## NOTES

1. Where no separate time is shown for arrival and departure, the time indicated is the departure time.

2. Trains must leave at the advertised times whenever practicable. Where the advertised departure times of passenger trains are slightly earlier than those shown in the Working Timetable, the former must be used in all quotations to the public.
3. A half-minute is allowed for station duties unless separate arrival and departure times are provided or a different time is specified by letter indications.
4. Figures in light type indicate the time at which a train should pass a Station, Signal Box or Junction point.

#### **FOUR-CHARACTER TRAIN IDENTIFICATION SYSTEM**

The number inserted in each column above the train title is the description allocated under the four character train identification system and provides the following information:-

1. The first figure indicates the classification of the train.
2. The second character indicates the destination area or Zone (see also below).
3. The third and fourth figures represent the individual number of the train.

- X** In the second character indicates trains conveying out-of-gauge or other exceptional load.
- Z** In the second character indicates excursion, military, Royal or other special train.

#### **LIGHT LOCOMOTIVE AND EMPTY COACHING STOCK MOVEMENTS**

These will normally be allocated the individual number of the trains they are "to work" or "after working".

## EXPLANATION OF ABBREVIATIONS, NOTES AND SYMBOLS

### TIMING LOADS IN WORKING TIMETABLES

The timing load at the head of a unit operated train indicates the type of unit on which the timing of the train is based.

The timing load for locomotive hauled trains indicates the maximum speed of the train , i.e. **100, 75, 95** etc. the class of loco traction, **47 , 86,** or **90** etc. followed by the tonnage on which the timing of the train is based.

### TRAIN BRAKING

All passenger and parcels trains will normally be air braked.

### DAYS OF OPERATION

- O** The addition of the letter "O" indicates that the train will run on that day or those days only.
- X** The addition of the letter "X" indicates that the train will **not** run on that day or those days.
- BHX** Does not run on designated Bank/Public Holidays.

The days run normally appear between square brackets, e.g. [SX]. In the case of overnight trains, the days run may appear between asterisks indicating that the train departure was on the previous day, e.g. \*MX\*. In this example they indicate that the main train starting point is SX but all the times in that particular column are MX.

### OPERATING CHARACTERISTICS

- C or +** Must only convey vehicles authorised to run at 100 mph or more.
- D** Driver Only Operation applies for trains consisting of coaching stock vehicles.
