Commentary on the LNE Timetable Planning Rules 2026, Version 3 Draft Rules for Subsidiary Timetable Change 2026

This document is a covering note for the Timetable Planning Rules – Draft Rules for Subsidiary Timetable Change 2026 - and provides a specific commentary to the route described above.

In the Timetable Planning Rules document, each change in content is indicated by the following convention:

New or Amended text is red
Deleted text is green and struck through

The change is also highlighted with a thick vertical line at the right-hand side of the page.

The following is a summary of changes in content from Version 2.2 of the 2026 Timetable Planning Rules.

1 Introduction and General Notes

Introduction

Reference to train operators replaced with timetable participants. Other minor wording changes for clarity and consistency across all TPR documents.

1.1 Index of Routes

Headers added to table.

Standard abbreviation for 'junction' applied throughout.

1.2 Sectional Appendices and Rule Book

1.2.1 Sectional Appendix

No change

1.2.2 Rule Book

Introduction to Rule Book replaced with link to RSSB website where the Rule Book can be viewed. Table referring to extracts from the Rule Book is deleted. This information can be found online at the RSSB website if required,

1.3 Definitions

Introductory text amended to refer to glossary in the National TPR document. Reference to contacting compiler by telephone replaced with reference to email address, as shown on front cover.

1.3.1 Train Classification

Reference to Rule Book deleted.

1.3.2 Days of Operation

No change

1.3.3 Traction and Rolling Stock

Power Removed as a definition.

1.3.4 Line Codes

No change

1.3.5 Activity and Other Codes

No change

2 Route Description

2.1 Planning Geography

Introduction

Replacement of train operators with timetable participants in the first paragraph.
Definitions of 'F' and 'P' amended to say 'All' instead of 'Only'

LN101 **Welwyn Garden City Signal YB1021**. Added to planning geography.
Welwyn Garden City Signal YB2040. Amended note to read Welwyn Garden City not EMU Sidings.

LN120 **Bowes Park**. Note added Platform details must be shown. This will assist with validation of this location.

LN600 **Darlington Signal 866** and **864** are moved to be shown after Darlington North Jn to reflect their correct position in the geography.
Darlington Signal 884 added as a shunt location. TIPLOC to be confirmed.
Manors. ML line code in Up direction replaces default line code. Required change for SARS to route trains correctly.

LN620 Standard abbreviation for 'junction' applied throughout.
Notes amended at **King Edward Bridge East Jn** to detail two routes available.

LN627 Standard abbreviation for 'junction' applied throughout.
Pelaw Jn. Notes amended to correctly show route is *to Pelaw South Jn* and *from Pelaw North Jn*. The routes are not bi-directional as previously indicated
Park Lane Jn notes amended to clarify there are two routes available.

LN629 Standard abbreviation for 'junction' applied throughout.

LN630 Standard abbreviation for 'junction' applied throughout.
Pelaw Metro Jn, correction to notes, route is from **Boldon West Jn**, being the previous mandatory timing point on LN627.

LN644 Standard abbreviation for 'junction' applied throughout.
Hartburn Jn, corrected notes, route on LN627 is to/from **Stockton Cut Jn**.

LN646 Standard abbreviation for 'junction' applied throughout.
Norton South Jn, corrected notes,. Route on LN627 is to/from **Hartburn Jn**
Morden Signal NF7194. Note amended for consistency and clarity - conditional timing point, not mandatory
Morden Signal NF7195. Note amended for consistency and clarity - conditional timing point, not mandatory

- LN656** **Seaton Snook Jn**, corrected notes, route on LN627 is to/from **Hartlepool**
- LN676** Standard abbreviation for 'junction' applied throughout.
Greensfield Jn. Notes amended for clarity and to confirm when this location is used as a timing point.
 Note added to confirmed preferred direction of running over the Gateshead Reversible and Greensfield Reversible.
- LN850** Standard abbreviation for 'junction' applied throughout.
Pelaw Metro Jn, correction to notes, route is to Boldon West Jn, being the next mandatory timing point on LN627.
- LN868** **Ecclesfield West**, delete suffix SB to this location; the signal box was abolished in late 1990s.
Woolley Coal Siding SB. Spelling correction.
- LN872** Standard abbreviation for 'junction' applied throughout.
- LN874** Standard abbreviation for 'junction' applied throughout.
- LN878** Standard abbreviation for 'junction' applied throughout.

2.2 **Route Opening Hours**

Introduction

Replace references to Rules of the Plan with Engineering Access Statement. Note added about planning trains when a signal box is switching out. Reference to PLT - Passage of Last Train deleted, as this is not used.

3 **Electrification**

3.1 **Electrification Supply Restrictions**

No change

3.2 **Electrification Limits**

References to Rules of the Plan replaced with Engineering Access Statement.

4 **Rolling Stock Restrictions**

4.1 **Locomotive Route Availability**

No change

4.2 **Passenger Stock Restrictions**

No change

4.3 **Freight Wagon Restrictions**

References to Rule Book and HS1 deleted.

4.4 **Freight Train Load Limits**

No change

4.5 **Freight Train Length Limits**

References to Sectional Appendix deleted.

4.6 **Engineers' Trains Restrictions**

This section is deleted entirely.

5 Running Times, Margins and Allowances

Introduction

Introductory remarks referring to 1994/95 rules removed as no longer relevant.

5.1 Sectional Running Times

To be advised separately.

5.1.1 Source of Current SRTs

Correction to reference to the National TPR document.

5.1.2 Method of Calculation

Replace train operator(s) with timetable participant(s). Correction to reference to the National TPR document.

5.1.3 New and Revised Sectional Running Times

No further changes.

5.1.4 Timing of Trains Consisting of Passenger Vehicles on Goods Lines

No
change

5.2 Headways

Correction to reference to the National TPR document.

5.2.1 Headway Values

Introduction

Definition of non-stopping and stopping headways is reworded. This is consistent with all TPR documents

LN676 Standard abbreviation for 'junction' applied throughout.

LN850 Standard abbreviation for 'junction' applied throughout.

LN868 Wording changes for consistency and to improve readability of rules. Correction to reference to Compendium of Signal Box Opening Times document. Under Junction Margins replace references to Wakefield with Woolley Coal Siding SB, this being the next mandatory timing point in the direction stated.

LN912 Revised headways shown following completion of resignalling project.

5.3 Junction Margins and Station Planning Rules

LN101 **Harringay.** Adjustments to Sectional Running Times - Movement Down. Note added to last set of adjustments to state these do not apply if routed towards Ferme Park.

Hornsey. Adjustments to Sectional Running Times entry added for pass from flyover to Down Slow or SL2. Acceleration to be applied approaching next timing point.

Welwyn Garden City. Turnrounds retitled Passenger to ECS in same direction which represents what the described moves are. Add Class 379.

Doncaster. Adjustments to Sectional Running Times, Movement Up, add for arrivals via Thorne Slow into 3b. Junction Margins - North End. First margin is reworded and proposed margin is increased from 1 to 2 to be more robust.

LN190 Standard abbreviation for 'junction' applied throughout.

LN200 Standard abbreviation for 'junction' applied throughout.

Wrawby Jn, entry added with reference to rules being found under LN736.
Pelham Street Jn, entry added with reference to rules being found under LN170

- LN206** **Newark Flat Crossing East Jn**. Adjustments to Sectional Running Times, wording amended for clarity. Standard abbreviation for 'junction' applied throughout
Boultham Jn. Standard abbreviation for 'junction' applied throughout.
West Holmes Jn, entry added with reference to rules being found under LN170.
- LN600** **Darlington**. Note deleted re Platforms 5 and 6 not in use until Period C. Junction Margin table, exception for Pass from Northallerton/Arrive Platform 4A from Dinsdale, remove reference to 4A via Bypass. It is not possible to reach Platform 4A via the Bypass line.
Belford. Proposal to add acceleration allowance for freight that has been timed to stop at Crag Mill Up Passenger Loop. Exit speed is 25mph. This is based on Tratim. Also add {½} for all passenger timed at 75mph or above. To mitigate against repetition of delays in this area.
- LN622** Standard abbreviation for 'junction' applied throughout.
- LN634** **Nunthorpe**. Missing 'Junction Margins' header added.
- LN676** Standard abbreviation for 'junction' applied throughout.
- LN804** **Aldwarke Jn** - Adjustments to Sectional Running Times. Delete reference to 142. Amended wording for consistency and clarity. Noted where adjustments apply approaching next timing point.
- LN828** Standard abbreviation of 'junction' applied throughout.
Aldwarke Jn, entry added with reference to rules being found under LN804.
- LN830** Standard abbreviation of 'junction' applied throughout.
Aldwarke Jn, entry added with reference to rules being found under LN804.
- LN838** Horsforth. Turnback siding turnround, delete text, leave value as 3.
- LN854** **Hebden Bridge**. Junction Margin wording amended, reference to Milner Royd Jn vice Leeds, the former being the next/previous mandatory timing point for the movements described. Spelling corrected.
Milner Royd Jn. Replace Halifax with Dryclough Jn, this being the next/previous mandatory timing point for the movements described
Heaton Lodge West Jn. Delete note referring to rules under LN860. Under Junction Margins added next mandatory timing point and LOR reference to distinguish the routes available.
Mirfield. Delete note referring to rules under LN860.
Mirfield East Jn. Delete note referring to rules under LN860. Adjustments to Sectional Running Times, delete comment '...to be applied approaching Mirfield East Jn,' as all adjustments apply approaching the location where they are specified unless stated otherwise.
Thornhill LNW Jn. Delete note referring to rules under LN860.
Wakefield Kirkgate. Tidy up of wording for consistency and readability. Spelling corrections. Restriction section added showing standage at signal K1229. Measurement taken from signalling diagram.
Turners Lane Jn. Delete Junction Margins as these are covered by the LNE standard junction margin.

- LN858** **Milner Royd Jn**, entry added with reference to rules being found under LN854.
Dryclough Jn. Standard abbreviation of 'junction' applied throughout.
- LN860** **Diggle Jn**. Note stating that allowance to be incorporated in schedule between Greenfield and Diggle Jn deleted. All allowances apply approaching the location where they are shown unless otherwise stated.
Marsden. Wording changes for clarity, consistency and conciseness.
Heaton Lodge West Jn. Rules are deleted and are shown only under LN854. Note added to confirm. This avoids unnecessary duplication in the TPR document.
Mirfield. Rules are deleted and are shown only under LN854. Note added to confirm. This avoids unnecessary duplication in the TPR document.
Mirfield East Jn. Rules are deleted and are shown only under LN854. Note added to confirm. This avoids unnecessary duplication in the TPR document.
Thornhill LNW Jn. Rules are deleted and are shown only under LN854. Note added to confirm. This avoids unnecessary duplication in the TPR document.
- LN868** **Barnsley** - Adjustments to Sectional Running Times. Amended wording to make the reasons clearer. Final Up movement has note added to explain that this adjustment is applied approaching next timing point.
- 5.4** **Platform Lengths**
LN600 **Darlington**. Note re Platforms 5 and 6 not being in use until Period C deleted.
LN694 **Seaton Delaval**. Platform length added
- 5.4.1** **Loop Lengths**
No change
- 5.5** **Timing Allowances**
Note stating all allowances are indicative for the Final Rules is deleted.
- 5.5.1** **SX Daytime**
LN804 Approach **Milford Jn**, exception added for CrossCountry ECS from Crofton Depot via Pontefract Monkhill. Allowance is reduced to [1] to reflect that these trains join LN804 at Ferrybridge South Jn.
Approach **Pontefract Baghill/Ferrybridge North Jn**, exception added for CrossCountry ECS to Crofton Depot via Pontefract Monkhill. Allowance is reduced to [1] to reflect that these trains leave LN804 at Ferrybridge South Jn.
- LN826** Note exempting East Midlands services deleted as no longer relevant.
- 5.5.2** **SX Night Time**
No change
- 5.5.3** **SO Daytime**
No change
- 5.5.4** **SO Nighttime**
LN101 New table for Saturday night/Sunday morning allowances,. Replaces current entry which refers only to allowances to be applied between King's Cross and Peterborough, which therefore suggests North of Peterborough SX Daytime allowances apply. Revised table consolidates all entries applicable for SO nighttime.

5.5.5 Sunday Daytime

LN804 Approach **Milford Jn**, exception added for CrossCountry ECS from Crofton Depot via Pontefract Monkhill. Allowance is reduced to [1] to reflect that these trains join LN804 at Ferrybridge South Jn.

Approach **Pontefract Baghill/Ferrybridge North Jn**, exception added for CrossCountry ECS to Crofton Depot via Pontefract Monkhill. Allowance is reduced to [1] to reflect that these trains leave LN804 at Ferrybridge South Jn.

LN826 Note exempting East Midlands services deleted as no longer relevant.

5.5.6 Sunday Nighttime

No change

6 Timetabling Considerations**6.1 Advertised and Working Times**

No change

6.2 Timing of Light Locomotives

No change

Appendices

No change

****No further changes****

These represent the revised Timetable Planning Rules (the “Draft Rules”) for the Subsidiary Timetable Change May 2026 in accordance with Part D of the Network Code, Condition D2.2.3.

As per Condition D2.2.4 of Part D of the Network Code, following distribution of the Draft Rules and by D-54, any Timetable Participant dissatisfied with any decision of Network Rail in respect of those Rules may make representations to Network Rail in respect of any changes they propose or objections they may have to the Draft Rules provided to them in accordance with D2.2.3.

Yours faithfully

Lindsey Nalton

1 Introduction and General Notes

Network Rail provide the Timetable Planning Rules document to ~~Train Operators~~ **Timetable Participants** and other interested parties to set out the rules which are applicable to Access ~~Proposals~~ **Requests** for scheduling of train paths on the Network Rail network. Separate ~~sections~~ **editions** of ~~the~~ Timetable Planning Rules are prepared for each Route with a National Timetable Planning Rules document setting out procedures to be followed and other nationally applicable rules.

Network Rail will determine the contents of ~~the~~ Timetable Planning Rules through consultation with ~~Train Operators~~ **Timetable Participants** with the primary aim of achieving the optimal balance between access to the network for ~~train operations~~ **Timetable Participants** and performance robustness of the resulting train plan. This consultation is in line with the Network Code Part D, and ~~Train Operators~~ **Timetable Participants** have a right of appeal to ~~a~~ **a** Timetabling Panel against the contents of the Final Timetable Planning Rules.

The Timetable Planning Rules are revised on a bi-annual basis, each revised version being operative for the same Timetable Period as the Working Timetable to which they pertain. Timetable Planning Rules may be changed only through this twice-yearly process or by the change procedure described in ~~the National Timetable Planning Rules~~ **Part D of the Network Code**.

~~Train Operators'~~ **Timetable Participants'** Access Proposals for Train Slots must be compliant with ~~the~~ Timetable Planning Rules. If a ~~Train Operator~~ **Timetable Participant** wishes to submit an Access Proposal for a Train Slot which is not compliant with ~~the~~ Timetable Planning Rules, it should consult the Network Rail Capacity Planning team to establish whether an amendment to Timetable Planning Rules is likely to be agreed and, if appropriate, submit an amendment proposal which will be considered by Network Rail in accordance with the Change Procedure set out in the National Timetable Planning Rules. The Timetable Planning Rules amendment proposal should be submitted to Network Rail as early as possible and certainly no later than the time of submission of the Access Proposal. If the proposed change is likely to involve the calculation of new sectional running times or a ~~physical~~ **detailed** investigation, the ~~Train Operator~~ **Timetable Participant** should liaise with the Capacity Planning team to establish a realistic timescale for evaluation of the proposed change before submission of the Access Proposal.

1.1 Index of Routes

Information arranged on a line of route basis in this document is presented in the following order:

LOR	LINE OF ROUTE DESCRIPTION
LN101	London King's Cross to Shaftholme Jn
LN105	Moorgate to Finsbury Park Jn
LN110	Canonbury West Jn to Finsbury Park Jn
LN115	Copenhagen Jn to Camden Road Central Jn
LN120	Wood Green North Junction to Langley Jn (via Hertford)
LN125	Hitchin Cambridge Jn to Royston (inclusive)
LN126	Hitchin North Junction to Hitchin East Junction
LN135	King's Dyke (exclusive) to Crescent Junction
LN145	Marholm Junction to Glinton Junction
LN147	Helpston Junction to Uffington
LN150	Flyover East Jn to Decoy North Jn
LN155	Flyover East Jn to Loversall Jn (Up Loversall Curve)
LN160	Loversall Carr Jn to Flyover West Jn
LN165	Harringay Park Jn to Harringay Jn
LN170	Werrington Jn to Flyover East Jn (via Lincoln)
LN175	Sleaford South Jn to Sleaford East Jn
LN180	Sleaford West Jn to Sleaford North Jn
LN185	Allington West Jn to Skegness
LN190	Allington East Jn to Allington North Jn (Allington Chord)
LN195	Grantham Nottingham Branch Jn to Allington West Jn (inclusive)
LN200	Wrawby Jn to Pelham Street Jn
LN206	Newark Flat Crossing (inclusive) to West Holmes Jn
LN210	Newark Crossing Curve line
LN215	Boultham Jn to Pyewipe Jn
LN220	Bessacarr Jn to Black Carr Jn
LN235	Rossington Colliery Branch
LN600	Shaftholme Jn to Reston GSP
LN618	Holgate Jn to Skelton Jn
LN620	King Edward Bridge East Jn to King Edward Bridge North Jn
LN622	Forth branch
LN624	Northallerton Castle Hills Jn to Castle Hills West GF
LN626	Northallerton High Jn to Northallerton East Jn
LN627	Northallerton Longlands Jn to Newcastle East Jn via the Coast
LN628	South Hylton to Sunderland South Jn
LN629	Pelaw Metro Jn to Pelaw South Jn
LN630	Pelaw North Jn to Pelaw Metro Jn
LN631	Darlington South Jn to Eaglescliffe South Jn
LN632	Stockton Cut Jn to Saltburn
LN634	Guisborough Jn to Whitby
LN636	Beam Mill Jn to Slag Road (Lackenby)
LN638	Grangetown Shell Jn to Cleveland Freightliner Terminal (Wilton)
LN640	ICI Wilton Coal Terminal
LN642	Saltburn West Jn to Boulby Mine
LN644	Hartburn Curve
LN646	Norton-on-Tees South to Ferryhill South Jn
LN648	Norton-on-Tees West to Norton-on-Tees East
LN652	Billingham Jn to Seal Sands Storage
LN656	Seaton-on-Tees Branch
LN662	Ryhope Grange Jn to Hendon
LN664	Boldon East Jn to Boldon North Jn
LN666	Boldon West Jn to Tyne Dock

Electronic copy - uncontrolled when printed.

LOR	LINE OF ROUTE DESCRIPTION
LN670	Jarrow Branch
LN672	Wardley to Pelaw Jn
LN674	High Level Bridge Jn to Greensfield Jn (West Curve)
LN676	Park Lane Jn to King Edward Bridge South Jn
LN678	Darlington North Jn to Eastgate
LN682	King Edward Bridge South Jn to Carlisle North Jn
LN684	Low Fell Jn to Norwood Jn
LN694	Benton North Jn to Morpeth North Jn via Bedlington
LN696	Hepscott Jn to Morpeth Jn
LN698	Butterwell South Branch
LN700	Butterwell North Branch
LN702	Bedlington North to Lynemouth Alcan
LN706	West Sleekburn Jn to North Blyth
LN708	Winning Jn to Marchey's House Jn
LN724	Holgate Jn to Skelton Jn
LN736	Cleethorpes to Nunnery Main Line Jn via Retford
LN738	Great Coates No.1 to Union Dock
LN740	Grimsby Marsh West Jn to Humber Road Jn
LN741	Habrough Jn to Ulceby South Jn
LN742	Killingholme to Brocklesby Jn
LN744	Ulceby North Jn to Barton on Humber
LN746	Cottam Power Station Branch
LN748	Retford Western Jn to Thrumpton West Jn
LN750	Woodburn Jn to Deepcar
LN752	Wrawby Jn to Marshgate Jn
LN754	Scunthorpe Foreign Ore Branch
LN756	Scunthorpe Trent Jn to Roxby
LN758	Branccliffe East Jn to Kirk Sandall Jn
LN762	St Catherines Jn to Decoy South Jn
LN764	Low Ellers Curve
LN766	Bentley Jn to Hexthorpe Jn (Doncaster Avoiding Line)
LN768	Mansfield Woodhouse to Shireoaks East Jn
LN772	Warsop Jn to Shirebrook Jn
LN782	Woodend Jn to Shireoaks West Jn
LN784	High Marnham to Shirebrook East Jn
LN786	Bevercotes Colliery Branch
LN788	Thoresby Colliery Branch
LN790	Rufford No.1 Coal Stacking Site to Clipstone East Jn
LN800	Clipstone South Jn to Clipstone West Jn
LN802	Welbeck Colliery Branch
LN804	Tapton Jn to Gascoigne Wood Jn via Sheffield
LN806	Tapton Jn to Masborough Jn via 'Old Road'
LN807	Dore South Jn to Dore West Jn
LN808	Dore Station Jn to Earles Sidings (excl.)
LN809	Shepcote Lane West Jn to Tinsley Yard East End
LN810	Shepcote Lane West Jn to Tinsley South Jn
LN812	Shepcote Lane East Jn to Broughton Lane Jn
LN814	Tinsley North Junction to Sheffield Tram Transfer Line
LN815	Parkgate Junction to Sheffield Tram Parkgate Transfer Line
LN816	Beighton Jn to Woodhouse Jn
LN818	Holmes Jn to Rotherham Central Jn (Holmes Curve)
LN824	Moorthorpe Jn to South Kirkby Jn
LN826	Doncaster South Yorkshire Jn to Swinton
LN828	Mexborough Jn to Aldwarke Jn via Kilnhurst
LN830	Aldwarke Jn to Woodburn Jn

LOR	LINE OF ROUTE DESCRIPTION
LN832	Doncaster Bridge Jn to St. James Jn
LN836	Doncaster Marshgate Jn to Neville Hill East Jn
LN838	Leeds Armley Jn to York Skelton Jn via Harrogate
LN840	Engine Shed Jn & Holbeck Depot Junction to Whitehall East Jn
LN842	Thorpe Marsh Jn to Adwick Jn
LN844	Applehurst Jn to Joan Croft Jn (Applehurst Loop)
LN846	Carcroft Jn to Skellow Jn
LN848	Hare Park Jn to Crofton West Jn
LN850	Wakefield Westgate South Jn to Wakefield Kirkgate West Jn
LN852	Holbeck Jn to Bradford Interchange
LN854	Hall Royd Jn to Colton Jn
LN858	Milner Royd Jn to Bradford Mill Lane Jn
LN859	Greetland Jn to Dryclough Jn
LN860	Diggle Jn to Copley Hill East Jn
LN861	Bradley Jn to Bradley Wood Jn
LN862	Barnsley Station Jn to Huddersfield
LN864	Dewsbury Railway Street Branch
LN868	Wincobank Jn to Horbury Jn via Barnsley
LN870	Wakefield Turner's Lane Jn to Calder Bridge Jn
LN872	Altofts Jn to Leeds West Jn
LN874	Methley Jn to Whitwood Jn
LN875	Castleford West Jn to Pontefract West Jn
LN876	Castleford East Jn to Ledston
LN878	Sherburn Jn to Gascoigne Wood
LN880	York to Scarborough
LN882	Wakefield Kirkgate West Jn to Goole Potters Grange Jn
LN884	Oakenshaw South Jn to Oakenshaw Jn
LN886	Monk Bretton Loop to Crofton East Jn
LN888	Stainforth Jn to Ferrybridge North Jn
LN889	Shaftholme Jn to Haywood Jn
LN892	Pontefract East Jn to Ferrybridge South Jn
LN894	Knottingley South Jn to Knottingley East Jn
LN896	Drax Power Station Branch
LN898	Neville Hill East Jn to Hull
LN900	Neville Hill West Jn to Hunslet East
LN902	Micklefield Jn to Church Fenton North Jn
LN904	Hambleton South Jn to Hambleton West Jn
LN906	Hambleton East Jn to Hambleton North Jn
LN908	Selby West Jn to Selby Canal Jn
LN910	Temple Hirst Jn to Selby South Jn
LN912	Thorne Jn to Gilberdyke Jn
LN914	Hull (Paragon) to Seamer West Jn
LN916	Hessle Road Jn to Saltend
LN918	Springbank North Jn to Walton Street Jn
LN920	Anlaby Road Jn to West Parade North Jn
LN922	Whitehall West Jn to Hellifield South Jn
LN924	Apperley Jn to Ilkley
LN926	Dockfield Jn to Esholt Jn
LN928	Shipley East Jn to Bradford Forster Square
LN930	Skipton Middle Jn to Rylstone
LN932	Shipley South Jn to Shipley West Jn

1.2 Sectional Appendices and Rule Book

1.2.1 Sectional Appendix

The Sectional Appendix to the Working Timetable ~~and Books of Rules and Regulations~~ shall be used.

~~The Sectional Appendix describes what the current network capability is, planned future changes may not be reflected.~~

The Sectional Appendix is the sole source of information regarding the following:

Electrification limits refer to relevant Table 'A'

Permissive Working refer to relevant Table 'A', then see below.

Route Clearance refer to 'tab' associated with relevant Table 'A'

To identify the type of Permissive Working that applies at a given location refer to the appropriate Sectional Appendix Table A for that location. If there is authority for Permissive Working, this will appear in the Signalling and Remarks. There are different authorities that depend upon the signalling and layout of the location. The following list identifies the types of Permissive Working that will appear in the Sectional Appendix.

Type	Description
PP	Permissive Working – full use for class 1, 2, 3 ECS, 5, 9 and 0 trains
PP – A	Permissive Working – Attaching and Detaching use only for class 1, 2, 3 ECS, 5, 9 and 0 trains
PP – C	Permissive Working – Contingency use only for class 1, 2, 3 ECS, 5, 9 and 0 trains
PP – S	Permissive Working – Platform Sharing use only for class 1, 2, 3 ECS, 5, 9 and 0 trains
PF	Permissive Working for class 3 to 8 and 0 trains

Source: Sectional Appendix – General Instructions – National – Explanation of Table A terms and symbols

1.2.2 Rule Book

~~The following Modules of the Rule Book GE/RT8000 affects all sections unless specified. The sections listed affect railway operations and train movements. The listed section does not apply directly to the planning of trains, but its application will affect how trains operate, and it is for that reason the item appears here~~

The rulebook may be located on the RSSB website using the following link:

<https://www.rssb.co.uk/>

RULE BOOK MODULE	SECTION	NOTES
G1 General safety responsibilities and personal track safety for non-track workers	5.5 Using the phonetic alphabet;	Operational principles
OTM Working of on-track machines (OTM)	2.2 Before starting a journey	TTPR Section 4.6
	5.6 Carrying out a running brake test	TTPR Section 5.1.2
P1 Single line working	6.5 Warning anyone working on or near the line used for single line working	When planning Single Line Working
	9.3 Right direction movements	
	9.4 Wrong direction movements	
S1 Signals and indicators controlling train movements		Operational principles

RULE BOOK MODULE	SECTION	NOTES
S2 Observing and obeying fixed signals	3.1 Passenger train at a position-light, shunt-ahead or shunting signal	Operational principles
SP Speeds	2.4 Differential permissible speed indicators	TTPR Section 5.1.2
	2.5 Permissible speed indicators with letters	TTPR Section 5.1.2
	2.6 Enhanced permissible speed (EPS) indicators	TTPR Section 5.1.2
T11 Movement of engineering trains and on-track plant under T3 arrangements	3 Movements entering the possession	When planning trains entering possessions
	7 Instructing the driver or machine controller	When planning trains entering possessions
TW1 Preparation and movement of trains General	7.1 Authority and arrangements for movements (Hauling dead traction units)	Operational principles
TW2 Preparation and movement of multiple-unit passenger trains	6.5 Carrying out a running brake test	TTPR Section 5.1.2
TW3 Preparation and movement of locomotive hauled trains (including HSTs, push-pull, postal, parcels)	2.1 Locomotives running light or hauling trains (Maximum speed of);	TTPR Section 5.1.2
	2.2 Maximum permitted speed of locomotive-hauled trains	TTPR Section 5.1.2
	2.3 Electric traction speed restrictions	TTPR Section 5.1.2
	3.16 Carrying out a running brake test	TTPR Section 5.1.2
	Section 14.1 Working trains with locomotives at both ends, when this type of working is permitted	Operational principles
Rule Book Handbook 5 Handsignalling Duties	Section 5.2 Entrance signal	When planning Temporary Block Working (TBW)
	5.3 Exit signal	When planning Temporary Block Working (TBW)
	5.4 Where TBW is divided into two sections	When planning Temporary Block Working (TBW)

1.3 Definitions

The list below is not an exhaustive one but is intended to give readers an understanding of some of the terminology as used for the purposes of this document. A glossary of terminology is available within Appendix H of the National TPR document.

If any term in Timetable Planning Rules is unclear, please contact the compiler [on](#) at the email address [telephone number](#) shown on the cover.

1.3.1 Train Classification

Classification	Description
1	Express passenger train; or Nominated postal or parcels train; or Breakdown or overhead line equipment train going to clear the line or returning from there (1Z99); or Traction unit going to assist a failed train (1Z99) Snow plough going to clear the line (1Z99)
2	Ordinary passenger train; or Breakdown or overhead line equipment train not going to clear the line (2Z99) Officers' special train (2Z01)
3	Freight train which can run at more than 75 mph; or A parcels train; or Empty coaching stock train if specially authorised
4	Freight train which can run up to 75 mph
5	Empty coaching stock train
6	Freight train which can run up to 60 mph
7	Freight train which can run up to 45 mph
8	Freight train which can run at, or is timed to run at, 35 mph or less
9	Thameslink services including to / from King's Cross TPE Liverpool Lime Street – Newcastle and Newcastle – Edinburgh services
0	Light locomotive or locomotives

2V91-99 2V90-98	Welwyn GC to Moorgate via SL1 not calling at Hornsey and Harringay. Moorgate or King's Cross to Welwyn GC via SL not calling at Harringay and Hornsey.

TID	Great Northern / Thameslink Suburban Class 2 services (WTT)
2W81-99	Alexandra Palace to Moorgate or King's Cross via SL2
2W80-98	Moorgate or King's Cross to Alexandra Palace via SL2
2Y01-99	Welwyn GC to King's Cross (includes Thameslink services)
2Y00-98	King's Cross to Welwyn GC (includes Thameslink services)

Great Northern / Thameslink Services	
TID	Class 5 services to Hornsey EMUD
5E00-09	Spare / Non-GTR services
5E1039	GTR South-End arrivals except from Moorgate
5E40-49	GTR South End arrivals from Moorgate
5E50-69	GTR North-End arrivals from London via Bowes Park Reversing Siding
5E70-79	GTR North-End arrivals from or via Welwyn Garden City
5E80-89	GTR North-End arrivals from or via Hertford North / Gordon Hill
5E90-99	Test trains and extraordinary services
TID	Class 9 services (WTT)
9Jxx	Peterborough and Horsham via London Bridge and Redhill
9Sxx	Cambridge and Gatwick Airport / Three Bridges / Brighton via London Bridge and Quarry Lines
9W90-99	Peterborough and Horsham via Hertford Loop, Streatham and Redhill
9Yxx	Welwyn Garden City / Blackfriars and Sevenoaks via Catford and Swanley

1.3.2 Days of Operation

The following abbreviations are used to identify the day or days that a train operates.

Abbreviation	Description
M	Monday
T	Tuesday
W	Wednesday
Th	Thursday
F	Friday
S	Saturday
Su	Sunday
EWD	Every Week Day (Monday to Saturday)
Daily	Every day, systems will not accept this; there must be a separate entry for Sundays
Suffixes	
O	Adding this indicates that the train will run only on that day or those days shown
X	Adding this indicates that the train will not run on that day or those days shown
General	
BHX	Denotes that this train does not run on a bank holiday

1.3.3 Traction and Rolling Stock

Abbreviation	Description
15X	DMU classes 150/155/156
153	Class 153 DMU
158	Class 158 DMU
170	Class 170 DMU
180	Class 180 DMU
22X	DEMU classes 220/221/222
379	Class 379 (timed as 387/100)
387	Class 387
700	Class 700
717	Class 717
755	Class 755 Bi-Mode
80X	Class 800, 801 and 802 multiple units in 5, 9 or 10-car formation; and Class 803 multiple units in a 5-car formation
91	Class 91 and 7 coaches and DVT
DMU	Any diesel multiple unit (excluding classes 220/221/222)
EMU	Any electric multiple unit
ECS	Empty Coaching Stock includes empty diesel and electric multiple units.
HST	Trains consisting of two Class 43 locomotives and Mk 3 passenger vehicles
LH	A passenger or parcels train hauled or propelled by one or more locomotives
LHCV	Locomotive hauled coaching vehicles
Power	Passenger stock equipped with power operated external doors

1.3.4 Line Codes

This section should be used in conjunction with Appendix A Timing Point Diagrams, which contains explanations of line codes not mentioned in the list below.

Abbreviation	Description
A/D	Arrival/Departure Line
AL	Avoiding Line
BS	Leeds Line B
CHC	Copley Hill Chord
CL	Carriage Line
DBH	Down Barrow Hill
DBP	Down Back Platform at Welwyn Garden City
DCF	Down Royston Flyover
DCT	Down Canal Tunnel
DF or DFL	Down Fast Line
DG	Two-way Goods No.2
DGL	Down Goods Line
DH	Down Harrogate
DHF	Down Huddersfield Fast
DHL	Down Hendon Line
DHM	Down Hull Main
DHS	Down Huddersfield Slow
DL	Down Line
DM	Down March
DM	Down Midland – Engine Shed Jn or Leeds West Junction LN872
DM or DML	Down Main Line
DN	Leeds Line D – non-preferred route for ARS
DPV	Down Passenger Loop
DS or DSL	Down Slow Line
DSG	Down Scunthorpe Goods
DUG	Down and Up Goods
E	E line between King's Cross and Belle Isle Jn E line between Whitehall Jn and Leeds E line between Mill Lane Jn and Bradford Interchange
ESL	East Slow Line
F	F line between King's Cross and Belle Isle Jn F line between Leeds West Jn and Leeds
FL	Fast Line – can be numbered e.g. FL1
GL	Goods Line
LSL	Leeds Line
M	M line between Mill Lane Jn and Bradford Interchange
MI	March Independent
ML	Main Line
NDS	Up Slow Line from Newcastle Platform 7 to Newcastle South Jn., then Down Slow Line to King Edward Bridge North Jn
NM	Up Slow Line from Newcastle Platform 7 to Newcastle South Jn., then Up Fast Line to King Edward Bridge North Jn
NNL	Normanton Line
NS	Up Slow Line from Newcastle Platform 7 to King Edward Bridge North Jn
SDA	South Down Arrival
SHL	Shunt Line
SL	Slow Line
SGL	Staveley Goods Line
SL1	Slow Line 1
SL2	Slow Line 2

Abbreviation	Description
SUD	South Up Departure
TL	Through Line
TS	Thorne Slow
UB	Up Bradford
UBH	Up Barrow Hill
UCT	Up Canal Tunnel
UD	Up Doncaster
UGL	Up Goods Loop
UH	Up Harrogate
UHF	Up Huddersfield Fast
UHM	Up Hull Main
UHS	Up Huddersfield Slow
UL	Up Line
UM	Up March
UM	Up Midland – Leeds West Jn
UM or UML	Up Main Line
UPV	Up Passenger Loop
US see below	Up Shipley/Up Sidings
USG	Up Scunthorpe Goods
USL	Up Slow Line
UWC	Up Whitehall Curve
UWF	Up Welwyn Flyover
W	W line between Mill Lane Jn and Bradford Interchange
WL	Werrington Line
WSL	West Slow Line

1.3.5 Activity and Other Codes

Abbreviation	Description
*	Suppression of traffic stop indicator
-D	Train stops to detach vehicles
-T	Train stops to attach and detach vehicles
-U	Train stops to attach vehicles
A	Train stops or shunts for other trains ahead or to pass only. Shows as an * in WTT
AE	Trains stops to attach/detach assisting locomotive.
BL	Train stops to attach or detach a banking locomotive
C	Train stops to change train crew
D	Train only stops to set down passengers. Shows as an s in NRT
E	Train stops for examination
G	NRT data to add
H	Notional Activity to prevent WTT column merge
HH	As H, were there is a third column involved
K	Passenger count point
KC	Ticket collection and examination point
KE	Ticket examination point
KF	Ticket examination point – 1 st Class only
KS	Selective ticket examination point
L	Train stops to change locomotives
N	Stop not advertised to the public
OP	Train stops for other operating reasons
OR	Train locomotive on rear of train
PR	Train propelling between points shown
R	Train stops when required. Shows as an x in NRT
RETB	Radio Electronic Token Block
RM	Trains stops for a reversing movement or driver to change ends
RR	Train stops to allow the locomotive to run-round its train
S	Trains for railway personnel only
T	Trains stops to pick up or set down passengers
TB	Train begins (Origin)
TF	Train finishes (Destination)
TS	Detail consist for TOPS Direct requested by Freight Operator
TW	Train stops to pick up or set down a staff, tablet or token on Single Lines. See Section 5.2
U	Train only stops to pick up passengers. Shows as a u in NRT
W	Train stops for watering of coaches
X	Train passes another train at crossing point on single line. See Section 5.2
x	Suppress running line information
	Force running line indication
	Force path and line indications
	Force path indication
#	Force stop with TW

Activity Codes – Notes
1. Any passenger train that stops at a location automatically generates a T Activity unless it is suppressed.
2. If an Activity is required that removes the 'passenger stop' Activity (T, D, U and R) from ITPS then the 'passenger stop' Activity must always appear in the first Activity field (e.g. T –D would be correct, –D T would not). This is because the National Rail Timetable (NRT) extract program only considers the first Activity field. If it does not find a 'passenger stop' Activity in the first field the time will not be extracted to appear in the NRT.
3. Up to 6 Activities may be shown for each event.
4. No two Activities may be duplicated at the same event.
5. At any one event, the following groups are mutually exclusive: a) D, U, T, N, S, TW, OP. b) –D, –U, –T. c) TB, TF. d) KC, KE.
6. N, R, G, D and U are only valid with Train Categories XC, XD, XI, XX, XZ, OO, OW, OL, BS, BR and blank (i.e. 'advertised' services).
7. K, KC, KE, KF, KS are only valid with Train Categories starting X or O.
8. If TF is present then none of K, KC, KE, KF, KS can be present.
9. Activity T indicates that a train stops to pick up and set down. This normally refers to passengers. Activity –T indicates that the train stops to attach and detach vehicles. At any location where a 'stop' time is shown, TPS or a similar system will assume a default Activity is required unless otherwise specified. These default Activities are as follows: T for trains with a Train Category starting in X or O, OP for trains with a Train Category starting in Z or E, and –T for all other trains (but see below). The default Activity will be generated when the upload file is created.
10. If Activities U, D, N, R, OP, S, TW, –U or –D are specified then this overrides the defaults and only the specified Activities will be included in the upload file (it is not necessary to use the * suppression code if these codes are present).
11. If a traffic Activity is NOT required at a 'stop' location with Activities other than U, D, N, R, OP, S, TW, –U or –D (e.g. at 'C' or 'L' stops) then the * must be input to the TPS or similar system train specification at that location to suppress –T or T. If the * is not added to indicate a non-traffic stop then T, –T or OP will be added to the upload file
12. If an Activity –T (only) is required on a train with a Category starting in X or O it is necessary to add a * to the schedule (to suppress 'T') and positively show –T in the Activity column.

2 Route Description

2.1 Planning Geography

Network Rail maintains the planning geography and issues it to ~~Train Operators~~ **Timetable Participants** using the BPlan system. BPlan data is to be regarded as the master geography and it is the responsibility of ~~Train Operators~~ **Timetable Participants** and nominated Network Rail users to ensure that data in their train planning systems reflects the master geography.

It is essential that all locations, times and full details such as platforms, running lines, activities etc. comply fully with all of the following rules. Any Network Links used for buses only are to have running line defined as BUS. All data used by a specifier must be that supplied by Network Rail: use of estimated times added or amended locally will cause the trains concerned to fail validation.

In order to avoid the creation of unnecessary journey legs and associated point-to-point timings, all passing times must conform to these rules.

Locations in bold **type and underlined** are mandatory timing points i.e. apply to all trains on the specified line of route.

Locations in **bold** type are conditional timing points with a mandatory element. These are locations where all trains travelling on a specific line or in a specific direction are required to be timed at this location, which will be defined in the Notes column. For lines/directions for which the mandatory element does not apply they are to be treated as non-mandatory timing points and are only required to be shown in connection with a specific activity with one or more of the codes shown below in the Code column.

Locations in normal type are non-mandatory timing points and are required to be shown only for a specific activity with one or more of the codes shown below in the Code column.

Locations in *italic* type are not timing points but are shown for reference purposes.

Line references shown in italics e.g. *SW100* are only for reference purposes.

In the tables below, the following codes apply:

F	Only All freight trains are timed here
P	Only All passenger trains are timed here
S	Only stopping trains are timed here
X	Only trains crossing from one running line to another are timed here

LN101 LONDON KING'S CROSS TO SHAFTHOLME JN

2.2 Route Opening Hours

Subject to constraints imposed by the **Engineering Access Statement Rules of the Route**, all routes are open continuously, except as shown below. For a complete listing of current signal box opening hours please refer to the 'Compendium of Signal Box Opening **Times Hours**' which can be found on the Network Rail website - <https://www.networkrail.co.uk/industry-and-commercial/information-for-operators/>

The hours shown reflect the contractual opening hours. The actual opening hours may vary from those shown. If there is doubt about a signal box's opening hours check with the appropriate Network Rail Operations Manager.

When the routes shown are required for services diverted under the **Engineering Access Statement Rules of the Route**, opening hours will be increased as necessary on a temporary basis.

Signal boxes equipped to be switched out during a route's opening hours are shown within the routes concerned. **No train is allowed to be in a section when a box is switching in or out. The number of minutes required to be out of section will vary by location, the LOM or signal box should be able to provide a safe value to plan to.**

~~PLT denotes passage of last train.~~

ROUTE SECTION	SX	SO	SUN
Filey (excl) to Seamer	0615 - 2215	0625 - 2215	0920 – 2205

3 Electrification

3.1 Electrification Limits

Limits of the 25 kV AC and 750V DC electrification systems are contained in Table A of the Sectional Appendix to the Working Timetables, issued by, Network Rail. Refer to Table A for the given location to identify the type of electrification that applies.

3.2 Electrification Supply Restrictions

Under normal conditions, the electrification power supplies will not place any restrictions on the use of approved electric traction. However, the Route Clearance sections of the Sectional Appendix to the Working Timetables, issued by, Network Rail do tabulate restrictions on the movement of electric trains. Refer to Table A and select Route Clearance.

Under maintenance conditions, certain sections of the electrified network may be blocked to electric traction. These restrictions are contained within the Network Rail **Engineering Access Statement** ~~Rules of the Route~~ for the appropriate year. Additional restrictions may also arise in connection with engineering possessions requested through the **Engineering Access Statement** ~~Rules of the Route~~ amendment procedure.

Line of Route

LN600 SHAFTHOME JUNCTION TO RESTON GSP

Due to power supply constraints in the Hutton Bonville and Marshall Meadows feeder areas, restrictions apply to a selection of electric services which can operate through this section.

Please consult NESA for a full list and description of this restriction.

4 Rolling Stock Restrictions

4.1 Locomotive Route Availability

See the applicable Route Clearance table for the given location in **the** Sectional Appendix to the Working Timetables, issued by Network Rail. Refer to Table A and select Route Clearance.

4.2 Passenger Stock Restrictions

See the applicable Route Clearance table for the given location in **the** Sectional Appendix to the Working Timetables, issued by Network Rail. Refer to Table A and select Route Clearance.

4.3 Freight Wagon Restrictions

See the applicable Route Clearance table for the given location in **the** Sectional Appendix to the Working Timetables, issued by Network Rail. The Route Availability for a given location is in the 'Signalling and Remarks' column of Table A. Route Clearance Table D5 Route clearance of freight vehicles gives further guidance on freight wagon restrictions.

Trains conveying vehicles that have a heavy axle weight or other exceptional characteristics, or vehicles conveying containers or swap bodies require an RT3973 form.

Note: The Rule Book GERT8000 Section TW4 of defines a container as an intermodal transport unit constructed to a standard (usually specified by the ISO) suitable for conveyance by road, rail or sea.

Note: The Sectional Appendix does not cover the CTRL HS1. The CTRL has its own Working Manual.

4.4 Freight Train Load Limits

Trailing load limits for all traction types are contained in the Freight Loads Book published by Network Rail.

Note: It is important to understand the weight limitations that apply to trains especially over sections of heavily graded routes. Coupling strength information is also contained in the Freight Loads Book. Coupling strength is important in determining the trailing loads that trains can convey.

4.5 Freight Train Length Limits

Refer to the Freight Train Loads Book published by Network Rail for the length limits of freight trains.

Note: The Sectional Appendix quotes loop lengths in metres and feet. All lengths are exclusive of an allowance of one locomotive.

4.6 Engineers' Trains Restrictions

Some On Track Machines (OTMs) do not reliably activate track circuits. These OTMs must use one of the following special reporting numbers 6Z09, 7Z09 or 8Z09. Because these OTMs do not reliably activate track circuits it is not possible to apply the headways and junction margins as outlined in Timetable Planning Rules consistently and it is therefore not possible for Capacity Planning to provide timings for these movements.* Source GE/RT 8000-OTM*

5 Running Times, Margins and Allowances

~~Except where otherwise stated, the information in this section of the Timetable Planning Rules reflects the general rules used in developing the 1994/5 timetable (Several exceptions to the general rules were agreed for 1994/5 and exceptions may continue to be possible with the specific agreement of Network Rail in every case.)~~

5.1 Sectional Running Times

The definition for Sectional Running Times (SRTs) is listed in ~~Section 6.4~~ **Appendix H** of the National TPRs.

5.1.1 Source of Current SRTs

The definitive catalogue of SRTs is BPlan.

5.1.2 Method of Calculation

SRTs are revised by ~~Train Operators~~ **Timetable Participants** and Network Rail as part of the Revision of Timetable Planning Rules process outlined in Network Code Part D 2.2. Normally they will not change from one timetable to the next. Network Rail will, however, re-calculate SRTs for particular train/route combinations in the following circumstances:

- i) Where a ~~Train Operators~~ **Timetable Participant** anticipates using a train/route combination for which no suitable SRTs exist;
- ii) Where Network Rail anticipates a change to route data, e.g. line speed changes;
- iii) Where there is evidence that the SRTs in current use do not adequately represent real train performance;
- iv) Where it is cost-effective to re-calculate all SRTs on a route at the same time as a re-calculation for a particular train type.

Network Rail will reflect the methodology and assumptions described in ~~Section 6~~ **1.4** of the National TPRs when calculating TPR proposals, unless and to the extent documented otherwise in respect of any given proposal. Timetable participants are encouraged to submit change proposals for review and consultation in line with the national methodology, or in line with such alternative methodology and assumptions as favoured by the proposer. NR will not seek to reject any proposal on the exclusive basis of the methodology employed, provided that the methodology and assumptions are clearly stated and demonstrably adhered to in respect of the proposal received.

SRT change proposals may be calculated in a number of ways including, but not limited to:

- a) Through actual timing of trains
- b) Use of On Train Monitoring Recorder (OTMR) systems
- c) Use of computer system actual values
- d) Use of computer simulation tools
- e) By any other agreed methodology

It is permissible to include percentage uplift in SRTs instead of applying engineering recovery allowances to be agreed by all affected parties.

In the event that the application of different methodologies produces conflicting proposals, a joint observation exercise should be undertaken to ascertain what happens in reality.

5.1.3 New and Revised Sectional Running Times

New and revised SRTs revised by Train Operators and Network Rail on an individual basis. These should be supplied by applying the methodology described in Section 6 of the National TPRs unless another methodology is deemed appropriate, provided that the methodology and assumptions are clearly stated and demonstrably adhered to in respect of the proposal received.

5.1.4 Timing of Trains Consisting of Passenger Vehicles on Goods Lines

The sectional running timings quoted for trains consisting of passenger vehicles on Goods Lines reflect the speeds shown in the relevant Table 'A' of the appropriate Sectional Appendix. They do not constitute an authority to time trains conveying passengers on a Goods Lines. Nor do they reflect the permitted speeds at which a train conveying passengers can proceed. Network Rail will offer the sectional running times for trains conveying passengers on a Goods Line on a train-by-train basis. For those times, please apply to the Capacity Planning Department. Operations Publications publish the authority to allow the planned operation of trains conveying passengers on Goods Lines. Before Operations Publications can grant authority, they require confirmation that the track is fit for purpose and that there is a safe method of operation. Therefore, the Capacity Planning Department must apply to the relevant Track Engineer and Operations Manager for confirmation of these requirements in writing. The Capacity Planning Department must pass these responses to Operations Publications. The Capacity Planning Department is responsible for advising Operations Publications of the requirement to operate a passenger train on a Goods Line at least 8 weeks before the day of operation.

5.2 Headways

The definition for Headways is listed in Section ~~6.5~~ 1.5 of the National Section 6.5 of the National TPRs.

5.2.1 Headway Values

All times are in minutes. All routes are shown.

Where track circuit block (TCB) signalling applies, the standard headways for each route are shown, together with any exceptions.

AB indicates locations where absolute block signalling applies. Here the headway is to be calculated from the transit time of the first of each pair of trains running between the stated timing points. A value "x" shall be added to the transit time to allow for the signaller's actions and sighting of the relevant signal. The planning headway is shown as "AB+x".

AB methodology may also be used to express the headway in other areas (e.g., TCB), the value x including the time taken to reset the route, clear the signal on entry to the section and sight the relevant signal.

Single lines and other forms of signalling are shown, together with any values applicable, where they occur.

"OTNS" or "OT" indicates One Train Working with No Train Staff; "OTS" or "OT(S)" indicates One train Working with Train Staff. "NST" indicates No Signaller Token. In these instances, only one train is allowed in the section at one time; a second train cannot be allowed to enter the section until the first train has left the section.

"ETB" indicates Electric Token Block and "TB" indicates Tokenless Block for single lines.

"RB" indicates Radio Signalling where "long section tokens" can be issued between certain block posts during times of low traffic volume.

~~Where headways are shown as being "following a non-stop" or "following a stopping", these descriptions refer to the service that the path is following. The headway value does not refer to running lines. The "following a stopping" headway should be applied to a service following a preceding service which stops at either a station or any other location for operational reasons. The "following a non-stopping" headway should be applied to a service following a preceding service which does not stop at that location. Immediately the preceding service stops at any location for any reason, the headway should be amended to the "following stopping" value.~~

Where headways are shown as being "non-stopping" or "stopping" these descriptions refer to the service that the path is following. The "stopping" headway should be applied to a service following a preceding service which stops at either a station or any other location for operational reasons. The "non-stopping" headway should be applied to a service following a preceding service which does not stop at that location. Immediately the preceding service stops at any location for any reason, the following service headway should be amended to the "stopping" value. If in doubt, apply the use of the "stopping" headway.

Light engine movements, postal and test trains to be treated as passenger trains when applying margins/allowances where there is a passenger/freight differential.

Details of how to apply headways are listed in the National TPRs Section 1.5.5.

Skipton to Rylstone	AB+2*		*Single Line, ETB

5.2.2 General Capacity Constraints

Where single line working is to operate or trains are to be routed to run on a line other than that normally planned for them, constraints on capacity will apply – see Rules of the Route.

The following special capacity and timing restrictions apply in addition to the constraints stated elsewhere in this document:

None

5.3 Junction Margins and Station Planning Rules

The definition for Junction Margins and Station Planning Rules is listed in Section 6.6 - 6.10 of the National TPRs.

All times shown are in minutes. Where adjustments to sectional running times are shown, the value must be added to the normal SRTs shown in B Plan. Negative adjustments are specially identified.

Minimum station allowances are the minimum practical for the particular type of stock. These are shown with exceptions being listed by line of route where applicable.

Light engine movements, postal and test trains to be treated as passenger trains when applying margins/allowances where there is a passenger/freight differential.

Standard Values

STANDARD VALUES – MINIMUM		
Adjustments to Sectional Running Times		
CrossCountry schedules must depart from origin and terminate at destination on a whole minute due to limitations with TOC Resourcing IT software (Integrale).		
Freight schedules must depart from origin and terminate at destination on a whole minute. (This is due to TOPS requirements).		
Arrivals at Destination		
The following operators' services are not required to arrive at destination on a full minute:		
Grand Central		
LNER		
Nexus (Tyne and Wear Metro)		
Northern		
Transpennine Express		
Arrivals from/departures to ECS		
LNER minimum platform standing allowance between ECS arrival and passenger train departures		
80x, 91		20
LNER minimum platform standing allowance between passenger train arrival and ECS departure		
80x, 91		10
Generic Rolling Stock Classes		
Train Class	TPS Timing Load	TPR Values
Class 150, 155 and 156 DMU	150 timing load	Class 150 values
Class 379 EMU	387/100 timing load	Class 379 values
Class 387 EMU	387/100 timing Load	Class 387 values
Class 387 EMU (stock transfers through TL Core)	375 timing load	Class 387 values
CrossCountry Class 170 Safety Check Unit (SCU) Allowances – minimum platform standing allowance between passenger train arrival and ECS departure to depot		
1 x 170		5
2 x 170		10

STANDARD VALUES – MINIMUM	
CrossCountry Class 170 Safety Check Unit (SCU) Allowances <u>which includes an attachment</u> – minimum platform standing allowance between passenger train arrival and ECS departure to depot	
When the second arrival is 1 x 170	9
When the second arrival is 2 x 170	14
CrossCountry 170/22x Train Preparation Allowances - minimum platform standing allowance between ECS arrival from depot and passenger train departure	
170	5
1 x 22X	15
2 x 22X	20
By exception, allowances for 'Train Preparation' (above) and may be reduced after discussion and agreement between CrossCountry and Network Rail	
CrossCountry 22x Safety Check Unit (SCU) Allowances – minimum platform standing allowance between passenger train arrival and ECS departure to depot	
1 x 22x departing in same direction as arrival	8
1 x 22x departing in reverse direction to arrival	10
2 x 22x departing in same direction as arrival	15
2 x 22x departing in reverse direction to arrival	20
GTR minimum platform standing allowance between ECS arrival and passenger train departures	
Class 379/387/700/717 departing in same direction	1 (unless otherwise specified)
GTR minimum platform standing allowance between passenger train arrival and ECS departure	
Class 379/387/700/717 departing in same direction	4 (unless otherwise specified)
Lumo Trains minimum platform standing allowance between passenger train arrival and ECS departure to depot in same direction	
Class 803	10
Attachment of Locomotives/Units	
22x	7

EMR 222, NMT, 5-car 80X (except TPE)	7**	
XC 170	4 (2-4 cars), 5 (5-6 cars), 7 (7-9 cars)	
XC 22x	5 single set 6 double set	
80X where a change of traincrew is planned	4	
Freight – Reversal before/after propelling movement	2	
Light engines	2	
*4 minutes for East Midlands Railway Services		

STANDARD VALUES – MINIMUM
** Does not apply to Hull Trains 5-car 802s

THE FOLLOWING PAGES SHOW THE EXCEPTIONS TO THESE STANDARD VALUES

LN101 LONDON KING'S CROSS TO SHAFTHOLME JN

London King's Cross

Adjustments to Sectional Running Times

Movement Up	Reason	Value
Entering a platform that is already occupied	Calling-on from signals protecting platforms	½ *

* Where this results in an arrival at King's Cross on a half-minute for a service not permitted to do so, <½> should be added to round up to a full minute

Connectional Allowance	15
-------------------------------	----

Planning Notes

Arrivals into platforms 6 and 7 via Line C use the facing crossover in Gas Works Tunnel.
Arrivals into platforms 5 to 10 via Up Fast and Line D, E or EX use the facing crossover at Belle Isle Jn.
Arrivals into platforms 8, 9 or 10 via Up Slow and Line F use the facing crossover at Copenhagen Jn.
A 0, 1 or 2 minute margin is possible providing that an arriving train passes Belle Isle Jn first, is using a different line and arrives on a higher numbered platform. For example:

- Train from Up Fast Line passes Belle Isle Jn at 12/00 then runs via Line C, D, E or EX to one of platforms 3 to 10 arrive 1202;
- Train departs one of platforms 0 to 2 at 1200 then runs via Line B and passes Belle Isle Jn at 12/02 to Down Fast Line.

The [1] engineering allowance approaching Belle Isle Jn may be moved to approaching King's Cross if it results in a compliant 2 minute margin being achieved between conflicting arriving and departing trains where the arriving train passes Belle Isle Jn first.

Platform end conflicts: departure before arrival

First movement	Second movement	Margin
Depart platform 0 via Line A	Arrive platform 0 or 1 via Line A	5
Depart platforms 0 or 1 to Down Fast via Line A or B	Arrive platforms 2 to 7 from Up Fast via Line B, C or D	6 \$
Depart platforms 0 to 7 to Down Fast via Line A, B, C, CX or D	Arrive platform 7 or 8 via Up Fast and Line E	6 \$
Depart platforms 0 to 7 to Down Fast via Line A, B, C, CX or D	Arrive platforms 8 to 10 via Up Fast and Line EX	6 \$
Depart platform 1 via Line A	Arrive platform 0 or 1 via Line A	5
Depart platform 1 via Line B	Arrive platform 1 via Line A	4
Depart platform 2 via Line B	Arrive platform 2 via Line B or C	6 \$
Depart platform 2 via Line C	Arrive platform 2 via Line B or C	6 \$
Depart platform 2 via Line CX	Arrive platform 2 via Line B	4
Depart platforms 2, 3 or 4 via Line CX	Arrive platforms 2 to 7 via Line C	5
Depart platforms 3, 4 or 5 via Line C	Arrive platforms 2 to 7 via Line C	6 \$
Depart platforms 2, 3, 4 or 5 via Line C	Arrive platforms 5, 6 or 7 via Line D	6 \$
Depart platform 5 via Line D	Arrive platform 5 via Line C	4
Depart platform 5, 6 or 7 via Line D	Arrive platform 6 or 7 via Line C	5
Depart platform 5, 6 or 7 via Line D	Arrive platform 6 or 7 via Line D	6 \$
Depart platform 7 via Line D	Arrive platform 7 via Up Slow and Line E	4
Depart platform 7 via Line E to Down Fast	Arrive platform 7 via Line C	4
Depart platform 7 or 8 via Line E	Arrive platforms 7 to 10 via Line E or EX	6 \$
Depart platform 8 via Line F	Arrive platform 8 via Line E	4
Depart platform 8, 9 or 10 via Line FX to Down Fast	Arrive platform 7 to 10 via Line E or EX	6 \$
Depart platform 8, 9 or 10 via Line F to Down Slow	Arrive platform 8, 9 or 10 via Line EX	5

LN101 LONDON KING'S CROSS TO SHAFTHOLME JN

London King's Cross

Depart platform 8, 9 or 10 via Line F to Down Slow	Arrive platform 8, 9 or 10 via Line F	6 \$
\$ Conflict occurs at Belle Isle Jn where the 2 minute margin is included in re-occupation margin.		

Platform end conflicts: arrival before departure

First movement	Second movement	Margin
Arrive any platform	Conflicting departure from any platform	1*
Arrive platform 0 via Line A	Depart platform 1 via Line B	Same time
Arrive platform 1 or 2 via Line B	Depart platform 0 via Line A	Same time
Arrive platform 2 via Line B	Depart platform 1 via Line A	Same time
Arrive platform 2, 3 or 4 via Line C	Depart platform 5 via Line D	Same time
Arrive platform 5, 6 or 7 via Line D	Depart platforms 2 to 5 via Line C or CX	Same time
Arrive platform 6 or 7 via Line C	Depart platforms 2 to 5 via Line C or CX	Same time
Arrive platform 8, 9 or 10 via Line EX	Depart platform 7 via Line E	Same time
Arrive platform 9 or 10 via Line EX	Depart platform 8 via Line E	Same time
Arrive platform 8, 9 or 10 via Line F	Depart platform 7 via Line E	Same time
Arrive platform 9 or 10 via Line F	Depart platform 8 via Line E	Same time

* Unless otherwise stated.

Minimum Turnround

	All Times
From Middlesbrough, Yorkshire and stations south thereof (LNER)	30
From Newcastle, Sunderland (LNER) and Berwick-upon-Tweed	35
From Scotland (LNER)	40
LNER passenger service forming ECS	15 (may be reduced with prior agreement between Network Rail and train operator)
From Hull (Hull Trains)	30 20 for arrivals during the following hours: Monday-Friday 0700-1000 and 1600-1900 Saturday all day Sunday 1700 – 2100
Grand Central	40* except for: 20 where an ECS forms a passenger service 15 where a passenger service forms ECS * May be reduced to no less than 20 with prior agreement between Network Rail and Train Operator
Lumo	20* for trains entering passenger service from ECS or for trains leaving passenger service to ECS 42** for passenger service forming passenger service *May be reduced to no less than 15 with prior agreement between Network Rail and Train Operator **May be reduced to no less than 35 with prior agreement between Network Rail and Train Operator

LN101 LONDON KING'S CROSS TO SHAFTHOLME JN

London King's Cross

Planning Restriction

When planning permissive working at King's Cross, a standage allowance must be included in the calculations as per the below:

- All types of services except below – 18m (2m from buffer stops to first train, 6m between trains and 10m signal sighting allowance)
- Class 387 & 717 in Platforms 0,1,3,4,5,7 or 9 – 27m (due to increased signal sighting allowance)

A 5 car 80x and an 8 car 387 or 700 can only platform share in P0.

A 5 car 180 and an 8 car 387 or 700 can only platform share in P1.

Diesel traction cannot be planned into P0.

Station Watering Points	Platforms 0–10
--------------------------------	----------------

Belle Isle Jn

Junction Margins

First Movement	Second Movement	Margin
Between all conflicting crossing movements		2
Up Slow to Line F (movement takes place at Copenhagen Jn)	Canal Tunnels to Down Slow (applies to both DCT and UCT)	2

Planning Note:

The [1] engineering allowance approaching Belle Isle Jn may be moved to approaching King's Cross if it results in a compliant 2 minute margin being achieved between conflicting arriving and departing trains where the arriving train passes Belle Isle Jn first.

Copenhagen Jn

Note: Trains in the Down direction on the North London Incline (NLI) should not normally be shown to stop at Copenhagen Jn. Down trains required to stop on the NLI to wait a path over Copenhagen Jn should be timed to stop at York Way North Jn unless they exceed 630 metres in length. Only trains in excess of 630 metres in length should be timed to stop at Copenhagen Jn. In those circumstances due to signalling constraints the following applies: A Down train on the NLI planned to stop at Copenhagen Jn must arrive a minimum of 5 minutes before the passage of any train on the Down Slow

Junction Margins

First Movement	Second Movement	Margin
Pass from York Way North Jn to Down Slow	Pass from Up Slow to York Way North Jn	3½
Pass from Up Slow to York Way North Jn	Pass Belle Isle Jn on Down Slow	3½

Platform 2 (Signal P438 to Signal P445 in rear) – Up direction	55 SLU / 358 metres
Platform 2 (Signal P438 to clear of Up Fast in rear)	65 SLU / 418 metres
Platform 2 (Signal P445 to Signal P438 in rear) – Down direction	55 SLU / 358 metres
Platform 4 (Signal P449 to Signal P442 in rear) – Down direction	52 SLU / 337 metres* (exclusive of stand-back allowance)
Platform 5 (Signal P443 to Signal P444 in rear) – Down direction	43 SLU / 280 metres* (exclusive of stand-back allowance)
Platform 6 (Signal P433, having crossed to the Up March at Peterborough East Jn) - Down direction	104 SLU / 668 metres (exclusive of stand-back allowance)
Platform 6 (Signal P433, arriving via the Down March) – Down direction	92 SLU / 592 metres (exclusive of stand-back allowance)
Platform 7 (Signal P431 to track circuit 0810, clear of Up March/Two Way Goods)	91 SLU / 585 metres (exclusive of stand-back allowance)
Two Way Goods (Signal P451 to Signal P800 in rear) – Down direction	112 SLU / 716 metres (exclusive of stand-back allowance)
Two Way Goods (Signal P800 to Signal P451 in rear) – Up direction	112 SLU / 716 metres (exclusive of stand-back allowance)
March Independent (Signal P443 to Signal P434 in rear) – Down direction	124 SLU / 796 metres (exclusive of stand-back allowance)
March Independent (Signal P434, clear of Platform 5)	52 SLU / 336 metres (exclusive of stand-back allowance)
March Independent (Signal P434, including Platform 5)	124 SLU / 796 metres (exclusive of stand-back allowance)
March Independent (Signal P434, clear of Platform 4 but not the Down Slow)	61 SLU / 391 metres (exclusive of stand-back allowance)
March Independent (Signal P434, clear of Platform 4 and the Down Slow)	33 SLU / 211 metres (exclusive of stand-back allowance)
March Independent (Signal P434, including Platform 4)	131 SLU / 840 metres (exclusive of stand-back allowance)
* Trains longer than length stated will foul the route into the opposite platform and therefore dwells for over length trains should be kept to the minimum possible. Reoccupation of the opposite platform must be based on trains' departure time from Peterborough if over the length shown.	
Any Down direction train longer than 292m (46 SLUs) in length and planned to stand at Platform 5 will prevent any pass, arrival or departure to/from Platform 6 across Spital Ladder as the overlap beyond Signal P434 will not time out.

To / from King's Cross	10 (may be reduced to 9 by prior agreement with Train Operator)

Planning Restrictions

Arrivals at Platform 4 & 5

For a Down arrival/pass from Holme at Platform 4 or 5 to receive an unregulated/clear run, there must be no planned movements across Spital Junction to or from Platforms 4, 5 or 6 within 2 minutes of a Down train that has already passed Holme, and then not until 1 minute after the Down train has departed Peterborough. If this isn't achievable, refer to Adjustments to Sectional Running Times for details of additional allowances to be applied.

Down Trains

Due to overlap restrictions at the north of the station, approach control allowances are required approaching Platforms 4 and 5, when there is a conflicting move across the north-end ladder (Spital Junction). Therefore, adjustment must be applied approaching Peterborough (see Adjustments to Sectional Running Times).

Newark North Gate

Planning note

All 80X services to/from LN206 will require a minimum 1½ minute stop in the station for power changeover purposes in either direction. Where a station dwell already exists, there is sufficient timing within to undertake the power changeover. All non-stop & ECS services will still require this 1½ mins stop, and it should be denoted an OP stop.

Minimum Turnround		
	7 – Leeds EMU services, but not 2 consecutive	
	10 – DMU/EMU from Leeds, Sheffield, Humberside area, Lincolnshire and Peterborough. Any reduction must be specially agreed	
Planning Restrictions		
a) Trains from the Sheffield direction arriving into Platform 3b will hold the overlap so trains cannot arrive into Platform 1 from the Up Main line/Leeds Line. Trains from the Shaftholme Jn direction can access Platform 1 simultaneously by using the Down Thorne Slow line which will add an extra 1 minute running time. This should be shown in the timetable as Adjustment allowance.		
b) Trains longer than 234m arriving in the Up direction into Platform 3a will foul the block joint in rear and prevent access into Platform 3b until 2 minutes after the train in Platform 3a has departed.		
c) Trains longer than 234m arriving in the Down direction into Platform 8 will foul the block joint in rear and prevent access into Platform 5 until 2 minutes after the train in Platform 8 has departed.		

Doncaster	
d) Trains should not be planned to operate northbound from Platform 3a as there is no north-facing signal at the A end of the platform	
Doncaster West Yard. Electrically hauled trains shunting to or from Doncaster West Yard must be routed to stand behind Signal D1488 or on to the Thorne Lines due to the presence of an OHL Neutral Section

Lincoln Terrace Sidings

Planning note

When entering, the sidings diverge into Siding 1 and Siding 2 beyond Signal SL7821, which is the protecting signal for exiting the sidings. The two sidings then converge again at the far end and extend to a buffer stop, dimensions are as follows:

Siding 1

Signal SL7821 to convergence with Siding 2 at rear – 214m/33 SLUs
Convergence point with Siding 2 at rear to buffer stop – 65m/10 SLUs

Siding 2

Signal SL7821 to convergence with Siding 1 at rear – 209m/33 SLUs
Convergence point with Siding 1 at rear to buffer stop – 65m/10 SLUs

Minimum Turnround	10 trains from Doncaster	
	12 trains from Sheffield, Nottingham, Cleethorpes or Peterborough*	
	15 trains from beyond Sheffield, Nottingham or Peterborough*#	
	13 80X – 30 if shunting via Terrace Sidings between Class 1 journeys	
	8 LNER passenger service forming ECS to Terrace Sidings	
	8 LNER ECS from Terrace Sidings forming passenger service	
	*Does not apply to LNER	
	# May be reduced to a minimum of 12 minutes subject to extended dwell at Nottingham of not less than 5 minutes.	

Lincoln

Planning Note

The lengths of Platforms 3, 4 and 5 are 144m, 144m and 165m respectively. Trains longer than this can still be planned into these platforms as they will draw past the platform signal, however:

- Over-length trains planned into Platform 3 prohibit access to Platforms 1 and 2, the Up Gainsborough Line, access into the Terrace Sidings and the bi-directional Down Gainsborough at the Pelham Street Jn end of the station; or lock Brayford Jn crossovers (and adjacent level crossings) at the East Holmes Jn side, depending on direction of travel.
- Over-length trains planned into Platform 4 prohibit access to the Down Gainsborough Line and Platform 5 at the Pelham Street Jn end of the station, or lock Brayford Jn crossovers (and adjacent level crossings) at the East Holmes Jn side, depending on direction of travel.
- Over-length trains planned into Platform 5 prohibit access to the Down Gainsborough Line and Platform 4 at the Pelham Street Jn end of the station, or lock Brayford Jn crossovers (and adjacent level crossings) at the East Holmes Jn side, depending on direction of travel.

In the case of examples B and C, if the train is routed towards the Spalding Lines, Sincil Bank CCTV barriers need to be lowered for the duration of the train's occupation of the platform; and if the train routed towards the Barnetby Lines, the Pelham Street Jn end of the station will be locked for the duration of the train's occupation.

Battersby

Adjustments to Sectional Running Times

Arriving when earlier train already in the platform	Calling on signal	1/2
-----------------------------------------------------	-------------------	-----

Crossing/Reversing Margin	First arriving train departs second	13 1/2
---------------------------	-------------------------------------	--------

Example:

1 st Train arrive	arr. XX.00
2 nd Train arrive	arr. XX.05
2 nd Train depart	dep. XX.08 1/2
1 st Train depart	dep. XX.13 1/2

Dwell Time

All	5 (minimum required for train reversing and not crossing another service)
-----	---------------------------------------------------------------------------

Restrictions:

- Trains arriving from either direction can only be planned into the platform and NOT directly into the Run Round loop
- Due to the operation of two Ground Frames, any run round must be allowed a minimum of 30 minutes. When the locomotive is moving from the run round loop onto the east end of the train, the driver must be in possession of the token for either the Glaisdale or Nunthorpe section; planners must satisfy themselves that there are no trains moving in either direction on the relevant section

Notes:

- Trains crossing at Battersby occupy the same section of track and platform and must have 5 minutes between consecutive arrivals and departures due to TPWS requirements
- Trains passing do so by utilizing the permissive working on the platform line. Planners must satisfy themselves of the lengths of both trains, and that they both can be accommodated according to the platform length AND the distances quoted below
- Platform and runround loop, stop board to stop board = 175m
- Buffer stops to east end stop board = 325m

Greensfield Junction

Junction Margins

First Movement	Second Movement	Margin
Pass to High Level Bridge Junction	Pass from Park Lane Jn on Greensfield East Line	4
Pass to High Level Bridge Junction	Depart from Greensfield East Line	1½
Pass to Park Lane Jn on Greensfield East Line	Pass from High Level Bridge	3
Pass to Park Lane Jn on Greensfield East Line	Depart from West Curve	2

Restrictions:

- Freights RA6 and above must not be planned to use the curve between Greensfield Junction and High Level Bridge Junction. The above restriction also applies to all movements involving class 67 locomotives
- No allowances or pathing time to be applied between High Level Bridge Junction or Park Lane Junction and Greensfield Junction; an 'A' stop must be applied at Greensfield Junction
- Maximum length of train which can stand at Greensfield Junction on West Curve is 150m
Maximum length of train which can stand at Greensfield Junction on Greensfield East Line is 630m

King Edward Bridge East Junction

Junction Margins

First Movement	Second Movement	Margin
Pass from KEB South/North	Pass to KEB South or KEB North	2½
Pass from KEB South/North	Depart to KEB South or KEB North	2
Pass to KEB North	Pass from KEB South, coming from Up Carlisle	5*
Pass to KEB North	Pass from KEB South, coming from Down ECML	3½
Pass to KEB North	Depart from Gateshead Chord to Greensfield/Park Lane	2

King Edward Bridge East Junction

Pass to KEB South	Pass from KEB North	2½
Pass to KEB South	Depart from South East Curve to Greensfield/Park Lane	2
Arrive from Park Lane Junction/Greensfield Junction #	Pass from KEB South, coming from Up Carlisle	6+
Arrive from Park Lane Junction/Greensfield Junction #	Pass from KEB South, coming from Down ECML	4½
Arrive from Park Lane Junction/Greensfield Junction #	Pass from KEB North	3½
Arrive from Park Lane Junction/Greensfield Junction #	Depart from Gateshead Curve or South East Curve, towards Greensfield Junction	3

*Can be reduced to 3½ minutes provided at least {1} applied between Norwood Junction and King Edward Bridge South Junction

+ Can be reduced to 4 minutes provided at least {1} applied between Norwood Junction and King Edward Bridge South Junction

In order to avoid coming to a stand at King Edward Bridge East Junction, (pathing time) can be added between Park Lane Junction and Greensfield Junction (or an 'A' stop added at Greensfield Junction), provided the train length does not exceed 630m

Restrictions:

- Maximum length of train which can stand at King Edward Bridge East Junction on South East Curve is 95m
 - Maximum length of train which can stand at King Edward Bridge North Junction on South East Curve is 135m
 - Maximum length of train which can stand at King Edward Bridge East Junction on Gateshead Curve is 190m
 - Maximum length of train which can stand at King Edward Bridge South Junction on Gateshead Curve is 195m
 - Maximum length of train which can stand at Greensfield Junction on Greensfield West line is 200m (if coming from High Level Bridge Junction) or 225m (if coming from Park Lane Junction)
 - A down train from Park Lane Junction/Greensfield Junction, coming to a stand at King Edward Bridge East Junction, 'claims' the overlap across the junction. Margins above reflect the resultant timeout
- No allowances to be applied between King Edward Bridge South Junction and King Edward Bridge East Junction, or between King Edward Bridge North Junction and King Edward Bridge East Junction in either direction; an 'A' stop should be inserted when required

Humber Road Junction

Adjustment to Sectional Running times

Movement Up	Reason	Value
Up services to the N.C.B Coal Terminal or Reception Sidings (including RR1,RR7 and ESL)	Approach Control	1

The junction margins for Humber Road Jn are to be replaced with those detailed in the following matrix:

Table 1: Junction Margin Matrix for IMNGHRJ Humber Road Junction (NB: *the matrix continues on the next page*)

There is one train working at the NCB 1, RR1, and RR7 coal loading points

At Reception Sidings, roads 3, 4 and 5 are available for trains arriving at the yard itself. RR1 consists of Roads 1 and 2, and RR7 consists of Roads 6 and 7

ESL is a bi-directionally worked siding line with stop boards. Trains can exit into Immingham Sorting Sidings at the eastern end of ESL

LN756 SCUNTHORPE TRENT JUNCTION TO ROXBY

Scunthorpe Roxby Gullet/Dragonby Sidings

Operating Restriction

Trains running to/from Roxby Gullet/Dragonby Sidings require to be in possession of a Train Staff issued by North Lincoln Junction. A second train cannot proceed along the branch to Roxby Gullet/Dragonby Sidings until the first train has completed its journey on the branch and the Train Staff is surrendered by the driver and returned to North Lincoln Junction, to be re-issued to the second train. A minimum of 30 minutes for Dragonby services and a minimum of 45 minutes for Roxby Gullet services should be allowed for this to take place before the second train can proceed on the branch.

This also applies to trains returning from Roxby Gullet/Dragonby Sidings to North Lincoln Junction.

Whitehall Road Ground Frame

Planning Note

Services using Whitehall Road Sidings will need to use the Up Huddersfield at Whitehall Ground Frame (Signal L3625) for 45 minutes. This is shown as a stop at Whitehall Ground Frame (Signal L3625)

For an Arrival

1. Train clears Signal L3625; this is the arrival time at Whitehall Ground Frame
2. Train propels into Whitehall Road Sidings, leaving half the wagons on one of the sidings. Note that the front of the train is still occupying Line F/Up Huddersfield
3. Driver seeks permission from signaller and draws forward so the front half of the train is clear of L3625.
4. Train then propels into Whitehall Road Siding to use the other siding. This is the departure time at Whitehall Ground Frame.

Whitehall Road Ground Frame

For a Departure

1. The loco and the front half of the train draws onto the Up Huddersfield behind L3625. This will be the arrival time at Whitehall Ground Frame
2. The service propels back into Whitehall Road Siding and couples to the rear part of the train and carries out a brake test.
3. The train then passes Signal L3625, this is the departure time at Whitehall Ground Frame

This is the normal Method of Working for trains longer than one of the two sidings and is subject to change.

* May be reduced by one minute for trains that have at least 1 minute pathing time between Whitehall and Leeds West Junctions or Neville Hill West Junction and Leeds

West End Line and Platform Preferred Usage

Trains should where possible use the following platforms

LNER turnrounds	Arrive C Line Depart D Line	Platform 6 or 8
CrossCountry Trains Eastbound	Arrive C line	Platform 9 or 11
CrossCountry Trains Westbound	Depart E line	Platform 11 or 12
Through Transpennine Express Eastbound	Arrive E line	Platform 15
Through Transpennine Express Westbound	Depart F line	Platform 16
Leeds NW/Harrogate lines	Arrive A line Depart B line	Platforms 0 – 5
Calderdale/Doncaster lines turnrounds	Arrive C line Depart D line	Platforms 10/11A/12A
Huddersfield	Arrive E line Depart F line	Platforms 12A/13/17
Normanton lines turnrounds	Arrive E line Arrive F line Depart F line	Platform 12A/13 or Platform 17

Platform Re-occupation

3

Restrictions:

Trains from the West via the Through Road, planned to stop in Platform 12CD must not exceed 2x3 car class 185s (143m).

LNER services not to be planned in Platforms 15 and 16 as services exceed platform length

Leeds

Trains required to stand on through-platforms for longer than 45 minutes to be discussed with and agreed by Network Rail Timetable Production Team

LNER Class 80x units that are required to attach or detach should not be planned into Platform 9

Planning Note:

Northern and LNER require a 10 min journey time from Neville Hill TMD to Leeds. This can be applied as additional adjustment time before Neville Hill West Junction.

When a train is showing as occupying Platform 1 or 1a, then the non-preferred route for arrival into Platform 2 needs to be used

*Can be reduced by one minute if {1} added approaching Scarborough

Scarborough	
Minimum Reversal	5 DMU
Minimum Turnround	
From Hull or York	10
From points beyond Hull or Leeds	20**
** This may be reduced to a minimum of 10 minutes by the number of minutes of additional station dwell at Hull, Bridlington, or York, of the incoming service	
Train Watering Points	Scarborough station. Both the platform line on which the train is standing and the adjacent platform line from which the watering will take place must be blocked whilst the operation takes place
Restriction: Platform 5 is barred to classes 153 156 185 150 155	
Excursion Sidings. Trains arrive into platform 1, then propel into the Excursion Sidings, then run-round, propelling back into platform 1 before departure. The Excursion Sidings can accommodate a second train, but this can only take place after the first train has completed a run round; therefore can only leave platform 1, 30 minutes after the first. The second train can only commence a run round after the first train has returned to platform 1; planners must satisfy themselves there is adequate time between the first train arriving platform 1, and the second train moving to that platform. All such moves to be fully timed

Hunmanby

Junction Margins

First Movement	Second Movement	Margin
Arrive/pass from Bridlington	Depart to Bridlington	1

Restriction:

Up train on Up line – Additional requirements associated with train lengths.

If it is necessary for a train with a length of more than 450 yards (420 metres) to pass over the crossing in the Up direction on the Up Bridlington line, the crossing must be under local control and the attendant advised in sufficient time before the train approaches the crossing

Reason for restriction:-

Signal SR124 at the west end of Hunmanby Station is designed not to clear to a proceed aspect until a train has come to a stand at it. The design of the crossing means there is a possibility that the barriers will raise, and the lights extinguish before a train with a length of more than 450 yards (420 metres) has passed clear of the crossing. Therefore, when such trains are planned to run over this route, arrangements must be made in advance for the crossing to be placed under local control

Arrive Platform 5 from Skipton	Arrive Platform 3 from Bradford Forster Square 80x 9/10car	Simultaneous

Due to the positioning of Stop Boards, the following apply to LNER trains running to/from Bradford Forster Square.

- Passenger trains towards Leeds formed of Class 91 + nine Mark IV stop beyond signal L3966 when calling therefore no conflicting train movements should be planned through Shipley East Jn and Dockfield Jn. Platform 3W cannot be used as a workaround for this, Platform 3x must be used for Class 91+ nine Mark IV. Additional detail and the junction margin can be found on the Dockfield Jn entry.
- Trains towards Leeds formed of 9 or 10 car Class 80X will block Shipley South Jn while calling. See Junction Margins.

5.4.1 Loop Lengths

The table below shows the maximum length of train that may use each of the loops at the following locations. All lengths are in SLU (Standard Length Unit – an SLU measures 21 feet) and metres. All lengths are measured from the signal at the exit of the loop to the block joint in rear unless otherwise stated. Check Sectional Appendix for locations where standage is not quoted.

LN101 LONDON KING'S CROSS TO SHAFTHOLME JUNCTION			
LOCATION	DIRECTION	USABLE LENGTH SLU/METRES	NOTES
Claypole Up Passenger Loop	Up	92 / 588	
Claypole Down Passenger Loop	Down	113 / 723	In Down directions, trains in excess of 350 yards (50 SLU) in length are only permitted to stand for a maximum of 15 minutes
Newark Goods Loop	Up/Down	76 / 486	Bi-directional

5.5 Timing Allowances

All allowances shown are in minutes.

LH/HST/22x/80X	Refers to non-freight locomotive hauled trains and all trains capable of running over 100 mph. Performance allowance does not apply to empty coaching stock moves and freight services
MU/LL	Refers to all forms of multiple unit, whether diesel or electric as well as to light locomotives, not capable of running at over 100 mph. Performance allowance does not apply to light locomotives
CI 4	Refers to locomotive hauled Class 4 freight trains
CI 6	Refers to locomotive hauled Class 6 freight trains

~~All allowances are indicative for the Final Principal Rules and are subject to change.~~

SX Daytime allowances apply at all times except where specified differently in Sections 5.5.2, 5.5.3, 5.5.4, 5.5.5 and 5.5.6

E refers to engineering allowance

P refers to performance allowances

5.5.1 SX Daytime (See routes for applicable times)

On Monday different allowances apply on some routes until the end of the 'Sunday' allowances at the times specified in the tables below. Please refer to Section 5.5.4 for the 'Sunday' allowances section to identify the routes to which those allowances apply.

Church Fenton – Colton Jn	E	3	3	3	Refer to EAS Section 4 for applicable times. To be coordinated with Colton Jn – York. One allowance only between Church Fenton and York.

5.5.5 Sunday Daytime (See routes for applicable times)

SX daytime allowances apply to those routes excluded from this section

LN105 MOORGATE TO FINSBURY PARK JUNCTION					
Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Up – Sundays					
Approach Moorgate	E		1		

LN170 WERRINGTON JUNCTION TO FLYOVER EAST JUNCTION (VIA LINCOLN)					
Timing Section	Type	LH HST 80X 22X	MU LL	Freight	Remarks
Down – Sundays					
Approach Spalding	E	1	1	1	Terminating trains only
Approach Sleaford South Jn	E	1	1	1	
Approach Pelham Street Jn	E	1	1	1	Does not apply to any movements from Terrace Sidings
Approach Gainsborough Trent Jn	E	1	1	1	Trains to Doncaster only
Approach Bessacarr Junction	E	1	1	1	
Up –Sundays					
Approach Gainsborough Trent Jn	E	1	1	1	
Approach Lincoln Pyewipe Jn	P		1		Trains terminating Lincoln
	E	1	1	1	
Approach Sleaford North Jn	E	1	1	1	
Approach Spalding	E	1	1	1	
Approach Glinton Junction	E	1	1	1	

LN185 ALLINGTON WEST JN TO SKEGNESS					
Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Down – Sundays					
Approach Skegness	E	1	1	1	
Up – Sundays					
Approach Sleaford	E	1	1	1	Trains from Boston direction

LN200 WRAWBY JN TO PELHAM STREET JN

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Down – Sundays					
Approach Pelham Street Junction	E	1	1	1	Does not apply to any movements from Terrace Sidings
	P		1		EMR services only
Up – Sundays					
Approach Wrawby Jn	E	1	1	1	

LN206 NEWARK FLAT CROSSING (INCLUSIVE) TO WEST HOLMES JUNCTION

Timing Section	Type	LH HST 80X 22X	MU LL	Freight	Remarks
Down – Sundays					
Approach Boultham Jn	E	1	1	1	
Up – Sundays					
Approach Newark Crossing East Jn	E	1	1	1	
Approach Newark Crossing East Jn	P		1		EMR services only

LN627 NORTHALLERTON LONGLANDS JN TO NEWCASTLE EAST JN VIA THE COAST

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Up – Sundays					
Approach Sunderland	E		1		All Northern and TWM terminating services only

LN628 SOUTH HYLTON TO SUNDERLAND SOUTH JUNCTION

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Up – Sundays					
Approach South Hylton	E		1		

LN646 NORTON-ON-TEES SOUTH TO FERRYHILL SOUTH JUNCTION

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Down – Sundays					
Approach Ferryhill South Junction	E	2	2	2	

LN736 CLEETHORPES TO NUNNERY MAIN LINE JN VIA RETFORD

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Down – Sundays					
Approach Retford	E	2	2	2	
Approach Worksop	P		1		
Approach Nunnery Main Line Jn	E	1	1	1	
	P		1		
Up – Sundays					
Approach Worksop	E	2	2	2	Terminating trains only
	P		½		Terminating trains only
Approach Retford	E	2	2	2	Terminating trains only
	P		2		Terminating trains only
Approach Clarborough Jn	E	2	2	2	
Approach Gainsborough Central	P		1		Terminating trains only
Approach Marsh Jn/Grimsby Town	E	2	1	2	
	P		2		Nil for trains from Barton on Humber
Approach Cleethorpes	P		2*		*For arrivals into Cleethorpes for services from Barton-on-Humber, the value of 1 minute performance should be presentable as either <1> before or as public timetable differential in Cleethorpes arrival.

LN752 WRAWBY JN TO MARSHGATE JN

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Down – Sundays					
Approach Scunthorpe Foreign Ore Branch Jn	E	1	1	1	
Approach Thorne Jn	E	1		1	
Approach Doncaster	E	1	1	1	
	P	3	2*		*1 minute for trains starting at Goole or Scunthorpe
Up – Sundays					
Approach Scunthorpe	P		1		Terminating trains only
	E	1	1*	1	*Terminating trains Only
Approach Wrawby Jn	E	1		1	

LN758 BRANCLIFFE EAST JUNCTION TO KIRK SANDALL JUNCTION

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Down – Sundays					
Approach St Catherines Jn	E	15	15	15	Applies only to the first train on the route.
Up – Sundays					
Approach Brancliffe Jn	E	15	15	15	Applies only to the first train on the route.

LN766 BENTLEY JUNCTION TO HEXTHORPE JUNCTION (DONCASTER AVOIDING LINE)

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Down – Sundays					
Approach Hexthorpe Junction	E	1	1	1	
Up – Sundays					
Approach Bentley Junction	E	1	1	1	

LN804 TAPTON JN TO GASCOIGNE WOOD JN VIA SHEFFIELD

Timing Section	Type	LH HST CI 4 22X	MU LL	CI 6	Remarks
Down – Sundays					
Approach Dore Station Jn	E	1*	1*	1*	*Can alternatively be applied approaching Sheffield if required
Approach Milford Jn	E	3 [^]	3	2	[^] [1] applies to CrossCountry ECS from Crofton Depot via Pontefract Monkhill
Up – Sundays					
Approach Pontefract Baghill/Ferrybridge North Jn	E	2**	3	2	** [1] applies to CrossCountry ECS to Crofton Depot via Pontefract Monkhill
Approach Moorthorpe/Moorthorpe Signal L6586	E	3	3	3	
Approach Wincobank Jn	P	1 ^{**}	1*		*Can be applied flexibly between Aldwarke and Nunnery Main Line Junctions if required *Can be removed from CrossCountry and Northern services if the arrival at Sheffield is advertised 1 minute later to the public
Approach Nunnery Main Line Jn	E	1	1	1	

LN806 TAPTON JUNCTION TO MASBOROUGH JUNCTION VIA 'OLD ROAD'

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Down – Sundays					
Approach Masborough Junction	E	2	2	2	
Up – Sundays					
Approach Beighton Junction	E	2	2	2	

LN826 DONCASTER SOUTH YORKSHIRE JUNCTION TO SWINTON

Timing Section	Type	LH HST CI 4 22X	MU LL	CI 6	Remarks
Up – Sundays					
Approach Doncaster	E	1	1	1	*Can be applied flexibly between Swinton Junction and Doncaster if required #Nil for East Midlands services.
	P	1**	1*		

LN842 THORPE MARSH JUNCTION TO ADWICK JUNCTION

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Down – Sundays					
Approach Applehurst Junction	E	3	3	3	

LN852 HOLBECK JUNCTION TO BRADFORD INTERCHANGE

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Up – Sundays					
Approach Holbeck Junction	P		2*		* 1 minute for trains from Halifax, Hebden Bridge or Huddersfield.

LN860 DIGGLE JN TO COPLEY HILL EAST JN

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Down – Sundays					
Approach Huddersfield	E		1		Terminating trains only
	P		1		Terminating trains only
Up – Sundays					
Approach Huddersfield/Marsden	E		1		Terminating trains only
Approach Heaton Lodge Jn	P		1		Stopping services from Leeds direction

LN862 BARNSELY STATION JUNCTION TO HUDDERSFIELD

Timing Section	Type	LH HST CI 4 22X	MU LL	CI 6	Remarks
Down – Sundays					
Approach Penistone	P		1		
Approach Huddersfield	E	1	1		
	P		½		
Up – Sundays					
Approach Barnsley	E	1	1		
	P		1		

LN868 WINCOBANK JUNCTION TO HORBURY JUNCTION VIA BARNSELY

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Down – Sundays					
Approach Barnsley	E	1		1	
Up – Sundays					
Approach Barnsley	P		1		Trains starting from Leeds only
Approach Wincobank Junction	E	1		1	

LN872 ALTOFTS JUNCTION TO LEEDS WEST JUNCTION

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Down – Sundays					
Approach Engine Shed Junction & Holbeck Depot Junction	E	2	2*	2	Approaching Stourton for trains that terminate or call * 1 minute for trains from Knottingley direction
	P		2		

LN882 WAKEFIELD KIRKGATE WEST JUNCTION TO GOOLE POTTERS GRANGE JUNCTION

Timing Section	Type	LH HST 22X	MU LL	Freight	Remarks
Down – Sundays					
Approach Pontefract	E		1*		* Trains terminating from Wakefield direction
	P		1*		* Trains terminating from Wakefield direction
Approach Knottingley	E	1	1	1	
	P		1		
Approach Goole	P		2		
Up – Sundays					
Approach Knottingley	P		1		
Approach Wakefield Kirkgate	E		1		
	P		1		

LN912 THORNE JUNCTION TO GILBERDYKE JUNCTION

Timing Section	Type	LH HST CI 4 22X	MU LL	CI 6	Remarks
Down – Sundays					
Approaching Gilberdyke	P	1	1		
Approach Goole	P		1		Terminating trains only

LN914 HULL (PARAGON) TO SEAMER WEST JN

Timing Section	Type	LH HST CI 4 22X	MU LL	CI 6	Remarks
Down – Sundays					
Approach Bridlington	E	2	2		Terminating trains only
	P		1		
Approach Seamer	E	2	2*		* Does not apply to trains starting from Filey and continuing to York or beyond
Up – Sundays					
Approach Bridlington	P		1		
Approach Hull	E	2	2*		* 1 minute for trains starting from Beverley
	P		1		

5.5.6 Sunday Nighttime (See routes for applicable times)

SX daytime allowances apply to those routes excluded from this section

LN101 LONDON KING'S CROSS TO SHAFTHOLME JN					
Timing Section	Type	LH HST 80X CI 4 22X	MU LL	CI 6, 7 & 8	Remarks
<p>Trains should not be timed on the Fast Lines between Belle Isle Jn and Digswell Jn, or Woolmer Green Jn and Hitchin (both directions).</p> <p>The allowances shown in this table replace any shown under daytime allowances for this line of route.</p> <p>Refer to EAS Section 4 for applicable times.</p>					
Down – Sunday night/Monday morning					
Approach Hitchin	E	3	3	3	
Approach Huntingdon (FL)	E	7	7	7	
Approach Fletton	E	3	3	3	
Approach Doncaster	E	5	5	5	3 applies for trains timed on SL or GL
Up – Sunday night/Monday morning					
Approach Loversall Carr Jn	E	5	5	5	3 applies for trains timed on SL or GL
Approach Cadwell	E	3	3	3	Applies to crossing moves Up Slow to Up Fast only.
Approach Hitchin (SL)	E	3	3	3	
Approach Hitchin (FL)	E	10	10	10	Does not apply to trains that have crossed Up Slow to Up Fast at Cadwell
Approach Belle Isle Jn	E	3*	3*	3*	Services routed towards the North London Lines (LN115) are to receive this allowance approaching Copenhagen Jn. *This does not apply to ECS moves to King's Cross originating at Bounds Green, Hornsey EMUD, Ferme Park Sidings or Bowes Park Reversing Sidings.

LN600 SHAFTHOLME JN TO RESTON GSP

Timing Section	Type	LH HST 80X CI 4 22X	MU LL	CI 6, 7 & 8	Remarks
Additional Engineering Allowance Down and Up – Sunday night/Monday morning					
Colton Jn – York	E	3	3	3	Refer to EAS Section 4 for applicable times. (A)
York – Skelton Jn	E	2	2	2	All trains to be timed over same line. Refer to EAS Section 4 for applicable times.
Skelton Jn – Longlands Jn	E	2	2	2	All trains to be timed to run Slow line]. Refer to EAS Section 4 for applicable times.
Longlands Jn – Darlington South Jn	E	15	15	15	Refer to EAS Section 4 for applicable times. (B)

Shipley East Jn – Skipton	E	20	20	20	Refer to EAS Section 4 for applicable times. (A)
Skipton – Hellifield	E	20	20	20	Refer to EAS Section 4 for applicable times. (A)
(A) Only one allowance per train between Kirkstall Jn and Hellifield, to be co-ordinated with NW&C allowances. Refer to Section 5.5.6 of the NW&C Timetable Planning Rules					

6 Timetabling Considerations

6.1 Advertised and Working Times

It is not permissible for trains to be specified to be advertised to arrive before or depart after the booked times stated in the working timetable (WTT).

It is permissible for trains to be specified to be advertised to depart before the booked times stated in the working timetable in the following circumstances;

- (i) Where the WTT departure time is delayed to achieve the required headway behind a preceding train or margin following a conflicting move.
- (ii) As an aid to punctual departure where this practice has been agreed between the Train Operator and Network Rail.

By agreement between the Train Operator and Network Rail, trains may be specified to be advertised to arrive after the booked times stated in the WTT. This agreement is used instead of engineering/performance allowances.

6.2 Timing of Light Locomotives

It is a general principle that all light locomotive movements will be timed. Any exceptions to this must be agreed by the appropriate Operational Planning Manager.
