

**LNE TPR Changes in V4 2025 Rules**

<b>Section</b>	<b>Change</b>	<b>No. of changes</b>
1	Introduction and General Notes	
1.1	Index of Routes <ul style="list-style-type: none"> <li>• No change</li> </ul>	
1.2	Sectional Appendices and Rule Book	
1.2.1	Sectional Appendix <ul style="list-style-type: none"> <li>• No change</li> </ul>	
1.2.2	Rule Book <ul style="list-style-type: none"> <li>• No change</li> </ul>	
1.3	Definitions	
1.3.1	Train Classification <ul style="list-style-type: none"> <li>• 1Lxx – additional definition added for London King’s Cross to Letchworth semi-fast services operated by GTR.</li> <li>• 1Rxx – changed to reflect 1Lxx definition update.</li> </ul>	
1.3.2	Days of Operation <ul style="list-style-type: none"> <li>• No change</li> </ul>	
1.3.3	Traction and Rolling Stock <ul style="list-style-type: none"> <li>• No change</li> </ul>	
1.3.4	Line Codes <ul style="list-style-type: none"> <li>• No change</li> </ul>	
1.3.5	Activity and Other Codes <ul style="list-style-type: none"> <li>• No change</li> </ul>	
2	Route Description	
2.1	Planning Geography <ul style="list-style-type: none"> <li>• LN101 – Gasworks (plural) Tunnel, correction to match Sectional Appendix. Line code DX deleted as this is not used.</li> <li>• LN101 – Belle Isle, line codes BX and DX deleted as these are not used.</li> <li>• LN101 – Finsbury Park Signal K60 removed from geography as it has no SRTs or network links. Line codes reverted SL1 to SL at Finsbury Park, Harringay &amp; Hornsey in down direction only (as per 2024 v4.2 / 2025 v2.1).</li> <li>• LN101 – Welwyn Reversing Siding description amended to match Sectional Appendix</li> <li>• LN101 – Welwyn Up Yard description amended from Welwyn FD</li> <li>• LN101 – Welwyn Garden City Signals YB2040, 2044 and 2042, updated TIPLOC code shown in Notes, and details of when these locations are used.</li> <li>• LN101 – Stevenage Signal YB2340, updated TIPLOC code shown in Notes, and details of when this locations is used.</li> <li>• LN101 – Hitchin, blank line code added in Down direction. Notes running via Down Fast amended for clarity.</li> <li>• LN101 – Cambridge Jn, Note amended to refer to next timing point on LN125 which is Letchworth Garden City.</li> <li>• LN101 – Hitchin Down Yard DCF route code added in down direction.</li> <li>• LN101 – Hitchin Signal YB2536. Note has been updated for clarity and consistency. Updated TIPLOC is shown.</li> <li>• LN101 – Hitchin North Jn, Note amended to refer to next timing point on LN125 which is Letchworth Garden City.</li> <li>• LN101 – Cadwell – Note amended for clarity. TIPLOC added.</li> </ul>	

- LN101 – Grantham Shunt Signal D1281, missing ‘S’ added to Code column.
- LN101 – Arksey Loop shown correctly as Arksey Down Passenger Loop to match Sectional Appendix.
- LN105 – Moorgate Signal YA3102 removed from geography as it has no SRTs or network links
- LN105 – Drayton Park Signal YA4187 and Signal YA3190 removed from geography. Both TIPLOCs have no SRTs or network links
- LN120 – Watton-at-Stone (with hyphens), correction to match Sectional Appendix.
- LN125 – Hitchin deleted from this line of route as per Sectional Appendix, this line of route commences from Cambridge Jn.
- LN125 – Cambridge Jn added as a reference point and the start of this line of route
- LN125 – Hitchin Signal YB4202, Notes amended to correct line name and TIPLOC.
- LN125 – Hitchin Signal YB4244, Notes amended for clarity and TIPLOC detail updated.
- LN125 – Hitchin Signal YB3283, TIPLOC detail updated.
- LN125 – Hitchin East Jn, Note amended to confirm route is via Down Royston Flyover.
- LN126 – Hitchin North Jn, Notes amended to correctly show the route via Down Royston Flyover.
- LN126 – Hitchin East Jn, Notes amended to correctly show next timing point on LN125 which is Letchworth Garden City.
- LN600 – Colton Jn – Trains to Hambleton Jn, added ‘from’
- LN600 – Down and Up Holgate Goods Loop added to planning geography with note to clarify TIPLOC
- LN600 – York Holgate Sidings note added to clarify TIPLOCs
- LN600 – Holgate Jn. Note amended to refer correctly to the next timing point on LN618 as York Yard South Jn.
- LN600 – York LIP/York TPE line codes corrected (can only depart in the Up direction to York or York NRM). Note added not to use York LIP (to be deleted later)
- LN600 – Skelton Jn. Note amended to refer correctly to the next timing point on LN618 as York Yard South Jn.
- LN600 – Thirsk Sidings location added
- LN600 – Thirsk Signal Y686 added
- LN600 – Morpeth Up Passenger Loop has code ‘S’ added.
- LN682 – Note added to header to advise that the route beyond Petteril Bridge Jn to Carlisle North Jn can be found in the North West & Central Timetable Planning Rules.
- LN736 – Pasture Street Signal 1000. Corrected name of location of signal to Grimsby Loop
- LN736 – Pasture Street Signal 981. Corrected name of location of signal to Cleethorpes Single.
- LN736 – Grimsby Marsh Jn. Corrected name of location to Marsh West Jn.
- LN736 – Brocklesby East Jn and Brocklesby West Jn added as reference locations.
- LN736 – Barnetby East Jn added as reference point.
- LN736 – Barnetby, line code GL added in the Down direction as this applies for movements to Barnetby Down Yard
- LN736 – Barnetby Down Yard added as a planning location.

- LN736 – Kirton Lime Sidings, add suffix SB to reflect correct name of this location.
- LN736 – Trent East Jn and Trent West Jn added as reference locations.
- LN736 – West Burton East Jn and West Burton West Jn added as reference points with West Burton Power Station shown between these locations.
- LN736 - Gringley Road Loop renamed as Up Thrumpton Loop. New TIPOC and Network Links are required.
- LN736 – Worksop West Jn added as a reference point.
- LN804 – Masborough Jn – code ‘S’ deleted and replaced by ‘F’. This is to capture all freight movements via this location including those routed via Beighton.
- LN836 – Copley Hill West Jn notes amended.
- LN836 – Holbeck Jn shown as conditional with note that it is not a timing point for trains via Copley Hill Chord
- LN836 – Copley Hill East Jn and Whitehall West Jn added for reference.
- LN836 – Whitehall Road GF spelling corrected. Whitehall Goods Yard description amended to match Sectional Appendix
- LN836 – Whitehall Jn additional line codes added and notes updated. Whitehall East Jn added for reference.
- LN836 – Leeds West Jn DM line code added in up direction
- LN854 – Standard abbreviation of ‘Junction’ applied throughout.
- LN854 – Mirfield East Jn reference to Dewsbury added as next timing point on diverging route (LN860) in notes.
- LN854 – Thornhill LNW Jn note amended to match how this is shown on LN860; reference to Dewsbury added as previous timing point from converging route.
- LN860 – Copley Hill East Jn shown as reference only as we do not time trains here; notes updated for clarity.
- LN882 – Planning geography is reverted to the Version 2 proposal, removing changes that were included in Version 3.
- LN888 – Knottingley South Jn, Notes amended reference to Knottingley East Jn to England Lane, matches Version 2 proposal.
- LN898 – Howden to become mandatory timing point.
- LN894 – Knottingley East Jn reverted to the Version 2 proposal.
- LN912 - Planning geography is reverted to the Version 2 proposal, removing changes that were included in Version 3.
- LN922 - Missing line code E added at Whitehall Jn and notes corrected; Whitehall West Jn added for clarity.
- LN922 - Armley Jn notes added referencing Leeds West Jn as next timing point on Harrogate / A or B lines (NB Whitehall Jn not a timing point on these lines).
- LN928 – Bradford Forster Square Signal L4539 location added.

## 2.2 Route Opening Hours

- LN682 – Note added to header to advise that the route beyond Petteril Bridge Jn to Carlisle North Jn can be found in the North West & Central Timetable Planning Rules.

## 3 Electrification

### 3.1 Electrification Limits

- No change

### 3.2 Electrification Supply Restrictions

- LN600 – notes shown here are deleted and replaced by new wording, consistent with proposal for Scotland. This refers to the Sectional Appendix for details of restrictions.

#### 4 Rolling Stock Restrictions

##### 4.1 Locomotive Route Availability

- No change

##### 4.2 Passenger Stock Restrictions – no change

- No change

##### 4.3 Freight Wagon Restrictions

- No change

##### 4.4 Freight Train Load Limits

- No change

##### 4.5 Freight Train Length Limits

- No change

##### 4.6 Engineers' Trains Restrictions

- No change

#### 5 Running Times, Margins and Allowances

##### 5.1 Sectional Running Times

###### 5.1.1 Source of Current SRTs

- No change

###### 5.1.2 Method of Calculation

- No change

###### 5.1.3 New and Revised Sectional Running Times

- To be published separately

###### 5.1.4 Timing of Trains Consisting of Passenger Vehicles on Goods Lines

- No change

##### 5.2 Headways

###### 5.2.1 Headway Values

- LN682 – Note added to header to advise that the route beyond **Petteril Bridge Jn to Carlisle North Jn** can be found in the North West & Central Timetable Planning Rules.
- LN836 – **South Kirkby Jn to Hare Park Jn**, first headway exception shown deleted and this is correctly described as a junction margin in section 5.3.
- LN836 - Amendments to how the headways are shown between **Holbeck Jn to Leeds** to align with how the headways should be shown on other lines of route. Note Armley Jn not a timing point on LN836 and not listed in the down direction.
- LN860 – EIS G Headways amended at Greenfield / Diggle Jn (down direction) and Marsden / Diggle Jn (up direction) following clarification on the operation of Tunnel Controls at Standedge Tunnel.
- LN875 – Headways in Up direction are reverted to Version 2 proposal.
- LN882 – Headways are reverted to Version 2 proposal.
- LN898 – Headway **Micklefield (excl) to Selby** withdrawn and replaced by new sections **Micklefield (excl) to Hambleton West Jn**, and **Hambleton West Jn (excl) to Selby**
- LN912 – Headways are reverted to Version 2 proposal.
- LN922 – Headway between **Whitehall Jn/Armley Jn and Apperley Jn (incl)** reduced from 4 to 3
- LN930 – Headway changed to AB+2 where ETB applies vice OTW

###### 5.2.2 General Capacity Constraints

- No change

## 5.3

## Junction Margins and Station Planning Rules

- Standard Values
  - Platform End Margins, first entry made clearer that first movement can be arrival or pass, and second movement is in the opposite direction. This aligns with other TPR versions.
  - New standard reversal for TPE Class 802 listed under exceptions.
- LN101
  - **Finsbury Park** – Note to second entry under Adjustments to Sectional Running Times deleted. The move described is not possible. There is a {½} adjustment shown at Alexandra Palace if crossing from SL2 to SL. Movement Up – delete reference to 225 and replace with 91 to be consistent with definitions provided in 1.3.3.
  - **Harringay** – Second entry under Adjustments to Sectional Running Times amended to refer to correct signal. Adjustment for pass from Harringay Park Jn added that this applies for movements towards Alexandra Palace, not applicable to trains terminating or stopping at Ferme Park. Note added to clarify that adjustments shown apply approaching next timing point as they are for acceleration from lower speed route. Movement Up corrections and expansion of wording, new entry added. Three additional junction margins added and corrections to existing margins.
  - **Alexandra Palace** – Adjustments to Sectional Running Times, additional entry added in Down direction for crossing moves from SL1 to Down Hertford or FL. Additional entry in Up direction for pass SL1 to FL. Delete references to 225 and replace with 91 to be consistent with definitions provided in 1.3.3.
  - **Potters Bar** - Delete references to 225 and replace with 91 to be consistent with definitions provided in 1.3.3.
  - **Welwyn Garden City** – References to Signals K603, K606, K608, K620 and K622 changed to refer to YB1033, YB2028, YB2026, YB2048 & YB2046 respectively where signal IDs have been changed following resignalling. Dwell time added for Class 379. Standard note added to 700 add 717 dwells when these can be reduced. Delete references to 225 and replace with 91 to be consistent with definitions provided in 1.3.3.
  - **Digswell** - Reference to Signal K617 changed to refer to YB1051 where the signal ID had been changed following resignalling.
  - **Stevenage** – Planning Restrictions expanded to include the restriction imposed by Down trains planned to depart from Platform 2. Station Working entry is consolidated into this section. Delete references to 225 and replace with 91 to be consistent with definitions provided in 1.3.3.
  - **Hitchin** – Delete references to 225 and replace with 91 to be consistent with definitions provided in 1.3.3.
  - **Sandy** - Delete references to 225 and replace with 91 to be consistent with definitions provided in 1.3.3.
  - **Huntingdon** - Delete references to 225 and replace with 91 to be consistent with definitions provided in 1.3.3.
  - **Holme Jn** - Delete references to 225 and replace with 91 to be consistent with definitions provided in 1.3.3.
  - **Peterborough Virtual Quarry** – entry deleted as the track has been realigned and restrictions no longer apply.
  - **Tallington Jn** - Delete references to 225 and replace with 91 to be consistent with definitions provided in 1.3.3.

- **Stoke Jn** - Delete references to 225 and replace with 91 to be consistent with definitions provided in 1.3.3.
- **Grantham** - Delete references to 225 and replace with 91 to be consistent with definitions provided in 1.3.3.
- **Grantham** – South end movements, fourth margin, wording of the second movement has been amended for clarity. Margin is unchanged.
- **Newark North Gate** - Delete references to 225 and replace with 91 to be consistent with definitions provided in 1.3.3.
- **Retford High Level**. References to Down Passenger Loop and Down platform replaced with Platform 2 for consistency.
- LN105
  - **Moorgate** – Simplification of junction margins and platform re-occupations table. Values are unchanged.
- LN120
  - **Bowes Park** – Add Adjustments to Sectional Running Times entry for trains passing this location to the Reversing Siding.
- LN125
  - **Letchworth Garden City EMU Sidings** – Additional margin shown for reoccupation of Reception, discussed at April TPR Forum.
- LN600
  - **York TPE Depot** – new location with 10 new margins proposed
  - **Newcastle** – DMU/EMU minimum turnround exception reworded to make it clear that the minimum turnround can be reduced to 5, not that the minimum pathing should be 5.
  - **Morpeth** – New margin Up pass/depart followed by Depart Morpeth Up Passenger Loop. One margin amended and one deleted.
  - **Morpeth North Jn** – Two margins added. One deleted and amendments to five other margins.
  - **Chevington** – Two margins amended wording to clarify that down arrival in loop (first train) is after the following train has passed Morpeth (previous Tiploc)
  - **Wooden Gate** (singular) – Titles and wording corrected to match Sectional Appendix
  - **Alnmouth for Alnwick** – Two margins amended wording.
- LN682
  - Note added to header to advise that the route beyond **Petteril Bridge Jn to Carlisle North Jn** can be found in the North West & Central Timetable Planning Rules.
  - **King Edward Bridge South Jn** – note referring to entry on LN600 reworded for consistency.
- LN684
  - **Low Fell Jn** entry added, rules referenced under LN600.
  - RMT renamed more descriptively as **Low Fell Royal Mail Terminal (RMT)**. This matches Planning Geography.
  - **Norwood Jn** entry added, rules referenced under LN682.
- LN736
  - **Marsh Jn** corrected name to **Marsh West Jn**.
- LN824
  - Line of Route added to this section of the TPR. **Moorthorpe** rules are referenced under LN804 and **South Kirkby Jn** rules are referenced under LN836.
- LN836

- **South Kirkby Jn.** Rules are reworded for consistency and clarity. Diverging margin added for first move to **Adwick Jn** followed by second move to **Moorthorpe**. Converging margin added in opposite direction, this was previously shown as headway exception.
- LN840
  - **Whitehall East Jn.** Standage information is shown.
  - **Engine Shed Jn.** Standage information is shown.
- LN854
  - **Mirfield East Jn** – Second Junction Margin wording of second movement amended to make it clear that this is a departure from Mirfield. Diverging margins added in down direction.
  - **Wakefield Kirkgate** – Dwell time: remove Class 68 Mk5 from entry.
- LN860
  - **Marsden** (EIS G) – Adjustments to Sectional Running Times. Movement Down note ‘applied approaching next timing point’ added. Removed reference to SL4729. Movement up acceleration from 15mph pointwork ‘applied approaching next timing point’ note added. Final movement with 0 value deleted.
  - **Marsden** (EIS G) – third and fifth junction margins deleted; other margins wording amended. New planning restriction added.
  - **Huddersfield** (EIS G) – down adjustment wording amended. Four new margins added; six deleted and four amended.
  - **Hillhouse** (EIS G) – one margin added; one deleted and one amended. Minimum turnaround to/from London removed.
  - **Bradley Jn** (EIS G) – adjustments wording amended – removed stopping/not stopping at Deighton where values are same. Removed 2 margins related to Deighton. Other margins reworded for consistency and clarity.
  - **Mirfield East Jn** – Second Junction Margin wording of second movement amended to make it clear that this is a departure from Mirfield. Diverging margins added in down direction.
  - **Dewsbury** – Dwell time: remove Class 68 Mk5 entry
  - **Batley East Jn** – Existing margins deleted replaced with two new margins offset at Batley.
- LN862
  - **Penistone** – Minimum turnaround reduced to 5.
- LN868
  - **Barnsley** – Platform reoccupation values reinstated.
- LN880
  - **Malton** – Dwell time: remove Class 68 Mk5 entry.
  - **Seamer** – Dwell time: remove 14x from note.
- LN882
  - **Pontefract Monkhill** – Junction Margins reverted to Version 2 proposal.
  - **Knottingley West Jn** – Junction Margins reverted to Version 2 proposal.
  - **Knottingley East Jn** – entry for Adjustments to Sectional Running Times and Junction Margins reinstated as per Version 2 proposal.
  - **England Lane Level Crossing** – entry deleted.
  - **Sudforth Lane SB** – entry for Adjustments to Sectional Running Times reinstated as per Version 2 proposal.
  - **Whitley Bridge** – entry deleted.

- **Whitley Bridge Jn** – Junction Margins reinstated as per Version 2 proposal.
  - **Gowdall Lane Jn** – entry deleted.
- LN912
  - **Goole** – Entry reverted to Version 2 proposal.
- LN922
  - **Whitehall West Jn.** Standage information is shown.
  - **Armley Jn.** Existing junction margins are rewritten for clarity and consistency; no change to values. Standage information is shown.
  - **Kirkstall Loop** – Junction Margins are reworded for clarity. Same time margin added for first move depart Kirkstall Forge, second movement depart Kirkstall Loop. For non-stop trains passing direct from Armley Jn to Apperley Jn, freight depart loop 3 minutes before that preceding train reaches Apperley Jn.
  - **Skipton** – Removal of one train working restriction on Rylstone branch.
- LN928
  - **Bradford Forster Square** – Reduced margin for depart Platform 0 or 1 followed by conflicting arrival to any platform replaces margin for departure from P1. Standard arrival followed by conflicting departure 1 minute margin has been included.
- LN930
  - **Rylstone** – Operating note amended to remove the one train working restriction on the branch avoiding the need for an extra loco in the working.

## 5.4

## Platform Lengths

- **Bradford Forster Square**, new platform 0 length added; Platform 1 length amended
- Entry for **Chesterfield** deleted. This duplicates the same information shown in East Midlands TPR where this correctly belongs.
- **Retford**, low level Platforms 3 and 4 now show direction information for clarity.
- **Watton-at-Stone** (with hyphens), correction to match Sectional Appendix

## 5.4.1

## Loop Lengths

- LN101 – **Claypole** correctly named Up Passenger Loop and Down Passenger Loop to match Sectional Appendix.
- LN101 – **Newark Northgate**, correctly shown as **Newark Goods Loop** to match Sectional Appendix.
- LN101 - **Arksey Down Passenger Loop** added. Details taken from Sectional Appendix.
- LN150 – **Doncaster Down Decoy** lengths corrected (values incorrectly converted from feet)
- LN600 – **Darlington Down Loop** replaces entry for Darlington DPL, correction of name.
- LN600 – **Darlington Down Bypass** added, length taken from Sectional Appendix.
- LN600 – **Low Fell Down/Up Goods** renamed **Tyne Yard Reversible Goods** to match Sectional Appendix.
- LN600 – **Berwick-upon-Tweed Down Goods Loop** length amended to match Sectional Appendix.
- LN600 – other loops have full names/descriptions shown where this will avoid confusion.
- LN860 – **Diggle Down Passenger Loop** details transferred from NW7021.

- 5.5 Timing Allowances
- 5.5.1 SX Daytime
  - LN682 - Note added to header to advise that the route beyond Petteril Bridge Jn to Carlisle North Jn can be found in the North West & Central Timetable Planning Rules.
  -
- 5.5.2 SX Nighttime
  - LN600 – Final 3 allowances shown removed along with associated note. There is no allowance shown on Scotland (SC147) in conjunction with this entry.
- 5.5.3 SO Daytime
  - No change
- 5.5.4 SO Nighttime
  - No change
- 5.5.5 Sunday Daytime
  - No change
- 5.5.6 Sunday Nighttime
  - LN101 Peterborough to Stoke entry deleted. The route is closed overnight on Sunday so engineering allowances do not apply.
  - LN101 Loversall Carr Jn to Doncaster allowances previously shown on LN600 are correctly shown here.
  - LN600 Loversall Carr Jn to Doncaster allowances shown here are deleted and are now correctly shown on LN101.
- 6 Timetabling Considerations
- 6.1 Advertised and Working Times
  - No change
- 6.2 Timing of Light Locomotives
  - No change
- Appendix A Route Code Diagrams
  - Diagrams for line codes BX and DX are deleted.
- Appendix B Timing Point Diagrams
  - No change

# 1 Introduction and General Notes

Network Rail provide the Timetable Planning Rules document to Train Operators and other interested parties to set out the rules which are applicable to Bids for scheduling of train paths on the Network Rail network. Separate sections of Timetable Planning Rules are prepared for each Route with a National Timetable Planning Rules document setting out procedures to be followed and other nationally applicable rules.

Network Rail will determine the contents of Timetable Planning Rules through consultation with Train Operators with the primary aim of achieving the optimal balance between access to the network for train operations and performance robustness of the resulting train plan. This consultation is in line with the Network Code Part D, and Train Operators have a right of appeal to Timetabling Panel against the contents of the Final Timetable Planning Rules.

The Timetable Planning Rules are revised on a bi-annual basis, each revised version being operative for the same Timetable Period as the Working Timetable to which they pertain. Timetable Planning Rules may be changed only through this twice-yearly process or by the change procedure described in the National Timetable Planning Rules.

Train Operators' Access Proposals for Train Slots must be compliant with Timetable Planning Rules. If a Train Operator wishes to submit an Access Proposal for a Train Slot which is not compliant with Timetable Planning Rules, it should consult the Network Rail Capacity Planning Team to establish whether an amendment to Timetable Planning Rules is likely to be agreed and, if appropriate, submit an amendment proposal which will be considered by Network Rail in accordance with the Change Procedure set out in the National Timetable Planning Rules. The Timetable Planning Rules amendment proposal should be submitted to Network Rail as early as possible as and certainly no later than the time of submission of the Access Proposal. If the proposed change is likely to involve the calculation of new sectional running times or a physical investigation, then the Train Operator should liaise with the Capacity Planning Team to establish a realistic timescale for evaluation of the proposed change before submission of the Access Proposal.

## 1.1 Index of Routes

Information arranged on a line of route basis in this document is presented in the following order:

LN101	London King's Cross to Shaftholme Jn
LN105	Moorgate to Finsbury Park Jn
LN110	Canonbury West Jn to Finsbury Park Jn
LN115	Copenhagen Jn to Camden Road Central Jn
LN120	Wood Green North Junction to Langley Jn (via Hertford)
LN125	Hitchin Cambridge Jn to Royston (inclusive)
LN126	Hitchin North Junction to Hitchin East Junction
LN135	King's Dyke (exclusive) to Crescent Junction
LN145	Marholm Junction to Glinton Junction
LN147	Helpston Junction to Uffington
LN150	Flyover East Jn to Decoy North Jn
LN155	Flyover East Jn to Loversall Jn (Up Loversall Curve)
LN160	Loversall Carr Jn to Flyover West Jn
LN165	Harringay Park Jn to Harringay Jn
LN170	Werrington Jn to Flyover East Jn (via Lincoln)
LN175	Sleaford South Jn to Sleaford East Jn
LN180	Sleaford West Jn to Sleaford North Jn
LN185	Allington West Jn to Skegness
LN190	Allington East Jn to Allington North Jn (Allington Chord)
LN195	Grantham Nottingham Branch Jn to Allington West Jn (inclusive)
LN200	Wrawby Jn to Pelham Street Jn
LN206	Newark Flat Crossing (inclusive) to West Holmes Jn
LN210	Newark Crossing Curve line
LN215	Boultham Jn to Pyewipe Jn
LN220	Bessacarr Jn to Black Carr Jn
LN235	Rossington Colliery Branch
LN600	Shaftholme Jn to Reston GSP
LN618	Holgate Jn to Skelton Jn
LN620	King Edward Bridge East Jn to King Edward Bridge North Jn
LN622	Forth branch
LN624	Northallerton Castle Hills Jn to Castle Hills West GF
LN626	Northallerton High Jn to Northallerton East Jn
LN627	Northallerton Longlands Jn to Newcastle East Jn via the Coast
LN628	South Hylton to Sunderland South Jn
LN629	Pelaw Metro Jn to Pelaw South Jn
LN630	Pelaw North Jn to Pelaw Metro Jn
LN631	Darlington South Jn to Eaglescliffe South Jn
LN632	Stockton Cut Jn to Saltburn
LN634	Guisborough Jn to Whitby
LN636	Beam Mill Jn to Slag Road (Lackenby)
LN638	Grangetown Shell Jn to Cleveland Freightliner Terminal (Wilton)
LN640	ICI Wilton Coal Terminal
LN642	Saltburn West Jn to Boulby Mine
LN644	Hartburn Curve
LN646	Norton-on-Tees South to Ferryhill South Jn
LN648	Norton-on-Tees West to Norton-on-Tees East
LN652	Billingham Jn to Seal Sands Storage
LN656	Seaton-on-Tees Branch
LN662	Ryhope Grange Jn to Hendon
LN664	Boldon East Jn to Boldon North Jn
LN666	Boldon West Jn to Tyne Dock
LN670	Jarrow Branch

LN672	Wardley to Pelaw Jn
LN674	High Level Bridge Jn to Greensfield Jn (West Curve)
LN676	Park Lane Jn to King Edward Bridge South Jn
LN678	Darlington North Jn to Eastgate
LN682	King Edward Bridge South Jn to Carlisle North Jn
LN684	Low Fell Jn to Norwood Jn
LN694	Benton North Jn to Morpeth North Jn via Bedlington
LN696	Hepscott Jn to Morpeth Jn
LN698	Butterwell South Branch
LN700	Butterwell North Branch
LN702	Bedlington North to Lynemouth Alcan
LN706	West Sleekburn Jn to North Blyth
LN708	Winning Jn to Marchey's House Jn
LN724	Holgate Jn to Skelton Jn
LN736	Cleethorpes to Nunnery Main Line Jn via Retford
LN738	Great Coates No.1 to Union Dock
LN740	Grimsby Marsh West Jn to Humber Road Jn
LN741	Habrough Jn to Ulceby South Jn
LN742	Killingholme to Brocklesby Jn
LN744	Ulceby North Jn to Barton on Humber
LN746	Cottam Power Station Branch
LN748	Retford Western Jn to Thrumpton West Jn
LN750	Woodburn Jn to Deepcar
LN752	Wrawby Jn to Marshgate Jn
LN754	Scunthorpe Foreign Ore Branch
LN756	Scunthorpe Trent Jn to Roxby
LN758	Branccliffe East Jn to Kirk Sandall Jn
LN762	St Catherine's Jn to Decoy South Jn
LN764	St Catherine's Jn to Potteric Carr Jn (Low Ellers Curve)
LN766	Bentley Jn to Hexthorpe Jn (Doncaster Avoiding Line)
LN768	Mansfield Woodhouse to Shireoaks East Jn
LN772	Warsop Jn to Shirebrook Jn
LN782	Woodend Jn to Shireoaks West Jn
LN784	High Marnham to Shirebrook East Jn
LN786	Bevercotes Colliery Branch
LN788	Thoresby Colliery Branch
LN790	Rufford No.1 Coal Stacking Site to Clipstone East Jn
LN800	Clipstone South Jn to Clipstone West Jn
LN802	Welbeck Colliery Branch
LN804	Tapton Jn to Gascoigne Wood Jn via Sheffield
LN806	Tapton Jn to Masborough Jn via 'Old Road'
LN807	Dore South Jn to Dore West Jn
LN808	Dore Station Jn to Earles Sidings (excl.)
LN809	Shepcote Lane West Jn to Tinsley Yard East End
LN810	Shepcote Lane West Jn to Tinsley South Jn
LN812	Shepcote Lane East Jn to Broughton Lane Jn
LN814	Tinsley North Junction to Sheffield Tram Transfer Line
LN815	Parkgate Junction to Sheffield Tram Parkgate Transfer Line
LN816	Beighton Jn to Woodhouse Jn
LN818	Holmes Jn to Rotherham Central Jn (Holmes Curve)
LN824	Moorthorpe Jn to South Kirkby Jn
LN826	Doncaster South Yorkshire Jn to Swinton
LN828	Mexborough Jn to Aldwarke Jn via Kilnhurst
LN830	Aldwarke Jn to Woodburn Jn
LN832	Doncaster Bridge Jn to St. James Jn
LN836	Doncaster Marshgate Jn to Neville Hill East Jn

LN838	Leeds Armley Jn to York Skelton Jn via Harrogate
LN840	Engine Shed Jn & Holbeck Depot Junction to Whitehall East Jn
LN842	Thorpe Marsh Jn to Adwick Jn
LN844	Applehurst Jn to Joan Croft Jn (Applehurst Loop)
LN846	Carcroft Jn to Skellow Jn
LN848	Hare Park Jn to Crofton West Jn
LN850	Wakefield Westgate South Jn to Wakefield Kirkgate West Jn
LN852	Holbeck Jn to Bradford Interchange
LN854	Hall Royd Jn to Colton Jn
LN858	Milner Royd Jn to Bradford Mill Lane Jn
LN859	Greetland Jn to Dryclough Jn
LN860	Diggle Jn to Copley Hill East Jn
LN861	Bradley Jn to Bradley Wood Jn
LN862	Barnsley Station Jn to Huddersfield
LN864	Dewsbury Railway Street Branch
LN868	Wincobank Jn to Horbury Jn via Barnsley
LN870	Wakefield Turner's Lane Jn to Calder Bridge Jn
LN872	Altofts Jn to Leeds West Jn
LN874	Methley Jn to Whitwood Jn
LN875	Castleford West Jn to Pontefract West Jn
LN878	Sherburn Jn to Gascoigne Wood
LN880	York to Scarborough
LN882	Wakefield Kirkgate West Jn to Goole Potters Grange Jn
LN884	Oakenshaw South Jn to Oakenshaw Jn
LN886	Monk Bretton Loop to Crofton East Jn
LN888	Stainforth Jn to Ferrybridge North Jn
LN889	Shaftholme Jn to Haywood Jn
LN892	Pontefract East Jn to Ferrybridge South Jn
LN894	Knottingley South Jn to Knottingley East Jn
LN896	Drax Power Station Branch
LN898	Neville Hill East Jn to Hull
LN900	Neville Hill West Jn to Hunslet East
LN902	Micklefield Jn to Church Fenton North Jn
LN904	Hambleton South Jn to Hambleton West Jn
LN906	Hambleton East Jn to Hambleton North Jn
LN908	Selby West Jn to Selby Canal Jn
LN910	Temple Hirst Jn to Selby South Jn
LN912	Thorne Jn to Gilberdyke Jn
LN914	Hull (Paragon) to Seamer West Jn
LN916	Hessle Road Jn to Saltend
LN918	Springbank North Jn to Walton Street Jn
LN920	Anlaby Road Jn to West Parade North Jn
LN922	Whitehall West Jn to Hellifield South Jn
LN924	Apperley Jn to Ilkley
LN926	Dockfield Jn to Esholt Jn
LN928	Shipley East Jn to Bradford Forster Square
LN930	Skipton Middle Jn to Rylstone
LN932	Shipley South Jn to Shipley West Jn

## 1.2 Sectional Appendices and Rule Book

### 1.2.1 Sectional Appendix

The Sectional Appendix to the Working Timetable and Books of Rules and Regulations shall be used.

The Sectional Appendix is the sole source of information regarding the following:

Electrification limits refer to relevant Table 'A'

Permissive Working refer to relevant Table 'A', then see below.

Route Clearance refer to 'tab' associated with relevant Table 'A'

To identify the type of Permissive Working that applies at a given location refer to the appropriate Sectional Appendix Table A for that location. If there is authority for Permissive Working, this will appear in the Signalling and Remarks. There are different authorities that depend upon the signalling and layout of the location. The following list identifies the types of Permissive Working that will appear in the Sectional Appendix.

Type	Description
PP	Permissive Working – full use for class 1, 2, 3 ECS, 5, 9 and 0 trains
PP – A	Permissive Working – Attaching and Detaching use only for class 1, 2, 3 ECS, 5, 9 and 0 trains
PP – C	Permissive Working – Contingency use only for class 1, 2, 3 ECS, 5, 9 and 0 trains
PP – S	Permissive Working – Platform Sharing use only for class 1, 2, 3 ECS, 5, 9 and 0 trains
PF	Permissive Working for class 3 to 8 and 0 trains

Source: Sectional Appendix – General Instructions – National – Explanation of Table A terms and symbols

### 1.2.2 Rule Book

The following Modules of the Rule Book GE/RT8000 affects all sections unless specified. The sections listed affect railway operations and train movements. The listed section does not apply to Train Planning directly, but its application will affect how trains operate, and it is for that reason the item appears here.

RULE BOOK MODULE	SECTION	NOTES
G1 General safety responsibilities and personal track safety for non-track workers	5.5 Using the phonetic alphabet;	Operational principles
OTM Working of on-track machines (OTM)	2.2 Before starting a journey	TTPR Section 4.6
	5.6 Carrying out a running brake test	TTPR Section 5.1.2
P1 Single line working	6.5 Warning anyone working on or near the line used for single line working	When planning Single Line Working
	9.3 Right-direction movements	
	9.4 Wrong-direction movements	
S1 Signals and indicators controlling train movements		Operational principles
S2 Observing and obeying fixed signals	3.1 Passenger train at a position-light, shunt-ahead or shunting signal	Operational principles
SP Speeds	2.4 Differential permissible speed indicators	TTPR Section 5.1.2
	2.5 Permissible speed indicators with letters	TTPR Section 5.1.2

RULE BOOK MODULE	SECTION	NOTES
	2.6 Enhanced permissible speed (EPS) indicators	TTPR Section 5.1.2
T11 Movement of engineering trains and on-track plant under T3 arrangements	3 Movements entering the possession	When planning trains entering possessions
	7 Instructing the driver or machine controller	When planning trains entering possessions
TW1 Preparation and movement of trains General	7.1 Authority and arrangements for movements (Hauling dead traction units)	Operational principles
TW2 Preparation and movement of multiple-unit passenger trains	6.5 Carrying out a running brake test	TTPR Section 5.1.2
TW3 Preparation and movement of locomotive hauled trains (including HSTs, push-pull, postal, parcels)	2.1 Locomotives running light or hauling trains (Maximum speed of);	TTPR Section 5.1.2
	2.2 Maximum permitted speed of locomotive-hauled trains	TTPR Section 5.1.2
	2.3 Electric-traction speed restrictions	TTPR Section 5.1.2
	3.16 Carrying out a running brake test	TTPR Section 5.1.2
	Section 14.1 Working trains with locomotives at both ends, when this type of working is permitted	Operational principles
Rule Book Handbook 5 Handsignalling Duties	Section 5.2 Entrance signal	When planning Temporary Block Working (TBW)
	5.3 Exit signal	When planning Temporary Block Working (TBW)
	5.4 Where TBW is divided into two sections	When planning Temporary Block Working (TBW)

## 1.3 Definitions

The list below is not an exhaustive one but is intended to give readers an understanding of some of the terminology as used for the purposes of this document.

If any term given in Timetable Planning Rules is unclear please contact the compiler on the telephone number shown on the cover.

### 1.3.1 Train Classification

Classification	Description
1	Express passenger train; or Nominated postal or parcels train; or Breakdown or overhead line equipment train going to clear the line or returning from there (1Z99); or Traction unit going to assist a failed train (1Z99) Snow plough going to clear the line (1Z99)
2	Ordinary passenger train; or Breakdown or overhead line equipment train not going to clear the line (2Z99) Officers' special train (2Z01)
3	Freight train which can run at more than 75 mph; or A parcels train; or Empty coaching stock train if specially authorised
4	Freight train which can run up to 75 mph
5	Empty coaching stock train
6	Freight train which can run up to 60 mph
7	Freight train which can run up to 45 mph
8	Freight train which can run at, or is timed to run at, 35 mph or less
9	Thameslink services including to / from King's Cross TPE Liverpool Lime Street – Newcastle and Newcastle – Edinburgh services
0	Light locomotive or locomotives

2V00-98	Moorgate to Welwyn GC

2W01-79	Alexandra Palace or Finsbury Park to Moorgate or King's Cross
2W00-78	Moorgate or King's Cross to Finsbury Park or Alexandra Palace
2W81-99	Alexandra Palace to Moorgate or King's Cross via SL2
2W80-98	Moorgate or King's Cross to Alexandra Palace via SL2
2Yxx	Welwyn GC to King's Cross (includes Thameslink services)
	King's Cross to Welwyn GC (includes Thameslink services)

Great Northern / Thameslink Services	
<b>TID</b>	<b>Class 5 services to Hornsey EMUD</b>
5E00-09	Spare / Non-GTR services
5E1039	GTR South-End arrivals except from Moorgate
5E40-49	GTR South End arrivals from Moorgate
5E50-69	GTR North-End arrivals from London via Bowes Park Reversing Siding
5E70-79	GTR North-End arrivals from or via Welwyn Garden City
5E80-89	GTR North-End arrivals from or via Hertford North / Gordon Hill
5E90-99	Test trains and extraordinary services
<b>TID</b>	<b>Class 9 services (WTT)</b>
9Jxx	Peterborough and Horsham via London Bridge and Redhill
9Sxx	Cambridge and Gatwick Airport / Three Bridges / Brighton via London Bridge and Quarry Lines
9W90-99	Peterborough and Horsham via Hertford Loop, Streatham and Redhill
9Yxx	Welwyn Garden City / Blackfriars and Sevenoaks via Catford and Swanley

### 1.3.2 Days of Operation

The following abbreviations are used to identify the day or days that a train operates.

Abbreviation	Description
M	Monday
T	Tuesday
W	Wednesday
Th	Thursday
F	Friday
S	Saturday
Su	Sunday
EWD	Every Week Day (Monday to Saturday)
Daily	Every day, systems will not accept this; there must be a separate entry for Sundays
Suffixes	
O	Adding this indicates that the train will run only on that day or those days shown
X	Adding this indicates that the train will not run on that day or those days shown
General	
BHX	Denotes that this train does not run on a bank holiday

### 1.3.3 Traction and Rolling Stock

Abbreviation	Description
15X	DMU classes 150/155/156
153	Class 153 DMU
158	Class 158 DMU
170	Class 170 DMU
180	Class 180 DMU
22X	DEMU classes 220/221/222
379	Class 379 (timed as 387/100)
387	Class 387
700	Class 700
717	Class 717
755	Class 755 Bi-Mode
80X	Class 800, 801 and 802 multiple units in 5, 9 or 10-car formation; and Class 803 multiple units in a 5-car formation
91	Class 91 and 7 coaches and DVT
DMU	Any diesel multiple unit (excluding classes 220/221/222)
EMU	Any electric multiple unit
ECS	Empty Coaching Stock includes empty diesel and electric multiple units.
HST	Trains consisting of two Class 43 locomotives and Mk 3 passenger vehicles
LH	A passenger or parcels train hauled or propelled by one or more locomotives
LHCV	Locomotive hauled coaching vehicles
Power	Passenger stock equipped with power operated external doors

### 1.3.4 Line Codes

This section should be used in conjunction with Appendix A Timing Point Diagrams, which contains explanations of line codes not mentioned in the list below.

Abbreviation	Description
A/D	Arrival/Departure Line
AL	Avoiding Line
BS	Leeds Line B
CHC	Copley Hill Chord
CL	Carriage Line
DBH	Down Barrow Hill
DBP	Down Back Platform at Welwyn Garden City
DCF	Down Royston Flyover
DCT	Down Canal Tunnel
DF or DFL	Down Fast Line
DG	Two-way Goods No.2
DGL	Down Goods Line
DH	Down Harrogate
DHF	Down Huddersfield Fast
DHL	Down Hendon Line
DHM	Down Hull Main
DHS	Down Huddersfield Slow
DL	Down Line
DM	Down March
DM	Down Midland – Engine Shed Jn or Leeds West Junction LN872
DM or DML	Down Main Line
DN	Leeds Line D – non-preferred route for ARS
DPV	Down Passenger Loop
DS or DSL	Down Slow Line
DSG	Down Scunthorpe Goods
DUG	Down and Up Goods
E	E line between King's Cross and Belle Isle Jn E line between Whitehall Jn and Leeds E line between Mill Lane Jn and Bradford Interchange
ESL	East Slow Line
F	F line between King's Cross and Belle Isle Jn F line between Leeds West Jn and Leeds
FL	Fast Line – can be numbered e.g. FL1
GL	Goods Line
LSL	Leeds Line
M	M line between Mill Lane Jn and Bradford Interchange
MI	March Independent
ML	Main Line
NDS	Up Slow Line from Newcastle Platform 7 to Newcastle South Jn., then Down Slow Line to King Edward Bridge North Jn
NM	Up Slow Line from Newcastle Platform 7 to Newcastle South Jn., then Up Fast Line to King Edward Bridge North Jn
NNL	Normanton Line
NS	Up Slow Line from Newcastle Platform 7 to King Edward Bridge North Jn
SDA	South Down Arrival
SHL	Shunt Line
SL	Slow Line – can be numbered e.g. SL1
SGL	Staveley Goods Line
SL1	Slow Line 1
SL2	Slow Line 2

---

Abbreviation	Description
SUD	South Up Departure
TL	Through Line
TS	Thorne Slow
UB	Up Bradford
UBH	Up Barrow Hill
UCT	Up Canal Tunnel
UD	Up Doncaster
UGL	Up Goods Loop
UH	Up Harrogate
UHF	Up Huddersfield Fast
UHM	Up Hull Main
UHS	Up Huddersfield Slow
UL	Up Line
UM	Up March
UM	Up Midland – Leeds West Jn
UM or UML	Up Main Line
UPV	Up Passenger Loop
US see below	Up Shipley/Up Sidings
USG	Up Scunthorpe Goods
USL	Up Slow Line
UWC	Up Whitehall Curve
UWF	Up Welwyn Flyover
W	W line between Mill Lane Jn and Bradford Interchange
WL	Werrington Line
WSL	West Slow Line

### 1.3.5 Activity and Other Codes

Abbreviation	Description
*	Suppression of traffic stop indicator
-D	Train stops to detach vehicles
-T	Train stops to attach and detach vehicles
-U	Train stops to attach vehicles
A	Train stops or shunts for other trains ahead or to pass only. Shows as an * in WTT
AE	Trains stops to attach/detach assisting locomotive.
BL	Train stops to attach or detach a banking locomotive
C	Train stops to change train crew
D	Train only stops to set down passengers. Shows as an s in NRT
E	Train stops for examination
G	NRT data to add
H	Notional Activity to prevent WTT column merge
HH	As H, were there is a third column involved
K	Passenger count point
KC	Ticket collection and examination point
KE	Ticket examination point
KF	Ticket examination point – 1 <sup>st</sup> Class only
KS	Selective ticket examination point
L	Train stops to change locomotives
N	Stop not advertised to the public
OP	Train stops for other operating reasons
OR	Train locomotive on rear of train
PR	Train propelling between points shown
R	Train stops when required. Shows as an x in NRT
RETB	Radio Electronic Token Block
RM	Trains stops for a reversing movement or driver to change ends
RR	Train stops to allow the locomotive to run-round its train
S	Trains for railway personnel only
T	Trains stops to pick up or set down passengers
TB	Train begins (Origin)
TF	Train finishes (Destination)
TS	Detail consist for TOPS Direct requested by Freight Operator
TW	Train stops to pick up or set down a staff, tablet or token on Single Lines. See Section 5.2
U	Train only stops to pick up passengers. Shows as a u in NRT
W	Train stops for watering of coaches
X	Train passes another train at crossing point on single line. See Section 5.2
x	Suppress running line information
	Force running line indication
	Force path and line indications
	Force path indication
#	Force stop with TW

Activity Codes – Notes
1. Any passenger train that stops at a location automatically generates a T Activity unless it is suppressed.
2. If an Activity is required that removes the 'passenger stop' Activity (T, D, U and R) from ITPS then the 'passenger stop' Activity must always appear in the first Activity field (e.g. T –D would be correct, –D T would not). This is because the National Rail Timetable (NRT) extract program only considers the first Activity field. If it does not find a 'passenger stop' Activity in the first field the time will not be extracted to appear in the NRT.
3. Up to 6 Activities may be shown for each event.
4. No two Activities may be duplicated at the same event.
5. At any one event, the following groups are mutually exclusive: a) D, U, T, N, S, TW, OP. b) –D, –U, –T. c) TB, TF. d) KC, KE.
6. N, R, G, D and U are only valid with Train Categories XC, XD, XI, XX, XZ, OO, OW, OL, BS, BR and blank (i.e. 'advertised' services).
7. K, KC, KE, KF, KS are only valid with Train Categories starting X or O.
8. If TF is present then none of K, KC, KE, KF, KS can be present.
9. Activity T indicates that a train stops to pick up and set down. This normally refers to passengers. Activity –T indicates that the train stops to attach and detach vehicles. At any location where a 'stop' time is shown, TPS or a similar system will assume a default Activity is required unless otherwise specified. These default Activities are as follows: T for trains with a Train Category starting in X or O, OP for trains with a Train Category starting in Z or E, and –T for all other trains (but see below). The default Activity will be generated when the upload file is created.
10. If Activities U, D, N, R, OP, S, TW, –U or –D are specified then this overrides the defaults and only the specified Activities will be included in the upload file (it is not necessary to use the * suppression code if these codes are present).
11. If a traffic Activity is NOT required at a 'stop' location with Activities other than U, D, N, R, OP, S, TW, –U or –D (e.g. at 'C' or 'L' stops) then the * must be input to the TPS or similar system train specification at that location to suppress –T or T. If the * is not added to indicate a non-traffic stop then T, –T or OP will be added to the upload file
12. If an Activity –T (only) is required on a train with a Category starting in X or O it is necessary to add a * to the schedule (to suppress 'T') and positively show –T in the Activity column.

## 2 Route Description

### 2.1 Planning Geography

Network Rail maintains the planning geography and issues it to Train Operators using the BPlan system. BPlan data is to be regarded as the master geography and it is the responsibility of Train Operators and nominated Network Rail users to ensure that data in their train planning systems reflects the master geography.

It is essential that all locations, times and full details such as platforms, running lines, activities etc. comply fully with all of the following rules. Any Network Links used for buses only are to have running line defined as BUS. All data used by a specifier must be that supplied by Network Rail: use of estimated times added or amended locally will cause the trains concerned to fail validation.

In order to avoid the creation of unnecessary journey legs and associated point-to-point timings, all passing times must conform to these rules.

Locations in bold **type and underlined** are mandatory timing points i.e. apply to all trains on the specified line of route.

Locations in **bold** type are conditional timing points with a mandatory element. These are locations where all trains travelling on a specific line or in a specific direction are required to be timed at this location, which will be defined in the Notes column. For lines/directions for which the mandatory element does not apply they are to be treated as non-mandatory timing points and are only required to be shown in connection with a specific activity with one or more of the codes shown below in the Code column.

Locations in normal type are non-mandatory timing points and are required to be shown only for a specific activity with one or more of the codes shown below in the Code column.

Locations in *italic* type are not timing points but are shown for reference purposes.

Line references shown in italics e.g. *SW100* are only for reference purposes.

In the tables below, the following codes apply:

F	Only freight trains are timed here
P	Only passenger trains are timed here
S	Only stopping trains are timed here
X	Only trains crossing from one running line to another are timed here

<b>LN101 LONDON KING'S CROSS TO SHAFTHOLME JUNCTION</b>

## 2.2 Route Opening Hours

Subject to constraints imposed by Rules of the Route, all routes are open continuously, except as shown below. For a complete listing of current signal box opening hours please refer to the 'Compendium of Signal Box Opening Hours' which can be found on the Network Rail website -

<https://www.networkrail.co.uk/industry-and-commercial/information-for-operators/>

The hours shown reflect the contractual opening hours. The actual opening hours may vary from those shown. If there is doubt about a signalbox's opening hours check with the appropriate Network Rail Operations Manager.

When the routes shown are required for services diverted under the Rules of the Route, opening hours will be increased as necessary on a temporary basis.

Signal boxes equipped to be switched out during a route's opening hours are shown within the routes concerned.

PLT denotes passage of last train.

<b>LN170 WERRINGTON JUNCTION TO FLYOVER EAST JUNCTION (VIA LINCOLN)</b>			
<b>ROUTE SECTION</b>	<b>SX</b>	<b>SO</b>	<b>SUN</b>

Woodburn Jn to Nunnery Main Line Jn	Continuous	0000 SO – 0005 SUN	08:30* – 24:00

\*Extended opening hours listed below are agreed for the purpose of operating specific Northern Trains services. These are subject to Network Rail receiving funding on an ongoing basis as agreed between Northern Trains and Network Rail.

Gainsborough Trent Junction opens at 09:25 vice 13:40 on Sundays.

Shireoaks to Woodburn Junction and Woodburn Junction to Nunnery Main Line opens at 08:30 vice 13:50 on Sundays.

Gainsborough Trent Junction closes at 23:15 vice 23:00 on Sundays.

Shireoaks to Woodburn Junction closes at 23:50 vice 23:00 Sundays.

### LN740 GRIMSBY MARSH WEST JUNCTION TO HUMBER ROAD JUNCTION

ROUTE SECTION	SX	SO	SUN
Immingham/Grimsby Light Railway	Open as Required		

### LN742 KILLINGHOLME TO BROCKLESBY JUNCTION

ROUTE SECTION	SX	SO	SUN
Humber Road Junction to Immingham West	Continuous	0000 – 2400	0801 – 2400

### LN744 ULCEBY NORTH JUNCTION TO BARTON ON HUMBER

ROUTE SECTION	SX	SO	SUN
Ulceby to Barton on Humber	0620 – 2232	0620 – 2232	1000 – 1940

### LN758 BRANCLIFFE EAST JUNCTION TO KIRK SANDALL JUNCTION

ROUTE SECTION	SX	SO	SUN
Branccliffe East Junction to St Catherine's Junction	Continuous	0000 – 1530	1400 – 2400

### LN768 MANSFIELD WOODHOUSE TO SHIREOAKS EAST JUNCTION

ROUTE SECTION	SX	SO	SUN
Mansfield Woodhouse to Shireoaks Junctions	Continuous	0000 – 2300	1400 – 2400

### LN784 HIGH MARNHAM TO SHIREBROOK EAST JUNCTION

ROUTE SECTION	SX	SO	SUN
High Marnham and Branches to Shirebrook Junctions	Continuous	0000 – 2200	1500 – 2400

### LN809 SHEPCOTE LANE WEST JUNCTION TO TINSLEY YARD EAST END

ROUTE SECTION	SX	SO	SUN
Tinsley South Junction to Tinsley Yard	Continuous	0000 – 2359	1350 – 2400

### LN816 BEIGHTON JUNCTION TO WOODHOUSE JUNCTION

ROUTE SECTION	SX	SO	SUN
Beighton Junction (excl) to Woodhouse Junction (excl)	Continuous	Continuous*	0000-0015* 1330 – 2359

\*Extended opening hours listed below are agreed for the purpose of operating specific Northern Trains services. These are subject to Network Rail receiving funding on an ongoing basis as agreed between Northern Trains and Network Rail.

Beighton Junction (excl) to Woodhouse Junction (excl) closes at 0015 vice 2200 SO

### LN830 ALDWARKE JUNCTION TO WOODBURN JUNCTION

ROUTE SECTION	SX	SO	SUN
Rotherham Central (excl) to Woodburn Junction	Continuous	0000 – 2359	0830 – 2400*

\*Extended opening hours listed below are agreed for the purpose of operating specific Supertram services. These are subject to Network Rail receiving funding on an ongoing basis as agreed between Supertram and Network Rail.

Rotherham Central (excl) to Woodburn Junction Opening hours opens 0830 Sunday vice 1350 Sunday

### LN838 LEEDS ARMLEY JUNCTION TO YORK SKELTON JUNCTION VIA HARROGATE

ROUTE SECTION	SX	SO	SUN
Armley Junction to Harrogate	Continuous	Continuous	Continuous
Harrogate (excl) to Knaresborough	0610-2320	0610-2320	0920-2320
Knaresborough (excl) to Skelton Jn	0610-2330	0610-2330	0915-2320

### LN854 HALL ROYD JUNCTION TO COLTON JN

ROUTE SECTION	SX	SO	SUN
Healey Mills to Horbury Jn	Continuous	0001 – 2359	0845 – 2359
Horbury Jn to Castleford	Continuous	0001 SO – 0005 SUN	0835* – 2400
Castleford to Milford Jn	Continuous	0000 – 2300 0000 – 2400	0800 – 2400 0840 – 2400
Milford Jn to Church Fenton (excl)	Continuous	0000 – 2300	0750 – 2400

\*Extended opening hours listed below are agreed for the purpose of operating specific Northern Train services. These are subject to Network Rail receiving funding on an ongoing basis as agreed between Northern Trains and Network Rail.

Horbury Jn to Castleford Opens 0835 vice 0845 Sun

### LN862 BARNSELY STATION JUNCTION TO HUDDERSFIELD

ROUTE SECTION	SX	SO	SUN
Barnsley Station Junction to Huddersfield	0600 – 2359 0555 – 2355	0600 – 2359 0555 – 2355	0905*– 2055* 0905*– 2055*

\*Extended opening hours listed below are agreed for the purpose of operating specific Northern Trains services. These are subject to Network Rail receiving funding on an ongoing basis as agreed between Northern Trains and Network Rail.

Barnsley Station Junction to Huddersfield opens 0905 vice 0945 and closes 2055 vice 2015 SUN (Applies in the Down Direction only)

Barnsley Station Junction to Huddersfield opens 0905 vice 0910 and closes 2055 vice 2034 SUN (Applies in the Up Direction only)

### LN868 WINCOBANK JN TO HORBURY JN VIA BARNSELY

ROUTE SECTION	SX	SO	SUN
Wincobank Jn (excl) to Barnsley	0445 –0012* FSX 0445 –0012* FO	0445 –0012	0825 – 2330
Barnsley Station Jn to Horbury Jn	0555 - 2400	0000 – 0005 and 0555 – 2400	0000-0005 and 0855* – 2325

\*Extended opening hours listed below are agreed for the purpose of operating specific Northern Trains services. These are subject to Network Rail receiving funding on an ongoing basis as agreed between Northern Trains and Network Rail.

Wincobank Jn (excl) to Barnsley closes 0012 vice 0005 FSX

Wincobank Jn (excl) to Barnsley closes 0012 vice 2350 FO

Barnsley to Horbury Jn opens 0855 vice 0915 SUN

### LN872 ALTOFTS JUNCTION TO LEEDS WEST JUNCTION

ROUTE SECTION	SX	SO	SUN
Altofts Junction – Leeds (excl)	Continuous	Continuous	0820* – 2400

\*Extended opening hours listed below are agreed for the purpose of operating specific Northern Trains services. These are subject to Network Rail receiving funding on an ongoing basis as agreed between Northern Trains and Network Rail.

Altofts Junction to Leeds (excl) opens 0820 vice 0830 SUN

### LN875 CASTLEFORD WEST JUNCTION TO PONTEFRACT WEST JUNCTION

ROUTE SECTION	SX	SO	SUN
Castleford (excl) to Pontefract Monkhill (excl)	Continuous	Continuous	0900* – 2400

\*Extended opening hours listed below are agreed for the purpose of operating specific Northern Trains services. These are subject to Network Rail receiving funding on an ongoing basis as agreed between Northern Trains and Network Rail.

Castleford (excl) to Pontefract Monkhill (excl) opens 0900 vice 0940 SUN

### LN880 YORK TO SCARBOROUGH

ROUTE SECTION	SX	SO	SUN
York to Scarborough	0600 –2335*	0600 –2335*	0845 –2335*

\* Extended opening hours listed below are agreed for the purpose of operating specific TransPennine Express services. These are subject to Network Rail receiving funding on an ongoing basis as agreed between TransPennine Express and Network Rail.

York to Scarborough Opens at 0600 SX and SO and closes 2335 SX, SO and SU vice 2330 SX, SO and SU

### LN882 WAKEFIELD KIRKGATE WEST JN TO GOOLE POTTERS GRANGE JN

ROUTE SECTION	SX	SO	SUN
Wakefield Kirkgate to Pontefract East Jn (excl)	Continuous	Continuous*	0000 –0005* 0845 – 2400
Pontefract East Junction (incl) to Drax Branch Jn (incl)	Continuous	Continuous	Continuous
Drax Branch Jn (excl) to Potters Grange Jn	Continuous	Continuous	0845 – 2400

\*Extended opening hours listed below are agreed for the purpose of operating specific Northern Trains services. These are subject to Network Rail receiving funding on an ongoing basis as agreed between Northern Trains and Network Rail.

Wakefield Kirkgate to Pontefract East Jn (excl) closes 0005 vice 2400 SO

### LN886 MONK BRETTON LOOP TO CROFTON EAST JUNCTION

ROUTE SECTION	SX	SO	SUN
Monk Bretton to Crofton East Jn	Continuous	Continuous	0845 – 2400

### LN898 NEVILLE HILL EAST JUNCTION TO HULL

ROUTE SECTION	SX	SO	SUN
Micklefield/Milford/Sherburn in Elmet to Hambleton East	Continuous	0000 – 2325**	0735** – 2400
Hambleton East to Gilberdyke (excl)	0525** – 2325**	0525** - 2345**	0745** –2335**
Gilberdyke to Hull (excl)	Continuous	Continuous	Continuous

\*\*Extended opening hours listed below are agreed for the purpose of operating specific Northern Trains and TransPennine Express services. These are subject to Network Rail receiving funding on an ongoing basis, between TransPennine Express, Northern Trains and Network Rail.

Micklefield/Milford/Sherburn in Elmet to Hambleton East opens 0735 SUN vice 0800 SUN and closes 2325 SO vice 2300 SO

Hambleton East to Gilberdyke (excl) opens 0525 SX vice 0552 SX and closes 2325 SX vice 2238 SX

Hambleton East to Gilberdyke (excl) opens 0525 SO vice 0602 SO and closes 2345 SO vice 2245 SO

Hambleton East to Gilberdyke (excl) opens 0745 SUN vice 0850 SUN and closes 2335 SUN vice 2300 SUN

### LN912 THORNE JN TO GILBERDYKE JN

ROUTE SECTION	SX	SO	SUN
Thorne Jn to Gilberdyke	0522 – 2355*	0522 – 2355*	0835*– 0005*

\*Extended opening hours listed below are agreed for the purpose of operating specific Northern Trains services. These are subject to Network Rail receiving funding on an ongoing basis as agreed between Northern Trains and Network Rail.

Thorne Junction to Gilberdyke closes 2355 SX vice 2310 SX  
Thorne Junction to Gilberdyke closes 2355 SO vice 2310 SO  
Thorne Junction to Gilberdyke opens 0835 SUN vice 0845 SUN and closes 0005 SUN vice 2340 SUN

### LN914 HULL TO SEAMER WEST JUNCTION

ROUTE SECTION	SX	SO	SUN
Filey (excl) to Seamer	0615 - 2215	0625 - 2215	0920 – 2205

## 3 Electrification

### 3.1 Electrification Limits

Limits of the 25 kV AC and 750V DC electrification systems are contained in Table A of the Sectional Appendix to the Working Timetables, issued by, Network Rail. Refer to Table A for the given location to identify the type of electrification that applies.

### 3.2 Electrification Supply Restrictions

Under normal conditions, the electrification power supplies will not place any restrictions on the use of approved electric traction. However, the Route Clearance sections of the Sectional Appendix to the Working Timetables, issued by, Network Rail do tabulate restrictions on the movement of electric trains. Refer to Table A and select Route Clearance.

Under maintenance conditions, certain sections of the electrified network may be blocked to electric traction. These restrictions are contained within the Network Rail Rules of the Route for the appropriate year. Additional restrictions may also arise in connection with engineering possessions requested through the Rules of the Route amendment procedure.

#### Line of Route

#### **LN600 SHAFTHOME JUNCTION TO RESTON GSP**

Due to power supply constraints in the Hutton Bonville and Marshall Meadows feeder areas, restrictions apply to a selection of electric services which can operate through this section.

Please consult NESA for a full list and description of this restriction.

## 4 Rolling Stock Restrictions

### 4.1 Locomotive Route Availability

See the applicable Route Clearance table for the given location in Sectional Appendix to the Working Timetables, issued by Network Rail. Refer to Table A and select Route Clearance.

### 4.2 Passenger Stock Restrictions

See the applicable Route Clearance table for the given location in Sectional Appendix to the Working Timetables, issued by Network Rail. Refer to Table A and select Route Clearance.

### 4.3 Freight Wagon Restrictions

See the applicable Route Clearance table for the given location in Sectional Appendix to the Working Timetables, issued by Network Rail. The Route Availability for a given location is in the 'Signalling and Remarks' column of Table A. Route Clearance Table D5 Route clearance of freight vehicles gives further guidance on freight wagon restrictions.

Trains conveying vehicles that have a heavy axle weight or other exceptional characteristics, or vehicles conveying containers or swap bodies require an RT3973 form.

*Note: The Rule Book GERT8000 Section TW4 of defines a container as an intermodal transport unit constructed to a standard (usually specified by the ISO) suitable for conveyance by road, rail or sea.*

*Note: The Sectional Appendix does not cover the CTRL HS1. The CTRL has its own Working Manual.*

### 4.4 Freight Train Load Limits

Trailing load limits for all traction types are contained in the Freight Loads Book published by Network Rail.

*Note: It is important to understand the weight limitations that apply to trains especially over sections of heavily graded routes. Coupling strength information is also contained in the Freight Loads Book. Coupling strength is important in determining the trailing loads that trains can convey.*

### 4.5 Freight Train Length Limits

Refer to the Freight Train Loads Book published by Network Rail for the length limits of freight trains.

*Note: The Sectional Appendix quotes loop lengths in metres and feet. All lengths are exclusive of an allowance of one locomotive.*

### 4.6 Engineers' Trains Restrictions

Some On Track Machines (OTMs) do not reliably activate track circuits. These OTMs must use one of the following special reporting numbers 6Z09, 7Z09 or 8Z09\*. Because these OTMs do not reliably activate track circuits it is not possible to apply the headways and junction margins as outlined in Timetable Planning Rules consistently and it is therefore not possible for Capacity Planning to provide timings for these movements. \* Source GE/RT 8000-OTM

## 5 Running Times, Margins and Allowances

Except where otherwise stated, the information in this section of the Timetable Planning Rules reflects the general rules used in developing the 1994/5 timetable (Several exceptions to the general rules were agreed for 1994/5 and exceptions may continue to be possible with the specific agreement of Network Rail in every case.)

### 5.1 Sectional Running Times

The definition for Sectional Running Times (SRTs) is listed in Section 6.4 of the National TPRs.

#### 5.1.1 Source of Current SRTs

The definitive catalogue of SRTs is BPlan.

#### 5.1.2 Method of Calculation

SRTs are revised by Train Operators and Network Rail as part of the Revision of Timetable Planning Rules process outlined in Network Code Part D 2.2. Normally they will not change from one timetable to the next. Network Rail will, however, re-calculate SRTs for particular train/route combinations in the following circumstances:

- i) Where a Train Operator anticipates using a train/route combination for which no suitable SRTs exist;
- ii) Where Network Rail anticipates a change to route data, e.g. line speed changes;
- iii) Where there is evidence that the SRTs in current use do not adequately represent real train performance;
- iv) Where it is cost-effective to re-calculate all SRTs on a route at the same time as a re-calculation for a particular train type.

Network Rail will reflect the methodology and assumptions described in Section 6 of the National TPRs when calculating TPR proposals, unless and to the extent documented otherwise in respect of any given proposal. Timetable participants are encouraged to submit change proposals for review and consultation in line with the national methodology, or in line with such alternative methodology and assumptions as favoured by the proposer. NR will not seek to reject any proposal on the exclusive basis of the methodology employed, provided that the methodology and assumptions are clearly stated and demonstrably adhered to in respect of the proposal received.

SRT change proposals may be calculated in a number of ways including, but not limited to:

- a) Through actual timing of trains
- b) Use of On Train Monitoring Recorder (OTMR) systems
- c) Use of computer system actual values
- d) Use of computer simulation tools
- e) By any other agreed methodology

It is permissible to include percentage uplift in SRTs instead of applying engineering recovery allowances to be agreed by all affected parties.

In the event that the application of different methodologies produces conflicting proposals, a joint observation exercise should be undertaken to ascertain what happens in reality.

#### 5.1.3 New and Revised Sectional Running Times

New and revised SRTs revised by Train Operators and Network Rail on an individual basis. These should be supplied by applying the methodology described in Section 6 of the National TPRs unless another methodology is deemed appropriate, provided that the methodology and assumptions are clearly stated and demonstrably adhered to in respect of the proposal received.

## 5.1.4 Timing of Trains Consisting of Passenger Vehicles on Goods Lines

The sectional running timings quoted for trains consisting of passenger vehicles on Goods Lines reflect the speeds shown in the relevant Table 'A' of the appropriate Sectional Appendix. They do not constitute an authority to time trains conveying passengers on a Goods Lines. Nor do they reflect the permitted speeds at which a train conveying passengers can proceed. Network Rail will offer the sectional running times for trains conveying passengers on a Goods Line on a train-by-train basis. For those times, please apply to the Capacity Planning Department. Operations Publications publish the authority to allow the planned operation of trains conveying passengers on Goods Lines. Before Operations Publications can grant authority, they require confirmation that the track is fit for purpose and that there is a safe method of operation. Therefore, the Capacity Planning Department must apply to the relevant Track Engineer and Operations Manager for confirmation of these requirements in writing. The Capacity Planning Department must pass these responses to Operations Publications. The Capacity Planning Department is responsible for advising Operations Publications of the requirement to operate a passenger train on a Goods Line at least 8 weeks before the day of operation.

## 5.2 Headways

The definition for Headways is listed in Section 6.5 of the National TPRs.

### 5.2.1 Headway Values

All times are in minutes. All routes are shown.

Where track circuit block (TCB) signalling applies, the standard headways for each route are shown, together with any exceptions.

AB indicates locations where absolute block signalling applies. Here the headway is to be calculated from the transit time of the first of each pair of trains running between the stated timing points. A value "x" shall be added to the transit time to allow for the signaller's actions and sighting of the relevant signal. The planning headway is shown as "AB+x".

AB methodology may also be used to express the headway in other areas (e.g., TCB), the value x including the time taken to reset the route, clear the signal on entry to the section and sight the relevant signal.

Single lines and other forms of signalling are shown, together with any values applicable, where they occur.

"OTNS" or "OT" indicates One Train Working with No Train Staff; "OTS" or "OT(S)" indicates One train Working with Train Staff. "NST" indicates No Signaller Token. In these instances, only one train is allowed in the section at one time; a second train cannot be allowed to enter the section until the first train has left the section.

"ETB" indicates Electric Token Block and "TB" indicates Tokenless Block for single lines.

"RB" indicates Radio Signalling where "long section tokens" can be issued between certain block posts during times of low traffic volume.

Where headways are shown as being "following a non-stop" or "following a stopping", these descriptions refer to the service that the path is following. **The headway value does not refer to running lines.** The "following a stopping" headway should be applied to a service following a preceding service which stops at either a station or any other location for operational reasons. The "following a non-stopping" headway should be applied to a service following a preceding service which does not stop at that location. Immediately the preceding service stops at any location for any reason, the headway should be amended to the "following stopping" value.

Light engine movements, postal and test trains to be treated as passenger trains when applying margins/allowances where there is a passenger/freight differential.

Details of how to apply headways are listed in the National TPRs Section 1.5.5.

### LN101 LONDON KING'S CROSS TO SHAFTHOLME JUNCTION

TIMING POINT	DOWN	UP	NOTES
Skipton to Rylstone	AB+2*		*Single Line, ETB

## 5.2.2 General Capacity Constraints

Where single line working is to operate or trains are to be routed to run on a line other than that normally planned for them, constraints on capacity will apply – see Rules of the Route.

The following special capacity and timing restrictions apply in addition to the constraints stated elsewhere in this document:

None

## 5.3 Junction Margins and Station Planning Rules

The definition for Junction Margins and Station Planning Rules is listed in Section 6.6 - 6.10 of the National TPRs.

All times shown are in minutes. Where adjustments to sectional running times are shown, the value must be added to the normal SRTs shown in B Plan. Negative adjustments are specially identified.

Minimum station allowances are the minimum practical for the particular type of stock. These are shown with exceptions being listed by line of route where applicable.

Light engine movements, postal and test trains to be treated as passenger trains when applying margins/allowances where there is a passenger/freight differential.

### Standard Values

STANDARD VALUES – MINIMUM	
<b>Adjustments to Sectional Running Times</b>	
CrossCountry schedules must depart from origin and terminate at destination on a whole minute due to limitations with TOC Resourcing IT software (Integrale).	
Freight schedules must depart from origin and terminate at destination on a whole minute. (This is due to TOPS requirements).	
<b>Attachment of Locomotives/Units</b>	
22x	7
DMU	6
EMU (gangwayed)	4
EMU (Non gangwayed)	3
EMU (Northern Trains)	7
Locomotive	15
Govia Thameslink Railway Class 387 and 379 units	6
LNER 80x	7
XC 170	4
<b>Detachment of Locomotives/Units:</b>	
22X	7
DMU	5
EMU (gangwayed)	3
EMU (non gangwayed)	2
EMU (Northern Trains)	7
Locomotive	10* *12 if locomotive attached at other end of train
Govia Thameslink Railway Class 387 and 379 units	5
LNER 80x	7
XC 170	4
<b>Connectional Allowance</b>	
	5 minutes
<b>Dwell Time – passenger services</b>	
Class 158	1
DMU (Other)	45 seconds – to be shown as alternating ½ and 1 minute stops
EMU	½

STANDARD VALUES – MINIMUM		
LH/22X/180/80X	1½	
Tyne & Wear Metro cars	24 seconds – to be shown as ½ stop and SRT shortened by 6 seconds	
LNER Class 91 and 80x	2	
Locomotive Change		
At same end	16	
Locomotive Run–Round		
Passenger	16	
Freight	20	
Platform End Margins		
First Movement	Second Movement	Margin
Arrival or pass	Conflicting departure (opposite direction)	1
Departure	Conflicting arrival	3
Platform Re–occupation		
Standard	3	
Reversals		
Standard	8	
Exceptions

EMR 222, NMT, 5-car 80X (except TPE)	7**	
TPE 802	8	
XC 170	4 (2-4 cars), 5 (5-6 cars), 7 (7-9 cars)	
XC 22x	5 single set 6 double set	
80X re-manned	4	
Freight – Reversal before/after propelling movement	2	
Light engines	2	
*4 minutes for East Midlands Railway Services		
**Does not apply to Hull Trains 5-car 802s		
Minimum Turnround		
DMU*	4	
*Where turnround times are specified at locations for trains from specific origins, request should be made to the Operational Planning Manager LNE, Network Rail for times from other locations as a longer turnround may apply.		
LH	35	
4 car class 379 or 387	8	
8 car class 379 or 387	9	
12 car class 379 or 387	10	
8 car class 700	8	
12 car class 700	10	
6 car class 717	6	
Class 80x	25	

<b>STANDARD VALUES – MINIMUM</b>	
<b>Arrivals at Destination</b>	
The following operators' services are not required to arrive at destination on a full minute:	
Grand Central	
Nexus (Tyne and Wear Metro)	
Northern	
Transpennine Express	
<b>Arrivals from/departures to ECS</b>	
<b>CrossCountry Class 170 Safety Check Unit (SCU) Allowances – minimum platform standing allowance between passenger train arrival and ECS departure to depot</b>	
1 x 170	5
2 x 170	10
<b>CrossCountry Class 170 Safety Check Unit (SCU) Allowances <u>which includes an attachment</u> – minimum platform standing allowance between passenger train arrival and ECS departure to depot</b>	
When the second arrival is 1 x 170	9
When the second arrival is 2 x 170	14
<b>CrossCountry 170/22x Train Preparation Allowances - minimum platform standing allowance between ECS arrival from depot and passenger train departure</b>	
170	5
1 x 22X	15
2 x 22X	20
By exception, allowances for 'Train Preparation' (above) and may be reduced after discussion and agreement between CrossCountry and Network Rail	
<b>CrossCountry 22x Safety Check Unit (SCU) Allowances – minimum platform standing allowance between passenger train arrival and ECS departure to depot</b>	
1 x 22x departing in same direction as arrival	8
1 x 22x departing in reverse direction to arrival	10
2 x 22x departing in same direction as arrival	15
2 x 22x departing in reverse direction to arrival	20
<b>GTR minimum platform standing allowance between ECS arrival and passenger train departures</b>	
Class 379/387/700/717 departing in same direction	1 (unless otherwise specified)
<b>GTR minimum platform standing allowance between passenger train arrival and ECS departure</b>	
Class 379/387/700/717 departing in same direction	4 (unless otherwise specified)
<b>Lumo Trains minimum platform standing allowance between passenger train arrival and ECS departure to depot in same direction</b>	
Class 803	10

THE FOLLOWING PAGES SHOW THE EXCEPTIONS TO THESE STANDARD VALUES

## LN101 LONDON KING'S CROSS TO SHAFTHOLME JUNCTION

### London King's Cross

#### Adjustments to Sectional Running Times

Movement Up	Reason	Value
Entering a platform that is already occupied	Calling-on from signals protecting platforms	½ *

\* Where this results in an arrival at King's Cross on a half minute for a service not permitted to do so, <½> should be added to round up to a full minute

<b>Connectional Allowance</b>	15
-------------------------------	----

#### Planning Notes

Arrivals into platforms 6 and 7 via Line C use the facing crossover in Gas Works Tunnel.  
Arrivals into platforms 5 to 10 via Up Fast and Line D, E or EX use the facing crossover at Belle Isle Junction.  
Arrivals into platforms 8, 9 or 10 via Up Slow and Line F use the facing crossover at Copenhagen Junction.  
A 0, 1 or 2 minute margin is possible providing that an arriving train passes Belle Isle first, is using a different line and arrives on a higher numbered platform. For example:

- Train from Up Fast Line passes Belle Isle at 12/00 then runs via Line C, D, E or EX to one of platforms 3 to 10 arrive 1202;
- Train departs one of platforms 0 to 2 at 1200 then runs via Line B and passes Belle Isle at 12/02 to Down Fast Line.

The [1] engineering allowance approaching Belle Isle may be moved to approaching King's Cross if it results in a compliant 2 minute margin being achieved between conflicting arriving and departing trains where the arriving train passes Belle Isle first.

#### Platform end conflicts: departure before arrival

First movement	Second movement	Margin
Depart platform 0 via Line A	Arrive platform 0 or 1 via Line A	5
Depart platforms 0 or 1 to Down Fast via Line A or B	Arrive platforms 2 to 7 from Up Fast via Line B, C or D	6 \$
Depart platforms 0 to 7 to Down Fast via Line A, B, C, CX or D	Arrive platform 7 or 8 via Up Fast and Line E	6 \$
Depart platforms 0 to 7 to Down Fast via Line A, B, C, CX or D	Arrive platforms 8 to 10 via Up Fast and Line EX	6 \$
Depart platform 1 via Line A	Arrive platform 0 or 1 via Line A	5
Depart platform 1 via Line B	Arrive platform 1 via Line A	4
Depart platform 2 via Line B	Arrive platform 2 via Line B or C	6 \$
Depart platform 2 via Line C	Arrive platform 2 via Line B or C	6 \$
Depart platform 2 via Line CX	Arrive platform 2 via Line B	4
Depart platforms 2, 3 or 4 via Line CX	Arrive platforms 2 to 7 via Line C	5
Depart platforms 3, 4 or 5 via Line C	Arrive platforms 2 to 7 via Line C	6 \$
Depart platforms 2, 3, 4 or 5 via Line C	Arrive platforms 5, 6 or 7 via Line D	6 \$
Depart platform 5 via Line D	Arrive platform 5 via Line C	4
Depart platform 5, 6 or 7 via Line D	Arrive platform 6 or 7 via Line C	5
Depart platform 5, 6 or 7 via Line D	Arrive platform 6 or 7 via Line D	6 \$
Depart platform 7 via Line D	Arrive platform 7 via Up Slow and Line E	4
Depart platform 7 via Line E to Down Fast	Arrive platform 7 via Line C	4
Depart platform 7 or 8 via Line E	Arrive platforms 7 to 10 via Line E or EX	6 \$
Depart platform 8 via Line F	Arrive platform 8 via Line E	4
Depart platform 8, 9 or 10 via Line FX to Down Fast	Arrive platform 7 to 10 via Line E or EX	6 \$
Depart platform 8, 9 or 10 via Line F to Down Slow	Arrive platform 8, 9 or 10 via Line EX	5

## LN101 LONDON KING'S CROSS TO SHAFTHOLME JUNCTION

### London King's Cross

Depart platform 8, 9 or 10 via Line F to Down Slow	Arrive platform 8, 9 or 10 via Line F	6 \$
---	---------------------------------------	------

\$ Conflict occurs at Belle Isle where the 2 minute margin is included in re-occupation margin.

#### Platform end conflicts: arrival before departure

First movement	Second movement	Margin
Arrive any platform	Conflicting departure from any platform	1*
Arrive platform 0 via Line A	Depart platform 1 via Line B	Same time
Arrive platform 1 or 2 via Line B	Depart platform 0 via Line A	Same time
Arrive platform 2 via Line B	Depart platform 1 via Line A	Same time
Arrive platform 2, 3 or 4 via Line C	Depart platform 5 via Line D	Same time
Arrive platform 5, 6 or 7 via Line D	Depart platforms 2 to 5 via Line C or CX	Same time
Arrive platform 6 or 7 via Line C	Depart platforms 2 to 5 via Line C or CX	Same time
Arrive platform 8, 9 or 10 via Line EX	Depart platform 7 via Line E	Same time
Arrive platform 9 or 10 via Line EX	Depart platform 8 via Line E	Same time
Arrive platform 8, 9 or 10 via Line F	Depart platform 7 via Line E	Same time
Arrive platform 9 or 10 via Line F	Depart platform 8 via Line E	Same time

\* Unless otherwise stated.

#### Minimum Turnround

	All Times
From Middlesbrough, Yorkshire and stations south thereof (LNER)	30
From Newcastle, Sunderland (LNER) and Berwick-upon-Tweed	35
From Scotland (LNER)	40
From Hull (Hull Trains)	30 20 for arrivals during the following hours: Monday-Friday 0700-1000 and 1600-1900 Saturday all day Sunday 1700 – 2100
From Sunderland (Grand Central)	35 except for: 20 1700–1930 Monday-Friday 20 all day Saturday 20 during Sunday engineering work 20 for arrivals originating from York during contingency timetable
Lumo	20* for trains entering passenger service from ECS or for trains leaving passenger service to ECS 42** for passenger service forming passenger service *May be reduced to 15 through agreement with operator **May be reduced to 35 through agreement from the operator

## LN101 LONDON KING'S CROSS TO SHAFTHOLME JUNCTION

### London King's Cross

#### Planning Restriction

When planning permissive working at King's Cross, a standage allowance must be included in the calculations as per the below:

- All types of services except below – 18m (2m from buffer stops to first train, 6m between trains and 10m signal sighting allowance)
- Class 387 & 717 in Platforms 0,1,3,4,5,7 or 9 – 27m (due to increased signal sighting allowance)

A 5 car 80x and an 8 car 387 or 700 can only platform share in P0.

A 5 car 180 and an 8 car 387 or 700 can only platform share in P1.

Diesel traction cannot be planned into P0.

<b>Station Watering Points</b>	Platforms 0–10
--------------------------------	----------------

### Belle Isle Junction

#### Junction Margins

First Movement	Second Movement	Margin
Between all conflicting crossing movements		2
Up Slow to Line F (movement takes place at Copenhagen Jn)	Canal Tunnels to Down Slow (applies to both DCT and UCT)	2

#### Planning Note:

The [1] engineering allowance approaching Belle Isle may be moved to approaching King's Cross if it results in a compliant 2 minute margin being achieved between conflicting arriving and departing trains where the arriving train passes Belle Isle first.

### Copenhagen Junction

Note: Trains in the Down direction on the North London Incline (NLI) should not normally be shown to stop at Copenhagen Junction. Down trains required to stop on the NLI to wait a path over Copenhagen Jn should be timed to stop at York Way North Jn unless they exceed 630 metres in length. Only trains in excess of 630 metres in length should be timed to stop at Copenhagen Jn. In those circumstances due to signalling constraints the following applies: A Down train on the NLI planned to stop at Copenhagen Jn must arrive a minimum of 5 minutes before the passage of any train on the Down Slow

#### Junction Margins

First Movement	Second Movement	Margin
Train from North London Incline to Down Slow Line	Train from Up Slow Line to North London Incline	3½
Train from Up Slow Line to North London Incline	Train passing Belle Isle on Down Slow	3½
Train from Up Slow Line to North London Incline	Train on Up Slow towards Belle Isle	3
Train passing Belle Isle on Down Slow	Train from Up Slow Line to North London Incline	2½

<b>Holloway South Junction</b>

Pass DFL	Pass DSL to DFL	2 <sup>\$</sup>

<sup>\$</sup>May be 1½ if second train has 1 minute or more pathing time approaching Finsbury Park

<sup>^</sup>Headway between these services may be reduced to 2½ minutes as far as Potters Bar

### Platform Re-occupation

In Down direction	2
In Up direction	2½

## Harringay Up Reversing Siding

### Permissive Working

Permissive Working is allowed in the siding.

The maximum standage is 322 metres/50 SLU from the buffer stop to signal K421. This excludes any allowance for stand back from the signal and standage required between different trains.

## Harringay

### Adjustments to Sectional Running Times

Movement Down	Reason	Value
Pass SL2 to Ferme Park	Approach control at signal K413	1
Pass SL2 to Hornsey Down Reversing Sidings	Approach control at signal K431	½
Pass from Harringay Park Jn towards Alexandra Palace	Acceleration from lower line speed	1 * freight ≤800t/TR40 1½ * passenger/ECS or freight ≤1400t/TR85 2 * freight ≥1600t/TR100

\* applies approaching next timing point

Movement Up	Reason	Value
Cross from SL2 to SL1	Slow speed crossover and approach control at Signal K422	{1} approaching Harringay and {½} approaching Finsbury Park
Trains from Hornsey EMUD or from Hornsey Down Reversing Sidings / Signal K440 via flyover	Slow speed crossovers	{½} approaching Finsbury Park

### Junction Margins

First Movement	Second Movement	Margin
Train departs Up Reversing Siding towards Hornsey EMUD	Train arrives Up Reversing Siding from Flyover or Up Slow 2	3
Train departs Up Reversing Siding towards Hornsey via Flyover	Train arrives Up Reversing Siding from Hornsey EMUD or Up Slow 2	3
Train passes Harringay from Flyover or Hornsey EMUD	Train Departs Up Reversing Siding towards Hornsey EMUD or Flyover	1
Depart SL2 (K85) to Hornsey EMUD	Pass Harringay from Alexandra Palace or Flyover on SL2	3
Cross from SL2 to SL1	Arrive SL1	2
Cross from SL2 to SL1	Pass from SL1	3

## Hornsey Down Reversing Sidings

### Junction Margins

First movement	Second Movement	Margin
Train departs Down Reversing Siding No 1 towards Flyover	Train arrives Down Reversing Siding No. 1 from SL1 or SL2	3
Train departs Down Reversing Siding No 1 towards Flyover	Train arrives Down Reversing Siding No. 2 from SL2	Parallel
Train departs Down Reversing Siding No 2 towards Flyover	Train arrives Down Reversing Siding No. 1 or 2 from SL2	3
Train departs Down Reversing Siding No 2 towards Flyover	Train arrives Down Reversing Siding No. 1 from SL1	Parallel
Train arrives at or passes Hornsey from Flyover	Train departs Down Reversing Siding No. 1 or 2 towards Flyover or Down Slow 2	1

### Planning Notes

Siding No. 1 – Usable length of 25 SLU/161 metres; capable of accommodating up to 8x20m vehicles  
Siding No. 2 – Usable length of 37 SLU/241 metres; capable of accommodating up to 12x20m vehicles

Trains formed of a 12-car Class 700 must not be timed to use Hornsey Down Reversing Sidings because there is insufficient length between the buffer stops and Signal K434. Bowes Park Reversing Siding should be used instead or, if not available, Hornsey Signal K440.

## Hornsey Signal K440

### Junction Margins

First movement	Second Movement	Margin
Up departure from Hornsey Signal K440	Down arrival at Down Reversing Siding No.1 or at Hornsey Signal K440 from SL2	4

## Hornsey EMU Depot

### Junction Margins

Consecutive arrivals at, or departures from the same end of Hornsey Depot must be no less than 10 minutes apart

## Alexandra Palace

### Adjustments to Sectional Running Times

Movement Down	Reason	Value
Finsbury Park to Alexandra Palace (adjustment to be applied approaching Alexandra Palace)	FL to Down Hertford or SL pass to pass; approach control and differential junction speed	1 EMU 1½ HST/LH/ 180/91/80X

Depart Yard	Pass Up/Down	5
Pass Up/Down	Depart Yard	2
Depart Platform 3 or 4 via the Welwyn Flyover	Pass Platform 1 or 2 to Up Slow	5
GTR class 387, 700 and 717 trains to Welwyn Garden City CS require a 4-minute operational stop in the platforms to clear the train of passengers and lock the doors		
This is to permit station staff to ensure windows are closed prior to the train passing through the carriage washer		
Turnrounds	All shunt movements to be timed	
Platform Re-occupation	3	

<b>Digswell</b>		
<b>Adjustments to Sectional Running Times</b>		
<b>Movement Down</b>	<b>Reason</b>	<b>Value</b>
Down Slow to Down Main	Acceleration – to be applied after Digswell	$\frac{1}{2}^* 180/80x/91/HST$
Depart Welwyn Up Yard to Down Main (including via Down Slow)	Acceleration – to be applied after Digswell	Freight 1,000t – 1,400t $\frac{1}{2}$ 1,600t – 2,000t 1 2,000t – 3,200t $1\frac{1}{2}$
*Not required for services calling at Welwyn North		
<b>Movement Up</b>	<b>Reason</b>	<b>Value</b>
Up Fast to Up Slow	Deceleration	$\frac{1}{2}^* 180/80x/91/HST/EMU$
*Not required for services calling at Welwyn North		
<b>Junction Margins – Down Direction</b>		
<b>First Movement</b>	<b>Second Movement</b>	<b>Margin</b>
Down Fast to Down Main passenger (not calling at Welwyn North)	Pass Down Slow to Down Main (not calling at Welwyn North)	2 <sup>#</sup>
Down Fast to Down Main passenger (not calling at Welwyn North)	Depart Down Slow (Signal YB1051) to Down Main	1 $\frac{1}{2}$ <sup>#</sup>
Down Fast to Down Main passenger (calling at Welwyn North)	Down Fast to Down Main (not calling at Welwyn North)	4 $\frac{1}{2}$
Down Slow to Down Main passenger (not calling at Welwyn North)	Down Fast to Down Main (calling at Welwyn North)	2
Down Slow to Down Main passenger (calling Welwyn North)	Down Fast to Down Main (not calling at Welwyn North)	4 $\frac{1}{2}$
Down Fast to Down Main passenger (not calling at Welwyn North)	Down Slow to Down Main (calling at Welwyn North)	1 $\frac{1}{2}$
<sup>#</sup> Where the first train is an express service timed at 100mph or above, the converging margin here should take precedence over the headway i.e. no pathing time should be applied to the second train between Digswell and Woolmer Green Junction for the purpose of artificially re-establishing a higher headway value than the margin given; the headway of 3 minutes should naturally restore itself once the appropriate acceleration allowances are added to the schedule of the second train		
<b>Junction Margins – Up direction</b>		
<b>First Movement</b>	<b>Second Movement</b>	<b>Margin</b>
All margins (unless stated below)		3
Up Main to Up Slow passenger	Up Main to Up Fast timed at 100mph or above	2 $\frac{1}{2}$
<b>Planning Notes</b>		
No timing allowances should be applied between Welwyn North and Digswell in the Up direction, for any trains timed at both, as there are no intermediate signals.		
Where possible, pathing allowances should not be applied between Digswell and Woolmer Green Junction		

<b>Welwyn North</b>
<b>Station Working</b>
For trains booked to call at Welwyn North a public/working differential (up to a maximum value of 3 minutes) equal to any pathing time approaching Digswell (down) and Woolmer Green (up) is to be applied

Woolmer Green		
Adjustments to Sectional Running Times		
Movement Down	Reason	Value
Down Main to Down Slow	Deceleration	½* 180/387/700/80x/91/HST
*Not required for services that have called at Welwyn North		
Movement Up	Reason	Value

### Junction Margins – Platforms 1-3

All conflicting margins 3 minutes unless stated below:

#### Platforms 1-3 South end

First Movement	Second Movement	Margin
Depart Platform 1a to Up Fast/Up Slow	Depart Platform 1b northbound	2
Arrive Platform 1a from Down Fast	Depart Platform 1b northbound	2
Depart Platform 1-3 to Up Fast	Pass Platform 3 to Up Fast	4
Arrive Platform 1-2 from Down Fast	Pass Platform 3 to Up Fast	3
Pass Platform 3 to Up Fast	Depart Platform 1-2 to Up Fast	2
Arrive Platform 1-2 from Down Fast	Depart Platform 1-2 to Up Fast (from adjacent platform)	1

#### Platforms 1-3 North end

First Movement	Second Movement	Margin
Depart Platforms 1-2 to Down Fast	Arrive/Pass Platforms 1-3 from Up Fast	4
Depart Platforms 1-2 to Up Slow/South Down Arrival/South Up Departure/Shunt Line	Arrive Platforms 1-2 from Up Fast	4
Depart Platforms 1-2 to Up Slow	Arrive Platforms 1-2 from South Down Arrival/South Up Departure/Shunt Line	4
Depart Platforms 1-2 to South Down Arrival/South Up Departure/Shunt Line	Arrive Platforms 1-2 from Up Slow	4
Depart Platform 2 to Up Slow/South Down Arrival/South Up Departure/Shunt Line	Pass Platform 3 to Up Fast	5
Depart Platform 1 or 2 to Down Fast	Conflicting departure from Platforms 4, 5 or 6 to Up Slow, Spital Sidings or South Down Arrival/South Up Departure/Shunt Line	2
Depart Platform 1 or 2 to Up Slow	Conflicting departure from Platforms 4, 5 or 6 to Spital Sidings or South Down Arrival/South Up Departure/Shunt Line	2
Pass Platform 3 to Up Fast	Depart Platforms 1-2 to Down Fast	1

### Junction Margins – Platforms 4-7

#### Platforms 4-7 and Two-Way Goods Line South end

All conflicting margins 3 minutes where a passenger train is the first conflicting move and 4 minutes where a freight train is the first conflicting move; exceptions are listed below:

First Movement	Second Movement	Margin
Arrive Platform 4 from Down Fast/Down Slow/Nene Sidings	Depart or Pass Platform 5 to Nene Sidings	1
Arrive Platform 4 from March Independent Line	Depart or Pass Platform 5 to March Independent Line	1
Arrive Platform 5 from Down Fast/Down Slow/Nene Sidings or March Independent Line	Depart or Pass Platforms 4 towards Peterborough East Junction via Nene Sidings or March Independent Line	1
Arrive Platform 6 from Peterborough East Junction via March Lines	Depart or Pass Platform 7 or Two-Way Goods Line towards Peterborough East Junction via Down March Line	1
Arrive Platform 6 from Up March Line	Depart or Pass Platforms 4 or 5 towards Peterborough East Junction via March Independent Line	1
Arrive Platform 7 from Peterborough East Junction via Down March Line	Depart or Pass Two-Way Goods Line towards Peterborough East Junction	1
Arrive Two-Way Goods Line from Peterborough	Depart Platform 7 towards Peterborough	1

<b>Peterborough</b>		
East Junction via Down March Line		
Depart Platforms 4 or 5 to Nene Sidings	Arrive into Platforms 4 or 5 from Nene Sidings	AB – second train cannot depart Nene Sidings until first train has arrived
<b>Platforms 4-7 and Two-Way Goods Line North end</b>		
All same direction conflict margins – 3 minutes		
All opposite direction conflicting margins 4 minutes where a passenger train is the first conflicting move and 5 minutes where a freight train is the first conflicting move; exceptions are listed below:		
First Movement	Second Movement	Margin
Down Fast Pass	Any arrival into Platforms 4, 5 or 6 from Up Fast or Up Slow	3
Down Fast Pass	Conflicting freight depart Platforms 4, 5 or 6	2
Down Fast Pass (passenger)	Conflicting departure from Platforms 4, 5 or 6	2
Arrive Platforms 4, 5, 6, 7 or Two-Way Goods Line from the north	Any conflicting departure from Platforms 4, 5, 6, 7 or Two-Way Goods Line to the north	1
<b>Train Watering Points</b>		
Platforms 1 and Eastfield Sidings		
<b>Turnround</b>		
To/from Spalding	5	
To/from Lincoln	7	
To/from Doncaster, or North or West of Lincoln	10	
To/from East Anglia	10	
9Jxx to / from Thameslink Core	12 (may be reduced to 10 by prior agreement with Train Operator)	
To / from King's Cross	10 (may be reduced to 9 by prior agreement with Train Operator)	
<b>Planning Restrictions</b>		
<u>Arrivals at Platform 4 &amp; 5</u>		
For a Down arrival/pass from Holme at Platform 4 or 5 to receive an unregulated/clear run, there must be no planned movements across Spital Junction to or from Platforms 4, 5 or 6 within 2 minutes of a Down train that has already passed Holme, and then not until 1 minute after the Down train has departed Peterborough. If this isn't achievable, then the below adjustments must be applied:		
<u>Down Trains</u>		
Due to overlap restrictions at the north of the station, approach control allowances are required approaching Platforms 4 and 5, when there is a conflicting move across the north-end ladder (Spital Junction). Therefore, adjustment must be applied approaching Peterborough (see Adjustments to Sectional Running Times)		
<u>Up Trains</u>		
If there is a departure or arrival at Platforms 1 or 2 to/from the south that cross the Fast Lines within 2½ mins of an arrival at Platform 3 from the Up Fast line, the Up arrival at Platform 3 must have 1-minute adjustment added for Conditional Double Red signals (P468 & P440) between Tallington Jn and Peterborough.		

## Peterborough

### Permissive Working Restrictions

Platforms 1 & 2 - A maximum of 2-cars, made up of Class 158 or 170 units (max 47m) can permissively work with either a 12-car class 700 (243m) or 8-car class 387 & 700 (163m) only.

\*Trains must be planned with 3 mins between arrivals when working permissively.

### Other General Restrictions

Maximum standage between Signal P434 on the March Independent Line and Signal P444 on Platform 5 is 516m (81 SLUs).

Any trains planned to stand at Signal P434 having passed through Platform 5, that are longer than the maximum standage length, will lock the preceding block section.

Any Down direction train longer than 292m (46 SLUs) in length and planned to stand at Platform 5 will prevent any pass, arrival or departure to/from Platform 6 across Spital Ladder as the overlap beyond Signal P434 will not time out.

No timing allowances should be applied between Peterborough and Spital Junction South as there are no intermediate signals.

There is no signalled route from Platform 4 to the Up Slow Line in the Down direction.

## New England North

### Junction Margins

First Movement	Second Movement	Margin
Down Freight to clear to Down Stamford line	Before Down train passes Peterborough (DFL)	3

## Newark North Gate

Same direction 3

### Planning note

All 80X services to/from LN206 will require a minimum 1½ minute stop in the station for power changeover purposes in either direction. Where a station dwell already exists, there is sufficient timing within to undertake the power changeover. All non-stop & ECS services will still require this 1½ mins stop, and it should be denoted an OP stop.

## Newark Flat Crossing

### Adjustment to Sectional Running Time

Movement Down	Reason	Value
Down Main pass (having stopped at Newark Northgate)	Acceleration – to be applied approaching Carlton-on-Trent Loops	½ 180/80x/91

Movement Up	Reason	Value
Up Main pass towards Newark Northgate (stopping at Newark Northgate)	Deceleration – to be applied approaching Newark Flat Crossing	½ 180/80x/91

Minimum Turnround	7 – Leeds EMU services, but not 2 consecutive	
	10 – DMU/EMU from Leeds, Sheffield, Humberside area, Lincolnshire and Peterborough. Any reduction must be specially agreed	
Planning Restrictions		
<p>a) Trains from the Sheffield direction arriving into Platform 3b will hold the overlap so trains cannot arrive into Platform 1 from the Up Main line/Leeds Line. Trains from the Shaftholme Junction direction can access Platform 1 simultaneously by using the Down Thorne Slow line which will add an extra 1 minute running time. This should be shown in the timetable as Adjustment allowance.</p> <p>b) Trains longer than 234m arriving in the Up direction into Platform 3a will foul the block joint in rear and prevent access into Platform 3b until 2 minutes after the train in Platform 3a has departed.</p> <p>c) Trains longer than 234m arriving in the Down direction into Platform 8 will foul the block joint in rear and prevent access into Platform 5 until 2 minutes after the train in Platform 8 has departed.</p> <p>d) Trains should not be planned to operate northbound from Platform 3a as there is no north-facing signal at the A end of the platform</p>		
<b>Doncaster West Yard.</b> Electrically hauled trains shunting to or from Doncaster West Yard must be routed to stand behind Signal D1488 or on to the Thorne Lines due to the presence of an OHL Neutral Section

## LN110 CANONBURY WEST JUNCTION TO FINSBURY PARK JUNCTION

### Highbury Vale Junction

#### Junction Margins

First Movement	Second Movement	Margin
Train from Canonbury West Junction	Train to Canonbury West Junction	2½

#### Planning restriction

Due to the location of the signal protecting the junction in the Up direction (K376), any train held here will prevent moves from Platform 1 at Finsbury Park towards Drayton Park. Additionally, any train longer than 308m will also block back over the route it has taken. No allowances other than a maximum of 1-minute pathing time should be applied approaching Highbury Vale Jn – trains should be held at Finsbury Park otherwise

## LN115 COPENHAGEN JUNCTION TO CAMDEN ROAD CENTRAL JUNCTION

	*Does not apply to LNER	
Where shorter turnrounds already apply, existing values may continue to be used, provided they are not further reduced. In the event that a service is amended by changes to the overall pattern, the new values will apply.		

## Lincoln

### Planning Note

The lengths of Platforms 3, 4 and 5 are 144m, 144m and 165m respectively. Trains longer than this e.g. HST units, can still be planned into these platforms as they will draw past the platform signal, however:

- Over-length trains planned into Platform 3 prohibit access to Platforms 1 and 2, the Up Gainsborough Line, access into the Terrace Sidings and the bi-directional Down Gainsborough at the Pelham Street end of the station; or lock Brayford Junction crossovers (and adjacent level crossings) at the East Homes side, depending on direction of travel.
- Over-length trains planned into Platform 4 prohibit access to the Down Gainsborough Line and Platform 5 at the Pelham Street end of the station, or lock Brayford Junction crossovers (and adjacent level crossings) at the East Holmes side, depending on direction of travel.
- Over-length trains planned into Platform 5 prohibit access to the Down Gainsborough Line and Platform 4 at the Pelham Street end of the station, or lock Brayford Junction crossovers (and adjacent level crossings) at the East Holmes side, depending on direction of travel.

In the case of examples B and C, if the train is routed towards the Spalding Lines, Sincil Bank CCTV barriers need to be lowered for the duration of the train's occupation of the platform; and if the train routed towards the Barnetby Lines, the Pelham Street end of the station will be locked for the duration of the train's occupation.

	10 To/from Carlisle, Hartlepool, Middlesbrough or Darlington	
	20 To/from York and beyond, and north of Carlisle	
# May be reduced by the amount of pathing time approaching Newcastle to a minimum turnround of 5 minutes		
Operating Restrictions		
Class 22X and 80x trains using Platforms 5/6 must be planned to use the furthest platform dependent on the direction of arrival (i.e Platform 5 ex KEB direction and Platform 6 ex HLB/Scotland direction). No other units to be planned to use Platform 5/6 whilst a Class 22X and 80x train is occupying either platform due to overlap and signal sighting issues.		
153, 155 and 158's are not permitted in Platform 10 as per the route clearance tables in the Sectional Appendix		
HSTs and trains formed with Mk3 carriages are not permitted in Platform 5 to 11 as per the route clearance tables in the Sectional Appendix		
Trains conveying containers should only be planned to run SL or Platform 7 or Platform 2 (in this preference) due to RT3973 restrictions through the station.		
Train Watering Points	Platforms 2, 3; restrictive use of Platforms 4, 5 and 6; Newcastle Forth Siding; Heaton Depot

Down Heavy Rail (73-178m) depart from Platform 4	Metro arrive from Park Lane	3½
Down Heavy Rail (up to 72m) depart from Platform 4	Down Metro depart from platform 3	2
Up freight pass	Up Metro Arrive	3½
Down depart	Down freight Pass	4

^ May be reduced by 1 if down train has at least (1) minute of pathing time approaching Sunderland

# May be reduced to ½ if down train is up to 72m

### Minimum Turnround

**Note:** All shunts to be timed for ARS purposes

Same platform	5 (8 for 80x)
Trains from York or south thereof, arriving and returning as Class 1 or 9	8
Via sidings	8
GC passenger to ECS or vice versa	4 (same direction) 5 (if reversing)

### Restrictions

- A down train longer than 178m arriving into Platforms 3/4 will foul the route to and from South Hylton. This train cannot turn round in the platform and return south and must depart towards Newcastle at least 1½ minutes before the next Metro departs towards South Hylton.

## Sunderland

- A down train longer than 195m can only arrive into Platforms 1/2 by prior agreement between the Train operator and the Local Operations Manager. The rear of the train will 'lock' the crossovers at the south end of the station, preventing moves to/from other platforms.
- Metro trains can only use No. 2 Siding; No. 1 Siding is not electrified

## East Boldon Up Loop

\*Can be reduced to 3½ minutes provided at least {1} applied between Norwood Junction and King Edward Bridge South Junction

+ Can be reduced to 4 minutes provided at least {1} applied between Norwood Junction and King Edward Bridge South Junction

# In order to avoid coming to a stand at King Edward Bridge East Junction, (pathing time) can be added between Park Lane Junction and Greensfield Junction (or an 'A' stop added at Greensfield Junction), provided the train length does not exceed 630m

## King Edward Bridge East Junction

### Restrictions:

- Maximum length of train which can stand at King Edward Bridge East Junction on South East Curve is 95m
  - Maximum length of train which can stand at King Edward Bridge North Junction on South East Curve is 135m
  - Maximum length of train which can stand at King Edward Bridge East Junction on Gateshead Curve is 190m
  - Maximum length of train which can stand at King Edward Bridge South Junction on Gateshead Curve is 195m
  - Maximum length of train which can stand at Greensfield Junction on Greensfield West line is 200m (if coming from High Level Bridge Junction) or 225m (if coming from Park Lane Junction)
  - A down train from Park Lane Junction/Greensfield Junction, coming to a stand at King Edward Bridge East Junction, 'claims' the overlap across the junction. Margins above reflect the resultant timeout
- No allowances to be applied between King Edward Bridge South Junction and King Edward Bridge East Junction, or between King Edward Bridge North Junction and King Edward Bridge East Junction in either direction; an 'A' stop should be inserted when required

## LN678 DARLINGTON NORTH JUNCTION TO EASTGATE

### North Road

### Planning Restriction

When Heighington SB is closed, there is no route available beyond North Road station.

Refer to section 2.2 for the Route Opening Hours.

## Heighington

### Junction Margins

First Movement	Second Movement	Margin
Arrive from Darlington	Depart to Darlington	2

## Shildon

### Junction Margins

5 Same platform arriving and departing in passenger service  
3 Down arrive, depart as class 5  
3 Class 5 at signal H55  
3 Down empty arrive Up platform, depart in passenger service

#### Shunts

Shunts at Hexham to be timed.

## Haltwhistle

### Restrictions:

- A train using the crossover west of Haltwhistle will prevent a Down train arriving or standing in the Down platform due to signalling overlap

### Note:

Signalling in the Up direction will allow a train to proceed past Haltwhistle to signal HW102, whilst waiting for a previous train to clear the section. A further train can pass Low Row 2 minutes after the train passes Haltwhistle

### Restriction:

- Tokenless One Train Working on Stocksbridge Line
- EMR Class 5s turn-back on Up Worksop, east of Woodburn Junction

## LN740 GRIMSBY MARSH WEST JUNCTION TO HUMBER ROAD JUNCTION

### Great Coates No1 Signal Box

<b>Operating Stop</b>	All trains to/from Grimsby Union Dock Branch must have a 2 minute 'OP' stop to collect /return the staff used for OT(S) working
-----------------------	---

### Pyewipe Road Signal Box

<b>Operating Stop</b>	All trains to/from Immingham East Junction must have a 2 minute 'OP' stop for token exchange purposes
-----------------------	---

### Humber Road Junction

#### Adjustment to Sectional Running times

Movement Up	Reason	Value
Up services to the N.C.B Coal Terminal or Reception Sidings (including RR1,RR7 and ESL )	Approach Control	1

The junction margins for Humber Road Jn are to be replaced with those detailed in the following matrix:

**Table 1: Junction Margin Matrix for IMNGHRJ Humber Road Junction (NB: *the matrix continues on the next page*)**

*There is one train working at the NCB 1, RR1, and RR7 coal loading points*

*At Reception Sidings, roads 3, 4 and 5 are available for trains arriving at the yard itself. RR1 consists of Roads 1 and 2, and RR7 consists of Roads 6 and 7*

*ESL is a bi-directionally worked siding line with stop boards. Trains can exit into Immingham Sorting Sidings at the eastern end of ESL*

## LN756 SCUNTHORPE TRENT JUNCTION TO ROXBY

### Scunthorpe Roxby Gullet/Dragonby Sidings

#### Operating Restriction

Trains running to/from Roxby Gullet/Dragonby Sidings require to be in possession of a Train Staff issued by North Lincoln Junction. A second train cannot proceed along the branch to Roxby Gullet/Dragonby Sidings until the first train has completed its journey on the branch and the Train Staff is surrendered by the driver and returned to North Lincoln Junction, to be re-issued to the second train. A minimum of 30 minutes for Dragonby services and a minimum of 45 minutes for Roxby Gullet services should be allowed for this to take place before the second train can proceed on the branch.

This also applies to trains returning from Roxby Gullet/Dragonby Sidings to North Lincoln Junction.

## LN758 BRANCLIFFE EAST JUNCTION TO KIRK SANDALL JUNCTION

### Dinnington Junction

#### Junction Margins

First Movement	Second Movement	Margin
Pass from Single line	Pass to Single line	6*
Pass from Single line	Depart to Single line	2

\* May be reduced to 4 minutes if train has at least an additional 2 minutes in the schedule.

#### Restrictions

When services are held at Dinnington Junction, WP607 waiting acceptance onto Single Line towards Maltby services in rear cannot pass Brancliffe East Junction towards Maltby if the first train exceeds 420m.

## Maltby Loop

### Junction Margins

First Movement	Second Movement	Margin

### Junction Margins

First Movement	Second Movement	Margin
Pass from Wakefield	Pass to Bradford	2½
Pass to Bradford	Pass to Leeds from Wakefield	2½

## Whitehall Road Ground Frame

### Planning Note

Services using Whitehall Road Sidings will need to use the Up Huddersfield at Whitehall Ground Frame (Signal L3625) for 45 minutes. This is shown as a stop at Whitehall Ground Frame (Signal L3625)

For an Arrival

1. Train clears Signal L3625; this is the arrival time at Whitehall Ground Frame
2. Train propels into Whitehall Road Sidings, leaving half the wagons on one of the sidings. Note that the front of the train is still occupying Line F/Up Huddersfield
3. Driver seeks permission from signaller and draws forward so the front half of the train is clear of L3625.
4. Train then propels into Whitehall Road Siding to use the other siding. This is the departure time at Whitehall Ground Frame.

For a Departure

1. The loco and the front half of the train draws onto the Up Huddersfield behind L3625. This will be the arrival time at Whitehall Ground Frame
2. The service propels back into Whitehall Road Siding and couples to the rear part of the train and carries out a brake test.
3. The train then passes Signal L3625, this is the departure time at Whitehall Ground Frame

This is the normal Method of Working for trains longer than one of the two sidings and is subject to change.

## Whitehall Junction

### Junction Margins

First Movement	Second Movement	Margin
Pass To/from Leeds	Freight depart ex Engine Shed or Armley Jn	1

Leeds	
<b>Platform Preferred Usage</b>	
Trains should where possible use the following platforms	
LNER turnrounds (91/HST)	Platform 6 or 8
CrossCountry Trains Eastbound	Platform 9 or 11
CrossCountry Trains Westbound	Platform 11 or 12
Through T.P.E. Eastbound	Platform 15
Through T.P.E. Westbound	Platform 16
Leeds NW/Harrogate lines	Platforms 0 – 5
Calderdale/Doncaster lines turnrounds	Platforms 10/11A/12A
Huddersfield/Normanton lines turnrounds	Platforms 12A/13/17
<b>Platform Re-occupation</b>	
3 (same direction)	
<b>Restrictions:</b>	
Trains from the West via the Through Road, planned to stop in Platform 12CD must not exceed 2x3 car class 185s.	
LNER services not to be planned in Platforms 15 and 16 as services exceed platform length	
Trains required to stand on through-platforms for longer than 45 minutes to be discussed with and agreed by Network Rail Timetable Production Team	
LNER Class 80x units that are required to attach or detach should not be planned into Platform 9	
<b>Planning Note:</b>	
Northern and LNER require a 10 min journey time from Neville Hill TMD to Leeds. This can be applied as additional adjustment time before Neville Hill West Junction.	
When a train is showing as occupying Platform 1 or 1a, then the non-preferred route for arrival into Platform 2 needs to be used	
<b>Train Watering Points</b>	
Leeds Station Platforms 1, 2, 3, 5, 6, 8, 11, 13 and 14

<b>Minimum Reversal</b>		
	5 DMU	
<b>Minimum Turnround</b>		
From Hull or York	10	

## Scarborough

From points beyond Hull or Leeds 20\*\*

\*\* This may be reduced to a minimum of 10 minutes by the number of minutes of additional station dwell at Hull, Bridlington, or York, of the incoming service

### Train Watering Points

Scarborough station. Both the platform line on which the train is standing and the adjacent platform line from which the watering will take place must be blocked whilst the operation takes place

**Restriction:** Platform 5 is barred to classes 153 156 185 150 155

**Excursion Sidings.** Trains arrive into platform 1, then propel into the Excursion Sidings, then run-round, propelling back into platform 1 before departure. The Excursion Sidings can accommodate a second train, but this can only take place after the first train has completed a run round; therefore can only leave platform 1, 30 minutes after the first. The second train can only commence a run round after the first train has returned to platform 1; planners must satisfy themselves there is adequate time between the first train arriving platform 1, and the second train moving to that platform. All such moves to be fully timed

\* May be reduced to a minimum of 10 minutes if the incoming/outgoing services have additional station dwell at Hull

## Hunmanby

### Junction Margins

First Movement	Second Movement	Margin
Arrive/pass from Bridlington	Depart to Bridlington	1

### Restriction:

#### Up train on Up line – Additional requirements associated with train lengths.

If it is necessary for a train with a length of more than 450 yards (420 metres) to pass over the crossing in the Up direction on the Up Bridlington line, the crossing must be under local control and the attendant advised in sufficient time before the train approaches the crossing

#### Reason for restriction:-

Signal SR124 at the west end of Hunmanby Station is designed not to clear to a proceed aspect until a train has come to a stand at it. The design of the crossing means there is a possibility that the barriers will raise, and the lights extinguish before a train with a length of more than 450 yards (420 metres) has passed clear of the crossing. Therefore, when such trains are planned to run over this route, arrangements must be made in advance for the crossing to be placed under local control

Depart Platform 3 to Leeds 80x 9/10 Car	Arrive Platform 3 or 5 from Bradford	4
Arrive Platform 3 from Bradford 80x 9/10car	Arrive Platform 5 from Skipton	Simultaneous
Arrive Platform 5 from Skipton	Arrive Platform 3 from Bradford 80x 9/10car	Simultaneous

Due to the positioning of Stop Boards, the following apply to LNER trains running to/from Bradford Forster Square.

- All LNER passenger trains to/from Bradford Forster Square must use platform 3 when calling.
- Passenger trains towards Leeds formed of Class 91 + nine Mark IV stop beyond signal L3966 when calling therefore no conflicting train movements should be planned through Shipley East Junction and Dockfield Jn. Platform 3W cannot be used as a workaround for this, Platform 3x must be used for Class 91+ nine Mark IV. Additional detail and the junction margin can be found on the Dockfield Junction entry.
- Trains towards Leeds formed of 9 or 10 car Class 80X will block Shipley South Jn while calling. See junction margins

### Overlap Restrictions

Movement	Conflict	Margin
Arrive Platform 5 from Bradford	Arrive Platform 2 from Leeds (and vice versa)	3*
Arrive Platform 3 from Bradford	Arrive Platform 2 from Leeds (and vice versa)	3*

\*These moves can be made simultaneous by using the short overlap, planned using platforms 2W, 3W and 5W, and with appropriate adjustment as above.

## LN930 SKIPTON MIDDLE JUNCTION TO RYLSTONE

### Rylstone

#### Operating Note:

The section of route between Skipton Middle Jn and Rylstone LC (TMO) is designated ETB.

Trains running towards Rylstone Quarry from Skipton

Leeds North-West workstation signaller must be contacted for permission to remove a token key from the machine located adjacent to L4042 signal. The train driver must then contact the Leeds North-West workstation signaller again once they are in possession of a token key prior to the signaller clearing L4042 signal.

Upon arrival at Rylstone LC (TMO) the train will be brought to a stand at the STOP board marked "STOP AND OBTAIN PERMISSION TO PROCEED. END OF TOKEN SECTION." and the token key replaced in the machine. Once permission has been obtained from the PIC, the train may proceed towards the quarry. The PIC (or driver of a unit which may be driven from both ends) must then inform the Leeds North-West workstation signaller that the token has been replaced and the train has passed the crossing complete with tail lamp.

Trains running towards Skipton from Rylstone Quarry

The departing train must initially request permission from the Leeds North-West workstation signaller for permission to depart towards Rylstone LC (TMO). Once permission has been obtained, the train must be brought to a stand at the STOP board marked "STOP AND OBTAIN PERMISSION TO PROCEED. START OF TOKEN SECTION" and permission obtained from the Leeds North-West workstation signaller to remove a token key from the DiBloC machine.

Once in possession of the token key, the train may proceed towards Skipton Middle Junction, obeying L4039 signal.

Once the train is fully clear of L4042 signal, the token key may be replaced in the DiBloC machine and the Leeds North-West workstation signaller advised that the token has been replaced and the train is complete with tail lamp

## LN932 SHIPLEY SOUTH JUNCTION TO SHIPLEY WEST JUNCTION

### Shipley

#### Adjustment to Sectional Running Times

Movement Up	Reason	Value
Depart Platform 5 towards Bradford	Acceleration	1 to be applied after Shipley

## 5.4 Platform Lengths

The table below shows the maximum length of train that may use each of the platforms at the following passenger stations. All lengths are in metres. The quoted lengths are the usable lengths from ramp to ramp unless specified. The measurements take no account of the need for signal sighting.

## 5.4.1 Loop Lengths

The table below shows the maximum length of train that may use each of the loops at the following locations. All lengths are in SLU (Standard Length Unit – an SLU measures 21 feet) and metres. All lengths are measured from the signal at the exit of the loop to the block joint in rear unless otherwise stated. Check Sectional Appendix for locations where standage is not quoted.

<b>LN101 LONDON KING'S CROSS TO SHAFTHOLME JUNCTION</b>			
LOCATION	DIRECTION	USABLE LENGTH SLU/METRES	NOTES
Claypole Up Passenger Loop	Up	92 / 588	
Claypole Down Passenger Loop	Down	113 / 723	In Down directions, trains in excess of 350 yards (50 SLU) in length are only permitted to stand for a maximum of 15 minutes

Goole Siding	Down	12 / 80	

## 5.5 Timing Allowances

All allowances shown are in minutes.

LH/HST/22x/80X	Refers to non-freight locomotive hauled trains and all trains capable of running over 100 mph. Performance allowance does not apply to empty coaching stock moves and freight services
MU/LL	Refers to all forms of multiple unit, whether diesel or electric as well as to light locomotives, not capable of running at over 100 mph. Performance allowance does not apply to light locomotives
CI 4	Refers to locomotive hauled Class 4 freight trains
CI 6	Refers to locomotive hauled Class 6 freight trains

All allowances are indicative for the Final Principal Rules and are subject to change.

SX Daytime allowances apply at all times except where specified differently in Sections 5.5.2, 5.5.3, 5.5.4, 5.5.5 and 5.5.6

E refers to engineering allowance

P refers to performance allowances

### 5.5.1 SX Daytime (See routes for applicable times)

On Monday different allowances apply on some routes until the end of the 'Sunday' allowances at the times specified in the tables below. Please refer to Section 5.5.4 for the 'Sunday' allowances section to identify the routes to which those allowances apply.

<b>LN101 LONDON KING'S CROSS TO SHAFTHOLME JN</b>					
Timing Section	Type	LH HST 80X 22X	MU	Freight	Remarks
<b>Down</b>					
Approach Welwyn Garden City	E		1		Applied for trains terminating at Welwyn Garden City Only
Approach Stevenage	P	1*	1*		*Not applicable to trains from Hertford Loop

### LN806 TAPTON JUNCTION TO MASBOROUGH JUNCTION VIA 'OLD ROAD'

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
<b>Down – Sundays</b>					
Approach Masborough Junction	E	2	2	2	
<b>Up – Sundays</b>					
Approach Beighton Junction	E	2	2	2	

### LN826 DONCASTER SOUTH YORKSHIRE JUNCTION TO SWINTON

Timing Section	Type	LH HST CI 4 22X	MU LL	CI 6	Remarks
<b>Up – Sundays</b>					
Approach Doncaster	E	1	1	1	*Can be applied flexibly between Swinton Junction and Doncaster if required #Nil for East Midlands services.
	P	1*#	1*		

### LN842 THORPE MARSH JUNCTION TO ADWICK JUNCTION

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
<b>Down – Sundays</b>					
Approach Applehurst Junction	E	3	3	3	

### LN852 HOLBECK JUNCTION TO BRADFORD INTERCHANGE

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
<b>Up – Sundays</b>					
Approach Holbeck Junction	P		2*		* 1 minute for trains from Halifax, Hebden Bridge or Huddersfield.

### LN860 DIGGLE JN TO COPLEY HILL EAST JN

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
<b>Down – Sundays</b>					
Approach Huddersfield	E		1		Terminating trains only
	P		1		Terminating trains only
<b>Up – Sundays</b>					
Approach Huddersfield/Marsden	E		1		Terminating trains only
Approach Heaton Lodge Jn	P		1		Stopping services from Leeds direction

### LN862 BARNESLEY STATION JUNCTION TO HUDDERSFIELD

Timing Section	Type	LH HST CI 4 22X	MU LL	CI 6	Remarks
<b>Down – Sundays</b>					
Approach Penistone	P		1		
Approach Huddersfield	E	1	1		
	P		½		
<b>Up – Sundays</b>					
Approach Barnsley	E	1	1		
	P		1		

### LN868 WINCOBANK JUNCTION TO HORBURY JUNCTION VIA BARNSELY

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
<b>Down – Sundays</b>					
Approach Barnsley	E	1		1	
<b>Up – Sundays</b>					
Approach Barnsley	P		1		Trains starting from Leeds only
Approach Wincobank Junction	E	1		1	

### LN872 ALTOFTS JUNCTION TO LEEDS WEST JUNCTION

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
<b>Down – Sundays</b>					
Approach Engine Shed Junction & Holbeck Depot Junction	E	2	2*	2	Approaching Stourton for trains that terminate or call * 1 minute for trains from Knottingley direction
	P		2		

### LN882 WAKEFIELD KIRKGATE WEST JUNCTION TO GOOLE POTTERS GRANGE JUNCTION

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
<b>Down – Sundays</b>					
Approach Pontefract	E		1*		* Trains terminating from Wakefield direction
	P		1*		* Trains terminating from Wakefield direction
Approach Knottingley	E	1	1	1	
	P		1		
Approach Goole	P		2		
<b>Up – Sundays</b>					
Approach Knottingley	P		1		
Approach Wakefield Kirkgate	E		1		
	P		1		

### LN912 THORNE JUNCTION TO GILBERDYKE JUNCTION

Timing Section	Type	LH HST CI 4 22X	MU LL	CI 6	Remarks
<b>Down – Sundays</b>					
Approaching Gilberdyke	P	1	1		
Approach Goole	P		1		Terminating trains only

LN914 HULL (PARAGON) TO SEAMER WEST JN					
Timing Section	Type	LH HST CI 4 22X	MU LL	CI 6	Remarks
<b>Down – Sundays</b>					
Approach Bridlington	E	2	2		Terminating trains only
	P		1		
Approach Seamer	E	2	2*		* Does not apply to trains starting from Filey and continuing to York or beyond
<b>Up – Sundays</b>					
Approach Bridlington	P		1		
Approach Hull	E	2	2*		* 1 minute for trains starting from Beverley
	P		1		

## 5.5.6 Sunday Nighttime (See routes for applicable times)

SX daytime allowances apply to those routes excluded from this section

<b>LN101 LONDON KING'S CROSS TO SHAFTHOLME JUNCTION</b>					
Timing Section	Type	LH HST 80X CI 4 22X	MU LL	CI 6, 7 & 8	Remarks
<b>Additional Engineering Allowance Down and Up – Sunday night/Monday morning</b>

(A) Only one allowance per train between Kirkstall Junction and Hellifield, to be co-ordinated with NW&C allowances. Refer to Section 5.5.6 of the NW&C Timetable Planning Rules					

## 6 Timetabling Considerations

### 6.1 Advertised and Working Times

It is not permissible for trains to be specified to be advertised to arrive before or depart after the booked times stated in the working timetable (WTT).

It is permissible for trains to be specified to be advertised to depart before the booked times stated in the working timetable in the following circumstances;

- (i) Where the WTT departure time is delayed to achieve the required headway behind a preceding train or margin following a conflicting move.
- (ii) As an aid to punctual departure where this practice has been agreed between the Train Operator and Network Rail.

By agreement between the Train Operator and Network Rail, trains may be specified to be advertised to arrive after the booked times stated in the WTT. This agreement is used instead of engineering/performance allowances.

### 6.2 Timing of Light Locomotives

It is a general principle that all light locomotive movements will be timed. Any exceptions to this must be agreed by the appropriate Operational Planning Manager.

## Appendix A Route Code Diagrams

The following diagrams are supplementary to the information shown in Section 2.1

### London King's Cross Area

London King's Cross Route C (from Platforms 2-5)

The diagram illustrates a proposed or specific route on the London Underground. The route is highlighted in pink and starts at King's Cross, moving north through a series of stations labeled 10, 9, 8, 7, 6, 5, 4, 3, 2, 1, and finally Belle Isle Junction. The route is marked with a pink line and an arrow pointing north. The stations are labeled A through F along the route: A is at the bottom right, B is at the bottom left, C is at the bottom center, D is at the bottom left, E is at the bottom center, and F is at the bottom right. The diagram shows a complex network of tracks with multiple crossings and junctions.

London King's Cross Route FX (from Platforms 8-10)

Belle Isle Route EX (into London King's Cross Platforms 8-10)

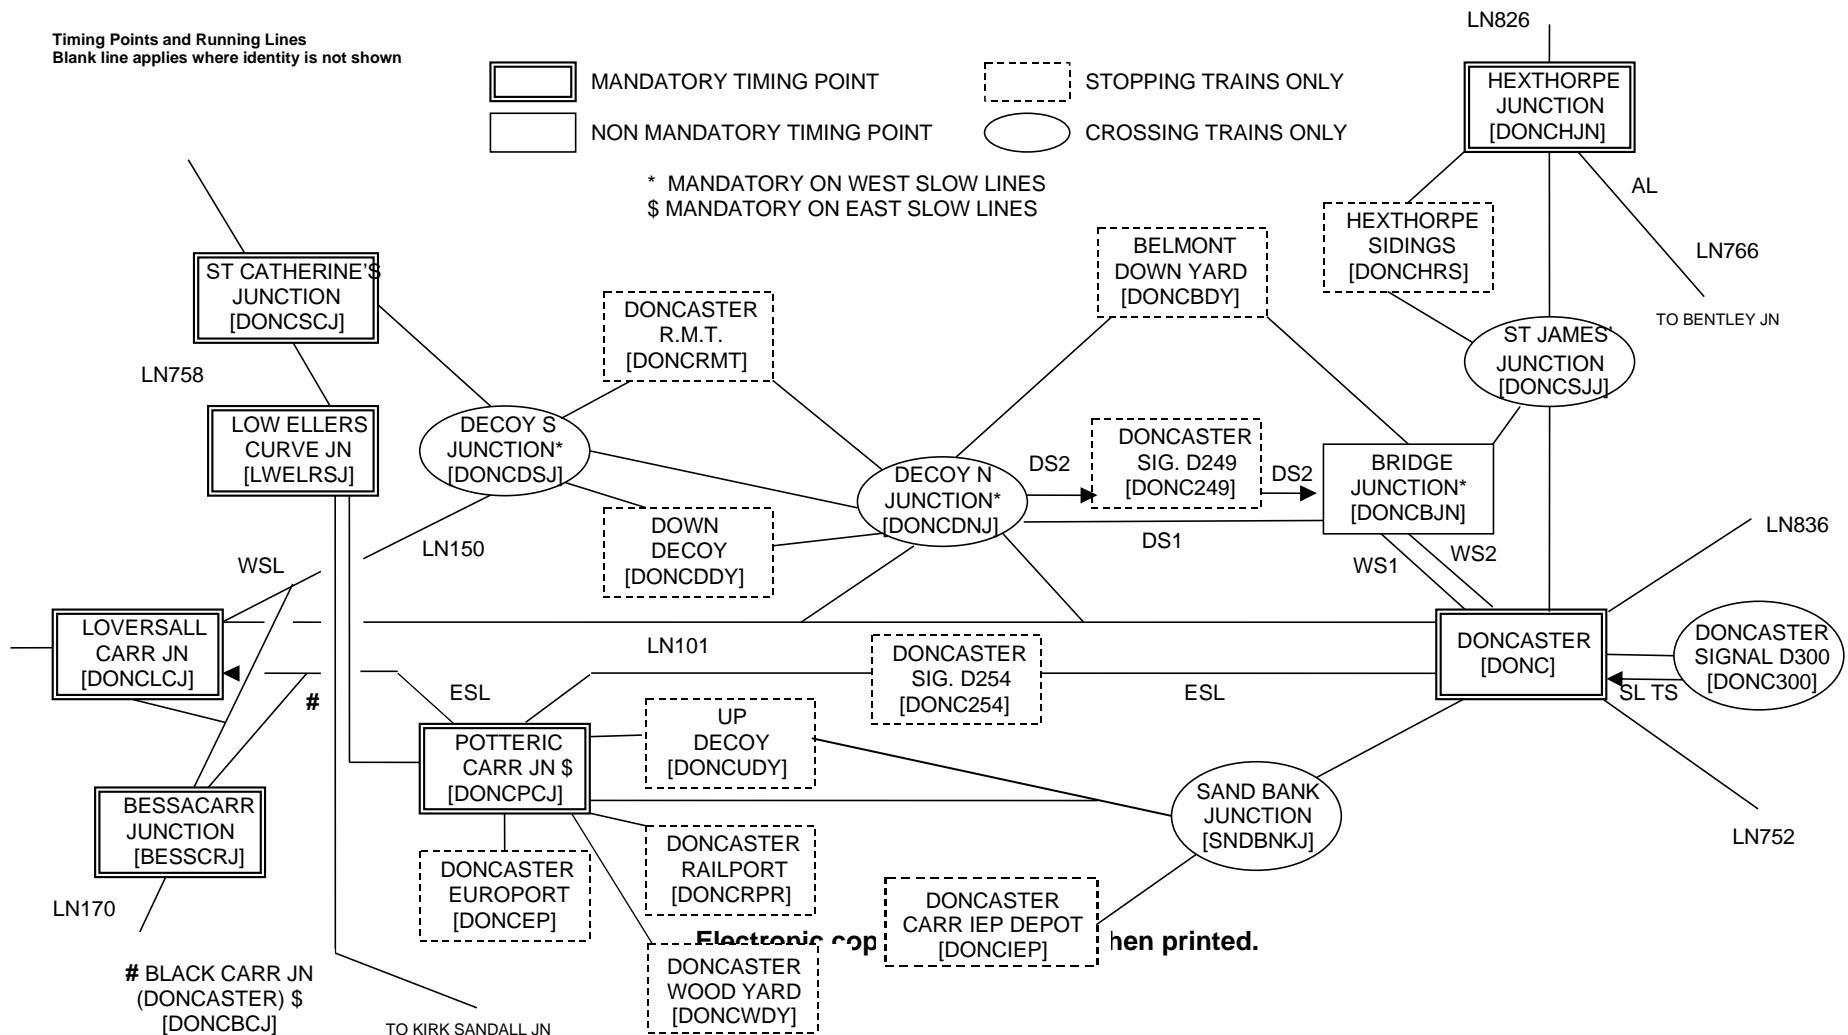

Belle Isle Route F (into London King's Cross platforms 8-10)
