caterham/Tattenham/East Grinstead/Sutton/Epsom/Dorking to Selhurst Depot via Selhurst station = 5Jxx **EVEN numbers**

East Croydon/Caterham/Tattenham/East Grinstead/Sutton/Epsom/Dorking to Victoria or London Bridge = 5xxx (where xxx is the next natural line of route digit, e.g. if 1P76 last train from Caterham to London Bridge, 5P78 applies to following ECS)

Exceptions:

STP planning should cancel the original and create an STP version of the train with the new digit. Care must be taken not to duplicate another train run. In the event of an insurmountable STP clash, the STP train to take 5Zxx

1.3.2 Days of Operation

The following abbreviations are used to identify the day or days that a train operates.

Abbreviation	Description
M	Monday
T	Tuesday
W	Wednesday
Th	Thursday
F	Friday
S	Saturday
Su	Sunday
EWD	Every Week Day (Monday to Saturday)
Daily	Every day – will not accept this; there must be a separate entry for Sundays
Suffixes	
O	Adding this indicates that the train will run only on that day or those days shown
X	Adding this indicates that the train will not run on that day or those days shown
General	
BHX	Denotes that this train does not run on a bank holiday

1.3.3 Traction and Rolling Stock

Abbreviation	Description
DMU	Any diesel multiple unit
ECS	Empty Coaching Stock
EMU	Electric multiple unit

1.3.4 Line Codes

Abbreviation	Description
8	No.8 Down
9	No.9 Reversible
10	No.10 Reversible
11	No.11 Reversible
AL	Atlantic Lines
BRV	Brighton Reversible
BRV	Bermondsey Reversible
CR	Carriage Road
DBA	Down Battersea
DBF	Down Brighton Fast
DBS	Down Brighton Slow
DCP	Down Crystal Palace
DFL	Down Fast Line
DH	Down Hastings
DHL	Down St Helier
DKL	Down Kensington
DLH	Down Loop
DML	Down Main
DPL	Down Passenger Loop
DSL	Down South London Line
DW	Down Wallington
DWL	Down West London
FL	Fast Line
GL	Goods Line
LRV	South London Reversible
QL	Quarry Line
REV	Reversible
RVF	Reversible Fast Line
RVL	Reversible Line
RVS	Reversible Slow Line
SL	Slow Line
SPR	Spur Line
SRV	Sussex Reversible
UBA	Up Battersea
UBF	Up Brighton Fast
UBM	Up Bermondsey Spur
UBS	Up Brighton Slow
UCP	Up Crystal Palace
UH	Up Hastings
UKL	Up Kensington
ULH	Up Loop
ULS	Up South London
UML	Up Main
UPL	Up Platform Loop
UPV	Up Passenger Loop
UHL	Up St Helier
USL	Up Slow Line
UW	Up Wallington
UWL	Up West London
UXL	Up Sussex Loop
WCR	West Carriage Road

1.3.5 Activity and Other Codes

Abbreviation	Description
*	Suppression of traffic stop indicator
-D	Train stops to detach vehicles
-T	Train stops to attach and detach vehicles
-U	Train stops to attach vehicles
A	Train stops or shunts for other trains ahead or to pass only. Shows as an * in WTT
AE	Trains stops to attach/detach assisting locomotive.
BL	Train stops to attach or detach a banking locomotive
C	Train stops to change train crew
D	Train only stops to set down passengers. Shows as an s in NRT
E	Train stops for examination
G	NRT data to add
H	Notional Activity to prevent WTT column merge
HH	As H, where there is a third column involved
K	Passenger count point
KC	Ticket collection and examination point
KE	Ticket examination point
KF	Ticket examination point – 1 st Class only
KS	Selective ticket examination point
L	Train stops to change locomotives
N	Stop not advertised to the public
OP	Train stops for other operating reasons
OR	Train locomotive on rear of train
PR	Train propelling between points shown
R	Train stops when required. Shows as an x in NRT
RETB	Radio Electronic Token Block
RM	Trains stops for a reversing movement or driver to change ends
RR	Train stops to allow the locomotive to run-round its train
S	Trains for railway personnel only
T	Trains stops to pick up or set down passengers
TB	Train begins (Origin)
TF	Train finishes (Destination)
TS	Detail consist for TOPS Direct requested by DB Cargo
TW	Train stops to pick up or set down a staff, tablet or token on Single Lines. See Section 5.2
U	Train only stops to pick up passengers. Shows as a u in NRT
W	Train stops for watering of coaches
X	Train passes another train at crossing point on single line. See Section 5.2
x{	Suppress running line information
{	Force running line indication
{}	Force path and line indications
}	Force path indication
#	Force stop with TW

Activity Codes - Notes

1. Any passenger train that stops at a location automatically generates a T Activity unless it is suppressed.
2. If an Activity is required that removes the 'passenger stop' Activity (T, D, U and R), then the 'passenger stop' Activity must always appear in the first Activity field (e.g. T -D would be correct, -D T would not). This is because the National Rail Timetable (NRT) extract program only considers the first Activity field. If it does not find a 'passenger stop' Activity in the first field the time will not be extracted to appear in the NRT.
3. Up to 6 Activities may be shown for each event.
4. No two Activities may be duplicated at the same event.
5. At any one event, the following groups are mutually exclusive
 - a) D, U, T, N, S, TW, OP.
 - b) -D, -U, -T.
 - c) TB, TF.
 - d) KC, KE.
6. N, R, G, D and U are only valid with Train Categories XC, XD, XI, XX, XZ, OO, OW, OL, BS, BR and blank (i.e. 'advertised' services). R, D and U are additionally valid with Train Categories XU and OU (unadvertised services).
7. K, KC, KE, KF, KS are only valid with Train Categories starting X or O.
8. If TF is present then none of K, KC, KE, KF, KS can be present.
9. Activity T indicates that a train stops to pick up and set down. This normally refers to passengers. Activity -T indicates that the train stops to attach and detach vehicles. At any location where a 'stop' time is shown, ITPS or a similar system will assume a default Activity is required unless otherwise specified. These default Activities are as follows: T for trains with a Train Category starting in X or O, OP for trains with a Train Category starting in Z or E, and -T for all other trains (but see below). The default Activity will be generated when the upload file is created.
10. If Activities U, D, N, R, OP, S, TW, -U or -D are specified then this overrides the defaults and only the specified Activities will be included in the upload file (it is not necessary to use the * suppression code if these codes are present).
11. If a traffic Activity is NOT required at a 'stop' location with Activities other than U, D, N, R, OP, S, TW, -U or -D (e.g. at 'C' or 'L' stops) then the * must be input to the ITPS or similar system train specification at that location to suppress -T or T. If the * is not added to indicate a non-traffic stop then T, -T or OP will be added to the upload file
12. If an Activity -T (only) is required on a train with a Category starting in X or O it is necessary to add a * to the spec (to suppress 'T') and positively show -T in the Activity column.

Train Service Codes

East London Line Train Service Codes

Section	Service Code
Highbury and Islington to Dalston Junction	22215003
Dalston Junction to New Cross	22218000
Dalston Junction to New Cross Gate	22218000
Dalston Junction to Queens Road Peckham	22218000
New Cross Gate to Crystal Palace/West Croydon	22215003
Queens Road Peckham to Clapham Junction	22214000

2 Route Description

2.1 Planning Geography

Network Rail maintains the planning geography and issues it to Train Operators using the BPlan system. BPlan data is to be regarded as the master geography and it is the responsibility of Train Operators and nominated Network Rail users to ensure that data in their train planning systems reflects the master geography.

It is essential that all locations, times and full details such as platforms, running lines, activities, etc. comply fully with all of the following rules. Any Network Links used for buses only are to have running line defined as BUS. All data used by a specifier must be that supplied by Network Rail: use of estimated times added or amended locally will cause the trains concerned to fail validation.

In order to avoid the creation of unnecessary journey legs and associated point-to-point timings, all passing times must conform to these rules.

Locations in **bold type and underlined** are mandatory timing points, i.e. apply to all trains on the specified line of route.

Locations in **bold** type are conditional timing points with a mandatory element. These are locations where all trains travelling on a specific line or in a specific direction are required to be timed at this location, which will be defined in the Notes column. For lines/directions for which the mandatory element does not apply they are to be treated as non-mandatory timing points and are only required to be shown in connection with a specific activity with one or more of the codes shown below in the Code column.

Locations in normal type are non-mandatory timing points and are required to be shown only for a specific activity which one of more of the codes shown below in the Code column.

Locations in *italic* type are not timing points but are shown for reference purposes

Line references shown in italics e.g. *SO500* are only for reference purposes.

In the tables below, the following codes apply:

F	Only freight trains are timed here
P	Only passenger trains are timed here
S	Only stopping trains are timed here
X	Only trains crossing from one running line to another are timed here

SO250 FACTORY JUNCTION TO MITRE BRIDGE JUNCTION

2.2 Route Opening Hours

Subject to constraints imposed by the Engineering Access Statement, all routes are open continuously, except as shown below. The hours shown reflect the contractual opening hours. The actual opening hours may vary from those shown. For a complete listing of current signal box opening hours please refer to the “Compendium of Signal Box Opening Times” which can be found on the Network Rail website:

<https://www.networkrail.co.uk/industry-and-commercial/information-for-operators/>

If there is doubt about a signal box's opening hours check with the appropriate Network Rail Operations Manager.

When the routes shown are required for services diverted under the Engineering Access Statement, opening hours will be increased as necessary on a temporary basis.

Signal boxes equipped to be switched-out during a route's opening hours are shown within the routes concerned.

3 Electrification

3.1 Electrification Limits

Limits of the 25 kV AC and 750V DC electrification systems are contained in Table A of the Sectional Appendix to the Working Timetables, issued by, Network Rail. Refer to Table A for the given location to identify the type of electrification that applies.

3.2 Electrification Supply Restrictions

Under normal conditions, the electrification power supplies will not place any restrictions on the use of approved electric traction. However, the Route Clearance sections of the Sectional Appendix to the Working Timetables, issued by, Network Rail do tabulate restrictions on the movement of electric trains. Refer to Table 'A' and select Route Clearance.

Under maintenance conditions, certain sections of the electrified network may be blocked to electric traction. These restrictions are contained within the Network Rail Engineering Access Statement for the appropriate year. Additional restrictions may also arise in connection with engineering possessions requested through the Engineering Access Statement amendment procedure.

4 Rolling Stock Restrictions

4.1 Locomotive Route Availability

See the applicable Route Clearance table for the given location in Sectional Appendix to the Working Timetables issued by Network Rail. Refer to Table 'A' and select Route Clearance.

SO500 LONDON VICTORIA TO BRIGHTON			
ROUTE SECTION	DOWN	UP	RESTRICTION
London Victoria to Brighton	ALL Linecodes	ALL Linecodes	Class 92 Locomotives are not permitted on the whole of the route

SO550 REDHILL TO TONBRIDGE

Redhill to Tonbridge	ALL Linecodes	ALL Linecodes	Class 92 Locomotives are not permitted on the whole of the route

4.2 Passenger Stock Restrictions

See the applicable Route Clearance table for the given location in Sectional Appendix to the Working Timetables issued by Network Rail. Refer to Table 'A' and select Route Clearance.

SO170 TONBRIDGE TO BOPEEP JUNCTION
SO600 WILLINGDON JUNCTION TO ASHFORD INTERNATIONAL
Restrictions due to Electrical Control Office Outages
Unplanned outage of High Brooms Substation traction supply rectifier or all dc circuit breakers open, (Grove Hill traction supply rectifier in service). All 12 car electric trains to operate in half power mode/notch 2, between buffer stops of 12 car Tonbridge Wells Turn back siding and High Brooms station in both directions. No additional restrictions on 8 or 4 car formations.
Unplanned outage Grove Hill Substation traction supply rectifier and/or HV Feeder 1921 or all dc circuit breakers open (High Brooms and Wadhurst traction supply rectifier in service). All trains to operate in half power mode/notch 2, between Frant station and High Brooms station in both directions
Unplanned outage Wadhurst Substation traction supply rectifier and/or HV Feeder 1922, (High Brooms and Grove Hill traction supply rectifier in service) All 12 car electric trains to operate in half power mode/notch 2, between Tonbridge Wells station and High Brooms station in both directions. No additional restrictions on 8 or 4 car formations
Extended high voltage feeding from feeder 1926 at Bo Peep substation to Grove Hill substation and failure of UPS at Grove Hill or Wadhurst substations. All electric trains to operate in half power mode, notch 2, between Frant station and High Brooms station in both directions
Outage of High Brooms substation traction supply rectifier or all dc circuit breakers open and outage Grove Hill substation traction supply rectifier and/or HV Feeder 1921 or all dc circuit breakers open (Wadhurst traction supply rectifier in service). Electric train services limited to maximum of 8 car operation between Tonbridge station and Hastings station, with a limitation of at least a 30 minute gap between services on the same road at each station. In addition, ALL electric trains to operate in half power mode/notch 2, between Tonbridge station and Stonegate station in both directions
Unplanned outage of High Brooms substation traction supply rectifier or all dc circuit breakers open and unplanned outage Wadhurst substation traction supply rectifier and/or HV Feeder 1922 or all dc circuit breakers open, (Grove Hill substation traction supply rectifier in service). Electric services limited to maximum of 8 car

SO170 TONBRIDGE TO BOPEEP JUNCTION

SO600 WILLINGDON JUNCTION TO ASHFORD INTERNATIONAL

operation between Tonbridge station and Hastings station, with a limitation of at least a 30 minute gap between services on the same road at each station.

In addition, ALL electric trains to operate in half power mode/notch 2, between Tonbridge station and Etchingham station in both directions.

Planned outage of the traction supply rectifier (or all dc circuit breakers open) at High Brooms and/or Grove Hill and/or Wadhurst substations are not permitted Monday to Saturday between the hours of 06.00 hours and 21.00 hours. Planned outage of Feeder 1921 or Feeder 1922 is not permitted Monday to Saturday between the hours of 06.00 hours and 21.00 hours unless prior arrangements have been made to enable the rectifiers at the affected substation to remain in service.

4.3 Freight Wagon Restrictions

See the applicable Route Clearance table for the given location in Sectional Appendix to the Working Timetables, issued by Network Rail. The Route Availability for a given location is in the 'Signalling and Remarks' column of Table A. Route Clearance Table D5 Route clearance of freight vehicles gives further guidance on freight wagon restrictions.

Trains conveying vehicles that have a heavy axle weight or other exceptional characteristics, or vehicles conveying containers or swap bodies require an RT3973 form.

Note: The Rule Book GERT8000 Section TW4 defines a container as an intermodal transport unit constructed to a standard (usually specified by the ISO) suitable for conveyance by road, rail or sea.

Note: The Sectional Appendix does not cover the CTRL HS1. The CTRL has its own Working Manual.

4.4 Freight Train Load Limits

Trailing load limits for all traction types are contained in the Freight Loads Book published by Network Rail.

Note: It is important to understand the weight limitations that apply to trains especially over sections of heavily graded routes. Coupling strength information is also contained in the Freight Loads Book. Coupling strength is important in determining the trailing loads that trains can convey.

4.5 Freight Train Length Limits

Refer to the Freight Train Loads Book published by Network Rail for the length limits of freight trains.

Note: The Sectional Appendix quotes loop lengths in metres and feet. These are the absolute lengths of the loop from the signal at the outlet to the fouling point at the entrance to the loop.

4.6 Driver Only Operation Limits

When special trains are required to operate DOO (NP) over the below routes, it must be ascertained that competent staff are available to deal with these trains at the forwarding and receiving terminals, sidings, yards etc. or where locomotive changes take place en route. Furthermore, signal boxes are to be advised of these additional DOO (NP) services, with particular reference to ECS trains.

Notes:

- Pass - Passenger trains
- ECS Slide - Empty Coaching Stock with power operated sliding doors
- NA - Not authorised (except where # shown).
- P - Permitted.
- + - Subject to any relevant Route Availability restrictions.
- * - Subject to provisions of working manual - White Pages (Sect H) paragraph. H10/1.
- @ - Unless the cab from which the train is being driven is Speed Sensing Fitted (SSF), slam door MU trains are limited to a maximum journey of 10 miles.
- # - Permitted for short notice movements, when all other DOO (NP) conditions are fulfilled and all doors are locked before departure. Authorisation MUST be obtained from Network Rail Operations Control, before this can be applied.

4.7 Engineers' Trains Restrictions

Some On Track Machines (OTMs) do not reliably activate track circuits. These OTMs must use one of the following special reporting numbers 6Z09, 7Z09 or 8Z09*. Because these OTMs do not reliably activate track circuits it is not possible to apply the headways and junction margins as outlined in Timetable Planning Rules consistently and it is therefore not possible for Operational Planning to provide timings for these movements.

* Source GE/RT 8000-OTM

5 Running Times, Margins and Allowances

Except where otherwise stated; the information in this section of the Timetable Planning Rules reflects the general rules used in developing the 1994/5 timetable. (Several exceptions to the general rules were agreed for 1994/5 and exceptions may continue to be possible with the specific agreement by Network Rail in every case.

5.1 Sectional Running Times

The definition for Sectional Running Times (SRTs) is listed in Section 6.1.4 of the National TPRs.

5.1.1 Source of Current SRTs

The definitive catalogue of SRTs is BPlan.

5.1.2 Method of Calculation

SRTs are revised by Train Operators and Network Rail as part of the Revision of Timetable Planning Rules process outlined in Network Code Part D 2.2. Normally they will not change from one timetable to the next. Network Rail will, however, re-calculate SRTs for particular train/route combinations in the following circumstances:

- i) Where a Train Operator anticipates using a train/route combination for which no suitable SRTs exist;
- ii) Where Network Rail anticipates a change to route data, e.g. line speed changes;
- iii) Where there is evidence that the SRTs in current use do not adequately represent real train performance;
- iv) Where it is cost-effective to re-calculate all SRTs on a route at the same time as a re-calculation for a particular train type.

Network Rail will reflect the methodology and assumptions described in Section 6 of the National TPRs when calculating TPR proposals, unless and to the extent documented otherwise in respect of any given proposal. Timetable participants are encouraged to submit change proposals for review and consultation in line with the national methodology, or in line with such alternative methodology and assumptions as favoured by the proposer. NR will not seek to reject any proposal on the exclusive basis of the methodology employed, provided that the methodology and assumptions are clearly stated and demonstrably adhered to in respect of the proposal received.

SRT change proposals may be calculated in a number of ways including, but not limited to:

Through actual timing of trains

- a) Use of On Train Monitoring Recorder (OTMR) systems
- b) Use of computer system actual values
- c) Use of computer simulation tools
- d) By any other agreed methodology

It is permissible to include percentage uplift in SRTs instead of applying engineering recovery allowances to be agreed by all affected parties.

In the event that the application of different methodologies produces conflicting proposals, a joint observation exercise should be undertaken to ascertain what happens in reality.

When the final SRTs obtained by the above methodology are different from those currently in use, Network Rail presents them to Train Operators for comment either in Section 5.1.3 below or through the Timetable Planning Rules Change Procedure.

5.1.3 New and Revised Sectional Running Times

New and revised SRTs are revised by Train Operators and Network Rail on an individual basis. These should be supplied by applying the methodology described in Section 6 of the National TPRs unless another methodology is deemed appropriate, provided that the methodology and assumptions are clearly stated and demonstrably adhered to in respect of the proposal received.

5.1.4 Timing of Trains Consisting of Passenger Vehicles on Goods Lines

The sectional running timings quoted for trains consisting of passenger vehicles on Goods Lines reflect the speeds shown in the relevant Table 'A' of the appropriate Sectional Appendix. They do not constitute an authority to time trains conveying passengers on a Goods Lines. Nor do they reflect the permitted speeds at which a train conveying passengers can proceed. Network Rail will offer the sectional running times for trains conveying passengers on a Goods Line on a train-by-train basis. For those times please apply to the Operational Planning Department.

Operations Publications publish the authority to allow the planned operation of trains conveying passengers on Goods Lines. Before Operations Publications can grant authority they require confirmation that the track is fit for purpose and that there is a safe method of operation. Therefore, the Operational Planning Department must apply to the relevant Track Engineer and Operations Manager for confirmation of these requirements in writing. The Operational Planning Department must pass these responses to Operations Publications. The Operational Planning Department is responsible for advising Operations Publications of the requirement to operate a passenger train on a Goods Line at least 8 weeks before the day of operation.

5.2 Headways

The definition for Headways is listed in Section 1.5 of the National TPRs.

Light Engine movements to be treated as passenger trains when applying margins/allowances where there is a freight/passenger difference.

5.2.1 Headway Values

All times are in minutes. All routes are shown.

Where track circuit block (TCB) signalling applies, the standard headways for each route are shown, together with any exceptions.

AB indicates locations where absolute block signalling applies: here the headway is to be calculated from the transit time of the first of each pair of trains running between the consecutive block posts being considered. To this transit time shall be added 2 minutes to allow for the signaller's actions. Exceptions are shown as AB and appear together with the actual headway value to be used, which includes the allowance for signallers' actions. Where there is an intermediate block signal, the absolute block section concerned shall be between this signal and the next block post in advance.

Single lines and other forms of signalling are shown, together with any values applicable, where they occur.

"OTNS" or "OT" indicates One Train Working with No Train Staff; "OTS" or "OT(S)" indicates One Train Working with Train Staff. "NST" indicates No Signaller token. In these cases only one train is allowed in the section at one time; a second train cannot be allowed to enter the section until the first train has left the section.

"ETB" indicates Electric Token Block and "TB" indicates Tokenless Block for single lines.

"RB" indicates Radio Signalling where "long section tokens" can be issued between certain block posts during times of low traffic volume.

Where headways are shown as being "non-stopping" or "stopping" these descriptions refer to the service that the path is following. The "stopping" headway should be applied to a service following a preceding service which stops at either a station or any other location for operational reasons unless stated otherwise within Section 5.2.1 or 5.3 Junction Margins and Station Planning Rules. The "non-stopping" headway should be applied to a service following a preceding service which does not stop at that location. Immediately the preceding service stops at any location for any reason, the following service headway should be amended to the "stopping" value unless stated otherwise within Section 5.2.1 or 5.3 Junction Margins and Station Planning Rules.

Headways in Sussex are applied on the depart to depart methodology

Wimbledon Chase – Sutton	5½ - Non-Stopping 7½ - Stopping	5½ - Non-Stopping 7½ - Stopping	

5.2.2 General Capacity Constraints

The standard headway as shown in 5.2.1 is defined as the minimum planned interval between trains at their closest point in any route section as shown. Assumptions as to the capacity of any particular route section should not be made solely by the information contained within this sub-section.

Network Rail will expect operators to allow greater margins between trains, where possible, in order that the finished timetable is robust.

If operators time a series of trains at the minimum headway as shown, they are expected to allow an additional margin of either 2 minutes before another train is timed to follow, or 1 minute each for the next 2 successive trains. A series should normally be defined as a maximum of 4 successive trains.

If trains are deliberately timed to close up on a preceding train, additional allowances must be inserted.

ETCS Level 2 operating within GTR trains will normally be operational between Blue Anchor Junction and Blackfriars Junction via the Snow Hill Lines and lines 4 & 5. Special operational arrangements will need to apply for trains taking alternative routes between these locations. A 2 ½ minute headway is therefore allowed between consecutive trains operated by ETCS compatible rolling stock

In the interests of a more robust timetable and performance, it is intended that bids from operators for additional services over certain lines and junctions which have minimal spare capacity will be limited for both permanent and amended train working, with the following exceptions:

- a) Where usage already exceeds the capacity limit, operators will be permitted to retain existing paths but will be encouraged to move trains away from the critical period or route section where there are acceptable customer/cost considerations. If an operator relinquishes a path in the critical period, other operators would not be able to re-occupy the path.
- b) If an operator wishes to bid for an additional train/s in the critical period or over the critical route section, that request will be tabled for discussion. Normally, additional bids that breach the capacity limit will not be accepted but in exceptional circumstances may be accepted subject to all parties affected acknowledging and accepting the performance risks.

In 2007 Network Rail declared the route between Reading and Gatwick Airport as congested, solely on account of the constraints on platform working at

Reading
Redhill
Gatwick Airport

For further details please refer to 'The Network Statement' as available on the following website:
www.networkrail.co.uk

Where single line working is to operate or trains are to be routed to run on a line other than that normally planned for them, constraints on capacity will apply – see Engineering Access Statement.

The following special capacity and timing restrictions apply in addition to the constraints stated elsewhere in this document:

SO250 FACTORY JUNCTION TO MITRE BRIDGE JUNCTION

LINE/LOCATION	SECTION	CRITICAL TIMES SX	REMARKS
Factory Junction	Factory Junction	07.00 – 09.45 16.00 – 19.00	From Longhedge Junction to Atlantic/Chatham Lines
North Pole Junction	North Pole Junction to Latchmere Junction (No 3)	ALL DAY	No more than 13 paths per hour in each direction Stopping services are likely to absorb more than one path

SO250A GROSVENOR BRIDGE JUNCTION TO FACTORY JUNCTION

LINE/LOCATION	SECTION	CRITICAL TIMES SX	REMARKS
Factory Junction	Factory Junction	07.00 – 09.45 16.00 – 19.00	From Longhedge Junction to Atlantic/Chatham Lines

SO250D FALCON JUNCTION TO LATCHMERE JUNCTION (NO 1)

LINE/LOCATION	SECTION	CRITICAL TIMES SX	REMARKS
Clapham Junction	Factory Junction	07.00 – 10.00 16.00 – 19.00	To and from Platforms 16 and 17 and Brighton Slow Lines

SO500 LONDON VICTORIA TO BRIGHTON

LINE/LOCATION	SECTION	CRITICAL TIMES SX	REMARKS
Clapham Junction	Falcon Junction	07.00 – 10.00 16.00 – 19.00	To and From Platforms 16 and 17 and Brighton Slow Lines

ROUTE SECTIONS

LINE/LOCATION	SECTION	CRITICAL TIMES SX	REMARKS
London Victoria / Three Bridges	It is intended to restrict usage to 90% of capacity	06.00 – 21.00 EWD	In peak periods no more than 20 trains per hour will be permitted on the fast Lines
London Victoria and Balcombe Tunnel Junction	The capacity is restricted to two track railway	SUNDAYS: No more than the current level of service	Two Track railway timetables on Sundays are detailed in the Engineering Access Statement and also in section 6.3 Two-Track Timetable Railway of the Timetable Planning Rules.

SO645 BATTERSEA PARK TO PECKHAM RYE (ATLANTIC LINES)

LINE/LOCATION	SECTION	CRITICAL TIMES SX	REMARKS
Factory Junction	Factory Junction	07.00 – 09.45 16.00 – 19.00	From Longhedge Junction to Atlantic/Chatham Lines

5.3 Junction Margins and Station Planning Rules

The definition for Junction Margins and Station Planning Rules is listed in Section 6.6, 6.7 and 6.8 of the National TPRs.

Light Engine movements to be treated as passenger trains when applying margins/allowances where there is a freight/passenger difference.

All times shown are in minutes. Where adjustments to sectional running times are shown, the value must be added to the normal SRTs shown in B Plan. Negative adjustments are specially identified.

Running brake tests must be carried out at the first opportunity after beginning a journey/crew change. These allowances are not necessarily listed at individual timing points. Additional adjustment time to allow for running brake tests should be agreed between the respective NR and Operator planner

Minimum station allowances are the minimum practical for the particular type of stock. These are shown with exceptions being listed by line of route where applicable.

Peak is defined as services arriving in London (Blackfriars, Victoria or London Bridge) between 07.00 and 09.59 SX and departing London (Blackfriars, Victoria and London Bridge) between 16.00 and 18.59 SX.

STANDARD VALUES – MINIMUM		
Adjustments to Sectional Running Times		
Movements	Reason	Value
Terminating trains arriving on half minutes in final timing link (with the exception of ARL)	Station working	{ $\frac{1}{2}$ }
All allowances mentioned in the exceptions should be included in train times when approaching the listed timing point unless otherwise noted.		
Attachment of Units		
Standard	4*	
* At least $\frac{1}{2}$ minute must be added to the schedule of rear portion when approaching the front portion to attach.		
Attachment of Units – Great Western Only		
Class	Allowance	Comments
769	5*	If ECS trains coupling together
*7 if a loaded passenger train		
Attachment of Units – Southern Services Only		
Class	Allowance	Comments
171	3	2 applies for ECS
377 or 387	4	
Attachment of Units – South Western Railway Services Only		
Class	Allowance	Comments
450	4	
455	2	
458	5	
701	4	
707	4	
Berthing Facilities		
When berthed on a running line during darkness or other conditions of poor visibility the person in charge must place a lamp displaying a red aspect at the end(s) of the train to face any movement that may approach on the same line.		
Trains must not be berthed on running lines except:-		
a) on platform lines at terminal stations		

STANDARD VALUES – MINIMUM								
b) on dead end bay lines at through stations c) on lines specified at individual locations within Section 5.3								
Connectional Allowance		5 minutes

Overlap Restrictions

First Movement	Second Movement	Margin
Train departs Shepherds Bush on the Down West London in the direction of Mitre Bridge Junction	Train departs or passes Kensington Olympia on the Down West London in the direction of Shepherds Bush	1
Train departs/passes Shepherds Bush Platform 1 on the Up West London and arrives into Kensington Olympia platform 3	Train departs Kensington Olympia Platform 2 on the Down West London crossing to the Up West London into Platform 1 at Shepherds Bush	1
Train arrives at Kensington Olympia Platform 2 from Shepherds Bush	Train approaching TVC801 on the Down West London at Kensington Olympia going north	2
Train arrives at Kensington Olympia Platform 2 from West Brompton	Train approaching TVC698 on the Down West London at Kensington Olympia going south	2

Shepherds Bush

Minimum Turnround – Passenger Stock

	Margin
Platform 2 Down	6*

* Applies to trains terminating from the Kensington Olympia direction and starting back towards Kensington Olympia in Platform 2 only. The time includes an allowance for shunting the train to enable the driver to observe signal TVC806. Train not to exceed 4 cars.

Shepherds Bush		
Overlap Restrictions		
First Movement	Second Movement	Margin
Train departs or passes Kensington Olympia towards West Brompton	Train departs Shepherds Bush towards Kensington Olympia	1
Dwell Times		
ARL Services only		1

North Pole Signal TVC813		
Dwell Times		
All Down Trains formed of EMU Stock (except Class 378/710)*	1	Changeover from DC to AC
* Trains formed of Class 378/710 EMU stock operated by London Overground are not required to stop at this location as the traction changeover can be completed whilst on the move		

North Pole Signal TVC818		
Dwell Times		
All Up Trains formed of EMU Stock (except Class 378/710)*	1	Changeover from DC to AC
* Trains formed of Class 378/710 EMU stock operated by London Overground are not required to stop at this location as the traction changeover can be completed whilst on the move		
Planning Note		
When a down train has terminated in either platform 1 or platform 2 at Shepherds Bush in order to reverse, a following train cannot depart or pass North Pole Jn on the Up West London Line until 1 minute after the preceding service has departed for Kensington Olympia		

North Pole Turnback Siding		
Junction Margins		
First Movement	Second Movement	Margin
Between all conflicting movements to/from Turnback siding		2
Train Length Restriction		
Length of Turnback Siding 162 metres to accommodate 1 x 5 car Class 378, 2 x 4 car Class 377, 1 x 5 car Class 710, 2 x 4 car Class 710		

Longhedge Junction	
Limit of Shunt	
	Length Limit
Down Ludgate (Clear of signal TVS63)	
Longhedge Junction Signal W135 Freight Restriction	
Between Longhedge Junction and Clapham Junction is steeply graded. Therefore a down direction locomotive hauled train from Longhedge Junction via the Ludgate Line must not be allowed to pass signal W135 (Culvert Road) until the route can be set from signal W145 into Clapham Junction	
Length Restrictions	
A train exceeding 1340m/209SLU in length on the Up Kensington will foul Latchmere No3 Junction when standing at TVS78 signal Therefore, junction margins must be based on trains' departure time at Longhedge Junction	
A train exceeding 728m/113SLU in length on the Up Battersea will foul Pouparts Junction and TVC584 when standing at TVS68 signal. Therefore, junction margins must be based on trains' departure time at Longhedge Junction

SO250A - Stewarts Lane T&R.S.M.D

Planning Note

When a train departing Stewarts Lane T&R.S.M.D bound for London Victoria (Central) follows another train on the Battersea Reversible towards Battersea Pier Junction, it cannot pass or arrive at Stewarts Lane Junction until 3½ minutes after the preceding train has passed Battersea Pier Junction due to only 1 signal (Signal VC546) in the section. This restriction also applies if the second train is reversing at Stewarts Lane Junction Shunt Signal 571 beyond VS735 points on the Battersea Reversible, which is the only available signal when formed of rolling stock that does not permit the driver to walk through the train

SO250B BATTERSEA PIER JUNCTION TO LONGHEDGE JUNCTION

Battersea Loop

Planning Restriction

Battersea Loop is leased by DB Cargo and therefore any non-DB Cargo services planned to use it must be pre-authorised by DB Cargo themselves. – See SO250A Planning Note relating to moves on/off the loop

SO250D FALCON JUNCTION TO LATCHMERE JUNCTION (NO 1)

Clapham Junction

See entry under route – SO500

SO500 LONDON VICTORIA TO BRIGHTON

London Victoria (Central)

For London Victoria (Eastern) Refer to Kent Timetable Planning Rules - SO110

For train planning purposes the station is divided into two parts.

Platforms 1-8 are known as Victoria (Eastern).

Platforms 9-19 are known as Victoria (Central).

Adjustment to Sectional Running Times

Movement	Reason	Value
Approaching an already occupied platform	Calling on allowance	{½}

For London Victoria (Eastern) Refer to Kent Timetable Planning Rules - SO110

Platform 18	12*	
Platform 19	12*	

* Maximum to be berthed in Platforms 9-19 = 60 cars

Trains formed of a 12 car Class 700 EMUs must not be planned to use Platforms 9-19 for passenger provision, due to operational restrictions

Connectional Allowance	15*
-------------------------------	-----

* Connectional allowance of 10 minutes applies to Southeastern and Southern

ECS Moves

ECS Moves to Selhurst T&R.S.M.D after the morning peak are to be routed via Streatham Common

Front Train Working:

In the event of Front Train Working with 2 (or more) loaded services a minimum of 5 minutes should be allowed between departure of Front Train and Rear Train to allow indicators etc to be changed.
Passenger trains that divide en route should not be "front trained".

Headway	2½ *
----------------	------

* Following consecutive departures from Platforms 13-19 to the Down Brighton Slow

Junction Margins

First Movement	Second Movement	Margin
Between All conflicting moves at Victoria (Central) platforms 9 to 19 (exclusive of resetting of the route for a departing service following the arrival/passing of conflicting inwards service) except where otherwise stated below (Platforms 9-19) except as below		3
Arrival in platforms 9 to 19	Conflicting departure from platforms 9 to 19	1
Depart Platforms 12-19 to either the Brighton Reversible or the Up Carriage Sidings	Any conflicting inwards service	5
Depart Platform 14 or 15 to the Down Slow	Any conflicting arrival from the Up Slow	4*
*Due to overlap issue on signal TVC532. Second train has to wait at signal TVC538 whilst first train crosses to the Down Slow via 240 crossover		
Depart Platforms 16-19 to Down Brighton Fast	Departure from Up Carriage Sidings into Platforms 12-15	2
Train departing from or passing signal TVS47 at Stewarts Lane Junction towards Stewarts Lane Depot/Longhedge Junction or Factory Junction	Departure from London Victoria towards Stewarts Lane Junction	2
Train departing from or passing signal TVC546 at Battersea Pier Junction towards London Victoria	Departure from London Victoria towards Stewarts Lane Junction	2

Passenger Stock Turnround Allowances

	Margin
Main Line Services (Loaded to Loaded)	12
Suburban Services (Loaded to Loaded)	7

Permissive Working

Attaching/Detaching and Platform Sharing is authorised as shown below:-

SO500 LONDON VICTORIA TO BRIGHTON

London Victoria (Central)

For London Victoria (Eastern) Refer to Kent Timetable Planning Rules - SO110

Platform 9	Attaching/Detaching and Platform Sharing
Platform 10	Attaching/Detaching and Platform Sharing
Platform 11	Attaching/Detaching and Platform Sharing
Platform 12	Attaching/Detaching and Platform Sharing
Platform 13	Attaching/Detaching and Platform Sharing
Platform 14	Attaching/Detaching and Platform Sharing
Platform 15	Attaching/Detaching and Platform Sharing

Platform 17	Attaching/Detaching and Platform Sharing
Platform 18	Attaching/Detaching and Platform Sharing
Platform 19	Attaching/Detaching and Platform Sharing

Platform Re-Occupation	Margin
Platforms 9 to 12 and 15 to 19	4*
Platforms 13 and 14 to/from the Fast Line	3
Platforms 13 and 14 to/from the Slow Line	4*

* A 3 minute reoccupation margin can be applied except in the following circumstances:

1. consecutive movements, or
2. where a platform is already occupied under permissive working arrangements.

Station Working Requirements:

At London Termini 3 minutes to be allowed if possible between arrivals on adjacent platforms to allow customers to clear in the morning and evening peak.

Platform starting signals must not be operated for trains via the Battersea Reversible line until permission has been granted from the Signaller operating Panel 7 at Victoria ASC for the movement to proceed beyond TVC541

Overnight:

Maximum use is to be made of Platforms 12 to 15 (These platforms have access to both Fast Line and Slow Line). The use of Platform 19 should be kept to a minimum because of difficult customer access.

Use of Platforms:

Diesel unit services and whenever possible diesel hauled trains must only use Platform 18 and 19.

For amended timetable purposes, Gatwick Express have the option of using the following alternative Platforms:

Platform Blocked	Alternative Platform	Remarks
Platform 13	Platform 15	Tractor access gate to open
Platform 14	Platform 12	Tractor access gate to open
Platform 13 & 14	Platform 7 & 8

All movements from the Reigate Line to a Platform that is already Occupied	Approach control on signal T492	{½}
All movements from the Down Redhill to Platforms 0 and 2 via 1909 points at Holmethorpe	Approach control and slow speed through crossovers	{2}
All movements from the Down Redhill to Platform 2 via 1911 points	Approach control and slow speed through crossovers	{½}
Adjustment to Sectional Running Times		
On the Down Redhill Line Only for Freight timing Loads which will be routed towards Tonbridge or Reigate or through the Platform Loops.		
Movement	Reason	Value
Allowance to be shown between Stoats Nest Junction and Redhill	Speed differential and Acceleration	{1½}
Adjustment to Sectional Running Times		
For Freight Timing Loads shown on the Up Redhill Line Only travelling through Redhill which have passed through Godstone or Reigate or passed through Redhill Platform Loops.		
The allowance below is to be shown between Redhill and Stoats Nest Junction.		
ITPS Timing Load	Reason	Value
Freight up to 400t inclusive of Heavy Axle at 60mph	Speed Differential & Acceleration	{½}
Freight up to 1600t inclusive of Heavy Axle at 60mph	Speed Differential & Acceleration	{1}
Freight up to 2400t inclusive of Heavy Axle at 60mph	Speed Differential & Acceleration	{1½}
Freight up to 400t at 75mph	Speed Differential & Acceleration	{1½}
Freight up to 1400t inclusive of Containers at 75mph	Speed Differential & Acceleration	{2}
Freight up to 1600t inclusive of Containers at 75mph	Speed Differential & Acceleration	{2½}
Berthing Facilities		
	Cars	Notes
Loco Hauled Sidings (L.H.S)	36	Non Electrified
Platform 1	8	
Platform 2		
Platform 3		No movements northbound (up direction) trains formed of a 12 car Class 700 EMUs

All Services except as below	5	
Southern, Southeastern and Thameslink	3	
Dwell Times		
All Services	1	

Redhill

Junction Margins

First Movement	Second Movement	Margin
Departure from Platform 3 towards Reigate or crossing move from Platform 0, 1 or 2 towards Earlswood	Up arrival into Platforms 0, 1 or 2 from Earlswood or Tonbridge, Redhill LHS or Tonbridge Goods	4
Train passes/ departs platform 3 towards Earlswood	Train arrives platform 0, 1, 2 from LHS or Tonbridge Goods	4
Train passes/ departs platform 0, 1, 2 towards Earlswood	Train arrives platform 0, 1, 2 from LHS or Tonbridge Goods	4
Train passes on DML	Train arrives platform 0, 1, 2 from LHS or Tonbridge Goods	4
Any train in the Down direction towards and calling at Earlswood	Any train departing or passing Redhill on Down Redhill towards Earlswood	3½
Departure from Platform 0 or 2 in the Up direction	Departure from Platform 0 or 2 in the Up direction	3½
Passing on Up Redhill line	Departure from Platform 0 or 2 in the Up direction, calling at Merstham	2½

Permissive Working

Attaching/Detaching and Platform Sharing is authorised as shown below -

Platform 0 – Up Loop No0	Both Directions	Attaching/Detaching and Platform Sharing*
Platform 1		Attaching/Detaching and Platform Sharing
Platform 2 – Up Loop No2	Both Directions	Attaching/Detaching and Platform Sharing*
Platform 3 – Down Loop	Down Direction	Detaching Only

*Where trains are booked to platform share only in platforms 0 and 2 (e.g. do not attach, detach or run-round), the station is only capable of accommodating a maximum of two trains at any one time in either platform using this methodology

Planning Note

Wherever possible the preferred sequence of Up trains from Platforms 0 and 2 is an Up departure from Platform 2 followed by an Up departure from Platform 0. This is because the route from Platform 0 is restricted by slow speed crossovers.

Platform Reoccupation Margins

First Movement	Second Movement	Margin
Departure from Platform 0, 1 or 2 towards Reigate	Arrival into Platform 0, 1 or 2 from Reigate	3½
Departure from Platforms 0 or 2 in the Up direction	Reoccupation of same platform with Down service	4
Departure of Tonbridge bound train from Platforms 0, 1 or 2	Arrival of train from Tonbridge into Platforms 0, 1 or 2	4
Departure of Down train from Platform 3	Reoccupation of same platform with Down service	2½

Overlap Restrictions

First Movement	Second Movement	Margin
Down depart Platform 3	Down arrive Down Main	1½
Down arrive Down Main	Down depart Platform 3	1
Up depart Platform 2	Up arrive Up Main	1½
Up arrive Up Main	Up depart Platform 2	1

Earlswood

Adjustment to Sectional Running Times

Earlswood

Movement	Reason	Value
Down Slow Line to Down Fast Line	Approach control on signal T197 and speed differential	{½} approaching Earlswood and {½} approaching next timing point after Earlswood
Up Fast Line to Up Slow Line	Approach control on signal T208 and speed differential	{½} approaching Earlswood and {½} approaching Redhill
Up Slow Line to Up Quarry Line	Approach control on signal T216 and speed differential	{½} approaching Earlswood and {1} approaching Stoats Nest Junction
Down Quarry Line to Down Slow Line	Approach control on signal T201 and speed differential	{½} approaching Earlswood and {½} approaching the next timing point after Earlswood

Junction Margins

First Movement	Second Movement	Margin
Pass Up Fast to Up Redhill	Pass Down Slow having not called at Redhill or Earlswood	3
Pass Down Fast/Quarry to Down Slow	Pass Up Fast to Up Quarry	2½

Salfords Aggregate Sidings

The non-stop headway applies for consecutive arrivals at Three Bridges *providing* the second train uses a different platform *and* the correct headway has been applied at the previous timing point irrespective of calling pattern. National TPR section 1.5.5 Application of Planning Headways refers.

Three Bridges Down Thameslink Sidings

Overlap Restrictions

First Movement	Second Movement	Reason	Margin
Train departs Three Bridges Platforms 4 or 5 and enters the Down Thameslink Sidings	Following movement departs Three Bridges into the Down Thameslink Sidings		20

Example, first train departs Three Bridges towards Down Thameslink Sidings at xx.00. Second movement into Sidings can depart Three Bridges at xx.20. This margin provides an allowance for the first train to use the washer, reverse in the headshunt and stable. 8 minutes applies if the second train not washing.

All trains arriving at the Down Sidings must be planned with a 'dot' stop at Three Bridges station. This is because the train will be brought to a stand or near stand at signal T273 before receiving a proceed aspect into the sidings.

Berthing Facilities

Siding	Cars*	Notes
Stabling Siding No 1	24	2 x 12 cars, 3 x 8 cars or 1 x 12 car and 1 x 8 car
Stabling Siding No 2	24	2 x 12 cars, 3 x 8 cars or 1 x 12 car and 1 x 8 car
Stabling Siding No 3	16 or 20	1 x 12 car and 1 x 8 car or 2 x 8 cars

* Assumed to be Class 700 stock

Margins between arrivals and departures

First Movement	Second Movement	Margin
Train arrives at Three Bridges Down Thameslink Sidings from Three Bridges station	Train departs from Three Bridges Down Thameslink Sidings towards Three Bridges station	6

Margins between successive departures

First Movement	Second Movement	Margin
Train departs from Three Bridges Down Thameslink Sidings and passes Three Bridges station	Following movement departs Three Bridges Down Thameslink Sidings towards Three Bridges station either stopping or not stopping	6
Train departs from Three Bridges Down Thameslink Sidings and stops at Three Bridges station (assumes 1 minute dwell at Three Bridges)	Following movement departs Three Bridges Down Thameslink Sidings towards Three Bridges station either stopping or not stopping	8

Planning Note

Pathing or performance allowances must not be placed between Three Bridges and Three Bridges Down Thameslink Sidings in either direction as there are no intermediate signals

Three Bridges Up Thameslink Depot

Acceptance of trains

First Movement	Second Movement	Margin
Train departs Three Bridges Platform 2 or 3 and enters the Up Thameslink Depot	Following movement departs Three Bridges into the Up Thameslink Depot	8
Example, first train departs Three Bridges towards Up Thameslink Depot at xx.00. Second movement into Depot can depart Three Bridges at xx.08.		

Berthing Facilities

Siding	Cars*	Notes
Road 1	36	
Road 2	24	
Road 3	24	
Road 4	24	

* Assumed to be Class 700 EMU stock. A maximum of six planned arrivals or departures is allowed on Depot at any one time.

Margins between arrivals and departures

First Movement	Second Movement	Margin
Train arrives at Three Bridges Up Thameslink Depot from Three Bridges station	Train departs from Three Bridges Up Thameslink Depot towards Three Bridges station	6

Margins between successive departures

First Movement	Second Movement	Margin
Train departs from Three Bridges Up Thameslink Depot and passes Three Bridges station	Following movement departs Three Bridges Up Thameslink Depot towards Three Bridges station either stopping or not stopping	6
Train departs from Three Bridges Up Thameslink Depot and stops at Three Bridges station (assumes 1 minute dwell at Three Bridges)	Following movement departs Three Bridges Up Thameslink Depot towards Three Bridges station either stopping or not stopping	8

Copyhold Junction

Adjustment to Sectional Running Times

Movement	Reason	Value
All trains crossing from DLH (Down Loop) to Up Main	Speed differential due to 40mph crossover	{½}*
All trains crossing from the Down Main to the ULH (Up Loop)	Approach Control and speed differential due to 20mph crossover	{1} approaching Copyhold Junction

*applied at the next timing point

Haywards Heath

Adjustment to Sectional Running Times

Movement	Reason	Value
Up trains arriving in platforms 1 or 4	Approach control on signals T348 or T350	{½}
Attachment in platform 1	Calling-on allowance to be added to second train due to restrictive aspect at signals T337, T348 or T350	{1}
Attachment in platforms 3 or 4	Calling-on allowance to be added to second train due to restrictive aspect at signals T348 or T350	{1}

Berthing Facilities

Location	Cars	Notes
Down Siding North	12	Trains berthed at this location must have been cleaned, watered and CET'd
Platforms 1 and 4	12	Classes 171, 375, 377, 387 and 700 only. Trains berthed at this location must have been cleaned, watered and CET'd

Margins between opposing direction departures

National TPR section 1.5.5 Application of Planning Headways refers.		

Lovers Walk T&R.S.M.D
Berthing Facilities
Maximum Berthing Capacity and Facilities available should be confirmed with Southern Railway Train Specification & Planning Department

Brighton Down Sidings

Allowances

Movement	Value
Allowance for CET on Siding No 1 South prior to movement to Siding No 1 North	{24}

Berthing Facilities

Siding	Cars	Notes
Siding No 1	24 cars	CET & water at South end of Siding No 1
Siding No 2	12 cars	CET & water

Siding Numbers to be shown as follows:

Siding No 1 North - 1N, Siding No 1 South - 1S, Siding No 2 – 2

Headways

Headway between consecutive arrivals on No 1 Siding	42 if first train washes and has CET (assumes first movement is to Siding 1 North) 18 if first train washes but has no CET (assumes first movement is to Siding 1 North).
Arrival on Siding No 1 followed by arrival on Siding No 2	14
Arrival on Siding No 2 followed by arrival on Siding No 1	14
Departures to Brighton station	12

Permissive Working

Permissive working is authorised as shown below -

Siding No 1	Permissive working allowed at the south end only (i.e. the 12 car length of siding alongside CET apron), north end 12 car siding is not permissive.
Siding No 2	Permissive working allowed

Brighton Reception Road

Special Working Requirements

An 'OP' dot stop is required for class 700 trains going to Brighton Down Sidings

Brighton		
Adjustment to Sectional Running Times		
Movement	Reason	Value
Movements to Platforms 3 and 8 where platforms are already occupied any platform that is already occupied	Approach Control "Calling on" for Permissive Working (See also Station Working Arrangements)	{½}
Berthing Facilities		
	Cars	Notes
Platforms 1-8	44	
Connectional Allowances		
All Services except as below	10	
All Southern Services	4	
Junction Margins & Platform Reoccupation		
Movement	Margin	
Platforms 1 and 2, between all conflicting movements and platform reoccupation	3	
Platforms 3, 4, 5 and 6 between all conflicting movements and platform reoccupation	4	
Platforms 7 and 8 where movement is to/from East Coastway, between all conflicting movements and platform reoccupation	3	
Platforms 7 and 8 where movement is to/from Preston Park, between all conflicting movements and platform reoccupation	4	
Depart any platform	Conflicting opposite direction arrival	1
Minimum Turnround – Passenger Services		
	Value	
Services formed of up to 8 cars from the Brighton Main Line (passenger to passenger)	10	
Services formed of up to 8 Cars from the East or West Coastway (passenger to passenger)	7	
Services formed of 9 to 12 Cars (passenger to passenger)	12*	
* 10 minutes can be applied if the previous and next turnrounds at Bedford or Cambridge are 15 minutes or more		
Permissive Working		
Attaching/Detaching and Pplatform Ssharing is authorised as shown below -		
Platform 1	Attaching/Detaching and Platform Sharing – Class 1 and 3 are allowed and trains formed of locomotive and coaching stock	
Platform 2	Attaching/Detaching and Platform Sharing	
Platform 3	Attaching/Detaching and Platform Sharing – Class 1 and 3 are allowed and trains formed of locomotive and coaching stock	
Platform 4	Attaching/Detaching and Platform Sharing - Class 377 / 387 units should not be booked to attach to another 4 car already in the platform as this is not possible due to curvature at the South end of platform	
Platform 5	Attaching/Detaching and Platform Sharing	
Platform 6	Attaching/Detaching and Platform Sharing	
Platform 7	Attaching/Detaching and Platform Sharing	
Platform 8	Attaching/Detaching and Platform Sharing	
Planning Note		
Where possible a departure from Platform 7 towards London Road (Brighton) should not be planned simultaneously with an arrival into Platform 8 from London Road (Brighton). This is because the route setting out of Platform 7 will default to the second set of crossovers at the north end of the platform which prevents a route being set into Platform 8.		
Planning Restriction		

Brighton

~~Due to route setting, trains planned to depart to Brighton Down Sidings, cannot be done from Platforms 5 or 7.~~
Trains must not be planned to run from Brighton platform 5 or 7 to Brighton Down Sidings as the signalling will not allow this to happen

Station Working Requirements

Access to Platforms

Platform 1	For use by West Coastway services ONLY
Platform 2	For use by West Coastway services. Direct movements to/from Lovers Walk Depot can only run via the West Carriage Road but must be maximum no longer than 160 metres/25 SLUs/ 8 coaches .
Platform 3 (full length) Platform 3 North (3N) Platform 3 South (3S)	When running no longer than 77 metres/12 SLUs/4 coaches (or one 3-car Class 158 / 171 or one 2-car Class 171) on to the buffer stop this platform is accessible by any route (3S). Trains no longer than 77m metres 12 SLUs may access platform 3 South (3S) from any route providing that platform 3 is unoccupied by another train When longer than 77 metres/12 SLUs/4 coaches the West Coastway route is not accessible Platform 3 South (3S) is not accessible from / to the Hove direction for trains longer than 77 metres / 12 SLUs - It is not possible to run 4 or more coaches onto 4 coaches already occupying platform 3S from all routes except the West Coastway (3N) from the Hove direction - Due to the position of the track circuits it is not possible to run 4 coaches onto 8 coaches already occupying the platform from the Down Main via T435 signal or Up East Branch via T700 signal except from Lovers Walk Depot (full length) Platform 3 is not accessible from Lovers Walk Depot via the West Carriage Road
Platform 4	- Accessible by any route except the West Coastway - Class 377 units should not be booked to attach to another 4 car already in the platform as this is not possible due to curvature at the South end of platform.
Platform 5 – 8	Accessible by any route except the West Coastway

Brighton Class 1 and Class 9 Services

These services should not be booked into platform 8 as this route is approach controlled from signal T435. These services should ~~also where possible~~ not be booked to enter an occupied platform, ~~as approach control is required because a "calling on allowance" will be required in the schedule~~

Front Train Working

In the event of a front train working with 2 or more loaded services a minimum of 5 minutes should be allowed between departure of front train and rear train to allow indicators etc to be changed.

SO500C PRESTON PARK TO HOVE

Preston Park

Platform 10	12	
Platform 11	12	
Platform 12	12	
Platform 13	12	
Platform 14	12	
Platform 15	10	8 / 9 cars if Class 171

Two 12-car platforms should be kept clear of berthed stock to provide additional capacity during service perturbation or in an emergency

Junction Margins

	Margin
Resetting of route for a departing service following the arrival of a conflicting inwards service	1*
*Although the standard reset rule generally applies at London Bridge station as above, it must also be applied following an arrival if the point of conflict for a subsequent departure would be at Brunswick Court Junction. This is due to the constraints imposed by the overlaps on the signals protecting Brunswick Court Junction	

Overnight Berthing

In Order of Preference

Platform 10
Platform 11
Platform 12

Note: Maximum to be berthed = 72

Connectional Allowance

4

Minimum Turnround – Passenger Stock

Platform Restrictions

Platform 10	Only 10 / 11 cars permitted if Class 171
Platform 11	Only 10 / 11 cars permitted if Class 171
Platform 12	Only 10 / 11 cars permitted if Class 171
Platform 13	Only 10 / 11 cars permitted if Class 171
Platform 14	Only 10 / 11 cars permitted if Class 171
Platform 15	Only 8 / 9 cars permitted if Class 171

Station Working Requirements

ECS Movements

ECS movements to Selhurst T&R.S.M.D after the morning peak are to be routed via Streatham Common unless prior agreement is reached with Network Rail

ECS movements To/From Streatham Hill should be routed via Crystal Palace unless prior agreement is reached with Network Rail

At London termini 3 minutes to be allowed if possible between arrivals on adjacent platforms to allow customer to clear in the morning and evening peak.

Platforming

In the event of a front train working with 2 or more loaded services a minimum of 5 minutes should be allowed between departure of front train and rear train to allow indicators etc to be changed

South Bermondsey Junction

See entry under route – SO680

Brunswick Court Junction

Planning Note

Pathing or performance allowances must not be placed between London Bridge and Brunswick Court Junction in either direction as there are no intermediate signals

Planning Restriction

Crossing moves at Brunswick Court Junction hold the overlaps of the down direction signals protecting the junction thereby preventing conflicting departures from London Bridge.

New Cross Gate Up Sussex Loop

Planning Note

No pathing time to be shown for a train departing/passing the Up Sussex Loop in the Up direction between the Loop and Bricklayers Arms Junction as there is no protecting signal between these locations. Any pathing time required to follow a preceding service should be shown as a dwell in the Loop.

The standage at signal T15 on the Down Crystal Palace Spur to avoid fouling Bromley Jn is 244 metres/38 SLUs/12 cars (or 10/ 11 cars if the train is formed of Class 171 stock).		
Limit of Shunt		
	Length Limit	
Up London Bridge Slow (Clear of T22)	8	
Down Crystal Palace Spur (Clear of T21)	8	
Down London Bridge Slow (Clear of T19)	8	
Down London Bridge Fast (Clear of T17)	8	
Movements Not Permitted		

Norwood Junction

There is no route available from signal T20 on the Up London Bridge Fast to Platform 4. The only routes from this signal are to Platforms 3 or 5.

There is no route available from signal T22 on the Up London Bridge Slow to Platform 4. The only routes available from this signal are to Platforms 1, 3 or 5.

Trains planned to run to Platform 4 must travel via the Fork Arrival Road and signal T10 which provides a route to the Limit of Shunt board at the London end of Platform 4. ECS moves only.

ECS moves departing Selhurst Depot can pass signal T10, S4 or S2 to pass through or stop in Platform 1 or 3, or platform 4 or 5 to complete reverse moves.

Permissive Working

Attaching/Detaching and Platform Sharing is authorised as shown below -

Platform 1	Up London Bridge Slow	Detaching Only
Platform 2	Up London Bridge Slow	Detaching Only
Platform 3	Up London Bridge Fast	Detaching Only
Platform 4	Down London Bridge Fast	Detaching Only
Platform 5	Down London Bridge Slow	Detaching Only
Platform 6	Down Platform Loop	Prohibited

Overlap Restrictions

First Movement(s)	Second Movement	Reason	Margin
Down train departing Platform 5 to Down London Bridge Slow	Down train arriving Platform 6	Overlap on signal T21	2
Down train departing or passing Platform 6 to Down Wallington Line whilst a Down train departs or passes Platform 4	Down train arriving Platform 5	Overlap on Signal T19	2

Planning Note

Empty stock workings from London Bridge or London Victoria should, whenever possible, be timed to run via Peckham Rye (if from London Bridge), Streatham Common and Selhurst to minimise conflicting movements at Norwood Junction.

Trains timed to run from London Bridge or London Victoria to Selhurst Depot via Norwood Junction should include "dot" stop at Norwood Junction to minimise the margins required to avoid conflicting movements with trains running in the opposite direction.

The non-stop headway applies for consecutive departures from Norwood Junction providing the second train uses a different platform and the correct headway is applied at the next timing point irrespective of calling pattern. National TPR section 1.5.5 Application of Planning Headways refers.

The non-stop headway applies for consecutive arrivals at Norwood Junction providing the second train uses a different platform and the correct headway has been applied at the previous timing point irrespective of calling pattern. National TPR section 1.5.5 Application of Planning Headways refers.

Three Bridges Tilgate Sidings

Acceptance of trains

First Movement	Second Movement	Margin
Train departs Three Bridges Platforms 2 or 3 and enters the Three Bridges Tilgate Sidings	Following movement departs Three Bridges into the Three Bridges Tilgate Sidings	8*

* Example, first train departs Three Bridges towards Three Bridges Tilgate Sidings at xx.00. Second movement into Three Bridges Tilgate Sidings can depart Three Bridges at xx.08. This margin provides an allowance for the first train to arrive in the relevant siding and stable.

All trains arriving at the Three Bridges Tilgate Sidings must be planned with a 'dot' stop at Three Bridges station. This is because the train will be brought to a stand or near stand at signal T277 or T279 before receiving a proceed aspect into the depot.

3 or 4 car trains of classes 377 and 387 rolling stock must not be planned to run to/from Tilgate Sidings to avoid a significant gapping risk at signal TD98 and across crossovers TD29a/b, 1754 a/b and 1752 a/b

Berthing Facilities

Siding	Cars*	Notes

Depart Platform 2 towards Pevensey and Westham	Arrive Platform 2 from Pevensey and Westham having called at Cooden Beach and Collington	6*
* When shunt moves are taking place at Bexhill stopping services should not be timed to depart Cooden Beach until 1 minute after the train in front has departed Bexhill platform 2 in either direction due to the protecting signal for the crossover at Bexhill being situated prior to Collington		
Operating Restrictions		

Bexhill

Trains stood at shunt signal 1435 can only be signalled into platform 2 using the crossover. No route is available from this signal to reverse back into platform 1.

St Leonards West Marina CSD

Acceptance of Trains into CSD

1. When the Down Siding (CWM/CET road) is occupied by an incoming movement no other train can be accepted into West Marina from the Main Line via either route
2. When the Shunt Neck is occupied, another movement may be accepted into, or allowed out of St Leonards Railway Engineering Ltd (via either route) but the first train must remain in the Shunt Neck until the second movement has been completed
3. When the Down Siding (CWM/CET road) is occupied by: An outgoing movement, a berthed train or a T4 possession; another train can be accepted into the Shunt Neck or St Leonards Railway Engineering Ltd, subject to the provisions of clause 2 above

Trains To/From the CSD may either be driven by a Driver or by a Shunt Driver, but the following must be noted:

If the Shunter Driver is taking a train from the Shunt Neck to the Carriage Shed, then he is unable to accept a further movement from the Main Line by either route for some 14 minutes after the train has left the Shunt Neck. If a Driver is provided, this is reduced to 2 minutes

If Shunter Driver is bringing a train from the Carriage Shed into the Shunt Neck, he will be unable to accept trains for some 10 minutes before the train is due to leave the Carriage Sidings, until 9 minutes after the train has arrived in the Shunt Neck under clause 2, or until after the train has departed by other clauses.

First Movement	Second Movement	Margin
Train from East Dulwich towards Peckham Rye	Train from Peckham Rye towards Denmark Hill on Up Atlantic Line	1
Train from Peckham Rye towards Denmark Hill on Up Atlantic Line	Train from East Dulwich towards Peckham Rye	3
Planning Note		
Pathing time should not be added between Crofton Road Junction and Peckham Rye as the end of train is likely to foul Crofton Road Junction or Peckham Rye Junction. This applies to all trains from the Atlantic Lines and not the Catford Loop which are longer than 5 coaches or 87m maximum length		

Tulse Hill		
Adjustment to Sectional Running Times		
Movement	Reason	Value
Up trains approaching Platform 1	Approach Control on Signal VC768	{½}
Non-stop trains from Streatham towards Herne Hill that run via Platform 3	Approach Control on Signal VC762	{½}
Connectional Allowances		
All Services (except Thameslink)	3	
Thameslink Route Services	4	
Length Restriction		

Tulse Hill				
The standage at signal VC766 on the Down Leigham Spur to avoid fouling Leigham Junction is 200 metres/31 SLUs/10 cars (or 8/ 9 cars if the train is formed of Class 171 stock).				
The standage at signal VC770 on the Up West Norwood Spur to avoid fouling West Norwood Junction is 160 metres/25 SLUs/8 cars (or 6 / 7 cars if the train is formed of Class 171 stock).				
The standage at signal VC760 on the Up Holborn is 170 metres/26 SLUs /8 car without fouling Tulse Hill South Junction				
The standage at signal VC763 on the Down Holborn is 188 metres/29 SLUs /9 car without fouling Tulse Hill North Junction				
The standage at signal VC762 on the Up Portsmouth is 203 metres/31 SLUs /10 car without fouling Tulse Hill South Junction				
The standage at signal VC765 on the Down Portsmouth is 162 metres/25 SLUs /8 car without fouling Tulse Hill North Junction				
Dwell Time				
All GTR services		1 – may be reduced to ½ minute outside SX peak hours by exception only with the agreement of Train Operator		
Overlap Restrictions				
First Movement		Second Movement	Signal	Margin
Train sat at signal VC165 on Up Portsmouth Line		Up train arrives at or passes platform 3 towards Herne Hill	VC762	0*
Down train arrives at or passes platform 4 from Signal VC165		Up train arrives at or passes platform 3 towards Peckham Rye	VC762	2
*Route is set towards Herne Hill preventing any train arriving or passing Platform 2 at Herne Hill				
Planning Restriction				
Terminating or shunting trains formed of more than 8 cars cannot be planned here.				

Streatham		
Adjustment to Sectional Running Times		
Movement	Reason	Value
All movements towards Streatham Common	Approach Control on signal VC779 and 15mph speed limit on Streatham Spurs	{½}
Connectional Allowances		
All Services	4	
Dwell Time		
All GTR services	1 – may be reduced to ½ minute outside SX peak hours by exception only with the agreement of Train Operator	
Permissive Working		
Attaching/Detaching and Platform Sharing is authorised as shown below -		
Platform 1		Prohibited
Platform 2		Detaching Only

Streatham South Junction		
Adjustment to Sectional Running Times		
Movement	Reason	Value
All movements from Streatham	Approach control on signal TVC789	{½}

Streatham South Junction

towards Wimbledon		
Up trains from Mitcham Junction towards Streatham North Junction	Approach control on signal TVC788	{1}

Length Restriction

A train exceeding 200m/31SLU in length will foul Streatham North Junction when standing at TVC783 on the Reversible Fast Spur in the Down direction. Therefore, junction margins must be based on trains' departure time at Streatham South Junction
A train exceeding 301m/47SLU in length will foul Streatham Junction when standing at TVC787 on the Down Portsmouth. Therefore, junction margins must be based on trains' departure time at Streatham South Junction
The standage at signal TVC782 on the Up Streatham Spur direction to avoid fouling Streatham Common Jn is 179 metres/28 SLUs/8 cars

Mitcham Eastfields

5.4 Platform Lengths

The table below shows the maximum length of train that may use each of the platforms at the following passenger stations. All lengths are in metres. The quoted lengths are the usable lengths from ramp to ramp unless specified. The measurements take no account of the need for signal sighting. Trains longer than the quoted lengths will only be accepted subject to the authority of the Route Director.

Where applicable, please see Section 5.4.1 for full availability of Loop Lengths may differ to Platform Lengths

5.4.1 Loop Lengths

The table below shows the maximum length of train that may use each of the loops at the following locations. All lengths are in SLU (Standard Length Unit – a SLU measures 21 feet) and metres. All lengths are measured from the signal at the exit to the loop to the block joint in rear unless stated otherwise. All lengths quoted exclude allowance for locomotives or stand back unless stated otherwise. Check Sectional Appendix for locations where standage is not quoted.

SO250 FACTORY JUNCTION TO MITRE BRIDGE JUNCTION				
LOCATION	DIRECTION	USABLE LENGTH		NOTES
		SLU	METRES	
Kensington Olympia Down West London (through line)	Down	58	372	This avoids fouling the track circuits preventing a route being set via the Platform Loop (Platform 2)
Kensington Olympia Up West London (through line)	Up	58	372	This avoids fouling the track circuits preventing a route being set via the Platform Loop (Platform 2)

5.5 Timing Allowances

All allowances shown are in minutes.

SX Daytime allowances apply at all times except where specified differently in Sections 5.5.2, 5.5.3, 5.5.4, 5.5.5 and 5.5.6 The locations at which allowances are included within a Train Slot may vary. The total allowance included within a Train Slot will not exceed the maximum value allowed.

All allowances are indicative for the Final Principal Rules and are subject to change.

E [] refers to engineering allowance

P < > refers to performance allowances

A { } refers to adjustment allowances (passing over slow crossovers etc.)

SO500 LONDON VICTORIA TO BRIGHTON			
TIMING SECTION	TYPE	EMU	REMARKS
Approaching Clapham Junction	P	½	All down trains from Victoria
Approaching Purley	P	1	All up trains from Caterham or Tattenham Corner unless replaced by a {1} calling on allowance when attaching

SO500C PRESTON PARK TO HOVE			
TIMING SECTION	TYPE	EMU	REMARKS
Approaching Preston Park	P	1	All up trains from the West Coastway route. Note: this value is not negotiable and must not be removed from train schedules

SO510 LONDON BRIDGE TO EPSOM DOWNS (See also SO130 & SO280A)			
TIMING SECTION	TYPE	EMU	REMARKS
Between Blackfriars Junction and Bricklayers Arms Junction	P	2	All Down trains from the Thameslink Core must have a minimum of <2> minutes between Blackfriars Junction and Bricklayers Arms Junction, <1> minute of which must be placed approaching London Bridge whenever possible). Note: the total value of 2 minutes is not negotiable
Between Bricklayers Arms Junction and Blackfriars Junction	P	2	All Up trains to the Thameslink Core must have a minimum of <2> minutes between Bricklayers Arms Junction and Blackfriars Junction, <1> minute of which must be placed approaching Blackfriars Junction whenever possible). Note: the total value of 2 minutes is not negotiable

SO520 THREE BRIDGES TO HAVANT VIA HORSHAM			
TIMING SECTION	TYPE	EMU	REMARKS
Approaching Three Bridges	P	1	All up trains originating from south of Horsham. Note: this value is not negotiable and must not be removed from train schedules
Approaching Arundel Junction	P	1	All trains that have not started from Littlehampton, Bognor Regis, Chichester or Barnham. Note: this value is not negotiable and must not be removed from train schedules

SO590 KEYMER JUNCTION TO EASTBOURNE			
TIMING SECTION	TYPE	EMU	REMARKS
Approaching Keymer Junction	P	1	All up trains from Lewes. Note: this value is not negotiable and must not be removed from train schedules

SO700 STREATHAM SOUTH JUNCTION TO SUTTON (VIA WIMBLEDON)			
TIMING SECTION	TYPE	EMU	REMARKS
Approaching Sutton	P	1	Trains arriving at Sutton via Wimbledon. Note: this value is not negotiable and must not be removed from train schedules

Light Engine movements to be treated as passenger trains when applying margins/allowances where there is a freight/passenger difference.

SIMBIDS

Timing allowances for all trains for SIMBIDS operation: (additional allowance to operate in reverse direction):-

- Between Balcombe Tunnel Junction and Copyhold Junction - on both Up and Down lines
- Between Copyhold Junction and Haywards Heath - on both Up and Down lines
- Between Haywards Heath and Wivelsfield - on both Up and Down lines
- Between Wivelsfield and Preston Park - on both Up and Down lines

6 Timetabling Considerations

6.1 Advertised and Working Times

Advertised Times maybe amended by agreement between Train Operator and Network Rail

6.2 Timing of Light Locomotives

It is a general Principal that all light locomotive movements will be timed. Any exceptions to this must be agreed by the appropriate Area Timing Specialist.

Light Engine movements to be treated as passenger trains when applying margins/allowances where there is a freight/passenger difference.

Train formation	Permissible speed	
	90 mph or above	85 mph or less
Any number of locomotives running light, or one or two locomotives with one, two or three vehicles, or three or more locomotives and any number of vehicles	75 mph	60 mph

Train formation	Permissible speed		
	100 mph or above	90 or 95 mph	80 or 85 mph
A locomotive with four, five or six vehicles, or two locomotives and from four to 10 vehicles	90 mph	80 mph	75 mph

6.3 Two-Track Railway Timetable

For times when Two Track Railway Operations applies, refer to Section 4 within the Engineering Access Statement

During periods when the Brighton Main Line timetable is planned to run over two tracks instead of four, the following allowances are to be added to allow for crossing movements between Fast/Quarry and Slow Lines.

Down

{½}	approaching Balham
{½}	approaching Stoats Nest Junction
{½}	approaching Earlswood
{½}	approaching next timing point after Earlswood
<1>	approaching Gatwick Airport (GTR services only)

Up

{½}	approaching Earlswood
{1}	approaching next timing point after Earlswood
{½}	approaching Stoats Nest Junction
{½}	approaching Balham
<1>	approaching East Croydon (GTR services only)
