CHL/118	09/10/2024	NR/L2/TRK/2102	Track	1) Phrasing of the standard is ambiguous which makes abiding by it difficult. CHL/158	04/02/2025	NR/GN/CIV/200 - Station Design Manual [Issue 10]	Buildings & Architecture	Guidance contradicts with the requirements of the Persons of Reduced Mobility National Technical Specification Notice (PRM NTSN (2021)).	Grid sizes are mandated by BS EN 12464, not 'recommended' as stated, and the guidance should include that 'if the ratio of the longer to the shorter side is 2 or more then becomes the shorter dimension of the area as stated in BS EN 12464 parts 1 and 2. The implications of this are significant as for a 100 m long platform (4 m wide), then the grid size would be 5 m incorrectly using d = 100 m instead of the maximum grid size being 0.4 m using d = 4 m. The final paragraph of 6.2.3 states: For platforms, it is recommended that illuminance measurements should be taken using a 1.0 m x 1.0 m grid across a platform and along its length. This is contradictory to the earlier NR guidance on grid sizes and is non-compliant with the requirements of the PRM NTSN as the platform width would be required to be at least 10 m wide for a 1.0 m grid size. CHL/182	25/03/2025	NR/L2/RSE/100 - Network Rail Assurance Panel Processes [Issue 9]	Systems Engineering	Reviewing above the standards it is implicit that projects that do not make changes to railway system compatibility, operation or maintenance are not required to make an NRAP application, no not require SRP review and sit outside of the CSM regulations.	Better definition of 'change' as 'Any modification(s) to the railway system functionality or compatibility following temporary or permanent EIS.' Clarification that 'Manging, maintaining and integrating with existing system interfaces is not a system change.'	In Progress
CHL/183	27/03/2025	NR/L2/TEL/30185 - Principles for Operational Telecommunications, Signalling and E&P Sub-Access Internet Protocol Networks [Issue 1]	Telecommunications	Clauses 12d, 12e and 12f make reference to a NRT (now DDaT) central system for the remote management of devices. Currently, this central system is not available as an offering from DDaT.	The requirement to manage devices on the DDaT network is the correct approach and should be implemented however, as the central management system is not currently in place and it is unclear when this will be introduced, we do not believe it reasonable to have a mandated clause that cannot be complied with. CHL/184	31/03/2025	NR/L2/OHS/00120 - Drugs and Alcohol Standard [Issue 8]	Health and Wellbeing	Issue 8 introduces sweeping restrictions on medications by redefining "legitimate medical reason" to exclude all unlicensed treatments or medications.	A retraction & thorough review - incorporating subject matter experts, medical, legal, and employee insights.	In Progress
CHL/185	31/03/2025	NR/L2/OHS/00120 - Drugs and Alcohol Standard [Issue 8]	Health and Wellbeing	Conflict with the Equality Act (2010) arising from the "legitimate medical reason" definition and blanket bans described within the standard, as well as planned suspensions from duty with predicable non-negative test results where impairment has already been assessed and the more general poor wording with unclear means of monitoring for compliance.	The update is withdrawn, redrafted with the support of suitable subject matter experts to reduce the risk of discrimination, smooth non-negative test result management with clear English clauses and controls. CHL/188	02/04/2025	NR/L2/TRK/2102 - Design and Construction of Track [Issue 13]	Track	Challenge in line with MVP	Remove the requirements of this section for horizontal alignment requirements for new construction or change from amber to green clauses.	In Progress
CHL/189	02/04/2025	NR/L2/TRK/2102 - Design and Construction of Track [Issue 13]	Track	Challenge in line with PACE	Change the definition of new construction to "construction of a new railway where no railway has previously existed. The provision of additional track(s) alongside an existing railway shall not be considered as new construction. The reinstatement of track(s) on a previously abandoned or mothballed formation shall not be considered as new construction". Current definition also includes the term abandoned formation. When reinstating track(s) on a mothballed route, it may not be possible or reasonable to comply with some of the new requirements of section 7, particularly horizontal alignment requirements (section 7.2) and the stiffness of the track system (section 7.7) which are more onerous than the requirements for renewals. CHL/190	02/04/2025	NR/L2/TRK/2102 - Design and Construction of Track [Issue 13]	Track	Relaxation of requirements in line with SPEED principles.	Relax the 60mph maximum speed for jointed rails less than 60ft.	In Progress
CHL/191	02/04/2025	NR/L2/TRK/2102 - Design and Construction of Track [Issue 13]	Track	Recent changes to the rule book allow for the provision of 'A boards' where there are permissible speed changes.	As a consequence, the infrastructure in front of the speed board may be subjected to higher speeds than currently designed and signed for and the attainable speed in front of the speed board may be higher than at present. Requirements and / or guidance are required for how this is managed in inspection, maintenance and design in order to realise these performance opportunities. Alternatively/in addition we could try can prove that the increased is attainable speed is negligible in terms of its effect on infrastructure and therefore no changes to inspection or design requirements are required however, this is likely to be untrue the longer the train is. CHL/192	02/04/2025	NR/L2/TRK/2102 - Design and Construction of Track [Issue 13]	Track	Simplify the process for converting from mph to kph associated with ETCS introduction	Update 2102 and revise / derogate against 5021 and the NTSN INF to say that even an exceedance of the geometry limits or limits on components occurs as a result of the conversion, that this is acceptable. Create a new SSD section which shows straight excavation of UTX (no benching / sloped sides).	In Progress

Normal grade 260 R to be used.	In Progress
